(2) Introduce span gases and set instrument gains. In order to avoid errors, span and calibrate at the same flow rates used to analyze the test sample. Span gases should have concentrations equal to 75 to 100 percent of full scale. If gain has shifted significantly on the analyzers, check the calibrations. Show actual concentrations on chart.

(3) Check zeros; repeat the procedure in paragraphs (a) (1) and (2) of this section if required.

(4) Check flow rates and pressures.

(5) Measure: THC CH_4 (non-methane option), CO, CO_2 and NOx concentrations of samples.

(6) Check zero and span points. If difference is greater than 2 percent of full scale, repeat the procedure in paragraphs (a)(1) through (5) of this section.

(b) For diesel fueled vehicles, follow procedures for gasoline fueled vehicles except THC.

(1) Zero HFID analyzer and obtain a stable zero reading.

(2) Introduce span gas and set instrument gains. Span gas should have concentration equal to 75 to 100 percent of full scale.

(3) Check zero as in paragraph (b)(1) of this section.

(4) Introduction of zero and span gas into the analyzer can be accomplished by either of the following methods:

(i) Close heated valve in THC sample (see Figures B82–3 or B82–4), and allow gases to enter HFID. Extreme care should be taken not to introduce gases under high pressure.

(ii) Connect zero and span line directly to THC sample probe and introduce gases at a flow rate between 190 percent and 210 percent of the HFID flow rate (see Figures B82–3A or B82–4A). Excess flow must be allowed to exit probe inlet.

Note.—In order to minimize errors, HFID flow rate and pressure during zero and span (and background bag reading) must be exactly the same as that used during testing.

(5) Continuously record (integrate electronically if desired) dilute total hydrocarbon emissions levels during test. Background samples are collected in sample bags and analyzed as in paragraph (b)(4)(i) or (4)(ii) of this section.

(6) Check zero and span as in paragraph (b)(1) through (b)(4)(i) or (4)(ii) of this section. If difference is greater than two percent of full scale, void test and check for HC "hangup" or electronic drift in analyzer.

20. A new § 86.144–83 is proposed to read as follows:

§ 86.144–83 Calculations, exhaust emissions.

The final reported test results shall be computed by use of the following formula:

(a) For light-duty vehicles and light-duty trucks:

$$Y_{wm} = 0.43[(Y_{ct}+Y_s)/(D_{ct}+D_s)] + 0.57[(Y_{ht}+Y_s)/(D_{ht}+D_s)]$$

Where:

Y_{wm} = Weighted mass emissions of each pollutant, e.g., total HC or NMHC, CO, CO_2, or NO_x, in grams per vehicle mile.

Y_{ct} = Mass emissions as calculated from the "transient" phase of the cold start test, in grams per test phase.

Y_{ht} = Mass emissions as calculated from the "transient" phase of the hot start test, in grams per test phase.

Y_s = Mass emissions as calculated from the "stabilized" phase of the cold start test, in grams per test phase.

D_{ct} = The measured driving distance from the "transient" phase of cold start test, in miles.

D_{ht} = The measured driving distance from the "transient" phase of the hot start test, in miles.

D_s = The measured driving distance from the "stabilized" phase of the cold start test, in miles.

(b) The mass of each pollutant for each phase of both the cold start test and the hot start test is determined from the following:

(1)(i) Total Hydrocarbon mass:

$$THC_{mass} = V_{mix} \times Density_{THC} \times (THC_{conc}/1{,}000{,}000)$$

(ii) Non-methane Hydrocarbon mass:

$$NMHC_{mass} = (THC_{mass}) - (CH_{4\ mass}) - (THC_{mass}) - (V_{mix} \times Density_{CH_4} \times (CH_{4\ conc}/1{,}000{,}000))$$

(2) Oxides of nitrogen mass:

$$Nox_{mass} = V_{mix} \times Density_{NOx} \times K_H \times (NO_{x\ conc}/1{,}000{,}000))$$

(3) Carbon monoxide mass:

$$CO_{mass} = V_{mix} \times Density_{CO} \times (CO_{conc}/1{,}000{,}000)$$

(4) Carbon dioxide mass:

$$CO_{2mass} = V_{mix} \times Density_{CO2} \times (CO_{2conc}/100)$$

(c) Meaning of symbols:

(1)(i) THC_{mass} = total hydrocarbon emissions, in grams per test phase.

$Density_{THC}$ = Density of total hydrocarbons is 16.33 g/ft³ (0.5767 kg/m³), assuming an average carbon to hydrogen ratio of 1:1.185, at 68°F (20°C) and 760 mm Hg (101.3 kPa) pressure.

THC_{conc} = Total Hydrocarbon concentration of the dilute exhaust sample corrected for total hydrocarbon background, in ppm carbon equivalent, i.e., equivalent propane X 3.

$THC_{conc} = THC_e - THC_d(1-1/DF)$

(ii) $NMHC_{mass}$ = Total hydrocarbon emissions less methane emissions, in grams per test phase.

Density C_2H_6=Density of methane is 18.89 g/ft³ (0.6671 kg/m) at 68°F (20°C) and 760 mm Hg (101.3 kPa) pressure.

CH_{4conc}=Methane concentration in the dilute exhaust sample corrected for methane background in ppm carbon.

$CH_{4conc}=CH_{4e}-CH_{4d}$ (1-1/DF)

Where

THC_e = Total hydrocarbon concentration of the dilute exhaust sample or, for Diesel vehicles, average total hydrocarbon concentration of the dilute exhaust sample as calculated from the integrated total HC traces, in ppm carbon equivalent.

THC_d=Total Hydrocabon concentration of the dilution air as measured, in ppm carbon equivalent.

CH_{4e}=Methane concentration of the dilute exhaust sample in ppm carbon equivalent.

CH_{4d}=Methane concentration of the dilution air as measured in ppm carbon equivalent.

(2) NOx_{mass}=Oxides of nitrogen emissions, in grams per test phase.

Density $_{NOx}$=Density of oxides of nitrogen in 54.16 g/ft³ (1.913 kg/m³), assuming they are in the form of nitrogen dioxide, at 68°F (20°C) and 760 mm HG (101.3 kPa) pressure.

NO_{xconc}=Oxides of nitrogen concentration of the dilute exhaust sample corrected for background in ppm.

$NO_{xconc}=NO_{xe}-NO_{xd}$ (1-1/DF)

Where:

NO_{xe}=Oxides of nitrogen concentration of the dilute exhaust sample as measured, in ppm. NO_{xd}=Oxides of nitrogen concentration of the dilution air as measured in ppm.

(3) CO_{mass}=Carbon monoxide emissions, in grams per test phase.

Density$_{CO}$=Density of carbon monoxide is 32.97 g/ft³ (1.164 kg/m³) at 68°F (20°C) and 760 mm Hg (101.3 kPA) pressure.

CO_{conc}=Carbon monoxide concentration of the dilure exhaust sample corrected for background, water vapor, and CO_2 extraction, in ppm.

$CO_{conc}=CO_e-CO_d$ (1-1/DF)

Where:

CO_e=Carbon monoxide concentration of the dilute exhaust sample volume corrected for water vapor and carbon dioxide extraction, in ppm. The calculation assumes the carbon to hydrogen ratio of the fuel is 1:1.85.

$CO_e=(1-0.01925\ CO_{2e}-0.000323\ R)\ CO_{em}$

Where:

CO_{em}=Carbon monoxide concentration of the dilute exhaust sample as measured, in ppm.

CO_{2e}=Carbon dioxide concentration of the dilute exhaust sample, in percent.

R=Relative humidity of the dilution air, in percent (see § 86.142(n)).

CO_d=Carbon monoxide concentration of the dilution air corrected for water vapor extraction, in ppm.

$CO_d=(1-0.000323R)\ C)_{dm}$

Where:

CO_{dm}=Carbon monoxide concentration of the dilution air sample as measured, in ppm.

Note.—If a CO instrument which meets the criteria specified in § 86.111 is used and the conditioning column has been deleted, CO_{em} can be substituted directly for CO_e, and CO_{dm} can be substituted directly for CO_d.

(4) CO_{2mass}=Carbon dioxide emissions, in grams per test phase.

Density CO_2=Density of carbon dioxide is 51.85 g/ft³ (1.843 kg/m³) at 68°F (20°C) and 760 mm Hg (101.3 kPa) pressure.

CO_{2conc}=Carbon dioxide concentration of the dilute exhaust sample corrected for background, in percent.

$CO_{2conc}=CO_{2e}-CO_{2d}$ (1-1/DF)

Where:

CO_{2d}=Carbon dioxide concentration of the dilution air as measured, in percent.

(5) $DF=13.4/[CO_{2e}+(HC_e+CO_e)\ 10^{-4}]$

K_H=Humidity correction factor.

$K_H=1/[1-0.0047\ (H-75)]$

for SI units $K_H=1/[1-0.0329\ (H-10.71)]$

Where:

H=Absolute humidity in grains (grams) of water per pound (kilogram) of dry air.

$H=[(43.478)\ R_a\times P_d]/[P_B-(P_d\times R_a/100)]$

for SI Units, $H=[(6.211)R_a\times P_d]/[P_B-(P_d\times R_a/100)]$

R_a=Relative humidity of the ambient air, in percent.

P_d=Saturated vapor pressure, in mm Hg (kPa) at the ambient dry bulb temperature.

P_B=Barometric pressure, in mm Hg (kPa).

V_{mix}=Total dilute exhaust volume in cubic feet per test phase corrected to standard conditions (528°R) (293°K) and 760 mm Hg (101.3 kPa)).

For PDP–CVS, V_{mix} is:

$$V_{mix}=\frac{V_o\times N(P_B\times P_a)\ (528°R)}{(760\ mm\ Hg)\ (T_p)}$$

for SI units,

$$V_{mix}=\frac{V_o\times N(P_B-P_a)\ (293.15°K)}{(101.325\ kPa)\ (T_p)}$$

Where:

V_o=Volume of gas pumped by the positive displacement pump, in cubic feet (m³) per revolution. This volume is dependent on the pressure differential across the positive displacement pump.

N=Number of revolutions of the positive displacement pump diring the test phase while samples are being collected.

P_B=Barometric pressure, in mm Hg (kPa).

P_a=Pressure depression below atmospheric measured at the inlet to the positive displacement pump, in mm Hg (kPa) (during an idle mode).

T_p=Average temperature of dilute exhaust entering positive displacement pump during test, °R(°K).

(d) Example calculation of mass values of exhaust emissions using positive displacement pump:

(1) For the "transient" phase of the cold start test assume the following: V_o=0.29344 ft³/revolution; N=10,485; R=48.0 percent; R_a=48.2 percent; P_B=762 mm Hg; P_d=22.225 mm Hg; P_a=70 mm Hg; T_p=570°R; THC_e=105.8 ppm, carbon equivalent; CH_{4e}=21.2 ppm; NOx_e=11.2 ppm; CO_{em}=306.6 ppm; CO_{2e}=1.43 percent; THC_d=12.1 ppm; CH_{4d}=1.8 ppm; NOx_d=0.8 ppm; CO_{dm}=15.3 ppm; CO_{2d}=0.032 percent; D_{ct}=3.598 miles.

Then:

$V_{mix}=(0.29344)\ (10,485)\ (762-70)\ (528)/(760)\ (570)=2595.0$ ft³ per test phase.

$H=(43.478)\ (48.2)\ (22.225)/[762-(22.225\times 48.2/100]=62$ grains of water per pound of dry air.

$K_H=1/[1-0.0047\ (62-75)]=0.9424$

$CO_e=[1-0.01925\ (1.43)-0.000323\ (48)]\ 306.0=293.4$ ppm

$CO_d=[1-0.000323\ (48)]\ 15.3=15.1$ ppm

$DF=13.4/[1.43+(105.8+293.4)\times 10^{-4}]=9.116$

$THC_{conc}=105.8-12.1\ (1-1/9.116)=95.03$ ppm

$THC_{mass}=(2595.0)\ (16.33)\ (95.03/1,000,000)=4.027$ grams per test phase

$CH_{4conc}=21.2-1.8(1-1/9.116)=19.60$ ppm

$CH_{4mass}=(2595.0)\ (18.89)\ (19.60/1,000,000)=0.961$ grams per test phase

$NMHC_{mass}=4.027-0.961=3.066$ grams per test phase

$NOx_{conc}=11.2-0.8\ (1-1/9.116)=10.49$ ppm

$NOx_{mass}=(2595.0)\ (54.16)\ (10.49/1,000,000)\ (0.9424)=1.389$ grams per test phase

$CO_{conc}=293.4-15.1\ (1-1/9.116)=280.0$ ppm

$CO_{mass}=(2595.0)\ (32.97)\ (280.0/1,000,000)=23.96$ grams per test phase

$CO_{2conc}=1.43-0.032\ (1-1/9.116)=1.402$ percent

$CO_{2mass}=(2595.0)\ (51.85)\ (1.402/100)=1886$ grams per test phase

(2) For the stabilized portion of the cold start test assume that similar calculations resulted in the following:

$THC_{mass}=0.62$ grams per test phase
$NMHC_{mass}=0.50$ grams per test phase
$NOx_{mass}=1.27$ grams per test phase
$CO_{mass}=5.98$ grams per test phase
$CO_{2mass}=2346$ grams per test phase
$D_s=3.902$ miles

(3) For the "transient" portion of the hot start test assume that similar calculations resulted in the following:

$THC_{mass}=0.51$ grams per test phase
$NMHC_{mass}=0.41$ grams per test phase
$NOx_{mass}=1.38$ grams per test phase
$CO_{mass}=5.01$ grams per test phase
$CO_{2mass}=1758$ grams per test phase
$D_{ht}=3.598$ miles

(4) Weighted mass emission results:

$THC_{wm}=0.43\ [(4.027+0.62)/(3.598+3.902)]+0.57\ [(0.51+0.62)/(3.598+3.902)]=0.352$ grams total hydrocarbon per vehicle mile

$NMHC_{wm}=0.43\ [(3.066+0.50)/(3.598+3.902)]+0.57\ [(0.41+0.50)/(3.598+3.902)]=0.274$ grams per vehicle mile

$NOx_{wm}=0.43\ [(1.38+1.27)/(3.598+3.902)]+0.57\ [(1.38+1.27)/(3.598+3.902)]=0.354$ grams per vehicle mile

$CO_{wm}=0.43\ [(23.96+5.98)/(3.598+3.902)+0.57[5.01+5.98)/(3.598+3.902)]=2.55$ grams per vehicle mile

CO_{hwm}=0.43 [(1660+2346)/(3.598+3.902)]+0.57 [(1758+2346)/(3.598+3.902)]=555 grams per vehicle mile.

21. A new § 86.402–83 is proposed to read as follows:

§ 86.402–83 Definitions.

The following definitions apply beginning with the 1983 model year. Section 86.402–78 remains effective.

"Hydrocarbon(s)" (HC) and "total hydrocarbon(s)" (THC) means those substances as determined by a flame ionization detector (FID) as specified in: (1) § 86.111–82 for Light-Duty Vehicles and Light-Duty Trucks; (2) § 86.1309–84, § 86.1310–84, § 86.1311–84 for Heavy-Duty Engines; and (3) § 86.511–78 for Motorcycles.

"Non-methane hydrocarbon(s)" (NMHC) means those substances defined as hydrocarbon(s) or total hydrocarbon(s) less that part which is methane.

22. A new § 86.403–83 is proposed to read as follows:

§ 86.403–83 Abbreviations.

The abbreviations used in this subpart have the following meanings in both capital and lowercase:

ASTM—American Society for Testing and Materials.
C—Celsius.
cc—Cubic centimetre(s).
cfh—Cubic feet per hour.
cfm—Cubic feet per minute.
CH_4—Methane.
cm—Centimetre(s).
CO—Carbon monoxide.
CO_2—Carbon dioxide.
Conc—Concentration.
cu.—Cubic.
CVS—Constant volume sampler.
EGR—Exhaust gas recirculation.
EP—End point.
EPA—Environmental Protection Agency.
F—Fahrenheit.
GC—Gas chromatograph.
h—hour.
HC—Hydrocarbon(s).
Hg—Mercury.
H_2O—Water.
in.—Inch(es).
K—Kelvin.
kg—Kilogram(s).
km—Kilometre(s).
kpa—Kilopascal(s).
lb—Pound(s).
m—Metre(s).
mph—Miles per hour.
mm—Millimetre(s).
N_2—Nitrogen.
NMHC—Non-methane hydrocarbon(s).
NOx—Oxides of nitrogen.
No.—Number.
O_2—Oxygen.
Pa—Pascal(s).
Pb—lead.
ppm—Parts per million by volume.
psi—Pounds per square inch.
psig—Pounds per square inch gauge.
R—Rankine.
rpm—Revolutions per minute.
THC—Total hydrocarbon(s).
wt—Weight.
°—Degree(s).
%—Percent.

23. A new § 86.410–83 is proposed to read as follows:

§ 86.410–83 Emission standards for 1983 motorcycles.

(a)(1) Manufacturers of motorcycles may elect either a total hydrocarbons exhaust emission standard or a non-methane hydrocarbons exhaust emission standard. Exhaust emissions from 1983 and later model year motorcycles shall not exceed:

(i) *Total hydrocarbons.* 5.0 grams per vehicle kilometer. *Non-methane hydrocarbons.* 4.75 grams per vehicle kilometer.

(ii) *Carbon monoxide.* 12 grams per vehicle kilometer.

(2) The standards set forth in paragraph (a)(1) of this section refer to the exhaust emitted over driving schedules as set forth in Subpart F and measured and calculated in accordance with those procedures.

(b) No crankcase emissions shall be discharged into the ambient atmosphere from any new motorcycle subject to this subpart.

24. A new § 86.502–83 is proposed to read as follows:

§ 86.502–83 Definitions.

The definitions in § 86.402–78 and § 86.402–83 apply to this subpart.

25. A new § 86.503–83 is proposed to read as follows:

§ 86.503–83 Abbreviations.

The abbreviations in § 86.403–78 and § 86.403–83 apply to this subpart.

26. A new § 86.511–83 is proposed to read as follows:

§ 86.511–83 Exhaust gas analytical system.

(a) *Schematic drawings.* Figure F 83–1 is a schematic drawing of the exhaust gas analytical system. Figure F 83–2 is a schematic drawing of the instrument to measure methane. Beeause various configurations can produce accurate results, exact conformance with either drawing is not required. Additional components such as instruments, valves, solenoids, pumps and switches may be used to provide additional information and coordinate the functions of the component systems.

(b) *Major component description.* The analytical system, Figure F 83–1, consists of a flame ionization detector (FID) for the determination of total hydrocarbons, gas chromatograph (GC) with a flame ionization detector for methane determination (for the non-methane option), non-dispersive infrared analyzers (NDIR) for the determination of carbon monoxide and carbon dioxide, and a chemiluminescence analyzer (CL) for the determination of oxides of nitrogen. The exhaust gas analytical system shall conform to the following requirements:

BILLING CODE 6560-29-M

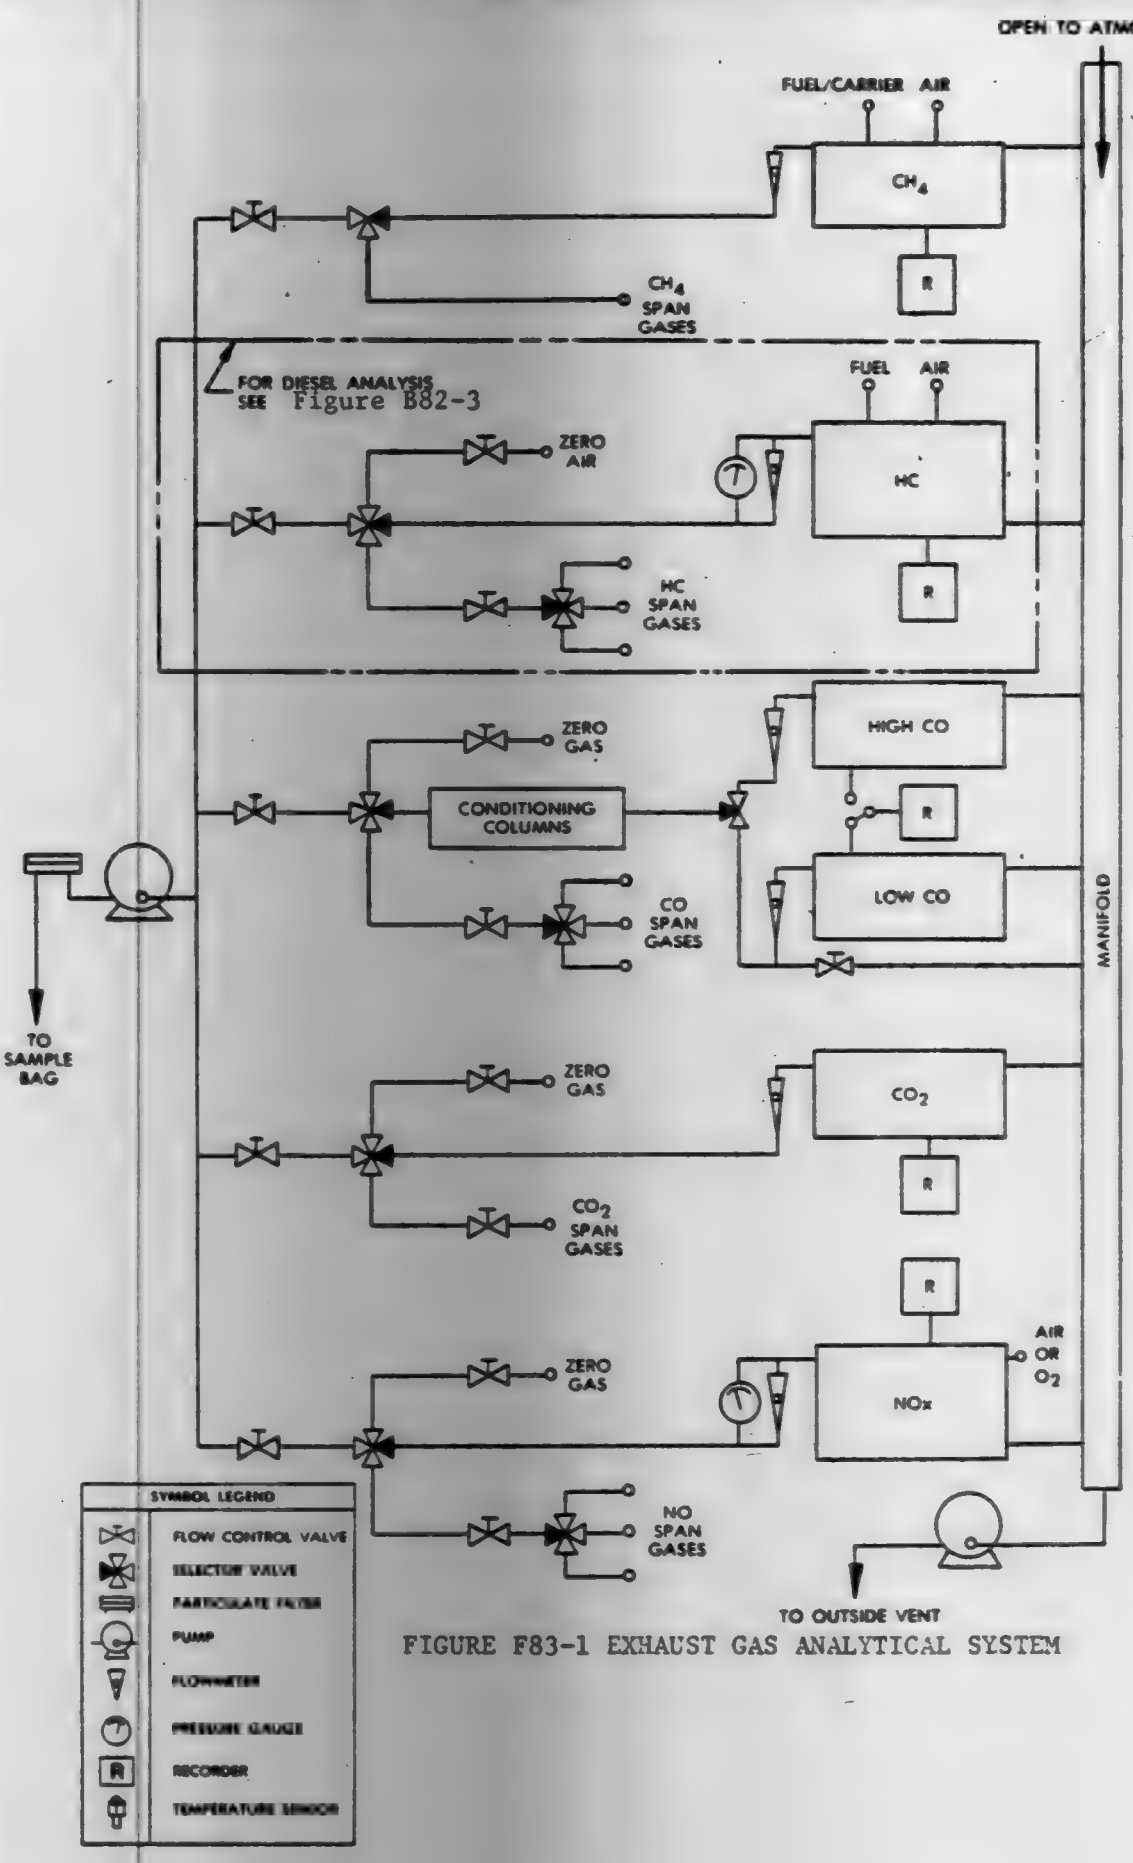

FIGURE F83-1 EXHAUST GAS ANALYTICAL SYSTEM

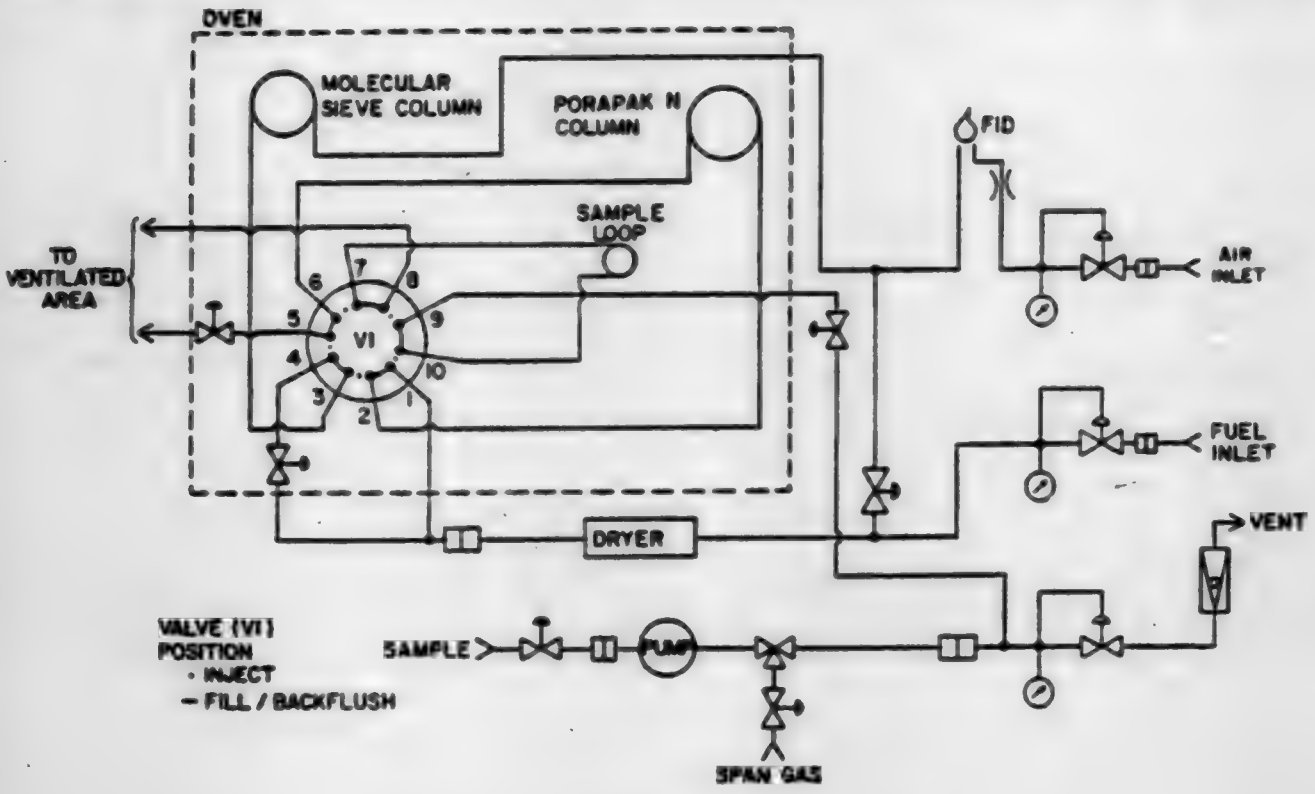

FIGURE F83-2 METHANE ANALYTICAL SYSTEM

BILLING CODE 6560-26-C

(1) The CL requires that the nitrogen dioxide present in the sample be converted to nitric oxide before analysis. Other types of analyzers may be used if shown to yield equivalent results and if approved in advance by the Administrator.

(2) The carbon monoxide (NDIR) analyzer may require a sample conditioning column containing $CaSO_4$, or indicating silica gel to remove water vapor and containing ascarite to remove carbon dioxide from the CO analysis stream.

(i) If CO instruments which are essentially free of CO_2 and water vapor interference are used, the use of the conditioning column may be deleted, see §§ 86.522 and 86.544.

(ii) A CO instrument will be considered to be essentially free of CO_2 and water vapor interference if its response to a mixture of 3 percent CO_2 in N_2 which has been bubbled through water at room temperature produces an equivalent CO response, as measured on the most sensitive CO range, which is less than one percent of full scale CO concentration on ranges above 300 ppm full scale or less than 3 ppm on ranges below 300 ppm full scale, see § 86.522.

(3) The optional methane analyzer requires a conditioning column (dryer) containing silica gel or molecular sieve material (or an equivalent) to remove water and organic contaminants from the carrier gas stream. The conditioning column shall be reconditioned bimonthly or as necessary by observing a visible indicating medium. The methane impurity of the carrier gas shall not exceed 0.5 ppm methane.

(c) *Other analyzers and equipment.* Other types of analyzers and equipment may be used if shown to yield equivalent results and if approved in advance by the Administrator.

27. A new § 86.514–83 is proposed to read as follows:

§ 86.514–83 Analytical gases.

(a) Analyzer gases.

(1) Gases for the CO and CO_2 analyzers shall be single blends of CO and CO_2 respectively using nitrogen as the diluent.

(2) Gases for the total hydrocarbon analyzer shall be single blends of propane using air as the diluent. Gases for calibration of the optional methane analyzer shall be single blends of methane using air as the diluent.

(3) Gases for the NOx analyzer shall be single blends of NO named as NOx, with a maximum NO_2 concentration of five percent of the nominal value, using nitrogen as the diluent.

(4) Fuel for the evaporative emission enclosure FID shall be a blend of 40±2% hydrogen with the balance being helium. The mixture shall contain less than 1 ppm equivalent carbon response. Ninety-eight to 100 percent hydrogen fuel may be used with advance approval by the Administrator.

(5) The allowable zero gas (air or nitrogen) impurity concentrations shall not exceed 1 ppm equivalent carbon response, 1 ppm carbon monoide, 0.04 percent (400 ppm) carbon dioixide and 0.1 ppm nitric oxide.

(6) "Zero grade air" includes artifical "air" consisting of a blend of nitrogen and oxygen with oxygen concentrations between 18 and 21 mole percent.

(7) The use of proportioning and precision blending devices to obtain the required analyzer gas concentration is allowable provided their use has been approved in advance by the Administrator.

(b) Calibration gases shall be traceable to within one percent of NBS gas standards, or other gas standards which have been approved by the Administrator.

(c) Span gases shall be accurate to within two percent of true concentration, where true concentration refers to NBS gas standards, or other gas standards which have been approved by the Administrator.

28. A new § 86.516–83 is proposed to read as follows:

§ 86.516–83 Calibrations, frequency and overview.

(a) Calibrations shall be performed as specified in §§ 86.517 through 86.526.

(b) [Reserved]

(c) At least monthly or after any maintenance which could alter calibration, the following calibrations and checks shall be performed:

(1) Calibrate the total hydrocarbon analyzer, optional methane analyzer, carbon dioxide analyzer, carbon monoxide analyzer, and oxides of nitrogen analyzer.

(2) Calibrate the dynamometer. If the dynamometer receives a weekly performance check (and remains within calibration) the monthly calibration need not be performed.

(d) At least weekly or after any maintenance which could alter calibration, the following calibrations and checks shall be performed:

(1) Check the oxides of nitrogen converter efficiency, and

(2) Perform a CVS system verification.

(3) Run a performance check on the dynamometer. This check may be omitted if the dynamometer has been calibrated within the preceding month.

(e) The CVS positive displacement pump or Critical Flow Venturi shall be calibrated following initial installation, major maintenance or as necessary when indicated by the CVS system verification (described in § 86.119).

(f) Sample conditioning columns, if used in the CO analyzer train, should be checked at a frequency consistent with observed column life or when the indicator of the column packing begins to show deterioration.

29. A new section 86.525–83 is proposed to read as follows:

§ 86.525–83 Methane analyzer calibration.

The methane analyzer shall receive the following initial and periodic calibration:

(a) *Initial and periodic optimization of detector response.* Prior to its introduction into service and at least annually thereafter the FID detector shall be adjusted for optimum methane response. Alternate methods yielding equivalent results may be used if approved in advance by the Administrator.

(1) Follow the manufacturer's instructions for instrument start-up and basic operating adjustment, using the appropriate fuel, carrier, and zero grade air.

(2) Optimize on the most commonly used range. Introduce into the analyzer a methane in air mixture with a methane concentration equal to approximately 90 percent of the most common range.

(3) Select an operating FID fuel flow rate that will give near maximum response and least variation in response with minor variations in fuel flow rate.

(4) To determine the optimum FID air flow rate, use the FID fuel flow setting determined above and vary air flow rate for maximum response.

(5) After the optimum flow conditions have been determined, actual flow rates are measured and recorded for future reference.

(b) *Initial and periodic calibration.* Prior to its introduction into service and at least monthly thereafter the methane analyzer shall be calibrated on all normally used ranges. Use the same flow rates when analyzing samples.

(1) Adjust analyzer to optimum flow conditions as determined above.

(2) Obtain a stable baseline reading using carrier gas.

(3) Calibrate on each normally used operating range with methane in air calibration gases having nominal concentrations of 15, 30, 60 and 90 percent of that range. Additional calibration points may be generated. For each range calibrated, if the deviation from a least-squares best-fit straight line

is two percent or less, or within 0.1 ppm methane of the value of each data point (excluding zero), a linear equation may be used to determine the methane concentration. If the deviation exceeds two percent or 0.1 ppm methane at any data point (whichever is highest), the best fit non-linear equation which represents the data to within two percent (or 0.1 ppm methane) of each point shall be used to determine the concentration. Use methane in air calibration gases having nominal concentrations of 15, 30, 45, 60, 75, and 90 percent of each range for the calibration of non-linear instruments.

(4) A stable baseline must be obtained before and after the methane peak elution. A stable baseline is defined as the time equal to or greater than 25 percent of the methane peak width at half peak height. The methane peak must be resolved from other gases, such as oxygen, nitrogen, and carbon monoxide. Methane concentration shall be determined by peak height measurement or area integration.

30. A new § 86.540–83 is proposed to read as follows:

§ 86.540–83 Exhaust sample analysis.

The following sequence of operations shall be performed in conjunction with each seies of measurements:

(a) Check flowrates and pressures. Adjust if required.

(b) Zero the analyzers and obtain a stable zero reading. Recheck after tests.

(c) Introduce span gases and set instrument gains. In order to avoid errors, span and calibrate at the same flow rates used to analyze the test sample. Span gases should have concentrations equal to 75 to 100 percent of full scale. If gain has shifted significantly on the analyzers, check the calibrations. show actual concentrations on chart.

(d) Check zeros; repeat the procedure in paragraphs (a) through (c) of this section if required.

(e) Check flow rates and pressures.

(f) Measure; THIC, CH_4 (non-methane option), CO, CO_2 and, optionally, NO_x concentrations of samples.

(g) [Reserved]

(h) Check zero and span points. If difference is greater than 2 percent of full scale, repeat the procedure in paragraphs (a) through (g) of this section.

31. A new § 86.544–83 is proposed to read as follows:

§ 86.544–83 Calculations, exhaust emissions.

The final reported test results, with oxides of nitrogen being optional, shall be computed by use of the following formulae:

(a) $Y_{wm} = 0.43\ [(Y_{ct}+Y_s)/(D_{ct}+D_s)] + 0.57\ [(Y_{ht}+Y_s)/(D_{ht}+D_s)]$

Where:

Y_{wm} = Weighted mass emission of each pollutant, e.g., total HC or NMHC, CO, CO_2, or NO_x, in grams per vehicle kilometer.

Y_{ct} = Mass emission as calculated from the "transient" phase of the cold start test, in grams per test phase.

Y_{ht} = Mass emissions as calculated from the "transient" phase of the hot start test, in grams per test phase.

Y_s = Mass emissions as calculated from the "stabilized" phase of the cold start test, in grams per test phase.

D_{ct} = The measured driving distance from the "transient" phase of the cold start test, in kilometers.

D_{ht} = The measured driving distance from the "transient" phase of the hot start test, in kilometers.

D_s = The measured driving distance from the "stabilized" phase of the cold start test, in kilometers.

(b) The mass of each pollutant for each phase of both the cold start test and the hot start test is determined from the following:

(1)(i) Total Hydrocarbon mass:

$THC_{mass} = V_{mix} \times Density_{THC} \times (THC_{conc}/1{,}000{,}000)$

(ii) Non-methane Hydrocarbon mass:

$NMHC_{mass} = (THC_{mass}) - (CH_{4\,mass}) = (THC_{mass}) - (V_{mix} \times Density_{CH_4} \times (CH_{4\,conc}/1{,}000{,}000))$

(2) Oxides of nitrogen mass:

$NO_{x\,mass} = V_{mix} \times Density_{NO_2} \times K_H \times (NO_{x\,conc}/1{,}000{,}000))$

(3) Carbon monoxide mass:

$CO_{mass} = V_{mix} \times Density_{CO} \times (C_{conc}/1{,}000{,}000)$

(4) Carbon dioxide mass:

$CO_{2\,mass} = V_{mix} \times Density_{CO_2} \times (CO_{2\,conc}/100)$

(c) Meaning of symbols:

(1)(i) THC_{mass} = total Hydrocarbon emissions, in grams per test phase.

$Density_{THC}$ = Density of total hydrocarbons is 16.33 g/ft³ (0.5767 kg/m³), assuming an average carbon to hydrogen ratio of 1:1.85, at 68°F (20°C) and 760 mm Hg (101.3 kPa) pressure.

THC_{conc} = Total Hydrocarbon concentration of the dilute exhaust sample corrected for total hydrocarbon background, in ppm carbon equivalent, i.e., equivalent propane X 3.

$THC_{conc} = THC_e - THC_d\ (1-1/DF)$

(ii) $NMHC_{mass}$ = Total hydrocarbon emissions less methane emissions, in grams per test phase.

$Density_{CH_4}$ = Density of methane is 18.89 g/ft³ (0.6671 kg/m³) at 68° F (20° C) and 760 mm Hg (101.3 kPa) pressure.

CH_{4conc} = Methane concentration in the dilute exhaust sample corrected for methane background in ppm carbon.

$CH_{4conc} = CH_{4e} - CH_{4d}\ (1-1/DF)$

Where:

THC_e = Total Hydrocarbon concentration of the dilute exhaust sample or, for diesel vehicles, average total hydrocarbon concentration of the dilute exhaust sample as calculated from the integrated total HC traces, in ppm carbon equivalent.

THC_d = Total hydrocarbon concentration of the dilution air as measured, in ppm carbon equivalent.

CH_{4e} = methane concentration of the dilute exhaust sample in ppm carbon equivalent.

CH_{4d} = methane concentration of the dilution air as measured in ppm carbon equivalent.

(2) NO_{xmass} = Oxides of nitrogen emissions, in grams per test phase.

$Density_{NO_2}$ = Density of oxides of nitrogen is 54.16 g/ft³ (1.913 kg/m³), assuming they are in the form of nitrogen dioxide, at 68° F (20° C) and 760 mm HG (101.3 kPa) pressure.

NO_{xconc} = Oxides of nitrogen concentration of the dilute exhaust sample corrected for background in ppm.

$NO_{xconc} = NO_{xe} - NO_{xd}\ (1-1/DF)$

Where:

NO_{xe} = Oxides of nitrogen concentration of the dilute exhaust sample as measured, in ppm.

NO_{xd} = Oxides of nitrogen concentration of the dilution air as measured in ppm.

(3) CO_{mass} = Carbon monoxide emissions, in grams per test phase.

$Density_{CO}$ = Density of carbon monoxide is 32.97 g/ft³ (1.164 kg/m³) at 68° F (20° C) and 760 mm Hg (101.3 kPA) pressure.

CO_{conc} = Carbon monoxide concentration of the dilute exhaust sample corrected for background, water vapor, and CO_2 extraction, in ppm.

$CO_{conc} = CO_e - CO_d\ (1-1/DF)$

Where:

CO_e = Carbon monoxide concentration of the dilute exhaust sample volume corrected for water vapor and carbon dioxide extraction, in ppm. The calculation assumes the carbon to hydrogen ratio of the fuel is 1:1.85.

$CO_e = (1-0.01925\ CO_{2e} - 0.000323\ R)\ CO_{em}$

Where:

CO_{em} = Carbon monoxide concentration of the dilute exhaust sample as measured, in ppm.

CO_{2e} = Carbon dioxide concentration of the dilute exhaust sample, in percent.

R = Relative humidity of the dilution air, in percent (see § 86.542–78(n)).

CO_d = Carbon monoxide concentration of the dilution air corrected for water vapor extraction, in ppm.

$CO_d = (1-0.000323R)\ CO_{dm}$

Where:

CO_{dm} = Carbon monoxide concentration of the dilution air sample as measured, in ppm.

Note.—If a CO instrument which meets the criteria specified in § 86.511 is used and the

conditioning column has been deleted, CO_{cm} can be substituted directly for CO_e, and CO_{dm} can be substituted directly for CO_d.

(4) CO_{2mass} = Carbon dioxide emissions, in grams per test phase.

Density CO_2 = Density of carbon dioxide is 51.85 g/ft³ (1.843 kg/m³) at 68° F (20° C) and 760 mm Hg (101.3 kPa) pressure.

CO_{2conc} = Carbon dioxide concentration of the dilute exhaust sample corrected for background, in percent.

$CO_{2conc} = CO_{2e} - CO_{2d}$ (1–1/DF)

Where:

CO_{2d} = Carbon dioxide concentration of the dilution air as measured, in percent.

(5) $DF = 13.4/[CO_{2e} + (HC_e + CO_e)10^{-4}]$

K_H = Humidity correction factor.

$K_H = 1/[1–0.0047\ (H–75)]$

for SI units $K_H = 1/[1–0.0329(H–10.71)]$

Where:

H = Absolute humidity in grains (grams) of water per pound (kilogram) of dry air.

$H = [(43.478)R_a \times P_d]/[P_B - (P_d \times R_a/100)]$

for SI Units, $H = [(6.211)R_a \times P_d]/[P_B - (P_d \times R_a/100)]$

R_a = Relative humidity of the ambient air, in percent.

P_d = Saturated vapor pressure, in mm Hg (kPa) at the ambient dry bulb temperature.

P_B = Barometric pressure, in mm Hg (kPa).

V_{mix} = Total dilute exhaust volume in cubic feet per test phase corrected to standard conditions (528° R) (293° K) and 760 mm Hg (101.3 kPa)).

For PDP–CVS, V_{mix} is:

$$V_{mix} = \frac{V_o \times N(P_B - P_A)\ (528°\ R)}{(760\ mm\ Hg)\ (T_p)}$$

for SI units,

$$V_{mix} = \frac{V_o \times N(P_B - P_A)\ (293.15°\ K)}{(101.325\ kPa)\ (T_p)}$$

Where:

V_o = Volume of gas pumped by the positive displacement pump, in cubic feet (m³) per revolution. This volume is dependent on the pressure differential across the positive displacement pump.

N = Number of revolutions of the positive displacement pump during the test phase while samples are being collected.

P_B = Barometric pressure, in mm Hg (kPa).

P_A = Pressure depression below atmospheric measured at the inlet to the positive displacement pump, in mm Hg (kPa) (during an idle mode).

T_p = Average temperature of dilute exhaust entering positive displacement pump during test, °R(K).

(d) Example calculation of mass values of exhaust emissions using positive displacement pump:

(1) For the "Transient" phase of the cold start test assume the following: V_o 0.0077934 m³/revolution; N = 12,115; R = 20.5 percent; R_a = 20.5 percent; P_B = 99.05 kPa; P_d = 3.382 kPa; P_A = 9.851 kPa; T_p = 309.8 °K; THCe = 249.75 ppm, carbon equivalent; CH_{4e} = 13.0 ppm; NOx_e = 38.3 ppm; CO_{em} = 311.23 ppm; CO_{2e} = 0.415 percent; THC_d = 4.90 ppm; CH_{4d} = 1.8 ppm; NOx_d = 0.3 ppm; CO_{dm} 8.13 ppm; CO_{2d} = 370 ppm; D_{ct} = 5.650 km.

Then:

$V_{mix} = (0.007934)(12,115)((99.05 - 9.851)(293.15)/(101.325)(309.81) = 78.651$ m³ per test phase.

$H = (6:211)(20.5)(3.382)/[(99.05) - (3.382 \times 20.5/100)] = 4.378$ grams of water per kg of dry air.

$K_H = 1/]1–0.0329(4.378 - 10.71)] = 0.8276$

$CO_e = [1–0.01925(0.415) - 0.000323\ (20.5)]\ 311.23 = 306.68$ ppm

$CO_d = [1–0.000323(20.5)]8.13 = 8.08$ ppm

$DF = 13.4/[0.415 + (249.75 + 306.68) \times 1\ 0^{-4}] = 28.472$

$THC_{conc} = 249.75 - 4.9\ (1 - 1/28.472) = 245.02$ ppm

$THC_{mass} = (78.651)(576.7)(245.02/1,000,000) = 11.114$ grams per test phase

$CH_{4\ conc} = 13.0 - 1.8(1 - 1/28.472) = 11.26$ ppm

$CH_{4\ mass} = (78.651)(667.1)(11.26/1,000,000) = 0.591$ grams per test phase

$NMHC_{mass} = 11.114 - 0.591 = 10.523$ grams per test phase

$NO_{x\ conc} = 38.3 - 0.3\ (1 - 1/28.472) = 38.01$ ppm

$NO_{x\ mass} = (78.651)(1913)(38.01/1,000,000)\ (0.8276) = 4.733$ grams per test phase

$CO_{conc} = 306.68 - 8.08\ (1 - 1/28.472) = 298.88$ ppm

$CO_{mass} = (78.651)(1164)(298.88/1,000,000) = 27.362$ grams per test phase

$CO_{2\ conc} = 0.415 - 370\ (1 - 1/28.472)10^{-4} = 0.3703$ percent

$CO_{2\ mass} = (78.651)(1843)(0.3793/100) = 549.81$ grams per test phase

(2) For the stabilized portion of the cold start test assume that similar calculations resulted in the following:

$THC_{mass} = 7.184$ grams per test phase

$NMHC_{mass} = 6.9$ grams per test phase

$NO_{x\ mass} = 2.154$ grams per test phase

$CO_{mass} = 64.541$ grams per test phase

$CO_{2\ mass} = 529.52$ grams per test phase

$D_s = 6.070$ kilometers

(3) For the "transient" portion of the hot start test assume that similar calculations resulted in the following:

$THC_{mass} = 6.122$ grams per test phase

$NMHC_{mass} = 5.8$ grams per test phase

$NO_{x\ mass} = 7.056$ grams per test phase

$CO_{mass} = 34.964$ grams per test phase

$CO_{2\ mass} = 480.93$ grams per test phase

$D_{ht} = 5.660$ kilometers

(4) Weighted mass emission results:

$THC_{wm} 0.43\ [(11.114 + 7.184)/(5.650 + 6.070)] + 0.57\ [(6.122 + 7.184)/(5.650 + 6.070)] = 1.318$ grams total hydrocarbon per vehicle kilometer

$NMHC_{wm} = 0.43[10.523 + 6.90)/(5.650 + 6.070)] + 0.57[(5.80 + 6.90)/(5.650 + 6.070)] = 1.257$ grams per vehicle kilometer

$NO_{x\ wm} = 0.43[(4.733 + 2.154)/(5.650 + 6.070)] + 0.57[(7.056 + 2.154)/(5.650 + 6.070)] = 0.700$ grams per vehicle kilometer

$CO_{wm} = 0.43\ [(27.362 + 64.541)/(5.650 + 6.070); + 0.57[34.964 + 64.541)/(5.650 + 6.070)] = 8.207$ grams per vehicle kilometer

$CO_{2wm} = 0.43\ [(549.81 + 529.52)/(5.650 + 6.070)] + 0.57\ [(480.93 + 529.52)/(5.650 + 6.070); = 88.701$ grams per vehicle kilometer.

32. In § 86.1310–84, the introductory text of paragraphs (a) and (a)(2) are proposed to be revised as follows:

§ 86.1310–84 Exhaust gas sampling and analytical system; diesel engines.

(a) *General.* The exhaust gas sampling system described in this paragraph is designed to measure the true mass of gaseous emissions in the exhaust of heavy-duty diesel engines. This system utilizes the CVS concept (described in § 86.1309–84) of measuring mass emissions of CH_4 (optional), NO_x, CO, and CO_2. A continuously integrated system is required for THC measurement, and is allowed for NO_x, CO, and CO_2. The mass of gaseous emissions is determined from the sample concentration and total flow over the test period. General requirements are as follows:

* * * * *

(2) The THC analytical system for diesel engines requires a heated flame ionization detector (HFID) and heated sample system. The methane analytical system (optional) requires a gas chromatograph with a flame ionization detector (FID) for methane detection:

* * * * *

33. In § 86.1311–84, paragraph (a) and the introductory text of paragraph (b), are proposed to be revised as follows:

§ 86.1311–84 Exhaust gas analytical system. CVS bag sample.

(a) *Schematic drawings.* Figure N84–5 (N84–5(a)) is a schematic drawing of the exhaust gas analytical system used for analyzing CVS bag samples from either gaosline-fueled or diesel engines. Since various configurations can produce accurate results, exact conformance with the drawing is not required. Additional components such as instruments, valves, solenoids, pumps and switches may be used to provide additional information and coordinate the functions of the component systems.

(b) *Major component description.* The analytical system, Figure N84–5 (N84–5(a)) consists of a flame ionization detector (FID) for the determination of total hydrocarbons, gas chromatograph and flame ionization detector for determination of methane, nondispersive infrared analyzers (NDIR) for the determination of carbon monoxide and carbon dioxide and a chemiluminescence analyzer (CL) for the determination of oxides of nitrogen. The exhaust gas analytical system shall conform to the following requirements:

* * * * *

BILLING CODE 6560-25-M

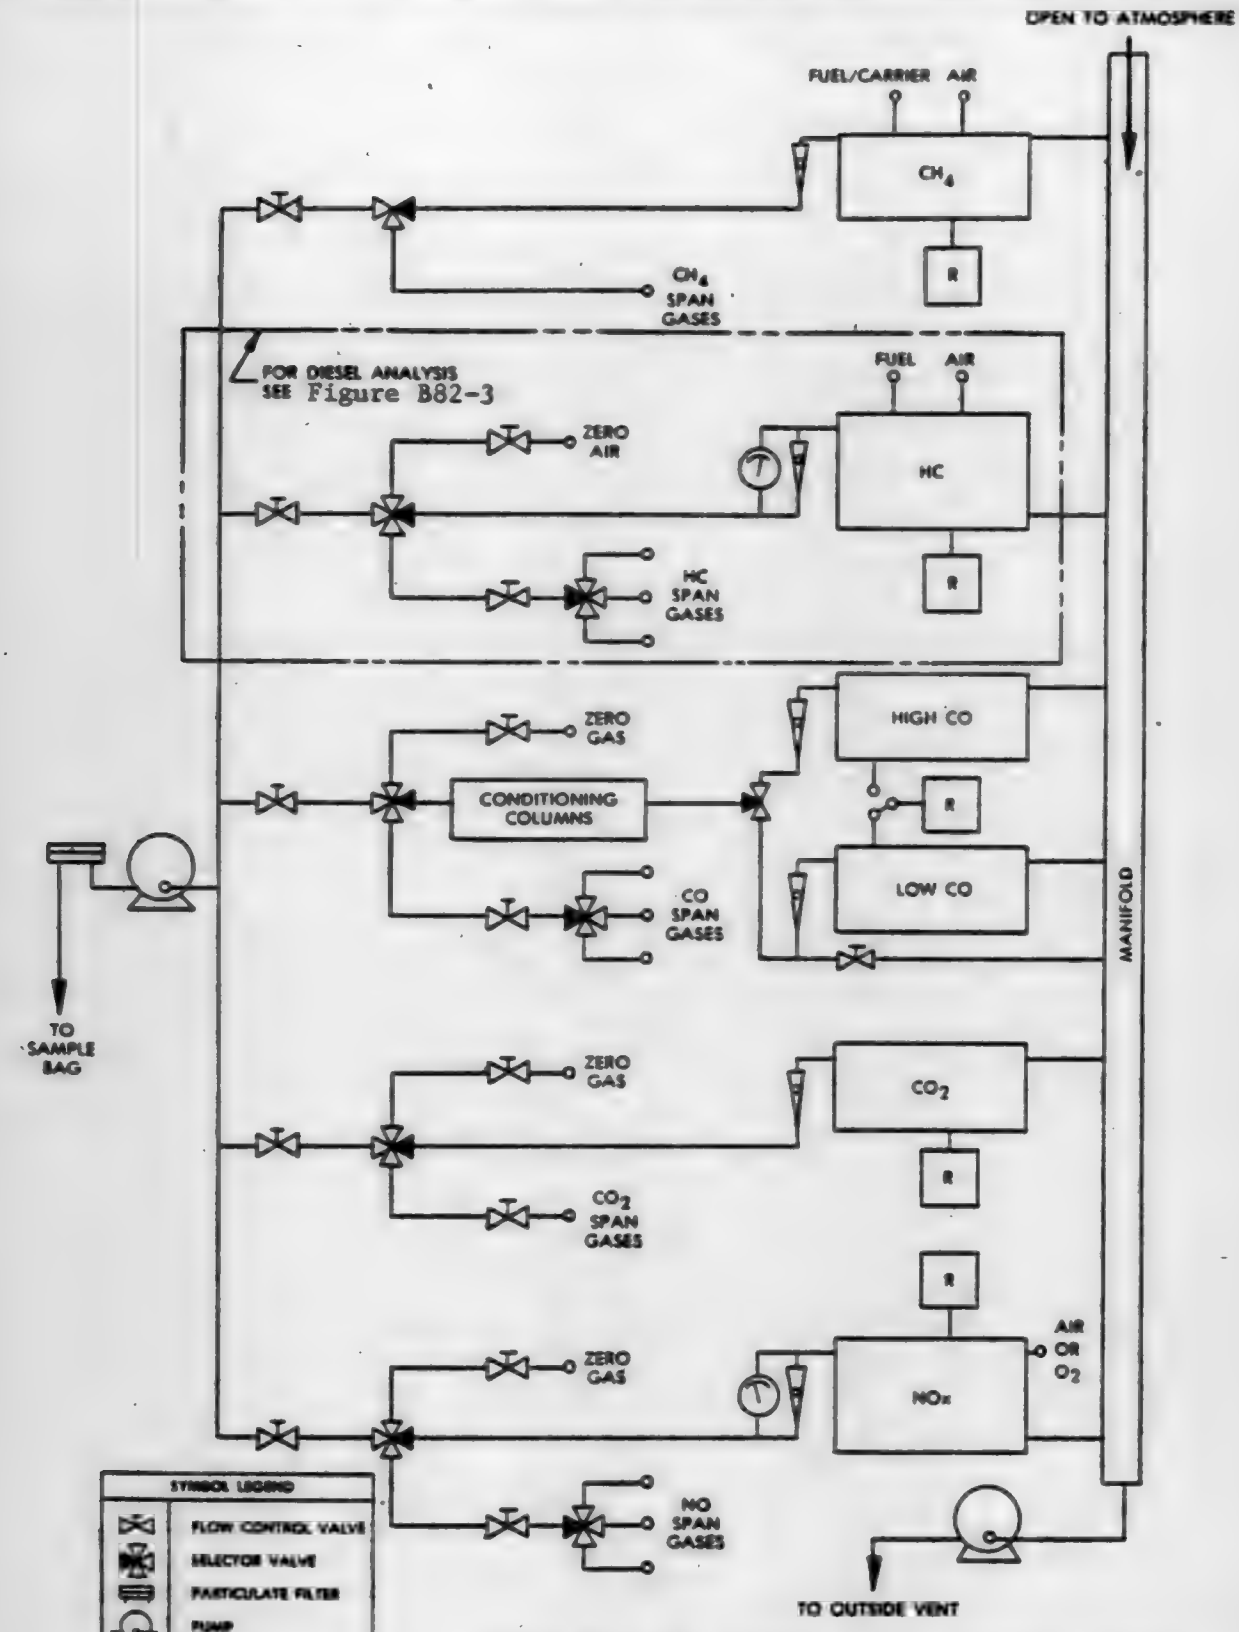

FIGURE N84-5(a) EXHAUST GAS ANALYTICAL SYSTEM

BILLING CODE 6560-26-C

34. In § 86.1314–84, paragraph (a)(2) is proposed to be revised as follows:

§ 86.1314–84 Analytical gases.

(a) * * *

(2) Gases for the total hydrocarbon analyzer shall be single blends of propane using air as the diluent. Gases for the methane analyzer shall be single blends of methane using air as the diluent.

* * * * *

35. In § 86.1316–84, paragraph (b)(1) is proposed to be revised as follows:

§ 86.1316–84 Calibrations; frequency and overview.

* * * * *

(b) * * *

(1) Calibrate the total hydrocarbon analyzer, methane analyzer, carbon dioxide analyzer, carbon monoxide analyzer and oxides of nitrogen analyzer.

* * * * *

36. Section 86.1321–84 is proposed to be revised to read as follows:

§ 86.1321–84 Hydrocarbon analyzer calibration.

(a) *Total hydrocarbon analyzer.* The FID total hydrocarbon analyzer shall receive the following initial and periodic calibration. The HFID shall be operated to a set point ±10° F (±5.5° C) between 365 and 385° F (185 and 197° C).

(1) Initial and periodic optimization of detector response. Prior to its introduction into service and at least annually thereafter the FID hydrocarbon analyzer shall be adjusted for optimum hydrocarbon response. Alternate methods yielding equivalent results may be used, if approved in advance by the Administrator.

(i) Follow the manufacturer's instructions for initial instrument start-up and basic operating adjustment using the appropriate fuel (see § 86.1314–84) and zero-grade air.

(ii) Optimize on the most common operating range. Introduce into the analyzer, a propane in air mixture with a propane concentration equal to approximately 90% of the most common operating range.

(iii) One of the following procedures is required for FID or HFID optimization.

(A) The procedures outlined in Society of Automotive Engineers (SAE) paper No. 770141, "Optimization of Flame Ionization Detector for Determination of Hydrocarbons in Diluted Automobile Exhaust"; author, Glenn D. Reschke.

(B) The HFID optimization procedures outlined in 40 CFR Part 86, Subpart D.

(C) Alternate procedures are allowed, if approved in advance by the Administrator.

(D) After the optimum flow rates have been determined, they are recorded for future reference.

(2) Initial and periodic calibration. Prior to its introduction into service and monthly thereafter the FID or HFID hydrocarbon analyzer shall be calibrated on all normally used instrument ranges. Use the same flow rate as when analyzing samples.

(i) Adjust analyzer to optimize performance.

(ii) Zero the hydrocarbon analyzer with zero-grade air.

(iii) Calibrate on each used operating range with propane in air calibration gases having nominal concentrations of 15, 30, 45, 60, 75 and 90 percent of that range. For each range calibrated, if the deviation from a least-squares best-fit straight line is 2% or less of the value at each data point, concentration values may be calculated by use of a single calibration factor for that range. If the deviation exceeds 2% at any point, the best-fit non-linear equation which represent the data to within 2% of each test point shall be used to determine concentration.

(b) *Methane analyzer.* The methane analyzer shall receive the following initial and periodic calibration:

(1) *Initial and period optimization of detector response.* Prior to its introduction into service and at least annually thereafter the FID detector shall be adjusted for optimum methane response. Alternate methods yielding equivalent results may be used if approved in advance by the Administrator.

(i) Follow the manufacturer's instructions for instrument start-up and basic operating adjustment, using the appropriate fuel, carrier, and zero grade air.

(ii) Optimize on the most commonly used range. Introduce into the analyzer a methane in air mixture with a methane concentration equal to approximately 90 percent of the most common range.

(iii) Select an operating FID fuel flow rate that will give near maximum response and least variation in response with minor variations in fuel flow rate.

(iv) To determine the optimum FID air flow rate, use the FID fuel flow setting determined above and vary air flow rate for maximum response.

(v) After the optimum flow conditions have been determined, actual flow rates are measured and recorded for future reference.

(2) *Initial and periodic calibration.* Prior to its introduction into service and at least monthly thereafter the methane analyzer shall be calibrated on all normally used ranges. Use the same flow rates when analyzing samples.

(i) Adjust analyzer to optimum flow conditions as determined above.

(ii) Obtain a stable baseline reading using carrier gas.

(iii) Calibrate on each normally used operating range with methane in air calibration gases having nominal concentrations of 15, 30, 60 and 90 percent of that range. Additional calibration points may be generated. For each range calibrated, if the deviation from a least-squares best-fit straight line is two percent or less, or within 0.1 ppm methane of the value of each data point (excluding zero), a linear equation may be used to determine the methane concentration. If the deviation exceeds two percent or 0.1 ppm methane at any data point (whichever is highest), the best fit non-linear equation which represents the data to within two percent (or 0.1 ppm methane) of each point shall be used to determine the concentration. Use methane in air calibration gases having nominal concentrations of 15, 30, 45, 60, 75, and 90 percent of each range for the calibration of non-linear instruments.

(iv) A stable baseline must be obtained before and after the methane peak elution. A stable baseline is defined as the time equal to or greater than 25 percent of the methane peak width at half peak height. The methane peak must be resolved from other gases, such as oxygen, nitrogen, and carbon monoxide. Methane concentration shall be determined by peak height measurement or area integration.

37. In § 86.1340–84, paragraph (d)(9) is proposed to be revised as follows:

§ 86.1340–84 Exhaust sample analysis.

* * * * *

(d) * * *

(9) Measure THC (except diesels), CH_4, CO, CO_2, and NOx concentrations in the sample bag(s) with approximately the same flow rates and pressures used in paragraphs (d)(5) of this section. Constituents measured continuously do not require bag analysis.

* * * * *

38. In § 86.1342–84, paragraph (a) is proposed to be amended by revising the definition of the term "A_{ss}" immediately following the word "where:" and paragraphs (b)(1), (c)(1), (d)(1), (e), (f), (g), (h) and (i) are proposed to be revised as follows:

§ 86.1342–84 Calculations; exhaust emissions.

(a) * * *

Where:

A_{wm} = Weighted mass emissions level (THC, NMHC, CO, CO_2, or NO_x) in grams per brake horsepower hour.

* * * * *

(b) The mass of each pollutant for the cold start test and the hot start test for bag measurements and diesel heat exchanger sample system measurements is determined from the following equations:

(1) Total hydrocarbon mass:

$THC_{mass} = V_{mix} \times Density_{THC} \times (THC_{conc} / 1{,}000{,}000)$

Non-methane hydrocarbon mass:

$NMHC_{mass} = (THC_{mass}) - (CH_{4\ mass} = THC_{mass} - (V_{mix} \times Density_{CH_4} \times (CH_{4\ conc} / 1{,}000{,}000))$

* * * * *

(c) The mass of each pollutant for the cold start test and the hot start test for flow compensated sample systems is determined from the following equations:

(1)

$$THC_{mass} = \sum_{i=1}^{n} \frac{p\,[(THC_e)_i \times (V_{mix})_i \times (Density_{THC}) \times gt]}{10^6}$$

$$\frac{THC_d}{10_6} \times \frac{(1-1)}{DF} \times V_{mix} \times Density_{THC}$$

$NMHC_{mass} = (THC_{mass}) - (CH_{4\ mass}$ (bag measurement)

* * * * *

(d) Meaning of the Symbols:

(1) THC_{mass} = Total Hydrocarbon emissions, in grams per test phase.

Density = Density of total hydrocarbons is 16.33 gm/ft_3 (0.5767 kg/m^3 assuming a carbon to hydrogen ratio of 1:1.85 at 68°F (20°C) and 760 mm Hg (101.3 kPa) pressure.

THC_{conc} = Total hydrocarbon concentration of the dilute exhaust sample corrected for background, in ppm carbon equivalent, i.e. equivalent propane ×3.

$THC_{conc} = THC_e - THC_d(1-1/DF)$.

$CH_{4\ mass}$ = Methane emissions, in grams per test phase.

Density = Density of Methane is 16.89 g/ft^3 (0.6671 kg/m^3 at 68°F (20°C) and 760 mm Hg (101.3 kPa) pressure.

$CH_{4\ conc}$ = Methane concentration of the dilute exhaust sample corrected for methane background, in ppm carbon.

$CH_{4\ conc} = CH_{4e} - CH_{4d}\ (1-1/DF)$.

Where:

THC_e = Total hydrocarbon concentration of the dilute exhaust bag sample, or for diesel heat exchanger systems, average hydrocarbon concentration of the dilute exhaust sample as calculated from the integrated THC traces in ppm carbon equivalent. For flow compensated sample systems THC_e is the instantaneous concentration.

THC_d = Total hydrocarbon concentration in the dilution air as measured, in ppm carbon equivalent.

CH_{4e} = Methane concentration of the dilute exhaust sample in ppm carbon equivalent.

CH_{4d} = Methane concentration of the dilution air as measured in ppm carbon equivalent.

* * * * *

(e) Sample calculation of mass values of exhaust emissions:

(1) Assume the following test results for gasoline engine:

	Test results	
	Cold start cycle	Hot start cycle
Vmix	6,924 ft³.	6,873 ft³.
R	30.2 pct	30.2 pct.
R_a	30.2 pct	30.2 pct.
P_b	735 mm Hg	735 mm Hg.
P_d	22.676 mm Hg	22.676 mm Hg.
THC_e	132.07 ppm C equivalent.	86.13 ppm C equivalent.
CH_{4e}	8.00 ppm C equivalent.	5.00 ppm C equivalent.
NO_{xe}	7.86 ppm	10.96 ppm.
CO_{em}	171.22 ppm	114.26 ppm.
CO_{2e}	0.178 pct	0.361 pct.
THC_d	3.60 ppm C equivalent.	8.70 ppm C equivalent.
CH_{4d}	1.80 ppm C	1.80 ppm C.
NO_{xd}	0.0 ppm	0.0 ppm.
CO_{dm}	0.89 ppm	0.89 pct.
CO_{2d}	0.0 pct	0.158 pct.
BHP-HR	0.259	0.347.

Then:

Cold start test:

H = [(43.478)(30.2)(22.676)]/[735 —(22.676)(30.2)/100]
= 41 grains of water per pound of dry air.

$K_H = 1/[1-0.0047(41-75)] = 0.862$

$CO_e = [1-0.01925(0.178)—0.000323(30.2)]171.22 = 169.0$ ppm

$CO_d = [1-0.000323(30.2)]0.89 = 0.881$ ppm

$DF = 13.4/[0.178 + (132.1 + 168.9)(10^{-5})] = 64.302$

$THC_{conc} = 132.1 - 3.6[1-(1/64.392)] = 128.6$ ppm

$THC_{mass} = 6924\ (16.33)(128.6/1{,}000{,}000) = 14.53$ grams

$CH_{4\ conc} = 8.00 - 1.80\ [1-(1/64.392)] = 6.23$ ppm

$CH_{4\ mass} = 6924\ (16.89)(6.23/1{,}000{,}000) = 0.81$ grams

$NMHC_{mass} = 14.53 - 0.81 = 13.72$ grams

$NO_{conc} = 7.86 - 0.0\ [1-(1/64.392)] = 7.86$ ppm

$NO_{mass} = 6924\ (54.16)(0.862)(7.86)/1{,}000{,}000 = 2.54$ grams

$CO_{conc} = 169.0 - 0.881\ [1-(1/164.392)] = 168.13$ ppm

$CO_{mass} = 6924\ (32.97)(168.13/1{,}000{,}000) = 38.38$ grams

$CO_{2\ conc} = 0.178 - 0.0\ (1-1/64.392) = 0.178\%$

$CO_{2\ mass} = 6924\ (51.85-85)(0.178/100) = 639$ grams

Hot start test:

Assume similar calculations result in the following:

$THC_{mass} = 8.72$ grams

$NMHC_{mass} = 8.28$ grams

$NO_{x\ mass} = 3.49$ grams

$CO_{mass} = 25.70$ grams

$CO_{2\ mass} = 1226$ grams

(2) Weighted mass emission results:

$$THC_{wm} = \frac{1/7\ (14.53) + 6/7\ (8.72)}{1/7\ (0.279) + 6/7\ (0.347)} =$$

28.6 grams/BHP-HR

$$NMHC_{wm} = \frac{1/7\ (13.72) + 6/7\ (8.28)}{1/7\ (0.259) + 6/7\ (0.347)} =$$

27.1 grams/BHP-HR

$$NO_{x\ wm} = \frac{1/7\ (2.54) + 6/7\ (3.49)}{1/7\ (0.259) + 6/7\ (0.347)} =$$

10.0 grams/BHP-HR

$$CO_{wm} = \frac{1/7\ (38.35) + 6/7\ (25.70)}{1/7\ (0.259) + 6/7\ (0.347)} =$$

82.2 grams/BHP-HR

$$CO_{wm} = \frac{1/7\ (639) + 6/7\ (1226)}{1/7\ (0.259) + 6/7\ (0.347)} =$$

3415 grams/BHP-HR

(f) The final report brake-specific fuel consumption (BSFC) shall be computed by use of the following formula:

$$BSFC = \frac{1/7\ (M_c) + 6/7\ (M_h)}{1/7\ (BHP\text{-}HR_c) + 6/7\ (BHP\text{-}HR_H)}$$

Where:

BSFC = Brake specific fuel consumption in pounds of fuel per brake horsepower-hour (lbs/BHP-HR).

M_c = Mass of fuel, in pounds, used by the engine during the cold start test.

M_H = Mass of fuel, in pounds, used by the engine during the hot start test.

$BHP\text{-}HR_c$ = Total brake horsepower-hours (brake horsepower integrated with respect to time) for the cold start test.

$BHP\text{-}HR_H$ = total brake horsepower-hours (brake horsepower integrated with respect to time) for the hot start test.

(g) The mass of fuel for the cold start and hot start test is determined from the following equation:

$M = (G_s/R_a)\ (1/453.6)$

(h) Meaning of symbols:

M = Mass of fuel, in pounds, used by the engine during the cold or hot start test.

G_s = Grams of carbon measured during the cold or hot start test.

$G_s = [12.011/(12.011 + a(1.008))]THC_{mass} + 0.429\ CO_{mass} + 0.273\ CO_{2\ mass}$

Where:

THC_{mass} = Total hydrocarbon emissions, in grams for cold or hot start test.

CO_{mass} = Carbon monoxide emissions, in grams for cold or hot start test.

$CO_{2\ mass}$ = Carbon dioxide emissions, in grams for cold or hot start test.

a = The measured hydrogen to carbon ratio of the fuel.

R_a = The grams of carbon in the fuel per gram of fuel.

$R_a = 12.011/[12.001 + a\ (1.008)]$.

(i) Sample calculation of brake-specific fuel consumption:

(1) Assume the following test results:

	Test results	
	Cold start cycle	Hot start cycle
BHP-HR	6.945	7.078.
a	1.85	1.85.
THC_{mass}	37.06 grams	19.62 grams.
CO_{mass}	357.69 grams	350.33 grams.

	Test results	
	Cold start cycle	Hot start cycle
CO_2	5419.62 grams	5361.32 grams.

Then:

G_c for cold start test = [12.011/(12.011 + (1.85)(1.008))](37.08) + 0.429(357.69) + 0.273(5419.62) = 1665.10 grams

G_c for hot start test = [12.011/(12.011 + (1.85)(1.008))](28.32) + 0.429(350.33) + 0.273(5261.32) = 1638.88 grams

$R_c = 12.011/[12.011 + 1.85(1.008)] = 0.866$

$M_c = (1665.10/0.866(1/453.6) = 4.24$ lbs.

$M_H = (1638.88/0.866(1/453.6) = 4.17$ lbs.

(2) Brake-specific fuel consumption results:

BSFC =

1/7 (4.24) + 6/7 (4.17)

1/7 (6.945) + 6/7 (7.078)

= 0.592 lbs. of fuel/BHP–HR

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday). This is a voluntary program. (See OFR NOTICE 41 FR 32914, August 6, 1976.)

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/SECRETARY	USDA/ASCS		DOT/SECRETARY	USDA/ASCS
DOT/COAST GUARD	USDA/FNS		DOT/COAST GUARD	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
DOT/FHWA	USDA/SCS		DOT/FHWA	USDA/SCS
DOT/FRA	MSPB/OPM		DOT/FRA	MSPB/OPM
DOT/MA	LABOR		DOT/MA	LABOR
DOT/NHTSA	HHS/FDA		DOT/NHTSA	HHS/FDA
DOT/RSPA			DOT/RSPA	
DOT/SLSDC			DOT/SLSDC	
DOT/UMTA			DOT/UMTA	

Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday. Comments on this program are still invited.

Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

REMINDERS

The "reminders" below identify documents that appeared in issues of the **Federal Register** 15 days or more ago. Inclusion or exclusion from this list has no legal significance.

Deadlines for Comments on Proposed Rules for the Week of December 27, 1981 through January 2, 1982

The Federal Register

Regulations appear as agency documents which are published daily in the **Federal Register** and codified annually in the **Code of Federal Regulations**

The **Federal Register**, published daily, is the official publication for notifying the public of proposed and final regulations. It is the tool to use to participate in the rulemaking process by commenting on the proposed regulations. And it keeps people up to date on the Federal regulations currently in effect.

The **Federal Register** contains many reader's aids—Highlights, Grant information, list of hearings and Sunshine meetings—which simplify the user's job.

The **Code of Federal Regulations** (CFR) contains the annual codification of the final regulations printed in the **Federal Register**. Each of the 50 titles is updated annually.

Subscription Prices:

Federal Register
One year: $75 domestic; $145 foreign
Six months: $45 domestic; $90 foreign

Code of Federal Regulations
One year: $525 domestic; $656.25 foreign
Single volumes: Individually priced.

Vol. 46 No. 247
Pages 62391-62640

federal register

Thursday
December 24, 1981

Highlights

62397 **Banking** FRS amends regulations on payment of interest on deposits.

62628 **Oil and Gas Reserves** Interior/BLM reschedules first oil and gas competitive lease sale in Alaska National Petroleum Reserve. (Part III of this issue)

62608 **Motor Vehicle Pollution** EPA proposes to permit manufacturers of light-duty diesel vehicles and trucks to average particulate emissions. (Part II of this issue)

62596 **Imports** Trade Representative requests comments on exclusion from U.S. of certain steel rod treating apparatus.

62479 **Water Pollution Control** EPA and DOT/CG invite comments on marine sanitation device program.

62638 **Aviation Safety** DOT/FAA proposes to amend cross-country aeronautical experience requirements for private and commercial pilot certification. (Part IV of this issue)

62599 **Buses** DOT/UMTA seeks transit operators to participate in New Bus Equipment Introduction Program.

Highlights

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $75.00 per year, or $45.00 for six months, payable in advance. The charge for individual copies is $1.00 for each issue, or $1.00 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

62554 **Motor Carriers** ICC permits motor carriers of property to recover reasonable foreseeable future costs in general increase filings.

62396 **Radioactive materials** NRC clarifies requirement for use of uranium shielding in shipping containers.

62452 **Hazardous Materials Transportation** DOT/RSPA establishes requirements for seamless aluminum cylinders made of alloys.

62462 **Motor Carriers** ICC interprets final rule on compensated intercorporate hauling operations.

62443 **Marine Safety** DOT/CG issues regulations on vessel navigation lights.

62441 **Military Personnel** DOD clarifies procedures for obtaining records needed for discharge review.

62449 **Postal Service** PS lowers minimum pound requirements for third-class 5-digit ZIP code presorted mail.

62566 **Motor Carriers** ICC approves Railroad Cost Index filed by the Association of American Railroads.

62391 **Tobacco** USDA/AMS amends inspection user fee regulations.

62464 **Freedom of Information** DOE proposes to revise schedule of fees for document search and duplication.

62487 **Imports** USDA issues first quarterly import estimates of specified meats for calendar year 1982.

62490 **Textiles** CITA amends restraint level for certain wool textile products from the Republic of Singapore.

62487 **Countervailing Duties** Commerce/ITA issues final results of administrative review on certain castor oil products from Brazil.

Federal Register
Vol. 46, No. 247
Thursday, December 24, 1981

Administration Office, Executive Office of the President
PROPOSED RULES
62464 Freedom of Information Act; implementation

Agricultural Marketing Service
RULES
62394 Lemons grown in Ariz. and Calif.
62394 Oranges (navel) grown in Ariz. and Calif.
Tobacco inspection:
62391 User fees for inspection and certification

Agriculture Department
See also Agricultural Marketing Service; Animal and Plant Health Inspection Service; Forest Service; Packers and Stockyards Administration.
RULES
Authority delegations by Secretary and General Officers:
62391 New agencies, realignment of functions, etc.; conforming authority delegations; correction
62391 Office of Personnel; support of Committee Management Officer
NOTICES
Committees; establishment, renewals, terminations, etc.:
62487 Future of Cooperative Extension Joint Committee
62487 Meat import limitations; quarterly estimates

Air Force Department
NOTICES
Meetings:
62491 Scientific Advisory Board

Alcohol, Drug Abuse, and Mental Health Administration
NOTICES
Meetings:
62543 January (1982)

Animal and Plant Health Inspection Service
RULES
Animal and poultry import restrictions:
62395 Mares, from countries affected with CEM; approved States

Arts and Humanities, National Foundation
NOTICES
Meetings:
62569 Humanities Advisory Panel
62569 Visual Arts Panel

Coast Guard
RULES
Inland waterways navigation regulations:
62443 Lights and shapes; positioning and technical details
PROPOSED RULES
Pollution:
62479 Marine sanitation devices; program review

Commerce Department
See Foreign-Trade Zones Board; International Trade Administration.

Commodity Futures Trading Commission
NOTICES
62601 Meetings; Sunshine Act

Consumer Product Safety Commission
NOTICES
62601 Meetings; Sunshine Act (5 documents)

Customs Service
NOTICES
62600 Tariff reclassification of tubular textile braided lead lines; established and uniform practice; extension of time

Defense Department
See also Air Force Department; Engineers Corps.
RULES
62441 Discharge Review Boards; military records, procedures for obtaining copies
NOTICES
Meetings:
62491 Electron Devices Advisory Group

Economic Regulatory Administration
NOTICES
Natural gas; fuel oil displacement certification applications:
62492 Capco Pipe Co., Inc.

Energy Department
See also Economic Regulatory Administration; Energy Research Office; Federal Energy Regulatory Commission.
PROPOSED RULES
62464 Freedom of Information Act; implementation
62480 Procurement

Energy Research Office
NOTICES
Meetings:
62492 DOE/NSF Nuclear Science Advisory Committee

Engineer Corps
NOTICES
Environmental statements; availability, etc.:
62491 Palo Duro Creek, Hansford County, Tex.; multipurpose dam; notice of intent

Environmental Protection Agency
RULES
Air pollution; standards of performance for new stationary sources:
62449 Washington; authority delegation
PROPOSED RULES
Air pollution control; new motor vehicles and engines:
62608 Particulate emissions averaging; 1985 and later model year diesel-fueled light-duty vehicles and light-duty trucks

Air quality planning purposes; designation of areas:
62480 California; extension of time
Water pollution control:
62479 Marine sanitation devices; program review

NOTICES

Air pollution control; steel industry compliance extension applications, etc.:
62537 Alabama By-Products Corp.
62536 Ford Motor Co.
Environmental statements; availability, etc.:
62538 Agency statements; weekly receipts

Equal Employment Opportunity Commission

NOTICES

62602 Meetings; Sunshine Act

Federal Aviation Administration

RULES

Airworthiness directives:
62400 Airbus Industrie
62399 Swearingen
62402 Control zones
62403 IFR altitudes
62436 Standard instrument approach procedures
62401–62403 Transition areas (3 documents)

PROPOSED RULES

Airmen certification:
62638 Pilot cross-country experience requirements
Airworthiness directives:
62467 Air Tractor
62468, 62469 Bell (2 documents)
62466 Boeing
62469–62471 Transition areas (3 documents)

NOTICES

62596 Air traffic computer replacement program; indemnification of contractors
Aircraft certification status, etc.:
62598 Rolls-Royce, Ltd.
Meetings:
62597 Aeronautics Radio Technical Commission (2 documents)

Federal Deposit Insurance Corporation

NOTICES

62603 Meetings; Sunshine Act (3 documents)

Federal Energy Regulatory Commission

RULES

Natural Gas Policy Act of 1978; ceiling prices for high cost natural gas produced from tight formations; various States:
62439 Colorado
62439 New Mexico
62440 Texas

PROPOSED RULES

Electric utilities:
62472 Rate schedules filing; inclusion of construction work in progress for public utilities; extension of time, etc.

NOTICES

Hearings, etc.:
62493 American Natural Rocky Mountain Co.
62494, 62495 Canyonville, Oreg. (2 documents)
62516 Carolina Power & Light Co.
62517 Central Power & Light Co.
62495 Citizens Utilities Co.
62495, 62496 Columbia Gas Transmission Corp. (2 documents)
62496 Cruz, Edward S., et al.
62497 Duke Power Co.
62518 El Paso Electric Co.
62518 Energy Terminal Services Corp.
62497 Flathead Joint Board of Flathead, Mission & Jocko Valley Irrigation Districts
62496, 62518 Florida Power & Light Co. (2 documents)
62498 Gold Bar, Wash.
62499 Grisdale Hill Co.
62499 Hydro Electric Constructors, Inc.
62519 Hydro Energies Corp.
62500–62502 Hydro Management, Inc. (4 documents)
62503 Idaho Power Co.
62519 Iowa Electric Light & Power Co.
62503 Kansas-Nebraska Natural Gas Co., Inc.
62504 Linville, Richard K.
62504 Live Oak Associates West
62505 Long Lake Energy Corp.
62505 Louisiana Resources Co.
62520 MacArthur, Charles E., et al.
62506 Mill Pond Associates, Inc.
62520 Missouri Power & Light Co.
62506 Natural Gas Pipeline Co. of America
62507 Pacific Offshore Pipeline Co.
62522 Page, Victor et al.
62509 Public Service Co. of New Mexico
62509 Quincy-Columbia Basin Irrigation District et al.
62523 R.D.D., Inc.
62510 Skykomish, Wash.
62510 Southern Natural Gas Co.
62511 Southern Utah Valley Power Project
62512 Supenn Pipeline
62512 Taft, Lawrence R.
62512 Texas Eastern Transmission Corp.
62513 Transcontinental Gas Pipe Line Corp.
62515 United Gas Pipe Line Co.

Rules and Regulations

Federal Register
Vol. 46, No. 247
Thursday, December 24, 1981

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

DEPARTMENT OF AGRICULTURE

Office of the Secretary

7 CFR Part 2

Revisions of Delegations of Authority

AGENCY: Department of Agriculture.
ACTION: Final rule.

SUMMARY: This document revises the delegations of authority from the Secretary of Agriculture and General Officers of the Department of Agriculture to reflect the responsibility of the Office of Personnel to support the Department's Committee Management Officer.

EFFECTIVE DATE: December 24, 1981.

FOR FURTHER INFORMATION CONTACT: William J. Riley, Chief, Security and Employee Relations Staff, Office of Personnel, United States Department of Agriculture, Washington, D.C. 20250, (202) 447–3327.

SUPPLEMENTARY INFORMATION: In January 1981 the Office of Personnel was assigned responsibility to support the Department's Committee Management Officer. However, the delegations of authority were never changed to reflect this responsibility. This notice hereby corrects that oversight. This rule relates to internal agency management. Therefore, pursuant to 5 U.S.C. 553, it is found upon good cause that notice and other public procedures with respect thereto are impractical and contrary to the public interest, and good cause is found for making this rule effective less than 30 days after publication in the **Federal Register**. Further, since this rule relates to internal agency management, it is exempt from the provisions of Executive Order 12291. Lastly, since this rule relates to internal agency management, this action will not have a significant economic impact on a substantial number of small entities.

PART 2—DELEGATIONS OF AUTHORITY BY THE SECRETARY OF AGRICULTURE AND GENERAL OFFICERS OF THE DEPARTMENT

Accordingly, Part 2, Subtitle A, Title 7, Code of Federal Regulations is amended as follows:

Subpart J—Delegations of Authority by the Assistant Secretary for Administration

1. Section 2.78 is amended by revising the introductory text of paragraph (a) and by adding new paragraphs (a)(19) thru (21) as follows:

§ 2.78 Director, Office of Personnel.

(a) *Delegations.* Pursuant to § 2.25 (d), (e), (g), and (h), subject to reservations in § 2.26(e), the following delegations of authority are made by the Assistant Secretary for Administration to the Director of Personnel.

* * * * *

(19) Provide staff assistance and support to the Department's Committee Management Officer.

(20) Formulate policies and procedures on the establishment and management of committees in the Department.

(21) Consult with GSA and Departmental agencies on the establishment and reestablishment of advisory committees.

* * * * *

(5 U.S.C. 301 and Reorganization Plan No. 2 of 1953)

For Subpart J:

Dated: December 21, 1981.

John E. Schrote,
Deputy Assistant Secretary for Administration.

[FR Doc. 81–36783 Filed 12–23–81; 8:45 am]
BILLING CODE 3410–01–M

7 CFR Part 2

Revision of Delegations of Authority; Correction

AGENCY: Department of Agriculture.
ACTION: Final rule.

SUMMARY: In FR Document 81–28167 appearing at page 47747 in the Federal Register of September 30, 1981, the amendatory language to § 2.68 appearing on page 47752 incorrectly used the term "Assistant Secretary for Marketing and Transportation Services" on lines four through six of that amendment. The term should read "Assistant Secretary for Food and Consumer Services". The purpose of this document is to correct that error.

EFFECTIVE DATE: December 24, 1981.

FOR FURTHER INFORMATION CONTACT: Robert Siegler, Deputy Assistant General Counsel, Office of the General Counsel, Department of Agriculture, Washington, D.C., (202) 447–6035.

(5 U.S.C. 301 and Reorganization Plan No. 2 of 1953)

Issued at Washington, D.C. this 18th day of December 1981.

Seeley G. Lodwick,
Under Secretary for International Affairs and Commodity Programs.

BILLING CODE 3410–01–M

Agricultural Marketing Service

7 CFR Part 29

Tobacco Inspection; User Fees

AGENCY: Agricultural Marketing Service, USDA.
ACTION: Final rule.

SUMMARY: The Omnibus Budget Reconciliation Act of 1981 (Pub. L. 97–35) enacted August 13, 1981, requires the Secretary, as of October 1, 1981, to fix and collect fees and charges for inspection and certification, and other services, including administrative and supervisory costs, at tobacco auction markets in all tobacco producing areas. Therefore, the regulations governing tobacco inspection are hereby amended to provide for such fees. Tobacco is grown in 22 states. Inspections of producer tobacco at designated auction tobacco markets will take precedence over permissive inspection, now performed by request and paid for by a prescribed hourly fee schedule. The regulations on fees for permissive inspection are unchanged from the regulations published February 3, 1981 (46 FR 10451).

EFFECTIVE DATE: October 1, 1981.

FOR FURTHER INFORMATION CONTACT: J. T. Bunn, Acting Director, Tobacco

Division, Agricultural Marketing Service, United States Department of Agriculture, Washington, D.C. 20250, (202) 447-7235.

SUPPLEMENTARY INFORMATION: Notice was given (46 FR 44761, September 8, 1981) that the Department was proposing to amend the regulations effective October 1, 1981, to allow the Secretary to fix and collect fees and charges for inspection and certification of producer tobacco at designated tobacco auction markets throughout tobacco producing areas. Interested parties were given an opportunity to comment upon the proposed regulations. After reviewing these comments as noted below, the Department hereby adopts the regulations as proposed which provide for charges, which as nearly as practicable, shall cover the costs of the services, including administrative and supervisory costs. The authority for these regulations is contained in the Tobacco Inspection Act (49 Stat. 731; U.S.C., 511 *et seq.*) as amended by the Omnibus Budget Reconciliation Act of 1981 (Pub. L. 97-35).

The Omnibus Budget Reconciliation Act of 1981 (Pub. L. 97-35) enacted August 13, 1981, authorizes the Secretary, as of October 1, 1981, to fix and collect fees and charges for inspection and certification, and other services, including administrative and supervisory costs, at tobacco auction markets in all tobacco producing areas. Therefore, the regulations governing tobacco inspection are hereby amended to provide for such fees.

Since 1935, upon enactment of the Tobacco Inspection Act, the Department has provided free and mandatory inspection of tobacco at designated auction markets. Inspection services currently provided are adequate for all designated auction markets, as well as for meeting requests for permissive inspection with minimum delays. Fees at designated auction markets are set at $.0045 per pound. This fixed fee has been calculated after thorough review of historical data regarding production and marketing, and it is anticipated that it will provide the funds necessary to continue the level of services in effect as of September 30, 1981. The regulations on fees for permissive inspection are unchanged and the prescribed hourly rate for such services performed by federal tobacco graders remains in effect.

A total of 11 comments were received on the proposal, 7 in favor and 4 opposed. The main concern of the proponents was that the effective date may cause serious problems to the industry. One proponent recommended a 30-day delay in the effective date to insure a fair and orderly transition. The Omnibus Budget Reconciliation Act of 1981 stipulates the October 1 effective date, and even though the Department is sensitive to the concerns of all segments of the industry having to effectuate this change well into a particular marketing season, as opposed to the opening of a season, it must be implemented as mandated by Pub. L. 97-35.

The Virginia Farm Bureau, though supportive of the user fee system, suggested that after the burley markets close in February 1982 that the fee charged per pound be reviewed to determine whether the fee needs to be adjusted upward or downward. Prior to the establishment of the $.0045 per pound fee, the Department considered graduated rates for individual types of tobacco, but it was concluded that, initially, it would be more equitable to assess a uniform fee. The Department plans to collect data on an annual basis beginning October 1, 1981, and continuing through May 1983. Using this data, along with the recommendations of the National Advisory Committee, may enable the Department to propose lower rates for some types of tobacco effective possibly by July 1983. Our objective is to recover the full costs of providing the service.

One commentor, representing Virginia dark-fired tobacco interests, expressed hope for an advisory subcommittee for each type of tobacco to be able to meet with the National Advisory Committee and also to meet with the Director of the Tobacco Division, Agricultural Marketing Service, annually to iron out specific local problems. While the National Advisory Committee is not yet formally established, it has been determined that membership will be increased from 10 to 14 in order to pro-rate membership on the Committee to areas based on production in each area. The Department is always receptive to recommendations to improve the tobacco inspection program and would welcome input from all segments of the tobacco industry.

One commentor stated he was not opposed to farmers paying for tobacco inspection but suggested the user fee be based on inspection per pile of tobacco rather than per pound as it takes no longer to grade a 200-pound sheet than a 50-pound sheet. This was considered prior to establishing the $.0045 per pound fee but was rejected because it was determined that charging per pound is more equitable based on estimated production and historical data. Poundage per pile or bale of tobacco offered at auction varies considerably among tobacco producing areas. Thus, in the interest of preserving customary or traditional marketing practices, the Department has determined that user fees be charged on a per pound basis instead of on a per pile basis, and this suggestion must be denied.

Additionally, this commentor recommended dismantling of the grower designation program because of implementation of user fees. He felt this program was too restrictive and was opposed to the length of time allowed for redesignation. This comment is inappropriate in that the proposed user fees are to be implemented for all types of tobacco regardless of the different marketing concepts implemented for auction sales. Any change in the grower designation program must be separately considered. At the present time, there is no such proposal before the Department.

One opponent from Murray, Kentucky, spoke of sales of tobacco on the farm and that most of the good tobacco was sold prior to the time when federal graders were assigned to those markets. She raised the question about the need for federal graders. The Tobacco Inspection Act authorizes the utilization of federal graders for auction sales of tobacco. Any tobacco sold without the benefit of price support and federal grading outside the auction system is a business matter between producers and buying concerns and does not fall within the parameters of the Tobacco Inspection Act or Department's proposal for user fees.

One opponent protested user fees on the grounds that the producer is already paying 2.778 percent in commissions to warehouses, plus miscellaneous taxes, to market his crop. While the Department is aware that the user fees will increase all producers' costs of marketing tobacco, the Congress in amending the Tobacco Inspection Act by the passage of the Omnibus Budget Reconciliation Act of 1981, has mandated that the Department assess user fees to recover the costs of providing inspection services.

One opposing commenter expressed the opinion that fees should be paid by the warehousemen and one stated they should be paid for by buyers. The user fee system required by the Omnibus Budget Reconciliation Act of 1981 is designed to recover costs of providing the services to sellers of tobacco and provides that the sellers should pay the user fees. However, the Act makes the warehouseman the responsible party to pay the fees to the Government and failure of the warehouseman to do so

will result in automatic suspension of grading services at the warehouse. It is anticipated that the warehouse will collect the fees from the sellers of tobacco and the warehouse records can and will show that the fees were in fact collected. However, there are a multitude of techniques available to any warehouseman to relieve the seller of these charges. The auditing procedures needed to verify beyond any reasonable doubt that the warehouseman in fact collected the fee from the seller or collected and did not return such fee by some technique to the seller, would be exhaustive, uneconomic, and constitute an onerous administrative burden on the warehouseman. Therefore, when warehousemen remit payment to the Department in an amount of $.0045 per pound during the applicable sales period, the Department will presume that the fees were assessed against the seller.

The final rule has been reviewed under U.S.D.A. procedures established to implement Executive Order 12291 and has been determined to be a nonmajor rule because it does not meet any of the criteria established for major rules under the executive order. Initial review of the regulations contained in 7 CFR Part 29, for need, currency, clarity, and effectiveness will be made within the next 5 years.

Additionally, in conformance with the provisions of the Regulatory Flexibility Act, full consideration has been given to the potential economic impact upon small business. All tobacco warehousemen and producers fall with the confines of "small business," as defined in the Regulatory Flexibility Act. The Department has informally advised all segments of the tobacco industry of the anticipated implementation of user fees and that there would be no change in the level of the services provided. It has been determined that the economic impact upon small entities would not be adverse and would in no way affect normal competition in the market place.

The Department hereby amends regulations contained in 7 CFR Part 29 as follows:

1. Section 29.2 is amended to make it clear that even though the user pays for a service, this does not alter the fact that discretion by the Secretary is still necessary in limiting inspection services to effectively carry out the provisions of the Tobacco Inspection Act and to provide efficient, cost-effective services to sellers of tobacco.

2. Section 29.2(b) is amended to remove any reference to "free" inspection services previously authorized by the Tobacco Inspection Act.

3. Section 29.3(h) is amended to reflect the renaming of Commodity Stabilization Service to the Agricultural Stabilization and Conservation Service.

4. Section 29.73 is amended to correct a previous error when language was inadvertently placed in the section when it was amended in 1973. This change has no effect on the substance of the regulations.

5. Section 29.123 is amended to incorporate necessary changes for implementation of user fees.

6. Section 29.125 is amended to increase the charge for appeals from $1 to $5. This increase in the charge for appeals is necessary to recover increased costs since the time these regulations were previously amended.

7. Section 29.127 is amended by expanding upon the title to include various courses of instruction. The section is further amended to provide for collection of costs incurred by the Department for providing materials and personnel to instruct industry and other interested persons in tobacco inspection standards.

8. Section 29.129 relating to payment of charges is deleted and a new section is added to establish a National Advisory Committee for Inspection Services, as mandated by the Omnibus Budget Reconciliation Act of 1981 and is governed by the Federal Advisory Committee Act (5 U.S.C. Appendix I).

PART 29—TOBACCO INSPECTION

The Department amends the regulations under the Tobacco Inspection Act contained in 7 CFR Part 29, as follows:

§ 29.2 [Amended]

1. The second sentence of § 29.2 introductory text is amended by adding immediately following the words "without limitation" the words "even though the cost of such service is paid by the seller."

2. The first sentence of § 29.2(b) Order of priority is amended by removing immediately following the words "markets designated for" the words "free and", and removing following the words "inspection service on" the words "a fee basis on".

§ 29.3 [Amended]

3. Amend § 29.3(h) by removing the words "Administrator, Commodity Stabilization Service" and inserting in lieu thereof the words "Administrator, Agricultural Stabilization and Conservation Service."

4. Section 29.123 is revised to read as follows:

§ 29.123 Fees and charges.

Beginning October 1, 1981, fees and charges for tobacco inspection and certification service shall be collected by the Director to cover insofar as practicable, all costs of the services including establishment of standards, administrative, and supervisory costs as follows:

(a) *Mandatory inspection.* The inspection and certification fee is $.0045 per pound. The fee shall be paid by sellers of tobacco at auction and assessed against the warehouse irrespective of ownership or interest in the tobacco. When the warehouse pays the Department, it is presumed the fee was collected from the seller. Inspection and related services shall be suspended or denied if the warehouse operator fails to pay the fees and charges imposed under this section. The fee shall be based on total poundage of tobacco inspected and sold at auction during each calendar month. The fee shall be due and payable on the first day of the immediately following month and on the day immediately following the last sale in the warehouse each marketing year. Inspection and certification services on designated auction markets shall take precedence over permissive inspections, other than reinspections.

(b) *Permissive inspection.* Fees and charges for inspection at redrying plants and receiving points shall comprise the cost of salaries, travel, per diem, and related expenses to cover the cost of performing the service. Fees shall be for actual time required to render the service calculated to the nearest 30-minute period. The base hourly salary rate shall be $17.80. The overtime rate for service performed outside the inspector's regularly scheduled tour of duty shall be $21.30. The rate of $26.70 shall be charged for work performed on Sundays and holidays. These same fees or charges shall be applicable for hogshead, bale, case, or sample inspections.

(c) Fees and charges fixed in accordance with this subpart shall be paid by the applicant or person obtaining the service in accordance with a statement rendered by the Division. A deposit to cover all, or a part of, fees and charges for services to be rendered may be required by the Division. Fees for services rendered shall be remitted by check or draft made payable to "Agricultural Marketing Service", United States Department of Agriculture.

§ 29.125 [Amended]

5. Section 29.125 is amended by removing the figure "$1" in line one and inserting "$5."

6. Section 29.127 is revised to read as follows:

§ 29.127 Demonstrations and courses of instruction.

Charges, not in excess of the cost thereof, as may be approved by the Director, may be made for demonstrations, samples, or courses of instruction when such are furnished upon request.

7. Section 29.129 is revised to read as follows:

§ 29.129 National Advisory Committee for Inspection Services.

(a) To assist the Secretary in determining the level of inspection and related services and the fees and charges therefore, a National Advisory Committee of tobacco producers shall be appointed in accordance with the Federal Advisory Committee Act (5 U.S.C. Appendix I).

(b) The committee shall consist of 14 members and 14 alternates. There will be a flue-cured subcommittee, a burley subcommittee, and a fire and dark air-cured subcommittee.

(c) Recommendations to the Secretary for membership on the committee will be received from the following organizations: One from the Georgia Farm Bureau, one from the South Carolina Farm Bureau, one from the Virginia Farm Bureau, three from the North Carolina Farm Bureau, two from the North Carolina Grange, one from the Tennessee Farm Bureau, three from the Kentucky Farm Bureau, one from the Florida, Indiana, Missouri, West Virginia, or Maryland Farm Bureau, and one from the Wisconsin or Ohio Farm Bureau.

(d) The committee and/or subcommittees shall meet at the call of the Secretary.

Dated: December 15, 1981.

C. W. McMillan,

Assistant Secretary, Marketing and Inspection Services.

[FR Doc. 81-36208 Filed 12-17-81; 8:45 am]

BILLING CODE 3410-02-M

---

7 CFR Part 907

[Navel Orange Reg. 533; Navel Orange Reg. 532, Amdt. 1]

Navel Oranges Grown in Arizona and Designated Part of California; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This action establishes the quantity of fresh California-Arizona navel oranges that may be shipped to market during the period December 25–December 31, 1981, and increases the quantity of such oranges that may be so shipped during the period December 18–December 24, 1981. Such action is needed to provide for orderly marketing of fresh navel oranges for the periods specified due to the marketing situation confronting the orange industry.

DATES: This regulation becomes effective December 25, 1981, and the amendment is effective for the period December 18–24, 1981.

FOR FURTHER INFORMATION CONTACT: William J. Doyle, (202) 447–5975.

SUPPLEMENTARY INFORMATION: *Findings.* This rule has been reviewed under Secretary's Memorandum 1512–1, and Executive Order 12291 and has been designated a "non-major" rule. This regulation and amendment are issued under the marketing agreement, as amended, and Order No. 907, as amended (7 CFR Part 907), regulating the handling of navel oranges grown in Arizona and designated part of California. The agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The action is based upon the recommendation and information submitted by the Navel Orange Administrative Committee and upon other available information. It is hereby found that this action will tend to effectuate the declared policy of the act.

This action is consistent with the marketing policy for 1981–82. The marketing policy was recommended by the committee following discussion at a public meeting on October 6, 1981. The committee met again publicly on December 22, 1981 at Los Angeles, California, to consider the current and prospective conditions of supply and demand and recommended a quantity of navel oranges deemed advisable to be handled during the specified weeks. The committee reports the demand for navel oranges is easier.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until 30 days after publication in the **Federal Register** (5 U.S.C. 553), because of insufficient time between the date when information became available upon which this regulation and amendment are based and the effective date necessary to effectuate the declared policy of the act. Interested persons were given an opportunity to submit information and views on the regulation at an open meeting, and the amendment relieves restrictions on the handling of navel oranges. It is necessary to effectuate the declared purposes of the act to make these regulatory provisions effective as specified, and handlers have been apprised of such provisions and effective time.

In accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3507), the reporting or recordkeeping provisions that are included in this final rule have been or will be submitted for approval to the Office of Management and Budget (OMB). They are not effective until OMB approval has been obtained.

PART 907—NAVEL ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

1. § 907.833 is added as follows:

§ 907.833 Navel Orange Regulation 533.

The quantities of navel oranges grown in Arizona and California which may be handled during the period December 25, 1981, through December 31, 1981, are established as follows:

(1) District 1: 624,000 cartons;
(2) District 2: 47,002 cartons;
(3) District 3: 26,000 cartons;
(4) District 4: Unlimited cartons.

2. § 907.832 Navel Orange Regulation 532 (46 F.R. 61442), is hereby amended to read:

§ 907.832 Navel Orange Regulation 532.

* * * * *

(1) District 1: 801,000 cartons;
(2) District 2: Unlimited cartons;
(3) District 3: 99,000 cartons;
(4) District 4: Unlimited cartons.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: December 23, 1981.

D. S. Kuryloski,

Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

BILLING CODE 3410-02-M

---

7 CFR Part 910

[Lemon Reg. 339]

Lemons Grown in California and Arizona; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation establishes the quantity of fresh California-Arizona

lemons that may be shipped to market during the period December 27–January 2, 1982. Such action is needed to provide for orderly marketing of fresh lemons for this period due to the marketing situation confronting the lemon industry.

EFFECTIVE DATE: December 27, 1981.

FOR FURTHER INFORMATION CONTACT: William J. Doyle, Acting Chief, Fruit Branch, F&V, AMS, USDA, Washington, D.C. 20250, telephone 202–447–5975.

SUPPLEMENTARY INFORMATION: This rule has been reviewed under Secretary's Memorandum 1512–1 and Executive Order 12291 and has been designated a "non-major" rule. This regulation is issued under the marketing agreement, as amended, and Order No. 910, as amended (7 CFR Part 910), regulating the handling of lemons grown in California and Arizona. The agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The action is based upon the recommendations and information submitted by the Lemon Administrative Committee and upon other available information. It is hereby found that this action will tend to effectuate the declared policy of the act.

This action is consistent with the marketing policy for 1981–82. The marketing policy was recommended by the committee following discussion at a public meeting on July 7, 1981. The committee met again publicly on December 22, 1981, at Los Angeles, California, to consider the current and prospective conditions of supply and demand and recommended a quantity of lemons deemed advisable to be handled during the specified week. The committee reports the demand for lemons is good.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until 30 days after publication in the **Federal Register** (5 U.S.C. 553), because of insufficient time between the date when information became available upon which this regulation is based and the effective date necessary to effectuate the declared purposes of the act. Interested persons were given an opportunity to submit information and views on the regulation at an open meeting. It is necessary to effectuate the declared purposes of the act to make these regulatory provisions effective as specified, and handlers have been apprised of such provisions and the effective time.

In accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3507), the reporting or recordkeeping provisions that are included in this final rule have been submitted for approval to the Office of Management and Budget (OMB). They are not effective until OMB approval has been obtained.

PART 910—LEMONS GROWN IN CALIFORNIA AND ARIZONA

Section 910.639 is added as follows:

§ 910.639 Lemon Regulation 339.

The quantity of lemons grown in California and Arizona which may be handled during the period December 27, 1981, through January 2, 1982, is established at 240,000 cartons.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: December 23, 1981.

D. S. Kuryloski,

Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc. 81-37007 Filed 12-23-81; 12:10 pm]

BILLING CODE 3410-02-M

Animal and Plant Health Inspection Service

9 CFR Part 92

[Docket No. 81-095]

Specifically Approved States To Receive Mares Imported From CEM-Affected Countries

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Interim rule.

SUMMARY: This document adds the States of Kentucky and Virginia to the list of specifically approved States authorized to receive certain mares imported into the United States from countries affected with contagious equine metritis (CEM).

This action is being taken because the Deputy Administrator of Veterinary Services, Animal and Plant Health Inspection Service, has determined that Kentucky and Virginia have laws or regulations in effect to require the additional quarantine, treatment and testing of such mares to further ensure their freedom from CEM as required by the regulations.

DATES: Effective date December 18, 1981. Comments must be received on or before February 22, 1982.

ADDRESS: Written comments to Deputy Administrator, USDA, APHIS, VS, Room 870, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782.

FOR FURTHER INFORMATION CONTACT: Dr. Mark Dulin, USDA, APHIS, VS, Room 818, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, 301–436–8170.

SUPPLEMENTARY INFORMATION:

Executive Order 12291 And Emergency Action

This action has been reviewed in conformance with Executive Order 12291 and Secretary's Memorandum 1512–1, and has been determined to be not a "major rule." The Department has determined that this action will not have a significant annual effect on the economy, will not cause a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; and will not have any adverse effects on competition, employment, investment, productivity, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. The emergency nature of this interim action makes it impracticable to follow the procedures of Executive Order 12291 with respect to this interim rule.

Dr. M. J. Tillery, Director, National Program Planning Staffs, VS, APHIS, USDA, has determined that an emergency situation exists which warrants publication without prior opportunity for a public comment period on this interim action. This amendment relieves restrictions presently imposed on mares over 731 days of age being imported into the United States, and should be made effective immediately in order to permit affected persons to move these mares into the United States without unnecessary restrictions.

Therefore, pursuant to the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to this emergency interim action is impracticable, unnecessary and contrary to the public interest, and good cause is found for making this emergency interim action effective less than 30 days after publication of this document in the **Federal Register.** Comments have been solicited for 60 days after publication of this document, and this emergency interim action will be scheduled for review so that a final document discussion comments received and any amendments required can be published in the **Federal Register** as soon as possible.

Certification Under the Regulatory Flexibility Act

Dr. Harry C. Mussman, Administrator of the Animal and Plant Health Inspection Service, has determined that this action will not have a significant

economic impact on a substantial number of small entities. This action will lift restrictions that were imposed in the fall of 1977 on the importation of certain horses from France, Ireland, and the United Kingdom, as well as restrictions added later on Australia, Belgium, Italy, the Federal Republic of Germany, Japan, Austria, and Denmark. It is anticipated that betwen 30 and 100 importers will consign approximately 300 mares over 731 days of age from CEM affected countries annually to the States of Kentucky and Virginia. This compares with 14,680 horses of all classes imported into the United States during Fiscal Year 1980.

To the best of our knowledge, through the years the number of small entities involved in the importation of mares from the countries involved has been extremely limited because of factors such as the number of animals sold; stallion fees ranging from $5,000 to $50,000; stallions syndicated up to $32,000,000 and the international operations involved. The average cost to import a horse from overseas is from $5,000 to $7,000, including preembarkation testing and treatment, the cost of transportation and post entry quarantine.

Background

On Friday, October 16, 1981, there was published in the **Federal Register** (46 FR 50930–50937) amendments to 9 CFR Part 92 which, among other things, authorized the importation of mares over 731 days of age into the United States from countries affected with CEM when specific requirements to prevent their introducing CEM into the United States are met. Further, these amendments require that such imported mares be consigned to States which have been approved by the Deputy Administrator, Veterinary Services, as having met the minimum standards believed necessary to ensure that such mares being imported into the United States are free of the contagion of CEM. These minimum standards are set forth in § 92.4(a)(9) of the regulations. The Deputy Administrator, Veterinary Services, has determined that the States of Kentucky and Virginia have met the minimum standards believed necessary to ensure that mares over 731 days of age being imported into the United States from countries affected with CEM are free of the contagion of CEM. Therefore, § 92.4(a)(8)(ii) is amended to list the States of Kentucky and Virginia as approved to receive mares over 731 days of age from CEM affected countries.

Alternatives

The alternatives considered in making this decision were (1) not to list Kentucky and Virginia as States approved to receive mares over 731 days of age from CEM affected countries, and (2) to make the change set forth in this document.

Alternative No. 1 would prohibit the consignment of mares over 731 days of age from CEM affected countries to the States of Kentucky and Virginia. This alternative was not adopted because the Deputy Administrator, Veterinary Services, has determined that Kentucky and Virginia have met the minimum standards necessary to ensure that such mares are free of the contagion of CEM. The continued prohibition on consignment to the States of Kentucky and Virginia would, therefore, constitute an unnecessary restriction on the importation of such mares.

Alternative No. 2 would allow for the consignment of mares over 731 days of age from CEM affected countries to the States of Kentucky and Virginia. This alternative was adopted because the Deputy Administrator, Veterinary Services, has determined that the States of Kentucky and Virginia have met the minimum standards necessary to ensure that such mares are free of the contagion of CEM.

PART 92—IMPORTATION OF CERTAIN ANIMALS AND POULTRY AND CERTAIN ANIMAL AND POULTRY PRODUCTS; INSPECTION AND OTHER REQUIREMENTS FOR CERTAIN MEANS OF CONVEYANCE AND SHIPPING CONTAINERS THEREON

Accordingly, Part 92, Title 9, Code of Federal Regulations, is amended by revising § 92.4(a)(8)(ii) as follows:

§ 92.4 Import permits for ruminants, swine, horses from countries affected with CEM, poultry, poultry semen, animal semen, birds, and for animal specimens for diagnostic purposes.[1]

(a) * * *

(8) * * *

(ii) The following States have been approved to receive mares over 731 days of age pursuant to § 92.2(i)(2)(v):

The State of Kentucky
The State of Virginia

* * * * *

(Sec. 2, 32 Stat. 792, as amended, sec. 306, 46 Stat. 689, as amended, secs. 2, 4, 71, 76 Stat. 129, 130, 132; 19 U.S.C. 1306, 21 U.S.C. 111, 134a, 134c, 134f; 37 FR 28464, 28477; 38 FR 19141)

All written submissions made pursuant to this interim rule will be made available for public inspection at the Federal Building, Room 870, Hyattsville, MD, during regular hours of business (8 a.m. to 4:30 p.m., Monday to Friday, except holidays) in a manner convenient to the public business (7 CFR 1.27(b)).

Comments submitted should bear a reference to the date and page number of this issue in the **Federal Register**.

Done at Washington, D.C., this 10th day of December, 1981.

J. K. Atwell,

Deputy Administrator, Veterinary Services.

BILLING CODE 3410-34-M

NUCLEAR REGULATORY COMMISSION

10 CFR Part 40

Clarification of Exemption for Uranium Shielding in Shipping Containers

AGENCY: Nuclear Regulatory Commission.

ACTION: Final rule.

SUMMARY: The Nuclear Regulatory Commission is amending its regulations concerning the domestic licensing of source material to clarify the conditions for exemption of uranium used as shielding in shipping containers. The amendment replaces a reference to a group of container specifications in a former section in Department of Transportation regulations by a statement of the single specification for encasement of the uranium. This single specification was obtained from the deleted section of DOT regulations. This clarification pertains to the authorization for possession and use of the uranium shielding under an existing NRC exemption from regulatory requirements and has no effect on transportation regulations.

EFFECTIVE DATE: December 24, 1981.

FOR FURTHER INFORMATION CONTACT: Mr. Donald O. Nellis, Office of Nuclear Regulatory Research, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Telephone: 301/443–5825.

SUPPLEMENTARY INFORMATION: The Nuclear Regulatory Commission is amending its rules to clarify the exemption from regulatory requirements of uranium used as shielding in shipping containers. The amendment pertains only to the exemption provided in § 40.13(c)(6) of NRC regulations for the receipt, possession, use or transfer of uranium shielding in shipping containers. The amendment has no effect on NRC requirements in 10 CFR

Part 71 for packaging and transportation of radioactive material.

Background

In 1961 the U.S. Atomic Energy Commission amended its regulations to provide an exemption from its licensing requirements for uranium used as shielding in shipping containers. In establishing the exemption, the Commission considered it desirable to require cladding of the uranium so as to reduce surface radiation levels and contain any uranium oxidation products. Accordingly, a requirement for cladding the uranium was included by reference to a set of shipping container requirements then in the U.S. Interstate Commerce Commission (a predecessor of the Department of Transportation) transportation regulations.

Although considered convenient at the time, this particular reference in the U.S. AEC (now NRC) regulations of a section from another federal agency's regulations has been a source of administrative inconvenience. Over the years, changes in the referenced section of the ICC regulations (e.g., changing the name of the agency and the section number) and, more recently, deletion of the entire section from DOT regulations, have caused questions about the applicability of 49 CFR 178.250 of DOT regulations to the exemption in § 40.13(c)(6).

The Regulation

The amendment of § 40.13(c)(6) will replace the reference to the set of shipping container requirements that were contained in 49 CFR 178.250 of DOT regulations by a single requirement which has been selected from that set. This single requirement for minimum cladding of the uranium shielding constitutes no substantive change from the expected cladding when the entire § 178.250 was incorporated by reference.

This change to § 40.13(c)(6) is a nonsubstantive amendment. It is intended to clarify an essential requirement for exempt use of uranium shielding in shipping containers.

This final rule contains no new or amended requirements for recordkeeping, reporting, plans or procedures, applications, or any other type of information collection.

Since the following amendment clarifies an ambiguity existing in the NRC's regulations without imposing any additional substantive requirement, the Commission has determined that good cause exists for omitting notice of proposed rulemaking and public procedure thereon as unnecessary. For these same reasons, the Commission has found that good cause exists for making the amendment effective immediately upon publication in the **Federal Register.**

Pursuant to the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974, as amended, and sections 552 and 553 of title 5 of the United States Code, the following amendment to Title 10, Chapter I, Code of Federal Regulations, Part 40, is published as a document subject to codification.

PART 40—DOMESTIC LICENSING OF SOURCE MATERIAL

1. The authority citation for 10 CFR Part 40 is revised to read as follows:

Authority: Secs. 62, 63, 64, 65, 81, 161, 182, 183, 186, 68 Stat. 932, 933, 935, 948, 953, 954, 955, as amended, secs. 83, 84, 92 Stat. 3033, as amended, 3039, sec. 234, 83 Stat. 444, as amended, (42 U.S.C. 2092, 2093, 2094, 2095, 2111, 2113, 2114, 2201, 2232, 2233, 2236, 2282); secs. 202, 206, 88 Stat. 1244, 1246, (42 U.S.C. 5842, 5846) unless otherwise noted.
Section 40.31(g) also issued under sec. 122, 68 Stat. 939 (42 U.S.C. 2152). Section 40.46 also issued under sec. 184, 68 Stat. 954, as amended (42 U.S.C. 2234).
For the purposes of sec. 223, 68 Stat. 958, as amended, (42 U.S.C. 2273), §§ 40.3, 40.25(d)(1)–(3), 40.35(a)–(d), 40.41(b) and (c), 40.46, 40.51(a) and (c) and 40.63 are issued under sec. 161b, 68 Stat. 948, as amended, (42 U.S.C. 2201(b)); and §§ 40.25(c) and (d)(3) and (4), 40.26(c)(2), 40.35(e), 40.41(f), 40.61, 40.62, 40.64, and 40.65 are issued under sec. 161o, 68 Stat. 950, as amended, (42 U.S.C. 2201(o)).

2. Section 40.13(c)(6) is revised to read as follows:

§ 40.13 Unimportant quantities of source material.

* * * * *

(c) * * *

(6) Natural or depleted uranium metal used as shielding constituting part of any shipping container: *Provded,* That:

(i) The shipping container is conspicuously and legibly impressed with the legend "CAUTION—RADIOACTIVE SHIELDING—URANIUM,"; and

(ii) The uranium metal is encased in mild steel or equally fire resistant metal of minimum wall thickness of one-eighth inch (3.2 mm).

BILLING CODE 7590-01-M

FEDERAL RESERVE SYSTEM

12 CFR Part 217

[Docket No. R-0379]

Interest on Deposits; Regulation Q; Technical Amendments

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Technical amendments.

SUMMARY: Pursuant to its authority under section 19 of the Federal Reserve Act, as amended, the Board has amended Regulation Q (Interest on Deposits) to incorporate the rules of the Depository Institutions Deregulation Committee ("DIDC"), adopted pursuant to the Depository Institutions Deregulation Act of 1980 (Title II of Pub. L. 96–221). The amendments to Regulation Q are technical and conform the Board's rules to those of the DIDC.

EFFECTIVE DATE: December 16, 1981.

FOR FURTHER INFORMATION CONTACT: Gilbert T. Schwartz, Associate General Counsel (202/452–3625), Paul S. Pilecki, Senior Attorney (202/452–3281), or Beverly A. Belcamino, Attorney (202/452–3623), Legal Division, Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

SUPPLEMENTARY INFORMATION: The Depository Institutions Deregulation Act of 1980 (Title II of Pub. L. 96–221) transfers to the DIDC the authority conferred by section 19(j) of the Federal Reserve Act (12 U.S.C. 371b) upon the Board (and the similar authority of the Federal Deposit Insurance Corporation and the Federal Home Loan Bank Board which are contained in other statutes) to prescribe rules relating to the payment of interest on deposits. The DIDC has issued final regulations and amendments to existing rules as follows: (1) Time deposits of less than $100,000 with maturities of 2½ years to less than 4 years (12 CFR 1204.106; 46 FR 20155 and 37020); (2) ceiling rates for 26-week money market time deposits (12 CFR 1204.104; 46 FR 20155, 51897 and 55507); (3) qualified tax-exempt savings certificates (12 CFR 1204.116; 46 FR 45121); and (4) new IRA/Keogh time deposits (12 CFR 1204.118; 46 FR 53395 and 58285). In view of these actions by the DIDC, the Board is amending Regulation Q to incorporate these changes.

The following table presents the provisions of Regulation Q that have been amended by the DIDC's actions.

TABLE OF REGULATION Q CHANGES

	DIDC Rule	Regulation Q provision affected
1204.104	Ceiling rates for 26-week money market certificates.	217.7(f).
1204.106	Time deposits of less than $100,000 with maturities of 2½ years to less than 4 years.	217.7(g).
1204.116	Qualified tax-exempt savings certificates.	217.7(b), 217.3(a), 217.7(g) (new paragraph).
1204.118	IRA/Keogh time deposits.	217.7(e).

Because these amendments are necessary to conform the Board's rules to those of the DIDC, the Board for good cause finds that the notice, public procedure, and deferral of effective date provisions of 5 U.S.C. 553 (b) and (d) with regard to this action are unnecessary and contrary to the public interest.

PART 217—INTEREST ON DEPOSITS

Pursuant to the Board's authority under section 19 of the Federal Reserve Act (12 U.S.C. 461, 371b) to prescribe rules to effectuate the purposes of that section and to prevent evasions thereof, Regulation Q, 12 CFR Part 217, is amended as follows:

1. Section 217.3 (12 CFR 217.3) is amended by revising paragraph (a) to read as follows:

§ 217.3 Interest on time and savings deposit.

(a) *Maximum rate.* Except as provided in this section, no member bank shall, directly or indirectly, by any device whatsoever, pay interest on any time or savings deposit at a rate in excess of such applicable maximum rate as the Board of Governors of the Federal Reserve System shall prescribe from time to time in § 217.7. Except as provided in § 217.7(i), in ascertaining the rate of interest paid, the effects of compounding of interest may be disregarded. The maximum rate of interest that may be paid by a member bank on an additional deposit to any existing time deposit shall not exceed the maximum rate that may be paid in accordance with § 217.7 on the date the additional deposit is made.

* * * * *

2. Section 217.7 (12 CFR 217.7) is amended by revising paragraph (b) to read as follows:

§ 217.7 Maximum rates of interest payable by member banks on time and savings deposits.

* * * * *

(b) *Fixed-ceiling time deposits of less than $100,000.* Except as provided in paragraphs (a), (d), (e), (f), (g), and (i), no member bank shall pay interest on any time deposit at a rate in excess of the applicable rate under the following schedule:

Maturity	Maximum per cent
14 days or more but less than 90 days	5¼
90 days or more but less than 1 year	5½
1 year or more but less than 2-½ years	8¼
2-½ years or more but less than 4 years	8½
4 years or more but less than 6 years	7½
6 years or more but less than 8 years	7¾
8 years or more	7¾

* * * * *

3. Section 217.7 (12 CFR 217.7) is amended by revising paragraph (e) to read as follows:

* * * * *

(e) *Individual Retirement Account and Keogh (H.R. 10) Plan deposits of less than $100,000.* (1) Except as provided in paragraphs (a), (e) (2), and (g) of this section, a member bank may pay interest on any time deposit with a maturity of three years or more that consists of funds deposited to the credit of, or in which the entire beneficial interest is held by, an individual pursuant to an Individual Retirement Account agreement or Keogh (H.R. 10) Plan established pursuant to 26 U.S.C. (I.R.C. 1954) 219, 401, 404, 408 and related provisions at a rate not in excess of 8 percent.[2]

(2) A member bank may pay interest at any rate as agreed to by the depositor on any time deposit with a maturity of one and one-half years or more, that consists of funds deposited to the credit of, or in which the entire beneficial interest is held by, an individual pursuant to an Individual Retirement Account agreement or Keogh (H.R. 10) Plan established pursuant to 26 U.S.C. (I.R.C. 1954) 219, 401, 404, 408 and related provisions. An institution may permit additional deposits to be made to such a time deposit at any time prior to its maturity without extending the maturity of all or a portion of the entire balance in the account.

* * * * *

4. Section 217.7 (12 CFR 217.7) is amended by revising paragraph (f) to read as follows:

* * * * *

(f) *26-week money market time deposits of less than $100,000.* Except as provided in paragraphs (a), (b) and (d) of this section, a member bank may pay interest on any nonnegotiable time deposit of $10,000 or more, with a maturity of 26 weeks, at a rate not to exceed the ceiling rates set forth below. The ceiling rate shall be based on the higher of either (1) The rate established and announced (auction average on a discount basis) for U.S. Treasury bills with maturities of 26 weeks at the auction held immediately prior to the date of deposit ("Bill Rate"), or (2) the average of the four rates established and announced (auction average on a discount basis) for U.S. Treasury bills with maturities of 26 weeks at the four auctions held immediately prior to the date of deposit ("Four-Week Average Bill Rate"). Rounding any rate to the next higher rate is not permitted and interest may not be compounded during the term of this deposit.

Bill rate or 4-week average bill rate	Interest rate ceiling
7.50 percent or below	7.75 percent.
Above 7.50 percent	One-quarter of one percentage point plus the higher of the bill rate or 4-week average bill rate.

A member bank may offer this category of time deposit to all depositors. However, a member bank may pay interest on any nonnegotiable time deposit of $10,000 or more with a maturity of 26 weeks which consists of funds deposited to the credit of, or in which the entire beneficial interest is held by:

(1) The United States, any state of the United States, or any county, municipality or political subdivision thereof, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, American Samoa, Guam, or political subdivision thereof; or

(2) An individual pursuant to an Individual Retirement Account agreement or Keogh (H.R. 10) Plan established pursuant to 26 U.S.C. (I.R.C. 1954) 219, 401, 404, 408 and related provisions at a rate not to exceed the ceiling rate payable on the same category of deposit by any Federally insured savings and loan association or mutual savings bank.[3]

* * * * * *

5. Section 217.7 (12 CFR 217.7) is amended by revising paragraph (g) to read as follows:

* * * * *

(g) *Time deposits of less than $100,000 with maturities of 2½ years to less than 4 years.* Except as provided in paragraphs (a), (b), (d), and (e) of this section, a member bank may pay

[2] * * *

[3] * * *

interest on any nonnegotiable time deposit with an original maturity of 2½ years to less than four years at a rate not to exceed the higher of one-quarter of one percent below the average 2½ year yield for U.S. Treasury securities as determined and announced by the U.S. Department of the Treasury immediately prior to the date of deposit, or 9.25 percent. Such announcement is made by the U.S. Department of the Treasury every two weeks. The average 2½ year yield will be rounded by the U.S. Department of the Treasury to the nearest 5 basis points. The rate paid on any such deposit cannot exceed the ceiling rate in effect on the date of deposit. A member bank may offer this category of time deposit to all depositors. However, a member bank may pay interest on any nonnegotiable time deposit with a maturity of 2½ years to less than 4 years which consists of funds deposited to the credit of, or in which the entire beneficial interest is held by:

(1) The United States, any state of the United States, or any county, municipality or political subdivision thereof, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, American Samoa, Guam, or political subdivision thereof; or

(2) An individual pursuant to an Individual Retirement Account agreement or Keogh (H.R. 10) Plan established pursuant to 26 U.S.C. (I.R.C. 1954) 219, 401, 404, 408 and related provisions at a rate not to exceed the ceiling rate payable on the same category of deposit by any Federally insured savings and loan association or mutual savings bank.[4]

* * * * *

6. Section 217.7 (12 CFR 217.7) is amended by adding a new paragraph (i) as follows:

* * * * *

(i) *Tax-exempt savings certificate.* (1) A member bank may pay interest on a nonnegotiable tax-exempt savings certificate ("ASC") provided that the time deposit has an original maturity of exactly one year, is available in denominations of $500 and any other denomination, at the discretion of the member bank, and has an annual investment yield to maturity equal to 70 percent of the average investment yield for the most recent auction of 52-week U.S. Treasury bills prior to the calendar week in which the ASC is issued.[5]

(2) A member bank must provide each depositor the following notice, in a form that the depositor may retain at the time of opening a deposit under this paragraph:

The Economic Recovery Tax Act of 1981 authorizes a lifetime exclusion from gross income for federal income tax purposes of up to $1,000 ($2,000 in the case of a joint return) for interest on tax-exempt savings certificates. Regardless of how much interest is earned on this or any other tax-exempt savings certificate, including interest earned on such certificates from other institutions, and regardless of during which taxable years that interest is earned, no more than a total of $1,000 ($2,000 in the case of a joint return) can be excluded from federal gross income for all taxable years. Furthermore, interest earned on a specific certificate cannot be excluded from federal gross income if (A) that certificate is used as collateral for any loan, or (B) any part of the principal of that certificate is redeemed or disposed of prior to maturity.

(3)(i) A member bank may not issue ASCs after March 31, 1982, under this paragraph unless an executive officer of the member bank certifies, in a form determined by the member bank, that the member bank has complied with the "qualified residential financing" requirement set out in 26 U.S.C. 128. The certification must be maintained by the member bank in its files and must be available to the member bank's primary supervisory agency upon request. The certification shall include appropriate supporting documentation, as determined by the member bank.

(ii) A member bank issuing ASCs during any calendar quarter must use at least 75 percent of the lesser of:

(A) The proceeds from ASCs issued during a calendar quarter, or

(B) "Qualified net savings," to provide "qualified residential financing" by the end of the subsequent calendar quarter and may not issue additional ASCs unitl the 75 percent requirement is satisfied.

(iii) For purposes of determining compliance with the "qualified residential financing" requirement, the following applies:

(A) The term "qualified net savings" includes interest or dividends credited to deposit accounts;

(B) The amount of "qualified residential financing" is to be determined net of repayment of principal and paydowns, but sales of such assets may not be netted;

(C) The term "any loan for agricultural purposes" is defined to have the same meaning as items described in the instructions to the Report of Condition of all Insured Commercial Banks, schedule A, item 4 "Loans to Finance Agricultural Production and Other Loans to Farmers," and schedule A, item 1(b) "Real Estate Loans Secured by Farmland," and

(D) "Qualified residential financing" includes a firm commitment to purchase any assets eligible for such investment.

(iv) If a member bank provides for automatic renewal of an ASC, depositors must be notified in writing at least 15 days in advance of the maturity of an ASC in the event the member bank cannot renew the ASC because of its failure to satisfy the residential financing requirement. Failure to give such notice shall not result in automatic renewal of the ASC.

(v) This paragraph (i) expires January 1, 1983.

By order of the Board of Governors of the Federal Reserve System, December 17, 1981.

William W. Wiles,

Secretary of the Board.

BILLING CODE 6210-01-M

---

[4] * * *

[5] When institutions credit interest more frequently than annually, the computation of interest must be adjusted to reflect the effects of compounding so that the annual investment yield to the depositor remains at the rate stipulated by law. Specifically, the formula used to derive the nominal interest rate at which interest can be credited is as follows:

$I=[(1=c/100^{d/365}]-1$

$r=100\times(365/d)\times I$

where: c = the annual investment yield required to be paid on the ASCs (in percent per annum)

D = the average number of days in a compounding period (365-day year)

I = the amount of interest earned during a (365-day year) compounding period per dollar in the account at the beginning of the period.

r = the correspondeing nominal rate of interest (365-day basis, in percent per annum)

For institutions using continuous compounding, the nominal interest rate would be defined as: $r=100\ [1n\ (1+(c/100))]$, where "ln" signifies the natural logarithm of the expression that follows it.

Federal Aviation Administration

14 CFR Part 39

[Airworthiness Docket No. 81-ASW-65; Amdt. 39-4284]

Airworthiness Directives; Swearingen Model SA226-T, SA226-AT and SA226-TC Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD) for Swearingen Model SA226-T, SA226-AT, and SA226-TC airplanes. This AD requires installation of cable guards and retainers in each control column. This AD is needed to correct an unsafe condition that could result in loss of

lateral control, and subsequent loss of the airplane.

DATE: Effective December 31, 1981.

Compliance required as prescribed in the body of the AD.

ADDRESSES: The applicable service information may be obtained from the Director of Product Support, Fairchild Swearingen Corporation, P.O. Box 32486, San Antonio, Texas 78284.

These documents may be examined at the Office of the Regional Counsel, Southwest Region, Federal Aviation Administration, 4400 Blue Mound Road, Fort Worth, Texas, or at the Rules Docket in Room 916, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C.

FOR FURTHER INFORMATION CONTACT:

William A. Simmons, Airframe Branch, Aircraft Certification Division, ASW-120, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Texas 76101, telephone number (817) 624-4911, extension 516.

SUPPLEMENTARY INFORMATION: There has been a failure of the control column cable pulley system and subsequent loss of lateral control on a Swearingen airplane. The FAA has determined that this is an unsafe condition which is likely to exist or develop on other airplanes of the same control column cable pulley type design. The AD requires installation of cable guards and retainers in each control column so that the control cables cannot disengage from the control pulleys. Fairchild Swearingen Service Bulletin SB27-022 issued January 5, 1979, refers to the installation of cable guards and retainers in each control column.

Since a situation exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than 30 days.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new airworthiness directive:

Swearingen: Applies to Swearingen Model SA226-T, S/N T201 through T290; SA226-AT, S/N AT001 through AT066; SA226-TC, S/N TC201 through TC255 airplanes certified in all categories. Compliance required within the next 50 hours' time in service after the effective date of this AD but not later than January 15, 1982. Accomplishment of Fairchild Swearingen Service Bulletin SB27-022 issued January 5, 1979, satisfies the requirements of this AD (Airworthiness Docket No. 81-ASW-65).

To prevent disengagement of the control cables from the control pulleys install cable guards and retainers in each control column in accordance with Fairchild Swearingen Service Bulletin SB27-022 issued January 5, 1979, or an equivalent means approved by the Chief, Aircraft Certification Division, FAA, Southwest Region.

A special flight permit may be issued in accordance with FAR 21.197 to allow flight of the aircraft to a location where this AD can be accomplished.

This amendment becomes effective December 31, 1981.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.89)

Note.—The FAA has determined that this regulation is an emergency regulation that is not major under Section 8 of Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this document involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979). If this action is subsequently determined to involve a significant regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation is not required). A copy of it, when filed, may be obtained by contacting the person identified under the caption "For Further Information Contact."

This rule is a final order of the Administrator under the Federal Aviation Act or 1958, as amended. As such, it is subject to review only by the various courts of appeals of the United States, or the United States Court of Appeals for the District of Columbia.

Issued in Fort Worth, Texas, on December 11, 1981.

F. E. Whitfield,

Acting Director, Southwest Region.

[FR Doc. 81-36879 Filed 12-23-81; 8:45 am]

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 22094; Amdt. 39-4287]

Airworthiness Directive; Airbus Industrie Model A300 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD) that requires repetitive inspections for cracks of rear cargo door frames, and replacement of the frames as necessary, on Airbus Industrie Model A300 series airplanes. This AD is needed to detect cracks which could result in failure of the frames causing depressurization, structural damage and possible loss of the airplane.

DATE: Effective January 25, 1982. Compliance schedule—as prescribed in the body of the AD.

ADDRESSES: The applicable service bulletins may be obtained from: Airbus Industrie, Airbus Support Division, BP 33, 31700 Blagnac, France.

A copy of each service bulletin is contained in the Rules Docket, Room 916, 800 Independence Avenue, SW., Washington, D.C. 20591 and is filed with the original document.

FOR FURTHER INFORMATION CONTACT:

C. Christie, Chief, Aircraft Certification Staff, AEU-100, Europe, Africa and Middle East Office, FAA, c/o American Embassy, Brussels, Belgium, telephone: 513.38.30 or C. Chapman, Acting Chief, Technical Standards Branch, AWS-110, FAA, 800 Independence Avenue, SW., Washington, DC 20591, telephone: 202-426-8192.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations to include an airworthiness directive to require repetitive inspections for cracks of rear cargo door frames, and replacement of the frames as necessary, on Airbus Industrie Model A300 series airplanes, was published in the **Federal Register** at 46 FR 42280. Since all Airbus Model A300 series airplanes on the U.S. registry are currently being inspected in accordance with Airbus Service Bulletin No. A300-53-108, or have been modified in accordance with Airbus Service Bulletin No. A300-53-109, no immediate safety hazard existed, and time permitted promulgation of this AD by public notice to make it applicable to those airplanes currently on the registry as well as all future airplanes that may be entered on the U.S. aircraft registry.

The proposal was prompted by reports of cracks in the flanges of the rear cargo compartment door frames 67 and 69 found during routine inspections on Airbus Industrie Model A300 series airplanes. Closer examination revealed corrosion attributed to the stresses induced in the frames during installation of titanium rivets. These cracks could cause failure of the frames resulting in depressurization, structural damage, and possible loss of the airplane. Since this condition is likely to exist or develop on other airplanes of the same type design, the AD requires repetitive inspections of rear cargo door frames 67 and 69 for cracks in the external and internal flanges, and replacement of the frames

as necessary, on Airbus Industrie Model A300 series airplanes.

Interested persons have been afforded an opportunity to participate in the making of this amendment. No objections were received. Accordingly, the proposal is adopted without change.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new airworthiness directive:

Airbus Industrie: Applies to Model A300 series airplanes, certificated in all categories.

Compliance is required as indicated, unless already accomplished.

To prevent failure of the aft cargo door frames 67 and 69, accomplish the following:

(a) Within the next 550 hours time in service after the effective date of this AD, unless already accomplished within the last 1450 hours time in service, inspect the rear cargo compartment door frame external flanges in accordance with paragraph 2.B.(1) of Airbus Industrie A300 Service Bulletin A300–53–108, Revision 1, dated October 15, 1979 (hereinafter referred to as the Service Bulletin), or an FAA-approved equivalent.

(b) If no cracks are found during the inspection required by paragraph (a) of this AD:

(1) The airplane may be returned to service; and

(2) Repeat the inspection in paragraph (a) of this AD at intervals not to exceed 2000 hours time in service from the last inspection.

(c) If, during the inspection required by paragraph (a) of this AD, the total number of cracks found does not exceed 5, or the total length of all cracks found does not exceed 2 inches:

(1) The airplane may be returned to service; and

(2) Repeat the inspection in paragraph (a) of this AD at intervals not to exceed 550 hours time in service from the last inspection.

(d) If, during the inspection required by paragraph (a) of this AD, the total number of cracks found exceeds 5, or the total length of all cracks found exceeds 2 inches, inspect the adjacent internal flange on the forward side of frame 67 and the aft side of frame 69 in accordance with paragraph 2.B(2)(b) of the Service Bulletin, or an FAA-approved equivalent.

(e) If no cracks are found on the internal flanges during the inspection required by paragraph (d) of this AD:

(1) The airplane may be returned to service; and

(2) Repeat the inspections in paragraphs (a) and (d) of this AD at intervals not to exceed 550 hours time in service from the last inspection.

(f) If, during inspection of the internal flanges required by paragraph (d) of this AD, the total number of cracks found does not exceed 5, or the total length of all cracks does not exceed 2 inches:

(1) The airplane may be returned to service; and

(2) Repeat the inspections in paragraphs (a) and (d) of this AD at intervals not to exceed 200 hours time in service from the last inspection.

(g) If, during the inspection of the internal flanges required by paragraph (d) of this AD, the total number of cracks found exceeds 5, or the total length of all cracks exceeds 2 inches, before further flight, except as provided in paragraph (i) of this AD, replace the frame in accordance with paragraph 2, "Accomplishment Instructions," of Airbus Industrie A300 Service Bulletin A300–53–109, Revision 4, dated April 25, 1980, or an FAA-approved equivalent.

(h) The inspections and repetitive inspections required by this AD may be discontinued when rear cargo door frames 67 and 69 have been replaced in accordance with Airbus Industrie A300 Service Bulletin A300–53–109, Revision No. 4, dated April 25, 1980, or an FAA-approved equivalent.

(i) In accordance with FAR §§ 21.197 and 21.199 the airplane may be flown to a base where the maintenance required by this AD may be accomplished.

(j) If an equivalent means of compliance is used in complying with this AD, that equivalent means must be approved by the Chief, Aircraft Certification Staff, AEU–100, Europe, Africa and Middle East Office, Federal Aviation Administration, c/o American Embassy, Brussels, Belgium.

(k) Upon submission of substantiating data, through an FAA Aviation Safety Inspector, the Chief, Aircraft Certification Staff, FAA, Europe, Africa, and Middle East Office, c/o American Embassy, Brussels, Belgium, may adjust the inspection intervals.

All persons affected by this directive who have not already received these documents from the manufacturer may obtain copies upon request to Airbus Industrie, Airbus Support Division, BP 33, 31700 Blagnac, France. These documents may be examined at FAA Headquarters, Room 916, 800 Independence Avenue, SW., Washington, D.C. 20591.

This amendment becomes effective January 25, 1982.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.89)

Note.—The Federal Aviation Administration has determined that this document involves a regulation which is not considered to be major under the provisions of Executive Order 12291 or significant under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979) and certifies that the rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act since it involves inspections and repairs on only a few aircraft owned by small entities. A final evaluation has been prepared for this regulation and has been placed in the docket. A copy of it may be obtained by contacting the person identified under the caption "FOR FURTHER INFORMATION CONTACT."

This rule is a final order of the Administrator under the Federal Aviation Act of 1958, as amended. As such, it is subject to review only by the courts of appeals of the United States, or the United States Court of Appeals for the District of Columbia.

Issued in Washington, D.C., on December 15, 1981.

M. C. Beard,

Director of Airworthiness.

[Airspace Docket No. 81-ASW-53]

Alteration of Transition Area; Camden, AR

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment will alter the transition area at Camden, AR. The intended effect of the amendment is to provide adequate controlled airspace for aircraft executing instrument approach procedures to the Harrell Field Airport, Camden, AR. This amendment is necessary since a review of the controlled airspace revealed that additional airspace is required for the protection of aircraft executing instrument approach procedures to the airport.

EFFECTIVE DATE: March 18, 1982.

FOR FURTHER INFORMATION CONTACT:
James L. Owens, Airspace and Procedures Branch (ASW–536), Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, TX 76101, telephone (817) 624–4911, extension 302.

SUPPLEMENTARY INFORMATION: On October 26, 1981, a notice of proposed rulemaking was published in the **Federal Register** (46 FR 52122) stating that the Federal Aviation Administration proposed to alter the Camden, AR, transition area. Interested persons were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the Federal Aviation Administration. Comments were received without objections. Except for editorial changes, this amendment is that proposed in the notice.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, by the Administrator, Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (46 FR 540) is amended in

§ 71.181 as follows, effective 0901 GMT, March 18, 1982, as follows:

Camden, AR

That airspace extending upward from 700 feet above the surface within a 6.5-mile radius of Camden, AR, Harrell Field Airport (latitude 33°37'15" N., longitude 92°45'45" W.) and within 3.5-miles each side of the El Dorado, AR, VORTAC 357° radial, extending from the 6.5-mile radius area to 13 miles north of the VORTAC, and within 3 miles each side of the 012° magnetic bearing from the Camden Nondirectional Radio Beacon (NDB) (latitude 33°37'15" N., longitude 92°45'45" W.) extending from the 6.5-mile radius area to 8.5 miles north of the NDB.

(Sec. 307(a), Federal Aviation Act of 1958, as amended (49 U.S.C. 1348(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.61(c))

Note.—The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 1103; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal.

Issued in Fort Worth, TX, on December 15, 1981.

F. E. Whitfield,

Acting Director, Southwest Region.

[Airspace Docket No. 81-ASW-55]

Alteration of Control Zones; Abilene, TX

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment will alter the control zones at Abilene, TX. The intended effect of the amendment is to provide adequate controlled airspace for aircraft executing instrument approach procedures to the Dyess AFB and Abilene Municipal Airports. This amendment is necessary because a review of the controlled airspace disclosed that in some instances excessive airspace was being provided and in other instances controlled airspace was inadequate to protect aircraft executing instrument approaches to the Dyess AFB and Abilene Municipal Airports.

EFFECTIVE DATE: March 18, 1982.

FOR FURTHER INFORMATION CONTACT: James L. Owens, Airspace and Procedures Branch (ASW-536), Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, TX 76101, telephone (817) 624-4911, extension 302.

SUPPLEMENTARY INFORMATION: On October 29, 1981, a notice of proposed rulemaking was published in the **Federal Register** (46 FR 53432) stating that the Federal Aviation Administration proposed to alter the Abilene, TX, control zones. Interested persons were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the Federal Aviation Administration. Comments were received without objections. Except for editorial changes, this amendment is that proposed in the notice.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, Subpart F of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (46 FR 540) is amended in § 71-171 as follows, effective 0901 GMT, March 18, 1982, as follows:

Abilene, TX

Abilene, TX (Municipal Airport)

Within a 5-mile radius of Abilene Municipal Airport (latitude 32°24'42"N., longitude 99°40'53"W.); within 2.5 miles each side of the Abilene ILS localizer south course extending from the 5-mile radius area to 7.5 miles south of the airport; within 2 miles each side of the Abilene ILS localizer north course extending from the 5-mile radius area to 7.5 miles north of the airport; within 2.5 miles each side of the Tuscola VOR 030° radial extending from the 5-mile radius area to 6.5 miles northeast of the airport, within 2 miles each side of the Abilene VORTAC 115° radial extending from the 5-mile radius area to the Abilene VORTAC, excluding that airspace within the Dyess AFB control zone.

Abilene, TX (Dyess AFB)

Within a 5-mile radius of Dyess AFB (latitude 32°25'10"N., longitude 99°51'53"W.); within 2.5 miles each side of the Abilene VORTAC 171° radial extending from the 5-mile radius area to 10.5 miles south of the VORTAC; within 3.5-miles each side of the Abilene VORTAC 355° radial extending from the 5-mile radius area to 11.5 miles north of the VORTAC.

(Sec. 307(a), Federal Aviation Act of 1958, as amended (49 U.S.C. 1348(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.61(c))

Note.—The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 1103; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal.

Issued in Fort Worth, TX, on December 15, 1981.

Designation of Transition Area; Caddo Mills, TX

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment will designate a transition area at Caddo Mills, TX. The intended effect of the amendment is to provide adequate controlled airspace for aircraft executing a new instrument approach procedure to the Caddo Mills Municipal Airport. This amendment is necessary to provide protection for aircraft executing an instrument approach using a proposed nondirectional radio beacon (NDB). Coincident with this action, the airport is changed from visual flight rules (VFR) to instrument flight rules (IFR).

EFFECTIVE DATE: March 18, 1982.

FOR FURTHER INFORMATION CONTACT: James L. Owens, Airspace and Procedures Branch (ASW-536), Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, TX 76101, telephone (817) 624-4911, extension 302.

SUPPLEMENTARY INFORMATION: On October 29, 1981, a notice of proposed rulemaking was published in the **Federal Register** (46 FR 53433) stating that the Federal Aviation Administration proposed to designate the Caddo Mills, TX, transition area. Interested persons were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the Federal Aviation Administration. Comments were received without objections. Except for editorial changes, this amendment is that proposed in the notice.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, by the Administrator, Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (46 FR 540) is amended in § 71.181 as follows, effective 0901 GMT, March 18, 1982, as follows:

Caddo Mills, TX

That airspace extending upward from 700 feet above the surface within a 6.5-mile radius of the Caddo Mills, TX, Municipal Airport (latitude 33°02'10" N., longitude 96°14'35" W.) and within 3 miles each side of the 172° bearing from the NDB (latitude 33°02'25" N., longitude 96°14'54" W.) extending from the 6.5-mile radius area to 8 miles south of the airport.

(Sec. 307(a), Federal Aviation Act of 1958, as amended (49 U.S.C. 1348(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.61(c))

Note.—The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. [Airspace Docket No. 81-SO-55]

Alteration of Transition Area, Carrollton, Georgia

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This rule alters the Carrollton, Georgia, Transition Area by lowering the base of controlled airspace from 1,200 feet to 700 feet AGL southeast of the West Georgia Regional Airport. New standard instrument approach procedures have been developed for the airport. Additional controlled airspace is required to protect aircraft executing the approach procedures. The airspace must be designated before the approach procedures can become effective.

EFFECTIVE DATE: 0901 G.m.t., January 22, 1982.

FOR FURTHER INFORMATION CONTACT: Harlen D. Phillips, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone: (404) 763-7646.

SUPPLEMENTARY INFORMATION:

History

On Thursday, October 22, 1981, (46 FR 51777), the FAA proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to alter the Carrollton, Georgia, Transition Area. This action adopts the proposal and thereby provides controlled airspace protection for aircraft executing new standard instrument approach procedures, LOC Runway 34 and NDB Runway 34, at the West Georgia Regional Airport. The existing Carrollton, nonfederal, nondirectional radio beacon (RBN) located on the airport is being replaced by the Carroll County RBN which will be located 4 miles southeast of Runway 34. A nonfederal localizer is proposed to serve Runway 34. Interested persons were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No objections were received from this notice.

The Rule

This amendment to Part 71 of the Federal Aviation Regulations lowers the base of controlled airspace from 1,200 to 700 feet AGL southeast of the West Georgia Regional Airport.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, § 71.181, Subpart G, of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (and amended) (46 FR 540) is further amended, effective 0901 G.m.t., January 22, 1982, as follows:

Carrollton, Georgia

By amending § 71.181 in the description of the Carrollton, Georgia, Transition Area by deleting the words, "* * * the 169° bearing from Carrollton RBN (latitude 33°38'02" N., longitude 85°09'13" W.), extending from the 6.5-mile radius area to 8.5 miles south of the RBN * * *." and substituting for them the words "* * * the 166° bearing from the Carroll County RBN (latitude 33°33'56" N., longitude 85°07'56" W.), extending from the 6.5-mile radius area to nine miles south of the RBN * * *"

(Sec. 307(a) of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1348(a)) and Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)))

Note.—The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a major rule under Executive Order 12291; (2) is not a significant rule under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal; and (4) will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

This action involves only a small alteration of navigable airspace and air traffic control procedures over a limited area.

Issued in East Point, Georgia, on December 11, 1981.

Jonathan Howe,

Director, Southern Region.

[FR Doc. 81-36676 Filed 12-23-81; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 95

[Docket No. 22525; Amdt. No. 95-302]

IFR Altitudes; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT

ACTION: Final rule.

SUMMARY: This amendment adopts miscellaneous amendments to the required IFR (instrument flight rule) altitudes and changeover points for certain Federal airways, jet routes, or direct routes for which a minimum or maximum en route authorized IFR altitude is prescribed. These regulatory actions are needed because of changes occurring in the National Airspace System. These changes are designed to provide for the safe and efficient use of the navigable airspace under instrument conditions in the affected areas.

EFFECTIVE DATE: January 21, 1982.

FOR FURTHER INFORMATION CONTACT: Donald K. Funai, Flight Procedures and Airspace Branch (AFO-730), Aircraft Programs Division, Office of Flight Operations, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone: (202) 426-8277.

SUPPLEMENTARY INFORMATION: This amendment to Part 95 of the Federal Aviation Regulations (14 CFR Part 95) prescribes new, amended, suspended, or revoked IFR altitudes governing the operation of all aircraft in IFR flight over a specified route or any portion of that route, as well as the changeover points (COPs) for Federal airways, jet routes, or direct routes as prescribed in Part 95. The specified IFR altitudes, when used in conjunction with the prescribed changeover points for those routes, ensure navigation aid coverage that is adequate for safe flight operations and free of frequency interference.

The reasons and circumstances which create the need of this amendment involve matters of flight safety, operational efficiency in the National Airspace System, and are related to published aeronautical charts that are essential to the user and provide for the safe and efficient use of the navigable

airspace. In addition, those various reasons or circumstances require making this amendment effective before the next scheduled charting and publication date of the flight information to assure its timely availability to the user. The effective date of this amendment reflects those considerations. In view of the close and immediate relationship between these regulatory changes and safety in air commerce, I find that notice and public procedure before adopting this amendment is unnecessary, impracticable, or contrary to the public interest and that good cause exists for making the amendment effective in less than 30 days.

Adoption of the Amendment

Accordingly and pursuant to the authority delegated to me by the Administrator, Part 95 of the Federal Aviation Regulations (14 CFR Part 95) is amended as follows effective at 0901 GMT January 21, 1982.

(Secs. 307 and 1110, Federal Aviation Act of 1958 (49 U.S.C. 1348 and 1510); Sec. 6(c), Department of Transporation Act (49 U.S.C. 1655(c)); and 14 CFR 11.49(b)(3))

Note.—The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "signficant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. The FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Washington, D.C. on December 16, 1981.

John M. Howard,

Acting Chief, Aircraft Programs Division.

BILLING CODE 4910-13-M

§95.1001 DIRECT ROUTES—U.S.
is amended by adding:

FROM	TO	MEA
Bismarck, ND VOR	Pembina, MN VOR	18000
Dickinson, ND VOR	#U.S. Canadian Border	16000
#Via DIK R-031		
Dupre, SD VOR	Bismarck, ND VOR	18000
		MAA—35000
Rapid City, SD VOR	Fargo, ND VOR	24000
Rapid City, SD VOR	Minot, ND VOR	#18000

*MEA is established with a gap in navigational coverage.

§95.1001 DIRECT ROUTES—U.S.
is amended to read:

FROM	TO	MEA
Reno, NV VOR	Trose INT, CA	*22000
		MAA—39000
*13000—MOCA		
Trose INT, CA	Modesto, CA VOR	
	SW-bound	*6000
	NE-bound	*22000
*5000—MOCA		MAA—39000

§95.1001 DIRECT ROUTES—U.S.
is amended to delete:

FROM	TO	MEA
Minneapolis, Minn. VORTAC	Cedar Rapids, Iowa VORTAC	*14500
*3900—MOCA		MAA—35000

§95.1001 DIRECT ROUTES—U.S.
is added to read:

FROM	TO	MEA
Gopher, MN VORTAC	Cedar Rapids, IA VORTAC	14500
		MAA—35000
Gopher, MN VORTAC	Moline, IL VORTAC	13000
		MAA—35000
Sioux Falls, SD VOR	Fargo, ND VOR	15000

BILLING CODE 4910-13-C

14 CFR Part 97

[Docket No. 22522; Amdt. No. 1206]

Standard Instrument Approach Procedures; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs) for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, addition of new obstacles, or changes in air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: An effective date for each SIAP is specified in the amendatory provisions.

ADDRESSES: Availability of matters incorporated by reference in the amendment is as follows:

For Examination

1. FAA Rules Docket, FAA Headquarters Building, 800 Independence Avenue, SW., Washington, D.C. 20591;
2. The FAA Regional Office of the region in which the affected airport is located; or
3. The Flight Inspection Field Office which originated the SIAP.

For Purchase

Individual SIAP copies may be obtained from:

1. FAA Public Information Center (APA–430), FAA Headquarters Building, 800 Independence Avenue, SW., Washington, D.C. 20591; or
2. The FAA Regional Office of the region in which the affected airport is located.

By Subscription

Copies of all SIAPs, mailed once every 2 weeks, may be ordered from Superintendant of Documents, U.S. Government Printing Office, Washington, D.C. 20402. The annual subscription price is $135.00.

FOR FURTHER INFORMATION CONTACT: Donald K. Funai, Flight Procedures and Airspace Branch (AFO–730), Aircraft Programs Division, Office of Flight Operations, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone (202) 426–8277.

SUPPLEMENTARY INFORMATION: This amendment to Part 97 of the Federal Aviation Regulations (14 CFR Part 97) prescribes new, amended, suspended, or revoked Standard Instrument Approach Procedures (SIAPs). The complete regulatory description of each SIAP is contained in official FAA form documents which are incorporated by reference in this amendment under 5 U.S.C. 552(a), 1 CFR Part 51, and § 97.20 of the Federal Aviation Regulations (FARs). The applicable FAA Forms are identified as FAA Forms 8260–3, 8260–4 and 8260–5. Materials incorporated by reference are available for examination or purchase as stated above.

The large number of SIAPs, their complex nature, and the need for a special format make their verbatim publication in the **Federal Register** expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs, but refer to their graphic depiction on charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP contained in FAA form document is unnecessary. The provisions of this amendment state the affected CFR (and FAR) sections, with the types and effective dates of the SIAPs. This amendment also identifies the airport, its location, the procedure identification and the amendment number.

This amendment to Part 97 is effective on the date of publication and contains separate SIAPs which have compliance dates stated as effective dates based on related changes in the National Airspace System or the application of new or revised criteria. Some SIAP amendments may have been previously issued by the FAA in a National Flight Data Center (FDC) Notice to Airmen (NOTAM) as an emergency action of immediate flight safety relating directly to published aeronautical charts. The circumstances which created the need for some SIAP amendments may require making them effective in less than 30 days. For the remaining SIAPs, an effective date at least 30 days after publication is provided.

Further, the SIAPs contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Approach Procedures (TERPs). In developing these SIAPs, the TERPs criteria were applied to the conditions existing or anticipated at the affected airports. Because of the close and immediate relationship between these SIAPs and safety in air commerce, I find that notice and public procedure before adopting these SIAPs is unnecessary, impracticable, or contrary to the public interest and, where applicable, that good cause exists for making some SIAPs effective in less than 30 days.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Part 97 of the Federal Aviation Regulations (14 CFR Part 97) is amended by establishing, amending, suspending, or revoking Standard Instrument Approach Procedures, effective at 0901 G.M.T. on the dates specified, as follows:

1. By amending § 97.23 VOR–VOR/DME SIAPs identified as follows:

Note.—The FAA published an amendment in Docket No. 22455, amdt No. 1204 to part 97 of the Federal Aviation Regulations (Vol 46 FR No. 232 page 58651; dated December 3, 1981) under Section 97.29 effective January 7, 1982, which is hereby amended as follows: Pago Pago, American Samoa, Pago Pago Intl, ILS/DME Rwy 5, amdt 9, change effective date to January 21, 1982.

5. By amending § 97.33 RNAV SIAPs identified as follows:

**** Effective February 4, 1982*

Alton, IL—Civic Memorial, RNAV Rwy 29, Amdt. 3
Clinton, IA—Clinton Muni, RNAV Rwy 21, Amdt. 5

(Secs. 307, 313(a), 601, and 1110, Federal Aviation Act of 1958 (49 U.S.C. 1348, 1354(a), 1421, and 1510); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.49(b)(3))

Note.—The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. The FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Washington, D.C. on December 18, 1981.

Note.—The incorporation by reference in the preceding document was approved by the Director of the Federal Register on December 31, 1981.

John M. Howard,

Acting Chief, Aircraft Programs Division.

[FR Doc. 81-30081 Filed 12-23-81; 8:45 am]

BILLING CODE 4910-13-M

DEPARTMENT OF COMMERCE

International Trade Administration

15 CFR Part 379

Amendment to Export Administration Regulations to Conform To Revised Commodity Control List; Correction of Paragraph References: Technical Data

AGENCY: International Trade Administration, Commerce.

ACTION: Final rule.

SUMMARY: This rule amends language in Part 379, Technical Data, of the Export Administration Regulations to correct paragraph references. A paragraph (*q*) was added to § 379.4(f)(1)(i) in the **Federal Register** of June 25, 1980 (45 FR 43139–43146), but paragraph references to various technical data listed in § 379.4 were not amended to reflect that addition.

EFFECTIVE DATE: December 24, 1981.

FOR FURTHER INFORMATION CONTACT: Archie Andrews, Director, Exporters' Service Staff, Office of Export Administration, U.S. Department of Commerce, Washington, D.C. 20230 (Telephone: (202) 377–4811).

SUPPLEMENTARY INFORMATION:

Rulemaking Requirements

In connection with various rulemaking requirements, the Office of Export Administration has determined that:

1. Under section 13(a) of the Export Administration Act of 1979 (Pub. L. 96–72, 50 U.S.C. app. 2401 *et seq.*) ("the Act"), this rule is exempt from the public participation in rulemaking procedures of the Administrative Procedure Act. This rule does not impose new controls on exports, and is therefore exempt from section 13(b) of the Act, which expresses the intent of Congress that where practicable "regulations imposing controls on exports" be published in proposed form.

2. This rule does not impose a burden under the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*

3. This rule is not subject to the requirements of the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*

4. This rule is not a major rule within the meaning of section 1(b) of Executive Order 12291 (46 FR 13193, February 19, 1981), "Federal Regulation."

Therefore, this regulation is issued in final form. Although there is no formal comment period, public comments on this regulation are welcome on a continuing basis.

PART 379—TECHNICAL DATA

Accordingly, Part 379 of the Export Administration Regulations (15 CFR Parts 368–399) is amended as follows:

§ 379.4 [Amended]

1. Section 379.4(f)(1) is amended by revising the phrase "(f)(1)(i)(A) through (o) of this section" to read "(f)(1)(i)(*a*) through (*o*) and (*q*) (*not* (*p*)) of this section", each place that it appears, and by revising the phrase "(f)(1)(i)(p)" to read "(f)(1)(i)(*p*)", each place that it appears.

(Secs. 13 and 15, Pub. BILLING CODE 3510-25-M

15 CFR Part 399

Clarification for Processing Computer License Applications

AGENCY: Office of Export Administration, International Trade Administration, Commerce.

ACTION: Final rule.

SUMMARY: The Export Administration Regulations are amended by adding two footnotes to Commodity Control List entry 1565, electronic computers and related equipment, appearing in Supplement No. 1 to § 399.1. One amendment formalizes the requirement for license applicants exporting computers to T and V country destinations to include the "CPU bus rate" and "processing data rate" in the commodity description column on forms ITA–622P and ITA–699P.

This rule does not change the requirements for applications to export computers to P, Q, W and Y destinations. Information concerning the CPU bus rate and processing data rate for all other destinations has always been required to be submitted in connection with applications, but it has not been specifically stated on the application form. This specific information will give licensing officers in the Office of Export Administration more efficient access to the data they need to distinguish "advanced computers" from other computer systems. The licensing officers otherwise must read extraneous technical material or obtain the information from the exporter, thus delaying the case.

The second amendment adds a footnote to paragraph (h) of Commodity Control List entry 1565 to clarify what is *not* controlled by the paragraph. Certain peripherals and displays are not controlled.

DATE: Effective December 24, 1981.

FOR FURTHER INFORMATION CONTACT: Mr. Archie Andrews, Director, Exporters' Service Staff, Office of Export Administration, Department of Commerce, Washington, D.C. 20230 (Telephone: (202) 377–4811).

SUPPLEMENTARY INFORMATION:

Rulemaking Requirements

Section 13(a) of the Export Administration Act of 1979 (Pub. L. 96–72, 50 U.S.C. app. 2401 *et seq.*) ("the Act") exempts regulations promulgated under the Act from the public participation in rulemaking procedures of the Administrative Procedure Act. Section 13(b) of the Act, which expresses the intent of Congress that to the extent practicable "regulations imposing controls on exports" be published in proposed form, is not applicable because these regulations do not impose new controls on exports. Therefore, this regulation is issued in final form. Although there is no formal comment period, public comments on this regulation are welcome on a continuing basis.

In connection with various rulemaking requirements, the Office of Export Administration has determined that this rule does not impose a burden under the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.* This regulation is not a major rule within the meaning of section 1(b) of Executive Order 12291 (46 FR 13193, February 19, 1981).

PART 399—COMMODITY CONTROL LIST AND RELATED MATTERS

Accordingly, ECCN 1565 appearing in Supplement No. 1 to § 399.1 of the Export Administration Regulations (15 CFR Part 399) is amended as follows:

§ 399.1 [Amended]

1. A new footnote "2" is added to the "Validated License Required" column of ECCN 1565 and existing footnotes 2 and 3 are redesignated as 3 and 4, and revised to read as follows:

Export control commodity number and commodity description	Unit	Validated license required	GLV dollar value limits T&V	Processing code	Reason for control
1565A Electronic computers and related equipment, as follows:	(1)	PQSTVWYZ [2]	1,000	CD	1, 3 [3], 4 [4]

* * *

[2] Refer to § 376.10 of the Regulations for specific information required to be filed with applications for P, Q, W and Y destinations. For all destinations other than P, Q, W and Y, follow general application instructions and, in addition, indicate in the commodity description column on forms ITA–622P and ITA–699P the "CPU bus rate" and "processing data rate." Section 376.10 of the Regulations provides the formulas for calculating those rates.

[3] Foreign policy export controls apply only to computer equipment destined for government consignees in the Republic of South Africa and Namibia.

[4] Nuclear related controls are described in Supplement No. 1 to § 399.2, Commodity Interpretation No. 1.

2. A footnote "1" is added to paragraph (h) of ECCN 1565, as follows:

* * * * *

(h) Other related equipment for the above (including that also described in entry Nos. 1572 and 1588), *i.e.*, specialized parts, components, peripherals, displays, sub-assemblies, accessories, and spare parts.[1]

* * * * *

[1] 1565(h) is not intended to control peripherals and displays, identified in 1565(h)(1) and (2), containing microprocessors that are permanently embedded as circuit elements dedicated solely to the primary function of the peripheral or display device and that have no user-accessible programmability of the microprocessors.

(Secs. 13, 15, and 21, Pub. L. 96–72, 93 Stat. 503, 50 U.S.C. app. § 2401 *et seq.*; Executive Order No. 12214 (45 FR 29783, May 6, 1980); Department Organization Order 10–3 (45 FR 6141, January 25, 1980); International Trade Administration Organization and Function Orders 41–1 (45 FR 11862, February 22, 1980) and 41–4 (45 FR 65003, October 1, 1980))

Dated: December 4, 1981.

William V. Skidmore,

Director, Office of Export Administration, International Trade Administration.

FEDERAL TRADE COMMISSION

16 CFR Part 13

[Docket No. C–3066]

Godfrey Co.; Prohibited Trade Practices, and Affirmative Corrective Actions

AGENCY: Federal Trade Commission.

ACTION: Modifying order.

SUMMARY: This order reopens this proceeding and modifies the Commission's order issued on May 14, 1981 (46 FR 29458, June 2, 1981), by modifying paragraph I(G) of the Order to relieve respondent from the obligation of divesting a specified retail grocery store.

DATES: Order issued May 14, 1981. Modifying order issued December 3, 1981.

FOR FURTHER INFORMATION CONTACT: FTC/CC, Selig S. Merber, Washington, D.C. 20580. (202) 276–2891.

SUPPLEMENTARY INFORMATION: In the Matter of Godfrey Company, a corporation. The prohibited trade practices and/or corrective actions, as codified under 16 CFR Part 13 and appearing at 46 FR 29458, remain unchanged.

The Order Modifying Cease and Desist Order issued May 14, 1981 is as follows:

The Federal Trade Commission having considered respondent Godfrey Company's petition filed on August 5, 1981 to reopen this matter and to modify the consent order to cease and desist issued by the Commission on May 14, 1981, and having determined that reopening and modification of the order is warranted:

It is ordered That this matter be, and it hereby is reopened and that paragraph I(G) of the Commission's order be and it is hereby modified to read as follows:

(G) The "disposition stores" means the following Godfrey ("G") stores and Jewel ("J") stores:

1. G–427 (3045 S. 13th St., Milwaukee, WI.)
2. G–607 (6077 S. Packard Ave., Cudahy, WI.)
3. G–810 (3039 S. 76th St., Milwaukee, WI.)
4. J–1201 (1201 N. 35th St., Milwaukee, WI.)
5. J–729 (7195 S. Layton Blvd., Milwaukee, WI.)
6. J–15182 (N81 W. 15182 Appleton Ave., Menomonee Falls, WI.)

By the Commission.

Carol M. Thomas,
Secretary.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Part 271

[Docket No. RM79-76 (Colorado-16); Order No. 197]

High-Cost Gas Produced From Tight Formations; Colorado

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Final rule.

SUMMARY: The Federal Energy Regulatory Commission is authorized by section 107(c)(5) of the Natural Gas Policy Act of 1978 to designate certain types of natural gas as high-cost gas where the Commission determines that the gas is produced under conditions which present extraordinary risks or costs. Under section 107(c)(5), the Commission issued a final regulation designating natural gas produced from tight formations as high-cost gas which may receive an incentive price (18 CFR 271.703). This rule established procedures for jurisdictional agencies to submit to the Commission recommendations of areas for designation as tight formations. This final order adopts the recommendation of the Colorado Oil and Gas conservation Commission that the Sussex Formation be designated as a tight formation under § 271.703(d).

EFFECTIVE DATE: This rule is effective December 16, 1981.

FOR FURTHER INFORMATION CONTACT: Leslie Lawner, (202) 357–8307 or Walter Lawson, (202) 357–8556.

SUPPLEMENTARY INFORMATION:

Issued: December 16, 1981.

The Commission hereby amends § 271.703(d) of its regulations to include the Sussex Formation in Colorado as a designated tight formation eligible for incentive pricing under § 271.703. The amendment was proposed in a Notice of Proposed Rulemaking by the Director, OPPR, issued September 4, 1981 (46 FR 45155, September 10, 1981) [1] based on a recommendation by the Colorado Oil and Gas Conservation Commission (Colorado) in accordance with § 271.703(c) that the Sussex Formation be designated as a tight formation.

Evidence submitted by Colorado supports the assertion that the Sussex Formation meets the guidelines contained in § 271.703(c)(2). The Commission adopts the Colorado recommendation.

This amendment shall become effective immediately. The Commission has found that the public interest dictates that new natural gas supplies be developed on an expedited basis, and, therefore, incentive prices should be made available as soon as possible. The need to make incentive prices immediately available establishes good cause to waive the thirty-day publication period.

(Department of Energy Organization Act, 42 U.S.C. 7101 *et seq.*; Natural Gas Policy Act of 1978, 15 U.S.C. 3301–3342; Administrative Procedure Act, 5 U.S.C. 553)

In consideration of the foregoing, Part 271 of Subchapter H, Chapter I, Title 18, *Code of Federal Regulations*, is amended as set forth below, effective December 16, 1981.

By the Commission.

Lois D. Cashell,
Acting Secretary.

PART 271—CEILING PRICES

Section 271.703(d) is amended by adding new subparagraph (61) to read as follows:

§ 271.703 Tight formations.

* * * * *

(d) *Designated tight formations.* * * *

(61) *Sussex Formation in Colorado.* RM79–76 (Colorado–16).

(i) *Delineation of formation.* The Sussex Formation is found in Weld County, Colorado, in Township 4 North, Range 68 West, 6th P.M., Sections 2, 3, and 10, Section 11–N½, Section 15–W ½; Township 5 North, Range 68 West, 6th P.M., Sections 33, 34, and 35.

(ii) *Depth.* The average depth to the top of the Sussex Formation is 4,400 and 4,500 feet.

[Docket No. RM79–76 (Texas–11); Order No. 199]

High-Cost Gas Produced From Tight Formations; Texas

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Final rule.

SUMMARY: The Federal Energy Regulatory Commission is authorized by section 107(c)(5) of the Natural Gas Policy Act of 1978 to designate certain types of natural gas as high-cost gas where the Commission determines that the gas is produced under conditions which present extraordinary risks or costs. Under section 107(c)(5), the Commission issued a final regulation designating natural gas produced from tight formations as high-cost gas which may receive an incentive price (18 CFR 271.703). This rule established procedures for jurisdictional agencies to submit to the Commission recommendations of areas for designation as tight formations. This final order adopts the recommendation of the Railroad Commission of Texas that the Wilcox Formation be designated as a tight formation under § 271.703(d).

EFFECTIVE DATE: This rule is effective December 16, 1981.

FOR FURTHER INFORMATION CONTACT: Leslie Lawner, (202) 357–8307 or Walter Lawson, (202) 357–8556.

SUPPLEMENTARY INFORMATION:

Issued: December 16, 1981.

The Commission hereby amends § 271.703(d) of its regulations include the Wilcox Formation in Texas as a designated tight formation eligible for incentive pricing under § 271.703. The amendment was proposed in a Notice of Proposed Rulemaking by the Director, OPPR, issued July 24, 1981 (46 FR 38935, July 30, 1981)[1] based on a recommendation by the Railroad Commission of Texas (Texas) in accordance with § 271.703(c) that the Wilcox Formation be designated as a tight formation.

Evidence submitted by Texas supports the assertion that the Wilcox Formation meets the guidelines contained in § 271.703(c)(2). The Commission adopts the Texas recommendation.

This amendment shall become effective immediately. The Commission has found that the public interest dictates that new natural gas supplies be developed on an expedited basis, and, therefore, incentive price should be made available as soon as possible. The need to make incentive prices available immediately establishes good cause to waive the thirty-day publication period.

(Department of Energy Organization Act, 42 U.S.C. 7101 *et seq.;* Natural Gas Policy Act of 1978, 15 U.S.C. 3301–3342; Administrative Procedure Act, 5 U.S.C. 553)

In consideration of the foregoing, Part 271 of Subchapter H, Chapter I, Title 18, *Code of Federal Regulations,* is amended as set forth below, effective December 16, 1981.

By the Commission.

Lois D. Cashell,

Acting Secretary.

PART 271—CEILING PRICES

Section 271.703(d) is amended by adding new subparagraph (63) to read as follows:

§ 271.703 Tight formations.

* * * * *

(d) *Designated tight formations.* * * *

(63) *The Wilcox Formation in Texas.* RM79–76 (Texas–11).

(i) *Delineation of formation.* The Wilcox Formation is found in the area of the Aviators, N. (12,000) Field, Webb County, Texas, and is within a 2.5 mile radius around the Pennzoil Producing Company No. 53–1 B.M.T.—Alice B. Hall well, and covers approximately 19.6 square miles.

(ii) *Depth.* The top of the Wilcox Formation is at approximately −11,085 feet subsea and is 114 feet thick.

PENSION BENEFIT GUARANTY CORPORATION

29 CFR Part 2621

Limitation on Guaranteed Benefits

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Final rule.

SUMMARY: This amendment to the Limitation on Guaranteed Benefits regulation contains the maximum guaranteeable pension benefit that may be paid by the Pension Benefit Guaranty Corporation ("PBGC") under Title IV of the Employee Retirement Income Security Act of 1974 as amended ("ERISA"), to a plan participant in a covered pension plan which terminates in 1982. Section 4022(b)(3)(B) of ERISA

provides that the maximum benefit guaranteeable by PBGC is based on the Social Security Administration contribution and benefit base. This amendment updates the maximum guaranteeable benefit for 1982 based on the Social Security Administration contribution and benefit base that is to be used for this purpose.

EFFECTIVE DATE: December 24, 1981.

FOR FURTHER INFORMATION CONTACT: Ms. Nina R. Hawes, Staff Attorney, Office of the General Counsel, Pension Benefit Guaranty Corporation, 2020 K Street, N.W., Washington, D.C. 20006, 202–254–3010.

SUPPLEMENTARY INFORMATION: On February 11, 1976, the Pension Benefit Guaranty Corporation ("PBGC") published a final rule on the Limitation on Guaranteed Benefits (29 CFR Part 2609, now recodified as 29 CFR Part 2671). That rule set forth the method of calculating the maximum guaranteeable benefit, as set forth in section 4022(b)(3)(B) of the Employee Retirement Income Security Act of 1974, 29 U.S.C. 1001 *et seq.* (1976), *as amended by* the Multiemployer Pension Plan Amendments Act of 1980, Pub. L. No. 96–364, 94 Stat. 1208 ("ERISA"). Under 29 CFR 2621.3(a)(2), the maximum benefit is "$750 multiplied by the fraction

$$\frac{x}{\$13,200}$$

where 'x' is the Social Security contribution and benefit base determined under § 230 of the Social Security Act in effect on the date of termination of the plan."

In the 1977 Amendments to the Social Security Act ("SSA"), special increases were added to the contribution and benefit base. However, the amended SSA specifically states that, for the purpose of section 4022(b)(3)(B) of ERISA, the contribution and benefit base for each year after 1976 would be the base that would have been determined for such year if the special increases had not been made. 42 U.S.C. 430(d) (1976 Ed., Supp. III).

On January 23, 1981, the PBGC issued a final regulation (46 FR 7323) which added an appendix to the Limitation on Guaranteed Benefits regulation. The appendix lists the maximum guaranteeable benefit payable by the PBGC to participants in plans that have terminated each year since ERISA went into effect. This amendment updates the appendix for plans that terminate in 1982.

The PBGC has been notified by the Social Security Administration that the contribution and benefit base for 1982 which is to be used to calculate the PBGC maximum guaranteeable benefits is $24,300. Accordingly, applying the formula under section 4022(b)(3)(B) of ERISA, the PBGC has determined that the maximum benefit guaranteeable by PBGC in 1982 will be $1380.68 per month in the form of a life annuity commencing at age 65 or the actuarial equivalent of $1380.68 payable in a different form or commencing at a different age.

Because the maximum guaranteeable benefit is determined according to the formula in section 4022(b)(3)(B) of ERISA, and this amendment makes no change in its method of calculation, but simply lists the 1982 maximum guaranteeable benefit amount for the public's knowledge, the PBGC finds that notice of and public comment on this amendment are impracticable and unnecessary. Moreover, because the 1982 maximum guaranteeable benefit is effective, under the statute, at the time that the Social Security contribution and benefit base is effective, *i.e.*, January 1, 1982, and is not dependent on the issuance of this regulation, the PGBC finds that good cause exists for making this amendment effective immediately.

The PBGC has determined that this amendment to the Limitation on Guaranteed Benefits regulation in not a "major rule" under the criteria set forth by Executive Order 12291, February 17, 1981 (46 FR 13193) because it will not result in an annual effect on the economy of $100 million or more, a major increase in costs for consumers or individual industries, or significant adverse effects on competition, employment, investment, productivity, innovation or competition.

In consideration of the foregoing, Part 2621 of Chapter XXVI, Code of Federal Regulations, is hereby amended to read as follows:

PART 2621—LIMITATION ON GUARANTEED BENEFITS

1. The authority citation for Part 2621 is revised to read as follows:

Authority: Secs. 4002(b)(3), 4022(b), Pub. L. 93–406, 88 Stat. 1004, 1016–18, (1974), as amended by secs. 403(1), 403(c), and 102, Pub. L. 96–364, 94 Stat. 1302, 1300, 1215 (1980) (29 U.S.C. 1302, 1322).

2. Appendix A to Part 2621 is amended by adding the following entry to the table to read as follows:

Appendix A to Part 2621—Maximum Guaranteeable Monthly Benefit

The following table lists by year the maximum guaranteeable monthly benefit payable in the form of a life annuity commencing at age 65 as described by § 2621.3(a)(2) to a participant in a plan that terminated in that year:

Year	Maximum guaranteeable monthly benefit
1982	$1,380.68

Robert E. Nagle,

Executive Director, Pension Benefit Guaranty Corporation.

BILLING CODE 7708–01–M

DEPARTMENT OF DEFENSE

Office of the Secretary

32 CFR Part 70

Discharge Review Boards; Rules Pertaining to Procedures for Obtaining Copies of Military Records

AGENCY: Department of Defense.

ACTION: Final rule.

SUMMARY: This rule amends Department of Defense rules currently in effect for Discharge Review Boards (DRBs) by clarifying the procedures for obtaining copies of military records incident to discharge review. The amendment is intended to insure that applicants or prospective applicants to the Discharge Review Boards of the military services are fully aware of the need to request copies of military records they desire for their discharge review prior to submitting an application for discharge review and of the consequences for an applicant of requesting military records after a request for discharge review is submitted.

EFFECTIVE DATE: January 25, 1982.

FOR FURTHER INFORMATION CONTACT: Mr. Francis X. Plant, Director, Department of the Army, Military Review Boards Agency, HQDA, Washington, D.C. 20310 (Phone (202) 697–9641).

SUPPLEMENTARY INFORMATION: On August 27, 1981, the Department of Defense, acting through the Director of the Department of the Army Military Review Boards Agency, published in the Federal Register (46 FR 43185) as a proposed rule this amendment to Discharge Review Board rules pertaining to procedures for obtaining copies of military records incident to discharge review. The basis and purpose of the amendment are contained in the supplementary information then published with the proposed rule and will not be repeated here. The proposed rule invited interested persons to submit comments for consideration in

connection with its adoption. Comments from the National Association of Concerned Veterans (NACV) were received and considered in the rulemaking.

The NACV's comments basically address three points applicable to the proposed rule: (1) failure of the proposed rule to address the promptness with which records are to be disclosed; (2) lack of precision regarding "the degree of delay in DBR decisionmaking that will result from requesting records while an application is pending;" and (3) alleged inconsistency of certain language in the proposed rule with the stipulation of voluntary dismissal in *O'Shea v. Secretary of Defense*, Civ. No. 81–1084 (D.D.C. July 16, 1981).

Regarding the first point, the NACV asserts in its comments:

> By statements like "[a]pplicants are strongly encouraged to submit any request for military records prior to applying * * * *in order to avoid substantial delays in processing* * * *" (emphasis added), the proposed regulations imply that a substantial amount of time will elapse before requested records are released.
>
> * * * [W]e urge DoD to adopt final regulations which specify that records will be disclosed in compliance with the timetable set forth in the FOIA. Without an amendment of this type, there will be a significant probability that records will not be disclosed in compliance with the FOIA * * *

The Department of Defense disagrees. The substantial delays referred to in the proposed rule are delays related to processing applications for discharge review and scheduling reviews, not delays related to responding to requests for records under the Freedom of Information Act (FOIA). Further, Department of Defense and military department regulations pertaining to FOIA already prescribe prompt action on FOIA requests. *See, e.g.*, 32 CFR Part 286 (1980) (Department of Defense); 32 CFR Part 518 (1980) (Army). Finally, none of the DRBs have received any complaints regarding the promptness with which they provide requested records.

In urging their second point, that the proposed rule should be more precise regarding the degree of delay in DBR decisionmaking that will result from requesting records while an application is still pending, NACV stated in part:

> Regulations specifying the degree of delay which can generally be expected are appropriate for two important reasons. The first reason relates to DoD's interest, already reflected in the proposed regulations, to encourage prospective applicants who desire their records to request them before applying. The more precise the regulations are about the delay that can be expected, the more likely it will be that prospective applicants will be impressed with the need to request records before applying.
>
> The second reason is to provide applicants who have not requested their records yet with enough information for them to make a knowing and intelligent decision concerning whether to request them * * *
>
> For the foregoing two reasons, we urge that the degree of delay that can generally be expected in various situations be specified in * * * the regulations that are finally adopted.

The Department of Defense views this suggestion as impracticable and undesirable. It is virtually impossible for the Department of Defense to predict with any precision what delay in DRB decisionmaking will result in individual cases from requesting records while an application to a DRB is pending. There are simply too many variables involved. Each military department has its own DRB and each of these DRBs offer up to five different modes of discharge review including review by traveling review boards, the itineraries of which depend on the number of applications pending at any given time from certain areas of the country. The DRBs handle from approximately 15,000 to 20,000 applications a year. The delay caused by a request for records will depend on the DRB involved, the number of applications before the DRB, the mode of review requested, and the itineraries of the traveling review boards. Further, applications must go through a number of processing steps prior to review, and the effect of a request for records will vary depending on at what stage of processing the application is when the request is made. Also, the delay a request for records causes will vary depending on the number of other requests for records made at about the same time. Finally, the delay involved will vary depending on the resources available to the DRBs at a particular time. In short, there are so many circumstances involved, which will vary over time, that any prediction regarding delay beyond a prediction of a substantial delay in some cases would be meaningless.

In addition, even if it were possible to predict the delay involved for particular applicants who request their records, making a particular amount of delay part of a rule that is binding on the DRBs would defeat an important purpose of the proposed rule, which is to encourage requests for records prior to applying for discharge review so that the limited resources at the DRBs headquarters are not overtaxed. If the DRBs were held to a fixed schedule of delays due to requests for records, some potential applicants would have no incentive for requesting their records before applying for discharge review and often might wait to request their records from the DRBs. As a result, the DRB headquarters would have to divert scarce resources from their primary mission to respond to requests for records.

NACV's third point concerned the statement in the proposed rule that following copying of requested records "[p]rocessing of the application [for discharge review] shall then be resumed at whatever stage of the discharge review process is practicable." NACV asserted that this language was "contrary to the understanding reached by counsel for the parties in the O'Shea litigation." DoD strongly disagrees. The questioned language is not contrary to the stipulation of voluntary dismissal in *O'Shea v. Secretary of Defense*, Civ. No. 81–1084 (D.D.C. July 16, 1981). Further, the language questioned is no more than a commonsense statement of the obvious. Certainly, no one could argue the converse—that the DRBs should be obligated to resume processing of applications at a stage of the discharge review process that is impracticable. Such a requirement would not only be extremely inefficient for the DRBs, since they handle 15,000–20,000 applications per year, but would be unfair because it would slow down processing and review of the applications of the great majority of applicants who request their records in a timely manner.

The NACV also opined in their comments that DoD misperceived the extent of the adverse affect that its prior policy on requesting records had on DRB applicants. NACV indicated that it and the Veterans Education Project had received a "flood of complaints" regarding the practice. Department of Defense notes that the DRBs have frequent contact with all who practice or appear before them and frequently receive comments and suggestions about DRB procedures. The DRBs have received few complaints about their procedures for obtaining records. Also, it is significant that following publication in the **Federal Register** of the proposed amendment to the DRB procedures, DoD received only NACV's comment. Given these circumstances, DoD believes the perception that its procedures for obtaining military records from the DRBs have caused no problems to the majority of DRB applicants to be an accurate one.

Finally, NACV made some suggestions in their proposed comments about forms and procedures for requesting military records prior to applying for discharge review. These comments basically suggested that the procedures and Department of Defense (DD Form 293) be modified: (1) to allow

applicants to request records at the same time they apply for discharge review and (2) to impress upon applicants the desirability of requesting their military records. These comments in part exceed the scope of the present proposed rulemaking because military records of former servicemembers are maintained at the National Personnel Records Center (NPRC) in St. Louis by the General Services Administration (GSA). The GSA has authority to prescribe the procedures for requesting these records prior to applying for discharge review. The procedures are repeated in DoD regulations for information purposes. Further, there are difficulties with NACV's suggestion that the DD Form 293 be modified so that DRB applicants may request records by checking a box on the form indicating they want copies of their records. The GSA requires the General Services Standard Form (GSSF) 180 and the information contained on it to act on requests for records and uses the GSSF 180 for many requests for records besides those of DRB applicants. The DRBs require the DD Form 293 and the information on it for processing DRB applications. Use by the DRBs of one form for two distinct purposes and by GSA of two different forms for one purpose would create substantial administrative problems for the GSA and the DRBs.

The Department of Defense is contemplating changes to DD Form 293 which would include a statement strongly encouraging applicants to request military records prior to, rather than after, applying for discharge review. This statement would be more prominent than that on the current form. The change would be in conjunction with other changes to the form and requires the approval of the Office of Management and Budget.

However, the Department of Defense does not believe it desirable as part of this change to advise all potential applicants to request copies of their military records if they intend to apply for discharge review. In many cases applicants do not dispute the accuracy of information in their records or the propriety of their discharges but instead request the DRBs to review their records and upgrade their discharges on equitable grounds such as mitigating factors not necessarily reflected in the records. The Department of Defense believes it is unwarranted to encourage every applicant to request his records and have the government spend a great deal of money unnecessarily when many applicants do not want or need their records and only a few individuals have had problems in this area.

Based on the above, the Department of Defense has determined that no significant changes need to be made to the proposed rule. However, based on further internal review, the Department of Defense has decided to add a sentence at the end of the rule that gives further information concerning present DRB practice in making records available. The sentence makes clear that applicants and counsel will have access to applicants' personnel records at their scheduled review site prior to the review.

PART 70—DISCHARGE REVIEW BOARDS (DRBs) PROCEDURES AND STANDARDS

Accordingly, 32 CFR 70.5 is amended by revising paragraph (b)(9)(i) as follows:

§ 70.5 Discharge review procedures.

(b) * * *

(9) * * *

(i) Prior to applying for discharge review, potential applicants or their designated representatives may obtain copies of their military personnel records by submitting a General Services Administration Standard Form 180, Request Pertaining to Military Records, to the National Personnel Records Center (NPRC), 9700 Page Boulevard, St. Louis, Mo. 62132. Once the application for discharge review (DD Form 293) is submitted, an applicant's military records are forwarded to the DRBs where they cannot be reproduced. Submission of a request for an applicant's military records (including a request pursuant to the Freedom of Information Act or Privacy Act) after the DD Form 293 has been submitted shall automatically result in the temporary suspension of processing of the application for discharge review until the requested records are sent to an appropriate location for copying, are copied, and are returned to the possession of the headquarters of the DRB. Processing of the application shall then be resumed at whatever stage of the discharge review process is practicable. Applicants are strongly encouraged to submit any request for their military records prior to applying for discharge review rather than after submitting DD Form 293 in order to avoid substantial delays in processing of applications and scheduling of reviews. Applicants and their counsel also may examine their military personnel records at the site of their scheduled review prior to the review. DRBs shall notify applicants of the dates of availability of the records for examination in their standard scheduling information.

(5 U.S.C. 552, 10 U.S.C. 133, 10 U.S.C. 136, 10 U.S.C. 1553, and delegations of authority from the Secretary of Defense and Assistant Secretary of Defense for Manpower, Reserve Affairs, and Logistics)

Dated: December 17, 1981.

Francis X. Plant,

Director, Department of the Army, Military Review Boards Agency.

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 84

[CGD 81-008]

Annex I to Inland Navigation Rules; Positioning and Technical Details of Lights and Shapes

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: The Coast Guard is issuing regulations setting out the positioning and technical details for the vessel navigation lights and shapes prescribed by the Inland Navigational Rules Act of 1980. These regulations give the details needed by a vessel to comply with this law. The regulations will enhance the mariner's ability to detect and identify vessels and their courses at night.

EFFECTIVE DATES: The effective date of these regulations is December 24, 1981, except for the Great Lakes. The effective date for the Great Lakes will be announced in a later notice.

FOR FURTHER INFORMATION CONTACT: Mr. Chris Llana, Project Manager, Office of Navigation, Room 1606, U.S. Coast Guard Headquarters, 2100 Second Street S.W., Washington, DC 20593, (202) 426-4958.

SUPPLEMENTARY INFORMATION: A Notice of Proposed Rulemaking on this subject was published on July 16, 1981 (46 FR 37002). Interested persons were given until September 14, 1981 to submit comments.

Drafting Information

The principal persons involved in drafting this rulemaking are Mr. Chris Llana, Project Manager, Office of Navigation, and Lieutenant Michael Tagg, Project Attorney, Office of Chief Counsel.

Discussion of Effective Dates

The effective date for the new Inland Navigation Rules is December 24, 1981,

on all inland waters except for the Great Lakes, for which the effective date has not yet been established. The former date was established by the Inland Navigational Rules Act of 1980. The effective date for the Great Lakes, however, will be established in the next several months in coordination with the Canadian government. The new Inland Navigation Rules incorporate the requirements of this regulatory Annex by reference. The effective dates for this Annex must coincide with the effective dates for the Inland Navigation Rules, therefore good cause exists for making this rule effective in less than 30 days after publication in the Federal Register.

Discussion of Comments

Comments from approximately 20 sources were received. Not all comments were limited to Annex I or took a clear position on the proposed rule. A number of comments were generally in favor of the rulemaking and a number were generally opposed. There were a few comments on the new statutory Inland Navigation Rules. A discussion of the specific comments follows.

One commenter opposed the use of the metric system of measurement. The metric system is used in the International Navigation Rules and their Annexes and in the Inland Navigation Rules. Use of another system in the Inland Rules Annex I would create confusion and would be inefficient. Use of the metric system is consistent with the Metric Conversion Act of 1975 and follows United States metrification policy.

Two commenters representing the Western Rivers towboat industry requested an extension of the comment period. Because the towboat industry has provided a great deal of input on this rulemaking (through written comments and through the Rules of the Road Advisory Committee and the Towing Safety Advisory Committee), and since such an extension would delay publication of the final rule beyond the December 24 effective date of the new Inland Rules, we did not grant their request. One of the commenters requesting a time extension submitted eight pages of comments on the proposed Annex I.

Section 84.01 Definitions

One commenter asked that the regulations be modified to permit the carriage of navigation lights designed for larger vessels on smaller classes of vessels. This has not always been permitted under Annex I to the International Rules because while the lights designed for larger vessels have more than enough intensity to meet the visibility requirements for smaller vessels, they do not often meet all the other technical requirements for lights used on smaller vessels. The proposal is being modified to preclude this effect for Inland Rules navigation lights. Lights meeting the requirements for larger vessels will be in compliance with the requirements for small vessels.

Rule 22 of both the International and the Inland Navigation Rules specifies the visibility of navigation lights for the various vessel size ranges—the larger the vessel, the greater the visibility requirement in nautical miles. Annex I gives the minimum required light intensities which correspond to the Rule 22 visibility requirements. Annex I also requires that the light intensity drop off rapidly at the ends of the arc through which the light is supposed to shine. The drafters of the International Rules recognized that it is very difficult to achieve total cut-off at the ends of the sectors, and developed the term "practical cut-off". The International Annex I did not define practical cut-off, but instead left it up to individual countries. The definitions varied among countries and with time as experience was gained.

For vessels over 20 meters in length, the United States had used 10% of minimum required intensity as the definition of practical cut-off for the International Rules. This definition was adopted for the proposed Annex I to the Inland Navigation Rules as well. Use of this definition results in a different but fixed practical cut-off intensity for each size range of vessel, because each size range has its own minimum required intensity to go with its different visibility requirement. While the higher powered lights used on larger vessels can meet the practical cut-off requirement for that size vessel, they normally cannot also meet the practical cut-off requirements for smaller vessel classes, and therefore they have not been approved for use on smaller vessels.

The larger fixtures could be made to meet the smaller vessel cut-offs if smaller wattage lamps were installed. This would, of course, reduce the visibility. Changing the definition of practical cut-off from a system based on the minimum required intensity for each vessel size range to a system based on the largest vessel for which the light was designed would permit a light approved for a given size range of vessel to be used on any smaller vessel, because the cut-off would be related to the light itself rather than the size of vessel. We are changing the definition of practical cut-off in the final rule because we believe that smaller vessels should be allowed to use brighter lights than required. In addition, the "10%" has been changed to "12.5%" to conform with current policy for inspected vessel International Rules navigation lights. These changes are a relaxation since lights which would meet the requirement of the proposal will in all cases meet the revised requirement.

A separate issue is the definition of practical cut-off for small vessels. The proposed definition of practical cut-off for vessels less than 20 meters in length was taken from the proposed regulations implementing the International Rules Annex I for smaller vessels. As those proposed regulations are now being considered for withdrawal, it is likely that a Coast Guard certification/approval program for small vessel navigation lights will not be implemented in the near future. Therefore, the definition of practical cut-off for lights for vessels less than 20 meters in length is being deleted from the final rule.

Section 84.03 Vertical Positioning and Spacing of Lights

Three commenters objected to the proposed requirement in paragraph (a)(2) that when two masthead lights are carried the after one shall be at least two meters vertically higher than the forward one. The stated reason for their objection was limited bridge clearance. This constraint was noted during the drafting of the proposal, and the two meters in the proposal was reduced from the 4.5 meter requirement contained in Annex I to the International Rules. One of the commenters suggested that the after masthead light merely be "higher than" the forward light. One of the others suggested a one meter requirement. The third offered no alternative.

If the two meter vertical height requirement does indeed cause a bridge clearance problem, it could be remedied by installing the after masthead light on a telescoping or hinged mast. The entire mast need not be hinged, just the upper offending portion. This type of installation is used on some harbor tugboats and offshore supply vessels. Although this type of mast does require manual operation, that is mitigated by the fact, as stated by one of the commenters, that Western Rivers towboats operate at night without a tow not more frequently than once every two weeks. Masthead lights need not be displayed at other times on the Western Rivers.

The after masthead light is placed higher so that other vessels will be able

to determine the approximate heading by observing the forward and after masthead lights, something they can only do if they are able to tell which light is on the forward mast and which is on the after mast. The Coast Guard feels that a minimum two meter vertical separation is needed for this purpose.

Section 84.03(d) of the proposal contained a requirement for screening "if necessary" of the masthead light or optional all-round light on power-driven vessels less than 12 meters in length. Six comments were received on this proposal. Two commenters strongly supported the proposal and the other four commenters, from the boating industry, were against. The opposing comments cited backscatter from haze and fog as being a problem, and said the requirement was too vague. Two of those commenters suggested that the requirement be made more specific as an alternative to deleting it.

While the proposed requirement was not intended to solve all night vision problems, it was expected to substantially reduce the problem for those vessels where the white navigation light reflects strongly from the vessel surfaces in front of the operator. Rule 6 recognizes that some backscatter is unavoidable under certain conditions and requires that in determining the safe speed for a vessel, the presence of backscatter from a vessel's own lights be taken into account.

The proposal was not made more specific in order to leave the manufacturer more discretion. As a result of the comments, the requirement is being made more specific, while retaining its character as a performance requirement. The requirement is also moved to § 84.09, which deals specifically with screens.

Section 84.03(e) of the proposal contained a requirement for a two meter vertical separation between the forward masthead light and the lowest masthead light on the after mast where the multiple masthead lights for towing are carried on the after mast. The language relating to the carriage of multiple masthead lights on the forward mast was ambiguous. This paragraph has been rewritten to make clear that the minimum required separation is between the highest forward masthead light and the lowest after masthead light.

Section 84.03(f)(1) contains a requirement that masthead lights be placed "above and clear of all other lights and obstructions". One commenter suggested deleting "above and" from the requirement, saying that it shouldn't matter if an obstruction was above a masthead light, as long as it was clear of it. The "above" refers first to "other lights". The intent is to make the masthead lights the most noticeable. Paragraph (f)(2) makes an exception for certain all-round lights, where lower placement is not practicable. "Obstructions" refers to objects within the prescribed vertical and horizontal sectors of the masthead light. If an object is clear of the navigation light, it is not an obstruction, even though it may be mounted above the masthead light.

Section 84.03(g) of the proposal required that the sidelights of a power-driven vessel be placed at least one meter lower than the forward masthead light. One commenter suggested a half meter separation and another commenter said the requirement could be met if dual filament lights were allowed. Both comments were from the Western Rivers towboat industry. The reasons for a one meter separation rather than a half meter separation were discussed in the preamble to the proposed rule. The other comment involves dual filament lights.

This type of light is not required by the Inland Navigation Rules or by this Annex, but is used voluntarily on some vessels and is required by other regulations on certain vessels. Dual filament lights contain in a single fixture one lamp (light bulb) containing two filaments—each on a separate electric circuit. When one filament burns out, power is switched on to the second filament, and the lamp is changed at a later convenient time. The commenter is concerned because his company voluntarily uses dual filament lights which ordinarily will not meet all of the requirements of Annex I.

In order for a navigation light to meet the Annex I horizontal sector requirements (shine through the proper arc), the light source (filament) must be positioned in a prefocused location. In the dual filament lights of the type that have been used by some Western Rivers towboats at least one of the filaments is not located properly within the light fixture. Dual filament lights can meet the requirement if fitted with large screens (which compensate for the off-center filament), but the commenter is apparently unwilling to fit screens of the necessary size.

Vessels operating under the International Navigation Rules which use lights of a similar redundancy have been equipped with tandem lights—two fixtures mounted one on top of the other, each with a separate filament. These lights are almost twice as tall as the dual filament lights, but the lights on both the primary and the secondary circuits perform equally well. In a sketch provided by the commenter to show the penalty incurred by switching to tandem lights (to retain redundancy), the minimum spacing marked indicated a misinterpretation of the requirements. In measuring vertical spacing between lights, the distance between the corresponding lights of tandem fixtures should be used, rather than between the upper light of one fixture and the lower light of the other fixture. If this system of measurement is used, the overall height should not be increased by more than about 25 centimeters with the use of tandem lights, which the Coast Guard believes is not excessive. The use of redundant source light fixtures at all, of course, is not required by the Navigation Rules.

Section 84.05 Horizontal positioning and spacing of lights.

Three comments were received from the Western Rivers towboat industry on the proposed horizontal spacing requirement for masthead lights on vessels over 50 meters in length. Under the new Inland Navigation Rules (and the International Rules), vessels over 50 meters in length are required to display a forward masthead light and an after masthead light, while shorter vessels need only display a single masthead light. Under Annex I to the International Navigation Rules, the two masthead lights are required to be separated by one-half the length of the vessel. The proposed Annex I to the Inland Rules required a separation of at least one-quarter of the length of the vessel. The horizontal separation proposed by the commenters ranged from 2 to 2.5 meters. Rule 24 requires that towboats on the Western Rivers only display masthead lights when they are operating without tows.

The purpose of the separation is to give other vessels an indication of the heading—the closer together the two lights appear, the closer the heading is to the line of sight, and the further apart the two lights appear to be, the closer the heading is to a perpendicular to the line of sight.

The commenters appeared to have downplayed the importance on Western Rivers towboats of navigation lights in general and masthead lights in particular. One commenter emphasized customary practice (involving the use of radiotelephone) between towboats arranging passing maneuvers. He stated that "Navigation lights in River Service are useful only to confirm passing maneuvers and to 'see how the other fellow is shaping up'." (The latter point we think is significant.) His discussion centered on normal passing maneuvers

between two towboats with tows and neglected situations involving vessels other than towboats. Navigation lights are for the primary benefit of the *other* vessel.

The Coast Guard considers navigation lights to be the primary night-time collision avoidance aid. While it may be true that towboats *with* tows follow predictable courses, the requirement for masthead lights for towboats on the Western Rivers applies only when the towboats are operating without tows, and then they are likely to be maneuvering and crossing channels. It is very important at such times for other vessels to know the towboat's relative orientation and turn rate.

While the supplemental use of radiotelephone and radar certainly enhance the safety of vessels operating at night, these aids are not always reliable. All vessels are not equipped with radar and it is not always used on vessels that are so equipped. All vessels do not have a radiotelephone and even when vessels attempt to contact other vessels by radiotelephone, they are not always able to make contact. Such a situation led to the collision of the Liberian tankship M/V PINA and the towboat MR. PETE on the Mississippi River in 1979. Contributing to this $3,285,000 accident were deficient navigation lights and the failure of the vessel operators to establish radio communications after repeated attempts.

One comment was that the after masthead light would shine into the towboat's pilot house. This is not a problem unique to towboats and it may be remedied by installing a screen to limit the downward dispersion of light.

The one-quarter hull length horizontal separation was proposed after the configuration of Western Rivers towboats had been studied. A set of blueprints was submitted during proposal development by a representative of a Western Rivers towing company and member of the Rules of the Road Advisory Committee. The marked-up plans of two towboats, one less than 50 meters in length and one more than 50 meters, were used to a considerable degree in the formulation of the proposed Annex I. The plans showed the existing navigation light positioning and had been marked up to show the positioning that would be required under the International Navigation Rules, and to show the company's proposed changes to the International Annex I to create the Inland Annex I. Their proposed changes included, for vessels over 50 meters in length, a horizontal separation between masthead lights of one quarter of the length of the vessel and a vertical separation of two meters. The blueprint showed an existing mast of approximately the height and position needed to satisfy the proposed horizontal and vertical positioning requirements for the after masthead light. The mast was mounted at the after end of the accommodations below the pilot house. (The mast is used to mount the after all-round range light required by Rule 7 of the existing Western Rivers Navigation Rules. The same light may double as an anchor light.)

Further investigation has shown that similar masts are not uncommon on large Western Rivers towboats. However, on some towboats less than 60 meters in length the upper accommodations (below the pilot house) do not extend as far aft. On vessels of this configuration, the after mast would have to be mounted on the next deck below in order to achieve the quarter hull length separation proposed, thereby resulting in a more costly installation. Taking into account rule 24(i) which exempts vessels on the Western Rivers from the requirement of displaying masthead lights while pushing ahead or towing alongside, the final rule has balanced cost and safety somewhat to permit certain vessels on the Western Rivers to carry their masthead lights at a reduced horizontal separation.

The final rule requires a minimum 10 meter masthead light separation for vessels 50 to 60 meters in length on the Western Rivers and retains the quarter hull length separation requirement for other vessels. The Coast Guard believes the 2 to 2.5 meter separation advocated by the commenters is inadequate to give other vessels reliable information on approximate heading and turn rate.

Rule 38 grants to existing vessels less than 150 meters in length a permanent exemption from compliance with the Annex I horizontal positioning requirements for masthead lights. The after all-round range light now required by Western Rivers rule 7 can be used in lieu of an after masthead light and stern light for nine years under the new Inland Rule 38. Therefore there will be no impact due to this provision on the approximately 135 existing Western Rivers towboats over 50 meters in length (all of which are less than 150 meters in length).

Section 84.09 Screens for Sidelights

The discussion of the proposed § 84.03(d) concerning screens for certain all-round and masthead lights stated that that part of the proposal relating to screens would be revised and moved to this section. Accordingly, to better reflect the new content of § 84.09, the title of this section is being changed to "Screens", and a new paragraph is being added.

Section 84.11 Shapes

The proposal adopted exactly the International Rules Annex I section on day shapes and so included a definition of a "cylinder" shape. Under the International Rules, this shape denotes a vessel constrained by draft. Because the classification "vessel constrained by its draft" was not carried over to the new Inland Rules, the definition for the cylinder shape is not needed and so is being deleted in the final Annex I.

Section 84.15 Intensity of Lights

One commenter said the visibility of lights for inland waters should not be as great as required under the International Rules. Another commenter said they should be more visible because of background land-based lights and because of smog. The visibility requirements were established in Rule 22 of the statutory Inland Rules and cannot be changed by this rulemaking. The intensities established by Annex I correspond to the visibilities prescribed in Rule 22 for good atmospheric conditions.

Section 84.19 Vertical Sectors

One commenter asked that provision be made for battery powered lights used on unmanned barges. Due to the limitations in battery technology, unmanned barge lights used on International Rules waters have been unable to provide the specified intensity in the full vertical sector for a reasonable period before new batteries are required. Since barges on inland waters are not likely to heel over more than a very small amount, the Coast Guard has allowed the battery powered lights used on them to meet a reduced vertical sector requirement. For lights used on International Rules waters this has been accomplished by an interpretive ruling of rule 24 of the International Rules. For the Inland Rules, the proposed Annex I is being modified to include unmanned barges as a separate category of vessel for the purposes of determining vertical sector requirements.

Section 84.23 Maneuvering Light

One commenter said the one meter minimum vertical separation requirement added to the bridge clearance problem. A smaller separation would not interfere unduly with the visibility of other navigation lights as the maneuvering light is operated only intermittently. Accordingly, the

separation requirement is being reduced to one-half meter.

Regulatory Analysis

These regulations were reviewed in accordance with the "Policies and Procedures for Simplification, Analysis and Review of Regulations" (DOT Order 2100.5 of May 22, 1980) in the Notice of Proposed Rulemaking (46 FR 37002) and were determined to be non-significant. The regulations were also found to be non-major under the criteria established in Executive Order 12291. No information has been received which alters those determinations or the Regulatory Flexibility Act (Pub. L. 96–354, 5 U.S.C. 601) certification of no significant impact, which was also published in the same Notice of Proposed Rulemaking.

In consideration of the foregoing, a new Part 84 of Title 33 of the Code of Federal Regulations is added to read as follows:

PART 84—ANNEX I: POSITIONING AND TECHNICAL DETAILS OF LIGHTS AND SHAPES

Sec.

84.01 Definitions.
84.03 Vertical positioning and spacing of lights.
84.05 Horizontal positioning and spacing of lights.
84.07 Details of location of direction-indicating lights for fishing vessels, dredgers and vessels engaged in underwater operations.
84.09 Screens.
84.11 Shapes.
84.13 Color specification of lights.
84.15 Intensity of lights.
84.17 Horizontal sectors.
84.1 Vertical sectors.
84.21 Intensity of non-electric lights.
84.23 Maneuvering light.
84.25 Approval. [Reserved]

Authority: Sec. 3, Pub. L. 96–591, 33 U.S.C. 2071; 49 CFR 1.46(n)(14).

§ 84.01 Definitions.

(a) The term "height above the hull" means height above the uppermost continuous deck. This height shall be measured from the position vertically beneath the location of the light.

(b) The term "practical cut-off" means, for vessels 20 meters or more in length, 12.5 percent of the minimum luminous intensity (Table 84.15(b)) corresponding to the greatest range of visibility for which the requirements of Annex I are met.

(c) The term "Rule" or "Rules" means the Inland Navigation Rules contained in sec. 2 of the Inland Navigational Rules Act of 1980 (Pub. L. 96–591, 94 Stat. 3415, 33 U.S.C. 2001, December 24, 1980) as amended.

§ 84.03 Vertical positioning and spacing of lights.

(a) On a power-driven vessel of 20 meters or more in length the masthead lights shall be placed as follows:

(1) The forward masthead light, or if only one masthead light is carried, then that light, at a height above the hull of not less than 5 meters, and, if the breadth of the vessel exceeds 5 meters, then at a height above the hull not less than such breadth, so however that the light need not be placed at a greater height above the hull than 8 meters;

(2) When two masthead lights are carried the after one shall be at least 2 meters vertically higher than the forward one.

(b) The vertical separation of the masthead lights of power-driven vessels shall be such that in all normal conditions of trim the after light will be seen over and separate from the forward light at a distance of 1000 meters from the stem when viewed from water level.

(c) The masthead light of a power-driven vessel of 12 meters but less than 20 meters in length shall be placed at a height above the gunwale of not less than 2.5 meters.

(d) The masthead light, or the all-round light described in rule 23(c), of a power-driven vessel of less than 12 meters in length shall be carried at least one meter higher than the sidelights.

(e) One of the two or three masthead lights prescribed for a power-driven vessel when engaged in towing or pushing another vessel shall be placed in the same position as either the forward masthead light or the after masthead light, provided that the lowest after masthead light shall be at least 2 meters vertically higher than the highest forward masthead light.

(f)(1) The masthead light or lights prescribed in Rule 23(a) shall be so placed as to be above and clear of all other lights and obstructions except as described in paragraph (f)(2) of this section.

(2) When it is impracticable to carry the all-round lights prescribed in rule 27(b)(i) below the masthead lights, they may be carried above the after masthead light(s) or vertically in between the forward masthead light(s) and after masthead light(s), provided that in the latter case the requirement of § 84.05(d) shall be complied with.

(g) The sidelights of a power-driven vessel shall be placed at least one meter lower than the forward masthead light. They shall not be so low as to be interfered with by deck lights.

(h) [Reserved]

(i) When the Rules prescribe two or three lights to be carried in a vertical line, they shall be spaced as follows:

(1) On a vessel of 20 meters in length or more such lights shall be spaced not less than 1 meter apart, and the lowest of these lights shall, except where a towing light is required, be placed at a height of not less than 4 meters above the hull;

(2) On a vessel of less than 20 meters in length such lights shall be spaced not less than 1 meter apart and the lowest of these lights shall, except where a towing light is required, be placed at a height of not less than 2 meters above the hull;

(3) When three lights are carried they shall be equally spaced.

(j) The lower of the two all-round lights prescribed for a vessel when engaged in fishing shall be a height above the sidelights not less than twice the distance between the two vertical lights.

(k) The forward anchor light prescribed in rule 30(a)(i), when two are carried, shall not be less than 4.5 meters above the after one. On a vessel of 50 meters or more in length this forward anchor light shall be placed at a height or not less than 6 meters above the hull.

§ 84.05 Horizontal positioning and spacing of lights.

(a) Except as specified in paragraph (b) of this section, when two masthead lights are prescribed for a power-driven vessel, the horizontal distance between them shall not be less than one quarter of the length of the vessel but need not be more than 50 meters. The forward light shall be placed not more than one half of the length of the vessel from the stem.

(b) On power-driven vessels 50 meters but less than 60 meters in length operated on the Western Rivers, the horizontal distance between masthead lights shall not be less than 10 meters.

(c) On a power-driven vessel of 20 meters or more in length the sidelights shall not be placed in front of the forward masthead lights. They shall be placed at or near the side of the vessel.

(d) When the lights prescribed in rule 27(b)(i) are placed vertically between the forward masthead light(s) and the after masthead light(s) these all-round lights shall be placed at a horizontal distance of not less than 2 meters from the fore and aft centerline of the vessel in the athwartship direction.

§ 84.07 Details of location of direction-indicating lights for fishing vessels, dredgers and vessels engaged in underwater operations.

(a) The light indicating the direction of the outlying gear from a vessel engaged in fishing as prescribed in rule 26(c)(ii) shall be placed at a horizontal distance of not less than 2 meters and not more

than 6 meters away from the two all-round red and white lights. This light shall be placed not higher than the all-round white light prescribed in rule 26(c)(i) and not lower than the sidelights.

(b) The lights and shapes on a vessel engaged in dredging or underwater operations to indicate the obstructed side and/or the side on which it is safe to pass, as prescribed in rule 27(d)(i) and (ii), shall be placed at the maximum practical horizontal distance, but in no case less than 2 meters, from the lights or shapes prescribed in rule 27(b)(i) and (ii). In no case shall the upper of these lights or shapes be at a greater height than the lower of the three lights or shapes prescribed in rule 27(b)(i) and (ii).

§ 84.09 Screens.

(a) The sidelights of vessels of 20 meters or more in length shall be fitted with mat black inboard screens and meet the requirements of § 84.17. On vessels of less than 20 meters in length, the sidelights, if necessary to meet the requirements of § 84.17, shall be fitted with mat black inboard screens. With a combined lantern, using a single vertical filament and a very narrow division between the green and red sections, external screens need not be fitted.

(b) On power-driven vessels less than 12 meters in length constructed after July 31, 1983, the masthead light, or the all-round light described in rule 23(c) shall be screened to prevent direct illumination of the vessel forward of the operator's position.

§ 84.11 Shapes.

(a) Shapes shall be black and of the following sizes:

(1) A ball shall have a diameter of not less than 0.6 meter;

(2) A cone shall have a base diameter of not less than 0.6 meter and a height equal to its diameter;

(3) A diamond shape shall consist of two cones (as defined in paragraph (a)(2) of this section) having a common base.

(b) The vertical distance between shapes shall be at least 1.5 meter.

(c) In a vessel of less than 20 meters in length shapes of lesser dimensions but commensurate with the size of the vessel may be used and the distance apart may be correspondingly reduced.

§ 84.13 Color specification of lights.

(a) The chromaticity of all navigation lights shall conform to the following standards, which lie within the boundaries of the area of the diagram specified for each color by the International Commission on Illumination (CIE), in the "Colors of Light Signals", which is incorporated by reference. It is Publication CIE No. 2.2. (TC–1.6), 1975, and is available from the Illumination Engineering Society, 345 East 47th Street, New York, NY 10017. It is also available for inspection at the Office of the Federal Register, Room 8401, 1100 L Street N.W., Washington, DC 20408. This incorporation by reference was approved by the Director of the Federal Register.

(b) The boundaries of the area for each color are given by indicating the corner co-ordinates, which are as follows:

(1) *White:*

x	0.525	0.525	0.452	0.31.0	0.310	0.443
y	0.382	0.440	0.440	0.348	0.283	0.382

(2) *Green:*

x	0.028	0.009	0.300	0.203
y	0.385	0.723	0.511	0.356

(3) *Red:*

x	0.680	0.660	0.735	0.721
y	0.320	0.320	0.265	0.259

(4) *Yellow:*

x	0.612	0.618	0.575	0.575
y	0.382	0.382	0.425	0.406

§ 84.15 Intensity of lights.

(a) The minimum luminous intensity of lights shall be calculated by using the formula:

$$I = 3.43 \times 10^6 \times T \times D^2 \times K^{-D}$$

where I is luminous intensity in candelas under service conditions,

T is threshold factor 2×10^{-7} lux,

D is range of visibility (luminous range) of the light in nautical miles,

K is atmospheric transmissivity. For prescribed lights the value of K shall be 0.8, corresponding to a meteorological visibility of approximately 13 nautical miles.

(b) A selection of figures derived from the formula is given in Table 84.15(b)

TABLE 84.15(b)

Range of visibility (luminous range) of light in nautical miles D	Minimum luminous intensity of light in candelas for K = 0.8 I
1	0.9
2	4.3
3	12
4	27
5	[illegible]
6	94

§ 84.17 Horizontal sectors.

(a)(1) In the forward direction, sidelights as fitted on the vessel shall show the minimum required intensities. The intensities shall decrease to reach practical cut-off between 1 and 3 degrees outside the prescribed sectors.

(2) For sternlights and masthead lights and at 22.5 degrees abaft the beam for sidelights, the minimum required intensities shall be maintained over the arc of the horizon up to 5 degrees within the limits of the sectors prescribed in rule 21. From 5 degrees within the prescribed sectors the intensity may decrease by 50 percent up to the prescribed limits; it shall decrease steadily to reach practical cut-off at not more than 5 degrees outside the prescribed sectors.

(b) All-round lights shall be so located as not to be obscured by masts, topmasts or structures within angular sectors of more than 6 degrees, except anchor lights prescribed in rule 30, which need not be placed at an impracticable height above the hull, and the all-round white light described in rule 23(d), which may not be obscured at all.

§ 84.19 Vertical sectors.

(a) The vertical sectors of electric lights as fitted, with the exception of lights on sailing vessels and on unmanned barges, shall ensure that:

(1) At least the required minimum intensity is maintained at all angles from 5 degrees above to 5 degrees below the horizontal;

(2) At least 60 percent of the required minimum intensity is maintained from 7.5 degrees above to 7.5 degrees below the horizontal.

(b) In the case of sailing vessels the vertical sectors of electric lights as fitted shall ensure that:

(1) At least the required minimum intensity is maintained at all angles from 5 degrees above to 5 degrees below the horizontal;

(2) At least 50 percent of the required minimum intensity is maintained from 25 degrees above to 25 degrees below the horizontal.

(c) In the case of unmanned barges the minimum required intensity of electric lights as fitted shall be maintained on the horizontal.

(d) In the case of lights other than electric lights these specifications shall be met as closely as possible

§ 84.21 Intensity of non-electric lights.

Non-electric lights shall so far as practicable comply with the minimum intensities, as specified in the Table given in § 84.15.

§ 84.23 Maneuvering light.

Notwithstanding the provisions of § 84.03(f), the maneuvering light described in rule 34(b) shall be placed approximately in the same fore and aft vertical plane as the masthead light or lights and, where practicable, at a minimum height of one-half meter vertically above the forward masthead

light, provided that it shall be carried not less than one-half meter vertically above or below the after masthead light. On a vessel where only one masthead light is carried the maneuvering light, if fitted, shall be carried where it can best be seen, not less than one-half meter vertically apart from the masthead light.

§ 84.25 Approval. [Reserved]

(Sec. 3, Pub. L. 96-591; 49 CFR 1.46(n)(14))

Dated: November 25, 1981.

R. A. Bauman,

Rear Admiral, U.S. Coast Guard, Chief, Office of Navigation.

BILLING CODE 4910-14-M

POSTAL SERVICE

39 CFR Part 111

Third-Class 5-Digit ZIP Code Presorted Mail

AGENCY: Postal Service.

ACTION: Final rule.

SUMMARY: By a notice published in the **Federal Register** on August 14, 1981, (46 FR 41047) the Postal Service adopted a final rule governing the preparation of third-class bulk mail sent at the 5-digit ZIP Code presort level rate. Each sack of mail sent at this rate must contain a minimum of 50 pieces or 15 pounds of mail. In this final rule the Postal Service is lowering these minimum requirements to 50 pieces or 10 pounds. The Service believes that this change will enable more mailers to qualify for this rate, and the change will not adversely affect the sack workload at the Bulk Mail Centers.

EFFECTIVE DATE: December 24, 1981.

FOR FURTHER INFORMATION CONTACT: Florence B. Richardson, (202) 245-4513.

SUPPLEMENTARY INFORMATION: Under current regulations, a sack of 5-digit presort bulk third-class mail must contain a minimum of 50 pieces or 15 pounds. After studying the effects of the regulations which were implemented on September 13, 1981 (46 FR 41047, August 14, 1981), the Postal Service believes it can reduce the minimum pound requirement from 15 pounds to 10 pounds. This change more closely relates to the breakpoint of approximately .24 pound which is used to determine when the bulk third-class per pound rate is charged (instead of the per piece rate). The breakpoint changed November 1, 1981 as a result of changes in third-class rates (46 FR 51683, October 21, 1981). This change will enable more mailings to qualify for the third-class 5-digit presort rate. For example, mailers who mail items which are subject to the bulk third-class per pound rates will need fewer items to qualify for the rate. The Postal Service believes more mailers will presort their mailings to 5-digit destinations, thus reducing their postage costs and also reducing the number of handlings that will be required by the Postal Service.

Also section 622.12a is revised to clarify that a unique 3-digit sack may contain no more than 49 pieces for a particular 5-digit ZIP Code when pieces for that ZIP Code are placed inside a unique three-digit sack with pieces for other 5-digit ZIP Codes served by that city as specified in section 667.42(2).

Post offices are being notified by telecommunication that these changes are being made effective on the date of publication of this document, so that affected mailers can be made aware of the lowered requirements as soon as possible and take advantage of the changes in their next mailings.

PART 111—GENERAL INFORMATION ON POSTAL SERVICE

In view of the considerations discussed above, the Postal Service hereby adopts the following changes to Parts 620 and 660 of the Domestic Mail Manual, which is incorporated by reference in the **Federal Register**. 39 CFR 111.1.

Part 620—Classification

In 622.1, revise 622.12a to read as follows:

622.1 Eligibility

* * * * *

.12 *Five-Digit Presort Level.*

a. *Minimum Quantity.* Each mailing must consist of at least 200 pieces or 50 pounds of mail presorted to 5-digit destinations. Each piece must be part of a package of 10 or more pieces to the same 5-digit ZIP Code and the package must be sacked to the same 5-digit ZIP Code. Each sack must contain a minimum of 50 pieces or 10 pounds of mail to the same 5-digit ZIP Code in order to be eligible for the 5-digit presort level rate. Exception: mailers may commingle different 5-digit packages of 10–49 pieces in sacks for the unique 3-digit multi-ZIP Code cities listed in Exhibit 122.633 providing:

(1) Each sack contains at least 50 pieces or 10 pounds of mail, and

(2) No 3-digit city packages are included in the sack, and

(3) 50 pieces or 10 pounds of mail for a single 5-digit ZIP Code (within the unique 3-digit city) must be sacked separately.

* * * * *

Part 660—Preparation Requirements

In 667, revise .42 to read as follows:

667.4 Preparation Requirements for Five-Digit Presort Level Rate

* * * * *

.42 *Sacking.* All qualifying packages of 10 or more pieces must be placed in a sack. Each sack must contain at least 50 pieces or 10 pounds of mail. Sacks may be prepared in one of two ways, as follows:

(1) If there are 50 pieces or 10 pounds of mail to a single 5-digit ZIP Code destination, they must be placed in a 5-digit sack. Five-digit sacks containing less than 50 pieces or 10 pounds may not be made. The sack must be labeled in the following manner:

Line 1: City, State and 5-digit ZIP Code Destination.
Line 2: Contents.
Line 3: Office of Mailing.

Sample:

ARLINGTON, VA 22202
3C LTRS
BOSTON, MA 021

(2) If a mailer has less than 50 pieces or 10 pounds to the same 5-digit ZIP Code, and if that 5-digit ZIP Code is included in a unique 3-digit multicoded city listed in Exhibit 122.633, packages of that mail may be included in a sack containing other 5-digit packages within the unique 3-digit ZIP Code city. Each sack must contain at least 50 pieces or 10 pounds of 5-digit presorted mail. No 3-digit city packages may be included in the sack. The sack must be labeled in the following manner:

Line 1: City, State and unique 3-digit city ZIP Code.
Line 2: Contents—5-digit PKGS.
Line 3: Office of Mailing.

Sample:

SPOKANE, WA 992
3C LTRS 5-DIGIT PKGS
BOSTON, MA 021

A transmittal letter making these changes in the pages of the Domestic Mail Manual will be published and will be transmitted to subscribers automatically. Notice of these changes will be published in the **Federal Register** as provided in 39 CFR 111.3.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 60

[A-10-FRL 2005-6]

Standards of Performance for New Source Performance Standards; Subdelegation of Authority to a Washington Local Agency

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA is today approving a request dated September 23, 1981, from the Washington Department of Ecology for subdelegation to enforce the New Source Performance Standards to the Benton-Franklin-Walla Walla Counties Air Pollution Control Authority.

EFFECTIVE DATE: November 9, 1981.

ADDRESSES: The related material in support of this subdelegation may be examined during normal business hours at the following locations:

Central Docket Section (10A–81–4), West Tower Lobby, Gallery I, Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460

Air Programs Branch, Environmental Protection Agency, Region 10, 1200 Sixth Avenue, Seattle, Washington 98101

State of Washington, Department of Ecology, 4224 Sixth Avenue, SE., Lacey, Washington 98503

The Office of the Federal Register, 1100 L Street, NW., Room 8401, Washington, D.C.

FOR FURTHER INFORMATION CONTACT: George C. Hofer, Air Programs Branch, Environmental Protection Agency, 1200 Sixth Avenue, M/S 625, Seattle, Washington 98101, Telephone: (206) 442–1352, 399–1352 (FTS).

SUPPLEMENTARY INFORMATION: Pursuant to section 112(d) of the Clean Air Act, as amended, the Regional Administrator of Region 10, Environmental Protection Agency (EPA), delegated to the State of Washington Department of Ecology on February 28, 1975, the authority to implement and enforce the program for New Source Performance Standards (NSPS). The delegation was announced in the **Federal Register** on April 1, 1975 (40 FR 14632).

On September 23, 1981, the Washington State Department of Ecology requested EPA's concurrence in the State's subdelegation of the NSPS program to the Benton-Franklin-Walla Walla Counties Air Pollution Control Authority. After reviewing the State's request, the Regional Administrator determined that the subdelegation met all the requirements outlined in EPA's delegation of February 28, 1975. Therefore, the Regional Administrator on November 9, 1981, concurred in the subdelegation to the local agency listed below with the stipulation that all the conditions placed on the original delegation to the State shall also apply to the subdelegation to the local agency (except fossil fuel-fired steam generators). EPA is today amending 40 CFR 60.04 to reflect the State's subdelegation.

The amended § 60.04 provides that all reports, requests, applications, submittals and communications required pursuant to Part 61 which were previously to be sent to the Director of the Washington Department of Ecology will now be sent to the Benton-Franklin-Walla Walla Counties Air Pollution Control Authority. The amended section is set forth below.

This rulemaking is effective immediately and is issued under the authority of section 112 of the Clean Air Act, as amended (42 U.S.C. 1857c–7).

Dated: November 20, 1981.

John R. Spencer,

Regional Administrator.

PART 60—STANDARDS OF PERFORMANCE FOR NEW STATIONARY SOURCES

Part 60 of Chapter I, Title 40 of the Code of Federal Regulations is amended as follows:

In § 60.4, paragraph (b) is amended by adding paragraph (WW)(viii):

§ 60.4 Address.

* * * * *

(b) * * *

(WW) * * *

(viii) Benton-Franklin-Walla Walla Counties Air Pollution Control Authority, 650 George Washington Way, Richland, Washington 99352.

* * * * *

Incorporation by reference of the State Implementation Plan for the State of Washington was approved by the Director of the Office of Federal Register on July 1, 1981.

BILLING CODE 6560–38–M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

43 CFR Public Land Order 6095

[NM 42945]

New Mexico; Revocation of Public Water Reserve No. 107, Interpretation No. 109

AGENCY: Bureau of Land Management, Interior.

ACTION: Public land order.

SUMMARY: This order revokes an Executive order and a Secretarial order which withdrew lands for a public water reserve. This action will restore the lands to operation of the public land laws generally, including nonmetalliferous mineral location under the mining laws.

EFFECTIVE DATE: January 19, 1982.

FOR FURTHER INFORMATION CONTACT: Stella V. Gonzales, New Mexico State Office 505–988–6211.

By virtue of the authority vested in the Secretary of the Interior by section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; 43 U.S.C. 1714, it is ordered as follows:

1. The Executive Order of April 17, 1926, creating Public Water Reserve No. 107, as construed by Secretarial Order of November 1, 1929, is hereby revoked in its entirety:

New Mexico Principal Meridian

T. 28 S., R. 9 W.,
Sec. 15, S½NE¼, N½SE¼.

The area described contains 160 acres in Luna County.

2. At 8 a.m. on January 19, 1982, the lands will be open to operation of the public land laws generally, subject to valid existing rights, the provisions of existing withdrawals, and the requirements of applicable law. All valid applications received at or prior to 8 a.m. on January 19, 1982, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing.

3. At 8 a.m. on January 19, 1982, the lands will be open to nonmetalliferous mineral location under the United States mining laws. The lands have been and continue to be open to metalliferous mineral location under the United States mining laws and to applications and offers under the mineral leasing laws.

Inquiries concerning the lands should be addressed to the Bureau of Land Management, P.O. Box 1449, Santa Fe, New Mexico 87501.

Garrey E. Carruthers,

Assistant Secretary of the Interior.

December 14, 1981.

BILLING CODE 4310–84–M

43 CFR Public Land Order 6096

[M 41590]

Montana; Public Land Order No. 5924; Correction

AGENCY: Bureau of Land Management, Interior.

ACTION: Public land order.

SUMMARY: This document will correct two errors in Public Land Order No. 5924 of May 18, 1981 which concerned partial revocation of a public water reserve in Montana.

EFFECTIVE DATE: December 24, 1981.

FOR FURTHER INFORMATION CONTACT: Roland F. Lee, Montana State Office, 406–657–6291.

By virtue of the authority vested in the Secretary of the Interior, by Section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; 43 U.S.C. 1714, it is ordered as follows:

The title of Public Land Order No. 5924 of May 18, 1981, in FR Doc. 81–16027 appearing on page 28857 in the issue of Friday, May 29, 1981, in the first column reads "Montana; Partial Revocation of Public Water Reserve No. 76." It is hereby corrected to read "Montana: Partial Revocation of Public Water Reserve No. 78."

The land description under Paragraph one in the first column reads "Public Water Reserve No. 76." It is hereby corrected to read "Public Water Reserve No. 78."

Garrey E. Carruthers,

Assistant Secretary of the Interior.

December 14, 1981.

BILLING CODE 4310–84–M

---

43 CFR Public Land Order 6097

[OR 19576 (WASH)]

Washington; Powersite Restoration No. 718; Partial Revocation of Powersite Reserve No. 67

AGENCY: Bureau of Land Management, Interior.

ACTION: Public land order.

SUMMARY: This order revokes an Executive order in part as to 80 acres of land withdrawn for a powersite reserve. This action will restore the public lands involved to operation of the public lands laws generally.

EFFECTIVE DATE: January 19, 1982.

FOR FURTHER INFORMATION CONTACT: Champ C. Vaughan, Jr., Oregon State Office, 503–231–6905.

By virtue of the authority vested in the Secretary of the Interior by section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; 43 U.S.C. 1714, and pursuant to the determination by the Federal Energy Regulatory Commission in DA–216–Washington, it is ordered as follows:

1. The Executive Order of July 2, 1910, which created Powersite Reserve No. 67, is hereby revoked insofar as it affects the following described lands:

Willamette Meridian

Powersite Reserve No. 67

T. 6 N., R. 10 E.,
Sec. 3, SE¼SE¼.
T 5 N., R. 11 E.,
Sec. 18, NE¼SW¼.

The area described aggregate 80 acres in Klickitat County.

2. The State of Washington has waived its preference right for highway rights-of-way or material sites as provided by the Federal Power Act of June 10, 1920, 16 U.S.C. 818.

3. At 10 a.m. on January 19, 1982, the public lands will be open to operation of the public land laws generally, subject to valid existing rights, the provisions of existing withdrawals, and the requirements of applicable law. All valid applications received at or prior to 10 a.m. on January 19, 1982, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing.

4. The lands have been open to applications and offers under the mineral leasing laws and to location under the United States mining laws subject to the provisions of the Act of August 11, 1955, (69 Stat. 682; 30 U.S.C. 621).

Inquiries concerning the lands should be addressed to the State Director, Bureau of Land Management, P.O. Box 2965, Portland, Oregon 97208.

Garrey E. Carruthers,

Assistant Secretary of the Interior.

December 14, 1981.

BILLING CODE 4310–84–M

DEPARTMENT OF TRANSPORTATION

Maritime Administration

46 CFR Part 310

Admission and Training of Midshipmen at the United States Merchant Marine Academy; Pay Increase

AGENCY: Maritime Administration, Transportation.

ACTION: Final rule.

SUMMARY: The Maritime Administration amends its regulations relating to merchant marine training to increase the pay that midshipmen of the United States Merchant Marine Academy receive while assigned to merchant vessels for sea year training. The purpose of this amendment is to implement the Maritime Administration policy that midshipmen shall receive the same rate of pay from their steamship company employers for the sea year training as cadets receive at the Federal academies.

EFFECTIVE DATE: January 15, 1982.

FOR FURTHER INFORMATION CONTACT: Mr. Erich J. Bernhardt, Academies Program Officer, Maritime Administration, Office of Maritime Labor & Training, Department of Transportation, Washington, D.C. 20590 (202) 426–5764.

SUPPLEMENTARY INFORMATION: Part 310 of Title 46 of the Code of Federal Regulations is hereby amended. This amendment increases the pay that midshipmen of the United States Merchant Marine Academy receive while assigned to merchant vessels for sea year training.

The rate of pay received by midshipmen while assigned to subsidized merchant vessels is a matter of public contract with the owners of such vessels. Accordingly, this amendment is exempt from the application of 5 U.S.C. 553, and is being issued as a final rule without opportunity for public comment. This amendment has been determined not to be a major regulation requiring preparation of a regulatory impact analysis, within the scope of E.O. 12291. The Maritime Administration certifies that the regulation will not exert a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, of 1980 (Pub. L. 96–354). It includes no reporting requirement for the collection of information within the scope of the Paperwork Reduction Act of 1980 (Pub. L. 96–511).

PART 310—MERCHANT MARINE TRAINING

Part 310 Title 46 of the Code of Federal Regulations is amended by revising paragraph (c) of Section 310.58 to read as follows:

§ 310.58 Training on subsidized vessels.

* * * * *

(c) *Pay.* Midshipmen shall receive pay while employed aboard merchant vessels, at the rate of $461.40 per month directly from their steamship company employers. While aboard ship, they shall be berthed in single-occupancy rooms or in rooms with other midshipmen in that part of the vessel designated for licensed officers (or in first-class passenger quarters) and shall mess with the licensed officers. The steamship company employers shall also pay the midshipmen such subsistence and room allowance in port, transportation allowances, and other bonuses or allowances as are paid to the licensed officers of the vessel in which the midshipmen are employed.

(Sec. 204(b) and 1301–1308, Merchant Marine Act, 1936, as amended (49 Stat. 1987, 46 U.S.C. 1114) and Maritime Education and Training Act of 1980 (Pub. L. 96–453); Reorganization Plans No. 21 of 1950 (64 Stat. 1273) and No. 7 of 1961 (75 Stat. 842), as

amended by Pub. L. 91-469 (84 Stat. 1036); Pub. L. 97-31 (Aug. 6, 1981); 49 CFR 1.66 (46 FR 47458, Sept. 28, 1981).

(Catalog of Federal Domestic Assistance Program No. 11-507 U.S. Merchant Marine Academy (Kings Point)).

Dated: December 16, 1931.

By Order of the Maritime Administrator.
Maritime Administration.

Research and Special Programs Administration

49 CFR Parts 171, 173 and 178

[Docket No. HM-176; Amdt. Nos. 171-63, 173-52, 178-69]

Specification and Usage Requirements for 3AL Seamless, Aluminum Cylinders

AGENCY: Materials Transportation Bureau (MTB), Research and Special Programs Administration, DOT.

ACTION: Final rule.

SUMMARY: This final rule amends the Hazardous Materials Regulations by establishing a specification requirement for seamless aluminum cylinders made of definitely prescribed alloys. These new cylinders are designated DOT Specification 3AL. Included in the final rule are requirements governing the use of these cylinders for shipment of certain hazardous materials. Because this final rule eliminates the need for 7 exemptions authorizing the use of over 3 million existing cylinders, these exemptions are terminated on the effective date of the final rule.

EFFECTIVE DATE: July 2, 1982.

FOR FURTHER INFORMATION CONTACT: Arthur Mallen, Chief, Technology Division, Office of Hazardous Materials Regulation, Materials Transportation Bureau, U.S. Department of Transportation, 400 7th St. S.W., Washington, D.C. 20590 (202-755-4906).

SUPPLEMENTARY INFORMATION: On August 14, 1980, the MTB published a notice of proposed rulemaking (NPRM) (Docket HM-176; Notice 80-7; 45 FR 54907) which proposed to establish a new seamless aluminum cylinder specification and authorize the use of this cylinder for certain hazardous materials. The NPRM was based in part on the Compressed Gas Association's (CGA) petition dated November 3, 1975, and Airco Industrial Gases (AIG) petition dated April 2, 1979, to add a new high pressure aluminum cylinder specification to Part 178. Comment was invited in that notice with a closing date of November 1, 1980. Based on the comments received and the MTB's evaluation thereof, the proposals in the NPRM with certain revisions are being incorporated as amendments to the Hazardous Materials Regulations.

It is the MTB's intention that existing seamless aluminum cylinders, authorized for use under exemptions, be covered under this rule, thereby eliminating the need for aluminum cylinder exemptions. Accordingly, a new paragraph (c) has been added to § 173.23 to cover cylinders previously authorized under exemptions.

The following is a section by section summary of the comments received on various parts of the notice.

Part 171

Section 171.7

One commenter suggested that the correct ASTM Tension testing method for aluminum is "ASTM B 557," rather than the proposed "ASTM E-8" which is for steel products. MTB agrees and has changed the new paragraph (d)(5)(x) to reference the correct method.

Part 173

One commenter endorsed the NPRM proposal to prohibit the use of 3AL cylinders for poisonous A materials and strong oxidizers. This commenter stated that since aluminum starts degrading at temperatures above 450°F the prohibition was appropriate in the absence of extensive (fire) tests to verify safety. Other commenters posed the opposite view by submitting a list of hazardous materials that are compatible with aluminum. They claim that the restrictions of 49 CFR 173.21 and 173.24 provide adequate safeguards for shipping these hazardous materials. Based on these latter commenters, MTB has reversed its NPRM position and has amended appropriate paragraphs in §§ 173.328, 173.332, 173.336, 173.337 and 173.351 to authorize the use of 3AL cylinders for Poison A materials and strong oxidizers previously authorized for shipment under exemptions.

Section 173.34

One commenter agreed that the 5 year retest is appropriate. Two commenters, on the other hand, claimed that the 5 year retest is discriminatory, and suggested that a 10 year retest is proper since existing regulations allow a 10 year retest for 3A and 3AA steel cylinders and a 12 year retest for 4E aluminum cylinders. Rejection rate for cylinders inspected in 1979 was presented as a basis for concluding that aluminum cylinders are as good as steel cylinders. Notwithstanding these comments, a 5 year retest will be required based on the following:

1. The 10 year retest for 3A and 3AA cylinders is based on extensive experience. The behavior of 3AL cylinders to high pressure cycling with various hazardous materials is not known.

2. No data comparable to the rejection elastic expansion (which is part of the basis for the extension of the retest interval for 3A or 3AA cylinders) was presented for aluminum cylinders.

3. Aluminum, while being resistant to corrosion by some hazardous materials, is very susceptible to damage by other hazardous materials.

4. The comparison of the 3AL to the 4E is not valid with respect to service pressure, burst, or condition of material. The 4E cylinder has a 4:1 burst to service pressure ratio and a limited (500 psi, max.) service pressure; the 3AL has an unlimited service pressure and a 2.5:1 burst to service pressure ratio. Further, the 4E cylinder derives its mechanical properties from cold work while the 3AL cylinder derives its mechanical properties from heat treatment.

In Subparts D and E, §§ 173.119(m)(9), 173.126, 173.134(a)(1), 173.135(a)(6), 173.136(a)(5), 173.137(a)(3), 173.138, 173.141(a)(9), 173.245(a)(28), 173.251(a)(1), and 173.280(a)(6) are amended to prohibit the use of aluminum cylinders for these flammable liquids and corrosive materials. Section 173.121 is amended to authorize shipment of carbon bisulfide in aluminum cylinders. These amendments are based on the compatibility data submitted by several commenters.

Section 173.301

Several commenters suggested that manifolding for 3AL cylinders containing certain gases should be allowed, pointing out that the exemptions allowed manifolding. MTB agrees. Paragraphs (d)(2) and (d)(3) are revised to allow manifolding of aluminum cylinders. However, cylinders containing nitrogen trifluoride and boron trichloride are prohibited from manifolding based on the incompatibility of these gases with aluminum.

Section 173.302(a)

Based on several comments received, paragraph (a)(4)(ii) is revised to allow the use of stainless steel valves; paragraph (a)(4)(iii) is revised to redefine lot size and permit any cleaning agent equivalent to those specified in the Specification that are not capable of reacting with oxygen. A paragraph (a)(5) is added to authorize the following:

1. Permit continued shipment of nonflammable gases which have previously been shipped;

2. Permit stainless steel valves for aluminum cylinders for oxygen service; and

3. Permit the use of equivalent but non-reacting cleaning agents to meet the requirements of RR–C–901(b) standard.

Because there was not sufficient justification presented, the ban on the use of tapered threads on aluminum cylinders used in oxygen service is retained.

Section 173.302(f)

Several commenters opposed the filling limitations imposed on the 3AL cylinder containing carbon monoxide. However, since no supporting data was presented, the filling limitation is retained.

Section 173.304

Good cause was shown to the MTB by commenter who suggested that the final amendments to paragraph (a)(2) should appropriately include all liquefied compressed gases that have been shipped to date in aluminum cylinders, especially two such gases, nitrous oxide and vinyl fluoride. The MTB concurs, and amends paragraph (a)(2) to include these two gases. Since nitrous oxide has similar oxidizing properties as oxygen, a new paragraph (a)(4) is added requiring cylinders used in nitrous oxide service be subjected to the same cleanliness requirements as oxygen cylinders. In addition, a new paragraph (a)(3) has been added to enumerate certain n.o.s. gases (subject to § 173.301(f)) which are not listed in § 172.101 that may be shipped in aluminum cylinders based on past experience gained through exemptions.

Section 173.351

The MTB on its own initiative is amending § 173.351 to authorize the shipment of hydrocyanic acid solutions not over 5 percent concentration in containers authorized for hydrocyanic solutions over 5 percent concentration.

Part 178

Section 178.46–4

Several commenters were opposed to the proposed language regarding inspector performance of chemical analysis, wall thickness measurement and reporting of volumetric capacity and tare weight. Based on the comments received, final § 178.46–4 allows the inspector to verify compliance with the chemical analyses and wall thickness requirement by performing, or witnessing the performance of the chemical analysis or the wall thickness measurement.

The duties of "reporting volumetric capacity and tare weight" and "verifying that design qualification tests have been performed prior to initial manufacture of a new design or a design change" have been added to § 178.46–4, the former upon the request of one commenter, the latter to provide verification of compliance with § 178.46–6(f) and (g).

Section 178.46–5

Paragraph (a) begins by providing that starting stock must be cast stock, or must be traceable to scalped cast stock. Several commenters raised objections to the proposed requirements for the following reasons:

(1) Extruded and forged stocks are equal to or better than cast stock;

(2) This requirement would inhibit significant cost reductions using state of art technological innovations;

(3) The hot extrusion process is a self scalping method for producing defect-free rod;

(4) Cast stock is not available in sizes under 4 inches in diameter;

(5) Use of extruded stock would be prohibited but the use of wrought stock would be permitted;

(6) Traditional aluminum industry practice accepts certification as a means of meeting the alloy chemistry limits without specific chemical analysis or traceability to starting stock;

(7) Cylinders of acceptable quality have been produced using unscalped cast stock under DOT–E 7042; and

(8) Use of grain size not exceeding 250 microns is too severe and not warranted since it is possible to control grain size growth during manufacture. Furthermore, supply of such material is limited to a few sophisticated aluminum producers.

Notwithstanding the above objections, the requirements in § 178.46–5(a) of the NPRM will be adopted in the final rule based on the following rationale.

(1) The statement that the hot extrusion process produces a defect free rod is valid only when producing rods. When producing cylinders by the backward extrusion process, the "oxide skin" is retained in the cylinder and would contribute to the weakening of the cylinder.

(2) For the purpose of manufacturing cylinders, it is questionable as to whether extruded stock and forged stock are comparable to cast stock. A commenters' rationale for the wide use of extruded and forged stock in critical aircraft usage is not a valid comparison, as aircraft structural components are of limited life and subject to frequent inspection; DOT 3AL cylinders have an unlimited life and a 5 year retest and reinspection schedule. Such critical aircraft components are not used in the "as forged" or "as extruded" condition. They are extensively machined prior to use.

(3) Material with specific certified chemistry and with proper grain size (not over 250 microns average) is available.

(4) The exemption process is available to accommodate validated "state of the art" improvements, as well as certain practices deemed appropriate.

Based on the comments received regarding the proposed elongation requirements, § 178.46–5(d) provides in Note 4, a less severe criteria for specimens taken from thin walled cylinders (3/16 inch or less wall thickness) and authorizes a retest without reheat treatment using a round 4D bar if the test method using the flat specimen fails. Also, § 178.46–5(e) allows ultrasonic inspection to be done either before or after parting, although, the added inspection after parting would necessitate more inspections due to the larger number of smaller pieces to inspect.

Section 178.46–6

Commenters were in general agreement that the MTB should lower its proposed design qualification cycle test requirement in paragraph (6)(f). The MTB concurs, in part, and the final rule will provide a reduced design qualification cycle test of at least 10,000 cycles (from 0 to test pressure). The proposed alternate 100,000 cycles (from 0 to service pressure) requirement is retained in the final rule since this cycling requirement was required for the design qualification of all the exemption cylinders and also is in the original proposal for rulemaking. A maximum rate of pressurization of 200 psi per second has been added to final paragraph (6)(f)(2) to assure that test cylinders experience the full pressurization effects as well as to provide uniform pressurization rates. This rate is based on a consensus of opinion expressed by certain cylinder manufacturers.

One commenter questioned the necessity of specifying in paragraph 6(d) a minimum base thickness for free standing cylinders, suggesting that this parameter applied only to cylinders with spun bottoms. The MTB disagrees. The two times the sidewall thickness applies to all types of free standing cylinders to provide wear allowance. This thickness should not be mistaken for the bottom thickness which is provided in paragraph 6(c) of this section.

One commenter questioned the knuckle radius specified in § 178.46–6(c) because he felt that the requirement of the qualification cycle test would eliminate any poorly designed cylinder. MTB disagrees. The cycle test is a general test and its test results would not show specific deficiencies in the design. Data furnished to the MTB during the exemption phase of this matter indicates the validity of the specified knuckle radius.

One commenter suggested that the service pressure parameter is too loose and suggested that any change in service pressure is a significant change. The commenter also suggested that a 30 percent change in bottom thickness be considered a design change. The MTB only agrees with the latter. The MTB believes that any service pressure change is too restrictive. Based on data obtained from other manufacturers, it is believed that a 10 percent change in service pressure is appropriate. The MTB also adds any increase in quantity or size of openings as a significant change since this affects the safety of cylinders appreciably.

Section 178.46–7

Two conflicting comments were received regarding the minimum wall thickness requirement for a cylinder with a diameter of 5 inches or more. The first commenter supplied data which suggested a 0.085 inch minimum wall thickness requirement, showing calculations which indicate that this thickness would give a maximum wall stress below the required calculated stress for a 5 inch diameter cylinder. Because the thickness is much thinner than that required of a 3A or 3AA cylinder which has a greater puncture resistance than the 3AL cylinder, it was not adopted in the final rule. The second commenter supplied data which suggested a 0.170 inch minimum wall thickness to provide more thickness to prevent catastrophic failure if a low pressure cylinder were accidentally filled to 1800 psi. MTB considers this proposal too severe. Consequently, the proposed minimum thickness requirement in the NPRM is adopted in the final rule.

Several commenters also requested that paragraph 7(a) of this section be revised to allow the use of the measured physical properties of the aluminum for establishing the minimum thickness required. Because MTB intends and believes that the wording in the NPRM allows the use of measured values, it has been incorporated in the final rule.

Section 178.46–11

Several commenters objected to the rejection and maximum test pressure criteria (last 2 sentences of paragraph (b)) of the NPRM as severely restrictive. Alternative criteria were proposed including (1) a specific test procedure, (2) proposal to limit the number of pressurizations corresponding to a stress that does not exceed yield strength, and (3) permit unlimited pressurizations since the cylinder is known to withstand 10,000 test pressure cycles. The first proposed alternative was not accepted as it prohibits other procedures that may work; furthermore the proposed procedure is covered by the proposed NPRM wording. The second proposed alternative was also rejected as the yield strength is not available to the retester who also uses this test procedure. The third proposal was not accepted since every successive retest requires a test pressure increased by 100 psi (or 10 percent of test pressure whichever is less). The cycle test uses the minimum pressure. The need of retests due to defect in apparatus or procedure can be minimized by knowledge of the test procedure and equipment and exercising care when testing. The wording used in the final rule is the same as that proposed in the NPRM, as some control must be exercised over the number of retests (and corresponding reheat treatments) permitted because of the unique properties of aluminum.

Section 178.46–12

Several commenters objected to the proposed 9t flattening test criteria of paragraph (c) as being too severe and proposed, as an alternative, the 10t criteria proposed in the CGA petition. The MTB felt that the 10t test criteria would not be severe enough to verify transverse ductility and so proposed in the exemptions the 9t criteria. Test data gathered under the exemptions show that the 9t criteria is readily attainable. In this section, several commenters proposed interchangeability of either the flattening test or the bend test, as they both measure ductility. The MTB agrees. The MTB, on its own, is allowing the use of alternate bend test to also qualify lots that fail the flattening test without reheat treatment.

Section 178.46–13

Several commenters proposed that the proper reference for mechanical testing is ASTM B 557–79, since the metal is aluminum not steel. MTB agrees. The final rule will reference ASTM B 557–79 instead of E 8–79. This action will also take care of the request to define the use of the 4D bar.

Section 178.46–15

The final rule corrects the omission of the marking example in paragraph (a)(2), by adding the symbol "XY" which was inadvertently omitted in the NPRM.

Section 178.46–16

A commenter suggested that the inspector's report form, relative to the reporting of wall thickness, be changed in the final rule to allow the acceptance of go-nogo gauge measurements. The MTB concurs. The final rule provides this. The final rule also corrects the proposed inspector's report form by—

1. Adding "Company" after lines 6 and 8.

2. Deleting as unnecessary, from the third paragraph of the report form the last two entries relating to maximum wall stress and internal pressure.

The Materials Transportation Bureau has determined that this regulation is not a major rule under the terms of Executive Order 12291 and DOT implementing procedures (44 FR 11034) and does not require a Regulatory Impact analysis, nor does it require an environmental impact statement under the National Environmental Policy Act (49 U.S.C. 4321 et. seq). A regulatory evaluation and environmental assessment is available for review in the Docket. I certify that this amendment will not, as promulgated, have a significant economic impact on a substantial number of small entities. Additionally, this amendment will not affect not-for-profit enterprises, or small governmental jurisdictions. For a number of years there were seven exemptions issued to cylinder manufacturers for authorization to manufacture seamless aluminium cylinders. This number of cylinder manufacturers has not increased and the publication of the final rule covering aluminum cylinders is not expected to proliferate the present number of seven manufacturers, therefore, Office of Management and Budget requirements relating to information collection and recordkeeping are not applicable.

In consideration of the foregoing, Parts 171, 173, and 178 of Title 49 Code of Federal Regulations are amended as set forth below.

PART 171—GENERAL INFORMATION, REGULATIONS AND DEFINITIONS

1. In § 171.7, paragraphs (d)(5)(x), (xi), (xii) and (d)(25) are added; and paragraph (d)(19) is revised to read as follows:

§ 171.7 Matter incorporated by reference.

* * * * *

(d) * * *

(5) * * *

(x) ASTM B 557–79 is titled "Tension Testing Wrought and Cast Aluminum and Magnesium—Alloy Products" 1979 Edition.

(xi) ASTM B–221–76 is titled "Standard Specification for Aluminum Alloy Extruded Bars, Rods, Shapes and Tubes," 1976 Edition.

(xii) ASTM E 290–77 is titled "Semi-Guided Bend Test for Ductility of Metallic Materials," 1977 edition.

* * * * *

(19) Federal Specification RR–C–901b is titled "Federal Specification, Cylinders, Compressed Gas: With Valve or Plug and Cap; ICC 3AA RR–C901b, August 1, 1967."

* * * * *

(25) Aluminum Associations' Handbook is titled "Aluminum Standards and Data," Sixth Edition, 1979.

* * * * *

PART 173—SHIPPERS—GENERAL REQUIREMENTS FOR SHIPMENTS AND PACKAGINGS

2. In § 173.23, paragraph (c) is added to read as follows:

§ 173.23 Previously authorized packaging.

* * * * *

(c) Seamless aluminum cylinders manufactured for use under DOT E 6498, E 6576, E 6688, E 7042, E 7446, E 8384, and E 8422 may be continued in use, and must be remarked in compliance with Specification 3 AL (§ 178.46 of this subchapter) before or at the time of the first retest following July 2, 1982. The required marking must appear immediately after the exemption mark which may be retained or obliterated by peening.

3. In § 173.34, the Table in paragraph (e) is amended by adding an entry "3 AL" immediately following the entry "3A, 3AA"; and paragraphs (e)(4) and (f)(4) are revised to read as follows:

§ 173.34 Qualification, maintenance and use of cylinders.

* * * * *

(e) * * *

Specification under which cylinder was made	Minimum retest pressure (p.s.i.)	Retest period (years)
* * * * *		
3AL	⅔ times service pressure	5
* * * * *		

* * * * *

(4) A cylinder must be condemned when it leaks, or when internal or external corrosion, denting, bulging, or evidence of rough usage exists to the extent that the cylinder is likely to be weakened appreciably, or when the permanent expansion exceeds 10 percent of the total expansion, except that for DOT 4E aluminum cylinders, when the permanent expansion exceeds 12 percent of the total expansion. Except for DOT 3AL and DOT 4E aluminum cylinders, a cylinder condemned for excessive permanent expansion may be reheat-treated. (See paragraph (g) of this section.) DOT 4 series cylinders, condemned for other than excessive permanent expansion, may be repaired and rebuilt as otherwise provided in this section.

* * * * *

(f) * * *

(4) DOT 3AL and DOT 4E aluminum cylinders may not be reheat treated and must be removed from service.

* * * * *

4. In § 173.119, paragraph (m)(9) is revised to read as follows:

§ 173.119 Flammable liquids not specifically provided for.

* * * * *

(m) * * *

(9) Specification steel or nickel cylinders as prescribed for any compressed gas except acetylene. All cylinder valves must be protected by one of the methods described in § 173.301(g) (1), (2), or (3) of this part. See § 173.34(e)(16).

* * * * *

5. In § 173.121, a new paragraph (a)(7) is added to read as follows:

§ 173.121 Carbon bisulfide (disulfide).

(a) * * *

(7) Specification cylinders as prescribed for any compressed gas except acetylene.

6. Section 173.126 is revised to read as follows:

§ 173.126 Nickel carbonyl.

Nickel carbonyl must be packed in specification steel or nickel cylinders as prescribed for any compressed gas except acetylene. A cylinder used exclusively for nickel carbonyl may be given a complete external visual inspection in lieu of the interior hydrostatic pressure test required by § 173.34(e) of this part. Visual inspection must be in accordance with CGA Pamphlet C–6. All cylinder valves must be protected by one of the methods described in § 173.301(g) (1), (2) or (3) of this part.

7. In § 173.134, the introduction to paragraph (a)(1) is revised to read as follows:

§ 173.134 Pyroforic liquids, n.o.s.

(a) * * *

(1) Specification steel or nickel cylinders prescribed for any compressed gas except acetylene having a minimum design pressure of 175 pounds per square inch are authorized. Cylinders with valves must be:

* * * * *

8. In § 173.135, paragraph (a)(6) is revised to read as follows:

§ 173.135 Diethyl dichlorosilane, dimethyl dichlorosilane, ethyl dichlorosilane, ethyl trichlorosilane, methyl trichlorosilane, trimethyl chlorosilane, and vinyl trichlorosilane.

(a) * * *

(6) Specification steel or nickel cylinders as prescribed for any compressed gas except acetylene.

* * * * *

9. In § 173.136, paragraph (a)(5) is revised to read as follows:

§ 173.136 Methyl dichlorosilance and trichlorosilane.

(a) * * *

(5) Specification steel or nickel cylinders as prescribed for any compressed gas except acetylene.

* * * * *

10. In § 173.137, paragraph (a)(3) is revised to read as follows:

§ 173.137 Lithium aluminum hydride, ethereal.

(a) * * *

(3) Specification steel or nickel cylinders as prescribed for any compressed gas except acetylene. Valves or fittings must be protected from injury by a metal cap or equally efficient device securely attached to the cylinder.

11. Section 173.138 is revised to read as follows:

§ 173.138 Pentaborane.

Specification steel or nickel cylinders prescribed for any compressed gas except acetylene are authorized. Each cylinder must be protected with a valve protection cap or must be packed in a strong wooden box and blocked therein so as to protect the valve from injury under conditions normally incident to transportation. Cylinders not exceeding 2 inches in diameter nor 6 inches in length, excluding the length of the valve, may also be packed in strong solid fiberboard boxes, having no outside dimension less than 4 inches, completely filled with layers of strong corrugated

fiberboard, the center of which shall be cut out to fit the cylinder valve, and otherwise so designed that neither the cylinder nor the valve will be in contact with the wall of the box under conditions normally incident to transportation.

12. In § 173.141, paragraph (a)(9) is revised to read as follows:

§ 173.141 Amyl mercaptan, butyl mercaptan, ethyl mercaptan, isopropyl mercaptan, propyl mercaptan, and aliphatic mercaptan mixtures.

(a) * * *

(9) Specification steel or nickel cylinders as prescribed for any compressed gas except acetylene.

* * * * *

13. In § 173.245, paragraph (a)(28) is revised to read as follows:

§ 173.245 Corrosive liquids not specifically provided for.

(a) * * *

(28) Specification steel or nickel cylinders prescribed for any compressed gas except acetylene are authorized. All cylinder valves must be protected by one of the methods described in § 173.301(g) (1), (2), or (3) of this part. See § 173.34(e)(16).

* * * * *

14. In § 173.251, paragraph (a)(1) is revised to read as follows:

§ 173.251 Boron trichloride and boron tribromide.

(a) * * *

(1) Specification steel or nickel cylinders as prescribed for any compressed gas except acetylene.

* * * * *

15. In § 173.280, paragraph (a)(6) is revised to read as follows:

§ 173.280 Trichlorosilanes.

(a) * * *

(6) Specification steel or nickel cylinders as prescribed for any compressed gas except acetylene.

* * * * *

16. In § 173.301, paragraphs (d)(2) and (3) are revised; the table in paragraph (h) is amended by revising the heading and by adding the entry "3AL" immediately following the entry "DOT 3A," as follows:

§ 173.301 General requirements for shipment of compressed gases in cylinders.

* * * * *

(d) * * *

(2) Manifolding is authorized for specification cylinders containing the following nonliquefied gases: boron trifluoride, carbon monoxide, ethylene, hydrogen, hydrocarbon gases, methane, and nitrogen trifluoride, except that aluminum cylinders are not authorized for boron trifluoride or nitrogen trifluoride service; provided individual cylinders are equipped with approved pressure relief devices as required by § 173.34(d) or § 173.315(i) of this part: *and provided further,* that each cylinder is equipped with an individual shutoff valve that must be tightly closed while in transit. Manifold branch lines of these individual shutoff valves must be sufficiently flexible to prevent injury to the valves which otherwise might result from the use of rigid branch lines. A temperature measuring device may be inserted in one cylinder of a manifold installation in place of the shutoff valve.

(3) Manifolding is authorized for specification cylinders containing the following gases: ethane, ethylene, hydrogen chloride, liquefied hydrocarbon gas, liquefied petroleum gas and propylene, except that aluminum cylinders are not authorized for hydrogen chloride and liquefied hydrocarbon gas service, provided each cylinder is equipped with approved pressure relief devices as required by § 173.34(d) or § 173.315(i) of this part: *and provided further,* that each cylinder is equipped with an individual shutoff valve that must be tightly closed while in transit. Each cylinder must be separately charged and means must be provided to insure that no interchange of cylinder contents can occur during transportation. Manifold branch lines to these individual shutoff valves must be sufficiently flexible to prevent injury to the valves which otherwise might result from the use of rigid branch lines.

* * * * *

(h) * * *

PACKAGINGS	
DOT 3AL	

* * * * *

17. In § 173.302, a new paragraph (a)(5) is added; and paragraphs (a)(4)(ii), (iii), and (f) are revised to read as follows:

§ 173.302 Charging of cylinders with nonliquefied compressed gases.

(a) * * *

(4) * * *

(ii) Cylinder must be equipped only with brass or stainless steel valve; and

(iii) Each cylinder must be cleaned in compliance with the requirements of Federal Specification RR–C–901b, dated August 1, 1967, paragraphs 3.7.2 and 3.8.2. Cleaning agents equivalent to those specified in RR–C–901b, may be used; however any cleaning agent must not be capable of reacting with oxygen. One cylinder selected at random from a group of 200 or less cleaned at the same time, must be tested for oil contamination in accordance with specification RR–C–901b paragraph 4.4.2.3 and meet the standard of cleanliness specified.

(5) Specification 3AL (§ 178.46 of this subchapter) cylinders are authorized only for the following nonliquefied gases: air, argon, carbon monoxide, diborane, ethylene, helium, mercury free hydrogen, krypton, methane, nitrogen, neon, oxygen and xenon. When used in oxygen service, aluminum cylinders must be in compliance with the following conditions:

(i) Cylinder must be equipped only with brass or stainless steel valve;

(ii) Cylinder must have only straight threads in the opening;

(iii) Each cylinder must be cleaned in compliance with the requirements of Federal Specification RR–C–901b, dated August 1, 1967, paragraphs 3.7.2, and 3.8.2. Cleaning agents equivalent to those specified in RR–C–901b may be used; however, any cleaning agent must not be capable of reacting with oxygen. One cylinder selected at random from a group of 200 or less, cleaned at the same time, must be tested for oil contamination in accordance with Specification RR–C–901b, paragraph 4.4.2.3, and meet the standard of cleanliness specified; and

(iv) Cylinder must have a marked service pressure not exceeding 3000 psi.

* * * * *

(f) *Carbon monoxide.* Carbon monoxide must be shipped in a specification 3A, 3AX, 3AA, 3AAX, 3AL, 3, 3E, or 3T, (§§ 178.36, 178.37, 178.46, 178.42, 178.45 of this subchapter) cylinder having a minimum service pressure of 1,800 psig. The pressure in the cylinder must not exceed 1000 psig at 70° F. except that if the gas is dry and sulfur free, the cylinder may be charged to five-sixths of the cylinder service pressure or 2000 psig, whichever is the lesser.

* * * * *

18. In § 173.304, the table in paragraph (a)(2) is amended by adding DOT 3AL cylinders with various service pressures for certain hazardous materials, and by adding footnote 11; paragraphs (a)(3) and (a)(4) are added; and paragraph (d)(3)(i) is revised to read as follows:

§ 173.304 Charging of cylinders with liquefied compressed gas.

(a) * * *

(2) * * *

Kind of gas	Maximum permitted filling density (see Note 1)	Containers marked as shown in this column or of the same type with higher service pressure must be used except as provided in § 173.34 (a), (b), § 173.301(j) (see notes following table).

NOTE 11: See § 173.304(a)(4).

(3) Specification 3AL (§ 178.46 of this subchapter) cylinders are authorized also for the following liquefied gases: cyclobutane, hydrogen selenide, propylene, silane, bromochlorodifluoromethane, vinyl bromide, and dimethyl ether.

(4) Specification DOT 3AL (§ 178.46 of this subchapter) cylinders when used in nitrous oxide service must be in compliance with out following conditions:

(i) Cylinder must be equipped only with brass or stainless steel valve; and

(ii) Each cylinder must be cleaned in compliance with the requirements of Federal Specification RR–C–901b paragraphs 3.7.2 and 3.8.2. Cleaning agents equivalent to those specified in RR–C–901b may be used; however, any cleaning agent must not be capable of reacting with oxygen. One cylinder selected at random from a group of 200 or less cleaned at the same time must be tested for oil contamination in accordance with Specification RR–C–901b paragraph 4.4.2.3 and meet the standard of cleanliness specified.

* * * * *

(d) * * *

(3) * * *

(i) Specification 3,[1] 3A, 3AA, 3B, 3E, 3AL, 4B, 4BA, 4B240FLW, 4B240ET, 4BW, 4B240X,[1] 4E, 4,[1] 4A,[1] 9,[1] 25,[1] 26,[1] 38,[1] 39, or 41[1] (§§ 178.36, 178.37, 178.38, 178.42, 178.46, 178.50, 178.51, 178.54, 178.55, 178.61, 178.65, 178.68 of this subchapter) cylinders. The internal volume of a specification 39 cylinder must not exceed 75 cubic inches.

* * * * *

19. In § 173.328, paragraph (a)(2) is revised to read as follows:

§ 173.328 Poison A materials not specifically provided for.

(a) * * *

(2) Specification 3A1800, 3AA1800, 3AL1800, or 3E1800 (§§ 178.36, 178.37, 178.42, 178.46 of this subchapter) cylinders.

(i) Specifications 3A, 3AA and 3AL cylinders must not exceed 125 pounds water capacity (nominal). Cylinders must have valve protection or be packed in strong wooden or metal boxes as described in § 173.327(a)(2). Specification 3AL cylinders are authorized only for arsine, carbonyl sulfide, and phosphine service.

* * * * *

20. In §173.332, paragraph (a)(2) is revised as follows:

§ 173.332 Hydrocyanic acid, liquid (prussic acid) and hydrocyanic acid liquefied.

(a) * * *

(2) Specification 3A480, 3AA480, 3A480X[1] or 3AL1800 (§ 178.36, 178.37, 178.46 of this subchapter) metal cylinders of not over 278 pounds water capacity (nominal); valve protection cap must be used and be at least 9/16-inch thick, gas-tight, with 9/16-inch faced seat for gasket and with United States standard form thread; the cap must be

capable of preventing injury or distortion of the valve when it is subjected to an impact caused by allowing the cylinder, prepared as for shipment, to fall from an upright position with side of cap striking a solid steel object projecting not more than 6 inches above floor level.

* * * * *

21. In § 173.336, paragraph (a)(2) is revised to read as follows:

§ 173.336 Nitrogen dioxide, liquid; nitrogen peroxide, liquid; and nitrogen; tetraoxide, liquid.

(a) * * *

(2) Specification 3A480, 3AA480, 3AL1800, or 25[1] (§§ 178.36, 178.37, or 178.46 of this subchapter) metal cylinders with valve removed are authorized. Valve opening must be closed by means of a solid metal plug with tapered thread properly luted to prevent leakages; valve protection cap must be used and be at least 5/16-inch thick, gas-tight, with 5/16-inch faced seat for gasket and with United States standard form thread.

* * * * *

22. In § 173.337, paragraphs (a) (1) and (2) are revised to read as set forth below and paragraphs (a)(3) and (4) are removed.

§ 173.337 Nitric oxide.

(a) * * *

(1) Specification 3A1800, 3AA1800, 3E1800, or 3AL2800 (§§ 178.36, 178.37, 178.42, or 178.46 of this subchapter) cylinders charged to a pressure of not more than 750 psi at 70° F. Cylinders must be equipped with a valve of stainless steel and valve seat of material which will not be deteriorated by contact with nitric oxide or nitrogen dioxide. Cylinders or valves may not be equipped with safety devices of any type. Valve outlets must be sealed by a solid threaded cap or plug and an inert gasketing material.

(i) Specification 3E1800 cylinders must be packed in strong wooden boxes of such design as to protect valves from injury or accidental functioning under conditions incident to transportation. Each outside package must be plainly marked "Inside containers comply with prescribed specifications."

(ii) Specification 3A, 3AA, and 3AL cylinders must have their valves protected by metal caps securely attached to the cylinders and be of sufficient strength to protect the valves from injury during transit, or by packing in strong wooden boxes of such design as to protect valves from injury or accidental functioning under conditions incident to transportation. Each outside package must be plainly marked "Inside containers comply with prescribed specifications."

(2) Specification 106A500X (§§ 179.300, 179.301 of this subchapter) tank car tanks. Nitric oxide charge in each tank may not exceed 200 psig at 70° F. Each tank must be equipped with gas-tight valve protection cap (see § 179.302 of this subchapter). Each valve outlet must be sealed by a threaded solid plug or a threaded cap with inert luting or gasket material. Valves must be of stainless steel and the caps, plugs, and valve seats must be of material that will not be deteriorated by contact with nitric oxide or nitrogen dioxide. The tank may not be equipped with any safety relief device.

23. § 173.351 is revised to read as follows:

§ 173.351 Hydrocyanic acid solutions.

Hydrocyanic acid solutions not over 5 percent hydrocyanic acid must be packaged in specification containers as follows:

(a) As prescribed in § 173.332.

(b) Specification 15A, 15B, 15C, 16A, 19A or 19B (§§ 178.168, 178.169, 178.170, 178.185, 178.190 or 178.191 of this subchapter) wooden boxes with inside glass bottles not over 1 pound capacity each for solutions of not over 5 percent hydrocyanic acid and not over 5 pints capacity each for solutions of not over 2 percent strength. Completed package, with glass packaging filled with water, must be capable of withstanding six four-foot drops onto solid concrete in the following order: bottom, four sides, and top, without breakage.

24. In § 173.354, paragraph (a)(3) is revised to read as follows:

§ 173.354 Motor fuel antiknock compound or tetraethyl lead.

(a) * * *

(3) Specification steel or nickel cylinders as prescribed for any compressed gas except acetylene.

* * * * *

25. In § 173.358, paragraph (a)(7) is revised to read as follows:

§ 173.358 Hexaethyl tetraphosphate; methyl parathion; organic phosphate compound; organic phosphorous compound; parathion; tetraethyl dithio pyrophosphate; and tetraethyl phyrophosphate, liquid.

(a) * * *

(7) Specification cylinders as prescribed for any compressed gas except acetylene. DOT 3AL cylinders are authorized only for parathion and methyl parathion service.

* * * * *

PART 178—SHIPPING CONTAINER SPECIFICATIONS

26. § 178.46 is added to read as follows:

§ 178.46 Specification 3AL; seamless cylinders made of definitely prescribed aluminum alloys.

§ 178.46–1 Compliance.

Each specification 3AL seamless cylinder must comply with this section.

§ 178.46–2 Size and service pressure.

(a) The maximum water capacity is 1000 pounds.

(b) The minimum service pressure is 150 psig (see § 173.300(h) of this subchapter).

§178.46–3 Inspection.

Inspections and verifications must be performed by an independent inspection agency approved in writing by the Associate Director for HMR in accordance with § 173.300a of this subchapter. Chemical analyses and tests as specified must be made within the United States unless otherwise approved in writing by the Associated Director for HMR in accordance with § 173.300b of this subchapter.

§ 178.46–4 Duties of the inspector.

(a) The inspector shall determine that all materials comply with this specification before releasing those materials for cylinder manufacture.

(b) The inspector shall verify compliance with the provisions of § 178.46–5(d)(1) by:

(1) Performing or witnessing the performance of the chemical analyses on each melt or cast lot or other unit of starting material; or

(2) Obtaining a certified chemical analysis from the material or cylinder manufacturer for each melt, or cast of material; or

(3) Obtaining a certified check analysis on one cylinder out of each lot of 200 cylinders or less, if a certificate containing data to indicate compliance with the material specification is obtained.

(c) The inspector shall verify ultrasonic inspection of all material by inspection or by obtaining the material producer's certificate of ultrasonic inspection. Ultrasonic inspection must be performed or verified as having been performed in accordance with § 178.46–5(e).

(d) The inspector shall determine that each cylinder complies with this specification by:

(1) Making a complete internal inspection before closing;

(2) Making a complete external inspection;

(3) Verifying that heat treatment was proper;

(4) Selecting the samples for all tests;

(5) Selecting the samples for check analyses performed by other than the material producer;

(6) Witnessing each test;

(7) Verifying that the prescribed minimum thickness was met by measuring or witnessing the measurement of the wall thickness;

(8) Verifying that the identification of material is proper;

(9) Verifying the threads, by gauge;

(10) Reporting volumetric capacity, tare weight, and minimum thickness noted;

(11) Determining that each cylinder is marked in compliance with the specification; and

(12) Preparing and providing the required report to the cylinder maker, purchaser, and the Associate Director for HMR.

(e) Prior to initial production of any design or design change, verify that the design qualification tests prescribed in § 178.46–6(f) have been performed with acceptable results.

(f) In this specification, a "lot" means of group of cylinders successively produced having the same:

(1) Size and configuration;

(2) Specified material of construction;

(3) Process of manufacture and heat treatment;

(4) Equipment of manufacture and heat treatment; and

(5) Conditions of time, temperature and atmosphere during heat treatment.

In no case may the lot size exceed 200 cylinders, but any cylinder processed for use in the required destructive physical testing need not be counted as being one of the 200.

§ 178.46–5 Authorized material and identification of material.

(a) Starting stock must be cast stock that is later scalped prior to extrusion of the cylinder shell. If starting stock is not cast stock, it must be traceable to cast stock that has been scalped prior to extrusion.

(b) Material with seams, cracks, laminations, or other defects likely to weaken the finished cylinder may not be used.

(c) Material must be identified by a suitable method that will identify the alloy, the aluminum producer's cast number, the solution heat treat batch number and the lot number.

(d) The material must be of uniform quality. Only the following heat treatable aluminum alloys are permitted:

(1) CHEMICAL COMPOSITION LIMITS [1]

Aluminum association alloy designation No.	Chemical composition								Other [2]		Al
	Si	Fe	Cu	Mn	Mg	Cr	Zn	Ti	Each	Total	
6351	0.7–1.3	0.50 maximum.	0.10 maximum.	0.40–0.8	0.40–0.8		0.20 maximum.	0.20 maximum.	0.05 maximum.	0.15 maximum.	Remainder.
6061	0.40–0.8	0.7 maximum.	0.15–0.40	0.15 maximum.	0.8–1.2	0.04–0.35	0.25 maximum.	0.15 maximum.	0.05 maximum.	0.15 maximum.	Remainder.

[1] ASTM B 221–76 Standard Specification for Aluminum-Alloy Extruded Bars, Rods Shapes, and Tubes, Table 1 Chemical Composition Limits.
[2] Analysis is regularly made only for the elements for which specific limits are s' own, except for unalloyed aluminum. If, however, the presence of other element is suspected to be, or in the course of routine analysis is indicated to be in excess of specified limits, further analysis is made to determine that these other elements are not in excess of the amount specified. (Aluminum Association Standards and Data—Sixth Edition 1979.)

(2) MECHANICAL PROPERTY LIMITS

Alloy and temper	Tensile strength—PSI		Elongation—percent minimum for 2" or 4D [1] size specimen
	Ultimate—minimum	Yield—minimum	
6351–T6	42,000	37,000	[2]14
6061–T6	38,000	35,000	[2]14

[1] "D" represents specimen diameter.
[2] When cylinder wall is not over 3/16-inch thick, 10 percent elongation is authorized when using a 2ft x 8t size test specimen.

(e) All starting stock must be 100 percent ultrasonically inspected, along the length at right angles to the central axis from two positions at 90° to one another. The equipment and continuous scanning procedure must be capable of detecting and rejecting internal defects such as cracks which have an ultrasonic response greater than that of a calibration block with a 5/64-inch diameter flat bottomed hole.

(f) Cast stock must have uniform equiaxed grain structure not to exceed 250 microns average.

(g) Any starting stock not complying with the above must be rejected.

§ 178.46–6 Manufacture.

(a) Cylinder shells must be manufactured by the backward extrusion method and have a cleanliness level adequate to ensure proper inspection.

(b) No fissure or other defect is acceptable that is likely to weaken the finished cylinder below the design strength requirements. A reasonably smooth and uniform surface finish is required. If not originally free from such defects, the surface may be machined or otherwise conditioned to eliminate these defects.

(c) The thickness of the cylinder base may not be less than the prescribed minimum wall thickness of the cylindrical shell. The cylinder base must have a basic torispherical, hemispherical, or ellipsoidal interior base configuration where the dish radius is no greater than 1.2 times the inside diameter of the shell. The knuckle radius may not be less than 12 percent of the inside diameter of the shell.

(d) For free standing cylinders, the base thickness must be at least two times the minimum wall thickness along the line of contact between the cylinder base and the floor when the cylinders are in the vertical position.

(e) Welding or brazing is prohibited.

(f) Each new design and any significant change to any acceptable design must be qualified for production by testing prototype samples as follows:

(1) Three samples must be subjected to 100,000 pressure reversal cycles between zero and service pressure or 10,000 pressure reversal cycles between zero and test pressure, at a rate not in excess of 10 cycles per minute without failure.

(2) Three samples must be pressurized to destruction and failure must not occur at less than 2.5 times the marked cylinder service pressure. Each cylinder must remain in one piece. Failure must initiate in the cylinder sidewall in a longitudinal direction. Rate of pressurization must not exceed 200 psi per second.

(g) In this specification "significant change" means a 10 percent or greater

change in cylinder wall thickness, service pressure, or diameter; a 30 percent or greater change in water capacity or base thickness; any change in material; over 100 percent increase in size of openings; or any change in the number of openings.

§ 178.46–7 Wall thickness.

(a) The minimum wall thickness must be such that the wall stress at the minimum specified test pressure will not exceed 80 percent of the minimum yield strength nor exceed 67 percent of the minimum ultimate tensile strength as verified by physical tests in § 178.46–13.

(b) Calculations must be made by the formula:

$$S=[P(1.3\ D^2+0.4d^2)]/[D^2-d^2]$$

Where:

S = Wall stress in pounds per square inch;
P = Prescribed minimum test pressure in pounds per square inch (see § 178.46–11(c));
D = Outside diameter in inches; and
d = Inside diameter in inches.

(c) The minimum wall thickness for any cylinder with an outside diameter greater than 5 inches must be 0.125 inch.

§ 178.46–8 Openings.

(a) Openings are permitted in heads only.

(b) The size of any centered opening in a head may not exceed one-half the outside diameter of the cylinder.

(c) Other openings are permitted in the head of a cylinder if:

(1) Each opening does not exceed 2.625 inches in diameter, or one-half the outside diameter of the cylinder; whichever is less;

(2) Each opening is separated from each other by a ligament; and

(3) Each ligament which separates two openings must be at least three times the average of the diameters of the two openings.

(d) All openings must be circular.

(e) All openings must be threaded. Threads must comply with the following:

(1) Each thread must be clean cut, even, without any checks, and to gauge.

(2) Taper threads, when used, must be the American Standard Pipe Thread (NPT) type complying with the USDC, NBS Handbook H–28, Part III, Section VII, or the National Gas Taper Thread (NGT) standard complying with NBS Handbook H–28, Part II, Sections VII and IX.

(3) Straight threads conforming with National Gas Straight Thread (NGS) standards are authorized. These threads must comply with NBS Handbook H–28, Part II, Sections VII and IX.

§ 178.46–9 Heat treatment.

Prior to any test, all cylinders must be subjected to a solution heat treatment and aging treatment appropriate for the aluminum alloy used.

§ 178.46–10 Pressure relief devices and protection for valves, pressure relief devices, and other connections.

Pressure relief devices and protection arrangements for valves, pressure relief devices, and other connections must comply with §§ 173.34(d) and 173.301(g) of this subchapter.

§ 178.46–11 Hydrostatic test.

(a) Each cylinder must be subjected to an internal test pressure using the water jacket equipment and method or other suitable equipment and method. The testing apparatus must be operated in a manner so as to obtain accurate data. The pressure gauge used must permit reading to an accuracy of one percent. The expansion gauge must permit reading the total expansion to an accuracy of either one percent or 0.1 cubic centimeter.

(b) The test pressure must be maintained for a sufficient period of time to assure complete expansion of the cylinder. In no case may the pressure be held less than 30 seconds. If, due to failure of the test apparatus, the required test pressure cannot be maintained, the test may be repeated at a pressure increased by 10 percent or 100 psi, whichever is lower. If the test apparatus again fails to maintain the test pressure, the cylinder being tested must be rejected. Any internal pressure applied to the cylinder before any official test may not exceed 90 percent of the test pressure.

(c) The minimum test pressure is the greatest of the following:

(1) 450 psi regardless of service pressure;

(2) Two times the service pressure for cylinders having service pressure less than 500 psi; or

(3) Five-thirds times the service pressure for cylinders having a service pressure of at least 500 psi.

(d) Permanent volumetric expansion may not exceed 10 percent of total volumetric expansion at test pressure.

§ 178.46–12 Flattening test.

(a) The flattening test must be performed on one cyliner taken at random out of each lot of 200 or less by placing the cylinder between wedge shaped knife edges having a 60° included angle, and rounded in accordance with the following table. The longitudinal axis of the cylinder must be at an angle 90° to the knife edges during the test.

TABLE

Cylinder wall thickness in inches	Radius in inches
Under .150	.500
.150 to .249	.875
.250 to .349	1.500
.350 to .449	2.125
.450 to .549	2.750
.550 to .649	3.500
.650 to .749	4.125

(b) An alternate bend test in accordance with ASTM E 290–77 using a mandrel diameter not more than 6 times the wall thickness is authorized to qualify lots that fail the flattening test of this section without reheat treatment. If used, this test must be performed on two samples from one cylinder taken at random out of each lot of 200 cylinders or less.

(e) Each test cylinder must withstand flattening to nine times the wall thickness without cracking. When the alternate bend test is used, the test specimens shall remain uncracked when bent inward around a mandrel in the direction of curvature of the cylinder wall until the interior edges are at a distance apart not greater than the diameter of the mandrel.

§ 178.46–13 Mechanical properties test.

(a) Two test specimens cut from one cylinder representing each lot of 200 cylinders or less must be tested. The results of the test must conform to at least the minimum acceptable mechanical property limits for aluminum alloys as specified in § 178.46–5(d)(2).

(b) Specimens must be 4D bar or gauge length 2 inches with width not over 1½ inch taken in the direction of extrusion approximately 180° from each other; *provided* that gauge length at least 24 times thickness with width not over 6 times thickness is authorized, when cylinder wall is not over 3/16 inch thick. The specimen, exclusive of grip ends, may not be flattened. Grip ends may be flattened to within one inch of each end of the reduced section. When the size of the cylinder does not permit securing straight specimens, the specimens may be taken in any location or direction and may be straightened or flattened cold by pressure only, not by blows. When such specimens are used, the inspectors's report must show that the specimens were so taken and prepared. Heating of specimens for any purpose is forbidden.

(c) The yield strength in tension must be the stress corresponding to a permanent strain of 0.2 percent of the gauge length.

(1) The yield strength must be determined by either the "offset"

method or the "extension under load" method as prescribed in ASTM Standard B–557–79.

(2) In using the "extension under load" method, the total strain (or "extension under load") corresponding to the stress at which the 0.2 percent permanent strain occurs may be determined with sufficient accuracy by calculating the elastic extension of the gauge length under appropriate load and adding thereto 0.2 percent of the gauge length. Elastic extension calculations must be based on an elastic modulus of 10,000,000 psi. In the event of controversy, the entire stress-strain diagram must be plotted and the yield strength determined from the 0.2 percent offset.

(3) For the purpose of strain measurement, the initial strain must be set while the specimen is under a stress of 6,000 psi, the strain indicator reading being set at the calculated corresponding strain.

(4) Cross-head speed of the testing machine may not exceed ⅛ inch per minute during yield strength determination.

§ 178.46–14 Rejected cylinder.

Reheat treatment of rejected cylinders is authorized one time; subsequent thereto, cylinders must pass all prescribed tests to be acceptable.

§ 178.46–15 Marking.

(a) Each cylinder must be plainly and permanently marked, by stamping on the cylinder shoulder, top head, or neck, in the following order:

(1) The specification marking "DOT 3AL" must appear first on the cylinder followed immediately by the service pressure (for example: DOT–3AL 1800).

(2) The serial number and an identifying symbol or letters appear next; location of the number to be just below or immediately following the DOT mark; location of the symbol to be just below or immediately following the number. The symbol and numbers must be those of the maker. The symbol must be registered with the Associate Director for HMR. No duplication is authorized.

Examples

DOT–3AL 1800
1234
XY
or: DOT–3AL 1800–1234–XY.

(3) The date of test (such as 5–81 for May 1981), so placed that the dates of subsequent tests can be easily added, appears next followed by the inspector's official mark.

(4) Marks must be at least ¼ inch high if space permits.

(b) Other marks are authorized provided they are made in low stress areas other than the side wall and are not of a size and depth that will create harmful stress concentrations. Such marks may not conflict with any DOT required markings.

§ 178.46–16 Inspector's report.

Required to be clear, legible, and in the following form:

(Place) _____
(Date) _____
Gas Cylinders:
Manufactured for —— Company
Location at _____
Manufactured by —— Company
Location at _____
Consigned to _____
Location at _____
Quantity _____
Size _____ inches outside diameter by _____ inches long
Marks stamped into the shoulder of the cylinder are:
Specification DOT _____
Serial numbers _____ to _____ inclusive
Identifying symbol (registered) _____
Cylinder manufacturer's identification symbol _____
Inspector's mark _____
Test date _____
Tare weights (yes or no)
Other marks (if any) _____
These cylinders were made by process of _____

The cylinders were heat treated by the process of _____ (alloy and temper designation).

The material used was verified as to chemical analysis and record thereof is attached hereto.

All material and each cylinder were inspected; all that were accepted were found free from seams, cracks, laminations, and other defects which might prove injurious to the strength of the cylinder. The processes of manufacture and heat treatment of cylinders were supervised and found to be efficient and satisfactory.

The cylinder walls were measured and the minimum thickness noted was at least equal to the minimum design thickness. The outside diameter was determined to be _____ inches. The wall stress was calculated to be _____ pounds per square inch under an internal pressure of _____ pounds per square inch. The required minimum thickness is _____ inch.

Hydrostatic tests, flattening tests, tensile tests of material, and other tests, as prescribed in Specification DOT–3AL were made in the presence of the inspector and all material and cylinders accepted were found to be in compliance with that specification. Records thereof are attached hereto.

I hereby certify that all of these cylinders proved satisfactory in every way and comply with the Department of Transportation Specification 3AL except as follows:

INTERSTATE COMMERCE COMMISSION

49 CFR Part 1136

[Ex Parte No. MC-122 (Sub-No. 3)]

Interpretation-Intercorporate Hauling

AGENCY: Interstate Commerce Commission.

ACTION: Notice of interpretative rule change.

SUMMARY: Final rules have been promulgated at 49 CFR 1136 which implement 49 U.S.C. 10524 (b) and (c), which define compensated intercorporate hauling (CIH) operations, and render them exempt from our carrier licensing regulations on compliance with certain conditions. The Commission has determined that there is no prohibition against a transportation firm using an affiliated CIH carrier for the transportation of company traffic. Conversely, the CIH exemption does not extend to the for-hire transportation of traffic tendered the carrier by non-affiliates. 49 CFR 1136.1 is modified in light of this finding.

EFFECTIVE DATE: December 24, 1981.

ADDRESS: Copies of the complete decision are available, upon request, from: The Office of the Secretary, Interstate Commerce Commission, 12th & Constitution Avenue, N.W., Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT:
Melvin Werner, (202) 275-7985, or Edward E. Guthrie, (202) 275-7691

SUPPLEMENTARY INFORMATION: In a notice published at 45 FR 45528 (July 3, 1980), the Commission adopted interim rules implementing 49 U.S.C. 10524 (b) and (c), which define compensated intercorporate hauling (CIH) operations, and render them exempt from our carrier licensing regulations on compliance with certain conditions.

One of the comments to the interim rules, submitted by Cape Air Freight, requested a declaratory order finding that for-hire carriers may not use affiliates operating under the CIH exemption to transport traffic of their customers. Notice of Cape Air's petition and of several other inquiries was published in Ex Parte No. MC-122 (Sub-No. 3), 45 FR 66768 (December 31, 1980). We have considered the comments of interested parties and conclude that 49 CFR 1136.1 should be revised to indicate certain limitations on operations under the CIH exemption. This interpretation does not preclude any notice from being filed as long as statutory requirements are otherwise met.

49 CFR 1136.1, promulgated December 31, 1980, provides:

§ 1136.1 Scope.

Compensated transportation service by a member of a corporate family for other members of the same corporate family ("Compensated Incorporate Hauling" or "CIH") is exempt from Commission regulation except for certain notice requirements. To qualify for the exemption, the participants shall be members of the corporate family in which the parent owns, directly or indirectly, a 100-percent interest in the subsidiaries. These regulations prescribe procedures for compliance with the notice requirements of 49 U.S.C. 10524 (b) and (c).

PART 1136—COMPENSATED INTERCORPORATE HAULING OPERATION

§ 1136.1 [Amended]

To advise the public of our findings in this proceeding we conclude that an additional clause should be added to the next-to-the last sentence of 49 CFR 1136.1. Accordingly, the next to the last sentence of § 1136.1 is amended by adding the following clause to follow the word "subsidiaries": * * *, except no corporation engaged primarily in operations as a for-hire carrier may use an affiliate operating under the exemption of 49 U.S.C. 10524(b), for movement of freight tendered to it in its capacity as a carrier. * * *

We are not providing a comment period for this modification because the proceeding from which it derives has provided a forum for adequate discussion of the issues. The language which has been added to 49 CFR 1136.1 is interpretative, and does not indicate a change in CIH policy. See 49 CFR 1136.3(g). Its intent is merely to assist prospective CIH operators to recognize the limits of the exemption.

This notice interprets a rule and will be effective upon publication of this notice in the **Federal Register** (see 5 U.S.C. 553(d)(2)). In addition, there is good cause to make the interpretation effective immediately so that carriers now providing service and those that intend to file CIH notices in the near future may understand the scope of the

permissible operations. (See 5 U.S.C. 553(d)(3)).

This action does not significantly affect the quality of the human environment or the conservation of energy resources.

(49 U.S.C. 10321 and 5 U.S.C. 553)

Date: December 11, 1981.

By the Commission, Chairman Taylor, Vice Chairman Clapp, Commissioners Gresham and Gilliam.

Agatha L. Mergenovich,

Secretary.

Proposed Rules

Federal Register
Vol. 46, No. 247
Thursday, December 24, 1981

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

EXECUTIVE OFFICE OF THE PRESIDENT

Office of Administration

5 CFR Part 2502

Availability of Records; Freedom of Information Act; Proposed Amendments to Regulations

AGENCY: Office of Administration, Executive Office of the President.

ACTION: Proposed rule.

SUMMARY: The Freedom of Information Act regulations of the Office of Administration were published in the **Federal Register** in final form on July 14, 1980 (45 FR 47112). Organizational changes since that date require amendment to the regulations to conform with the present structure of the agency. The proposed regulations reflect those organizational changes particularly the abolition of the position of Deputy Director.

DATES: Comments on the proposed amendments must be made by January 25, 1982.

ADDRESS: Comments should be directed to Mary C. Lawton, Acting General Counsel, Office of Administration, 17th and Pennsylvania Avenue NW., Washington, D.C. 20530.

FOR FURTHER INFORMATION CONTACT: Mary C. Lawton, (202) 456–2977.

Part 2502 of Title 5 of the CFR is proposed to be amended as set forth below.

John F. W. Rogers,
Director.

PART 2502—AVAILABILITY OF RECORDS

1. Section 2502.4 is proposed to be revised to read as follows:

§ 2502.4 Organization and functions.

The Office of Administration was created by Reorganization Plan No. 1 of 1977 and Executive Order 12028. Its primary function is to provide common administrative and support services for the various Agencies of the Executive Office of the President. It consists of:

(a) The Office of the Director
(b) Five Divisions—
(1) Personnel
(2) Financial Management
(3) Administrative Operations
(4) Library and Information Services
(5) Automated Systems

The Office has no field organization. Offices of the Office of Administration are presently located in the Executive Office Building, 17th and Pennsylvania Avenue NW., Washington, D.C. 20530. Regular office hours are from 9 a.m. to 5:30 p.m., Monday through Friday. Both buildings are under security control. Persons desiring access are encouraged to make advance arrangements for an appointment.

§§ 2502.7 through 2502.15 and 2502.19 [Nomenclature Change]

2. Sections 2502.7, 2502.8, 2502.9, 2502.10, 2502.11, 2502.12, 2502.13, 2502.14, 2502.15, 2502.19 are amended by substituting the title "Director, Administrative Operations Division" for the title "Deputy Director" wherever it appears.

3. The authority citation for Part 2502 is revised to read as follows:

Authority: 5 U.S.C. 552, as amended.

[FR Doc. 81–30805 Filed 12–23–81; 8:45 am]
BILLING CODE 3115–01–M

DEPARTMENT OF ENERGY

10 CFR Part 1004

Freedom of Information; Schedule of Fees for Processing Requests, Revision

AGENCY: Department of Energy.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Department of Energy (DOE) proposes to revise the schedule of fees for processing requests submitted under the Freedom of Information Act (FOIA) (5 U.S.C. 552 *et seq.*).

DATE: Comments must be received on or before January 25, 1982.

ADDRESSES: Comments may be mailed to Milton Jordan, Director, Division of Freedom of Information and Privacy Acts Activities, Room 1G–051, 1000 Independence Avenue, SW., Washington, D.C. 20585.

FOR FURTHER INFORMATION CONTACT: Milton Jordan, Director, Division of Freedom of Information and Privacy Acts Activities, Room 1G–051, Department of Energy, 1000 Independence Avenue, SW., Washington, D.C. 20585. (202) 252–5955. Abel Lopez (Office of General Counsel), Department of Energy, Room 6A–211, 1000 Independence Avenue, SW., Washington, D.C. 20585. (202) 252–6618.

SUPPLEMENTARY INFORMATION:

I. Background.
II. Procedural Requirements. A. Section 501 of the DOE Organization Act; B. Executive Order No. 12291; C. Regulatory Flexibility Act.
III. Written Comments Procedure.

I. Background

The FOIA permits the DOE to promulgate Regulations, after notice and comment, specifying a uniform fee schedule for document search and duplication services performed by the DOE in response to requests submitted under the FOIA (5 U.S.C. 552(a)(4)). Fees must be limited to reasonable standard charges, and must provide for recovery of only costs directly incurred. Fees are to be waived or reduced, if DOE determines that such waiver or reduction is in the public interest because the public would primarily benefit from furnishing the information to the requester.

The current fee schedule for search and duplication at 10 CFR 1004.9 was published in the **Federal Register** on January 8, 1979 (44 FR 1908). Under the DOE Regulation the requester is charged all search and duplication costs associated with processing the FOIA request when the total fee exceeds $25. The proposed Regulation would lower this threshold amount to $15. The proposed Regulation also elaborates on the types of costs to be charged, extends the duplication provisions of the fee schedule to requests for documents available in a Departmental Reading Room and establishes $10 as the amount above which such fees will be charged. These revisions are intended to recover more of the costs associated with these search and duplication requests.

II. Procedural Requirements

A. Section 501 of the DOE Organization Act.

Under section 501(c) of the Department of Energy Organization Act, the Department is not bound by the prior

hearing requirements of subsections (b), (c) and (d) with respect to a proposed Regulation upon our determination that no substantial issue of fact or law exists and that the proposed Regulation is unlikely to have substantial impact on the Nation's economy or large numbers of individuals and businesses. Where it is determined that no substantial issue or impact exists, the proposed Regulation may be promulgated in accordance with section 553 of Title 5 U.S.C.

The revision of the fee schedule at 10 CFR 1004.9 raises no substantial issues of fact or law becuase it will merely elaborate the types of costs incurred and allow the agency to recover the costs that it is permitted to recover when providing documents. The amount of costs that the revision permits DOE to recover will not have a substantial impact on the Nation's economy or large numbers of individuals and businesses.

B. *Executive Order No. 12291.*

It has been determined that this proposed Regulation is not a proposed major rule subject to the requirement of the Executive Order No. 12291 (46 FR 13193, February 19, 1981), because it is not likely to result in: an annual effect onthe economy of more than $100 million or more; a major increase in costs of prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; or cause significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

C. *Regulatory Flexibility Act.*

Pursuant to section 605(b) of the Regulatory Flexibility Act, 5 U.S.C. 601–612, DOE finds that sections 603 and 604 of the Act do not apply to the proposed Regulation because promulgation of the rule will not have a significant economic impact on a substantial number of small entities.

While DOE expects that the number of FOIA requesters, including small entities charged a fee will increase, it does not anticipate that such fee increases will have a significant economic impact on the operations of small entities or that the actual number of small entities affected will be "substantial."

III. Written Comments Procedure

You are invited to participate in this proceeding by submitting data, views, or arguments with respect to the matters contained in this proposed Regulation. Comments should be submitted by 4:30 p.m., E.S.T., on the date set forth in the "Dates" section of this proposed Regulation, to the address indicated in the "Addresses" section of this proposed Regulation and should be identified on the outside envelope and on the document with the designation: "Freedom of Information Fees Schedule." Three copies should be submitted.

Any information or data submitted which you consider to be confidential must be so identified and submitted in writing, one copy only. We reserve the right to determine the confidential status of such information or data and so treat it according to our determination.

Written comments will be available for public inspection and copying in the DOE's Division of Freedom of Information and Privacy Acts Activities, Room 1E–190, 1000 Independence Avenue, SW., Washington, DC 20585. The DOE will consider all timely comments before acting on the matter proposed in this Notice.

(5 U.S.C. 552)

For the reasons set out in the preamble Part 1004, the DOE proposes to amend Chapter X of 10 CFR as set forth below.

Issued in Washington, DC, December 18, 1981.

William S. Heffelfinger,

Assistant Secretary, Management and Administration.

Title 10 CFR, Chapter X, Part 1004 is amended as follows:

PART 1004—FREEDOM OF INFORMATION

1. In § 1004.7, paragraph (a) is revised to read as follows:

§ 1004.7 Response by authorizing officials: Form and content.

(a) *Form of grant.* When a requested record has been identified and will be made available, and where applicable fees are $15 or less for a Freedom of Information request, or where it has been determined that the payment of applicable fees should be waived, the records shall be made available promptly. Where the applicable fees are in excess of $15 for a Freedom of Information request, the records may be made available before all charges are paid in full.

* * * * *

2. In § 1004.9, paragraph (a)(2) is revised to read as follows:

§ 1004.9 Fees for provisions of records.

(a) * * *

(2) Fees shall not be charged where they would amount, in the aggregate, for a request or series of related requests, to $15 or less for Freedom of Information request. A request for documents available in a Reading Room will be charged for reproduction costs only and will not be charged when such fees would amount, in the aggregate, for a request or series of related requests, to $10 or less. Where fees are in excess of $15 for a Freedom of Information request, or $10 for a request for documents available in a Reading Room, the requester will be assessed for the full amount.

* * * * *

3. Section 1004.9 is amended by revising paragraphs (b)(6), (b)(7) and (c), and adding (d) to read as follows:

(b) * * *

(6) *Computerized records.* Fees for services in processing requests maintained in whole or in part in computerized form shall be in accordance with this section so far as practicable. Services of personnel in the nature of a search will be charged at rates prescribed in paragraph (b)(4) of this section unless the level of personnel involved permits rates in accordance with paragraph (b)(3) of this section. Charges for computer time involved is as follows:

(i) Programming (per hour), $17.00.

(ii) Key punching/per 1,000 card usage, $183.00.

(iii) Duplication per hour, $45.00.

(iv) Computer time per quarter hour, $219.00.

(7) *Other nonpaper records.* Fees for services in processing requests where the records are maintained on microfiche, microfilm, recording tape shall be as follows:

(i) 105mm fiche (duplicate), $1.00.

(ii) 100 ft. roll of 35mm microfilm, $7.00.

(iii) 100 ft. roll of 16mm microfilm, $6.00.

* * * * *

(c) *Notice of anticipated fees in excess of $15.* Unless the requester specifically states that he is willing to pay whatever fees are assessed by DOE for meeting the request, or, alternatively, specifies an amount in excess of $15 which he is willing to pay and which in fact covers the anticipated fees for meeting the request, a request that is expected to involve assessed fees in excess of $15 will not be deemed to have been received until the requester is advised of the cost, agrees to bear it, and makes any advance deposit required. Such notification shall be made by the Freedom of Information Officer consistent with § 1004.4(e).

(d) *Reading Room fees.* Reading Room fees in excess of $10 will be billed to the requester after notification of costs.

BILLING CODE 6450-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 81-NW-80-AD]

Airworthiness Directives; Boeing Model 707/720 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This Notice proposes an amendment to an existing Airworthiness Directive which required a one-time visual inspection of the wing station 733 production break rib lower outboard and inboard chord for cracks on Boeing Model 707/720 airplanes. This amendment adds repeat inspection intervals to insure that cracks do not progress to the extent that they may degrade the structural capability of the wing below fail-safe regulatory requirements.

DATES: Comments must be received on or before January 29, 1982.

ADDRESSES: Send comments on the proposal in duplicate to: Federal Aviation Administration, Northwest Mountain Region, Office of the Regional Counsel, Attention: Rules Docket No. 81-NW-80-AD, 9010 East Marginal Way South, Seattle, Washington, 98108.

FOR FURTHER INFORMATION CONTACT: Mr. Roger Anderson, Airframe Branch, ANM-120S Seattle Area Aircraft Certification Office, FAA Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington 98108, telephone (206) 767-2516.

Comments Invited

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket or notice number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA public contact concerned with the substance of the proposed AD will be filed in the Rules Docket.

Availability of NPRM'S

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Northwest Mountain Region, Office of the Regional Counsel, Attention: Airworthiness Rules Docket, Docket No. 81-NW-80-AD, 9010 East Marginal Way South, Seattle, Washington 98108.

Discussion: The existing Airworthiness Directive, T81-06-51, Amendment No. 39-4110, (46 FR 25428; May 7, 1981) required a one-time visual inspection of the wing station 733 production break rib lower outboard and inboard chords for cracks. The action was necessary because a 21-inch long crack was found in the aft lower outboard wing splice rib chord which resulted in degradation of the structural capability of the wing below fail-safe regulatory requirements. As a result of the inspection, operators reported finding several rib chords with small cracks, none of which seriously compromised the strength of the wing. However, analysis and evaluation subsequent to issuing the requirement for a one-time inspection has shown that the cracks were caused by stress corrosion in the 7079-T6 aluminum alloy rib chords. Repetitive inspections are therefore now required to insure that cracks are discovered before they progress so far as to endanger the structural integrity of the wing.

Description of the inspection procedures and related documents are included in Boeing Service Bulletin A3308, Revision 2, dated July 10, 1981.

The continued normal inspections in accordance with D6-44860 (Supplemental Structural Inspection Document for High Time 707/720 Aircraft) will not suffice since the much longer inspection intervals for this detail were established for detection of fatigue damage and did not consider the faster progress of stress corrosion damage in these parts.

Cracks in the rib chords of the Wing Station 733 production break, if left undetected, could result in degradation of the wing structural capability below fail-safe regulatory requirements.

It is estimated that 279 airplanes of the U.S. Registry will be affected by this proposed AD, that it will take approximately 8 man hours per airplane per year to accomplish the inspections, and that the average labor cost will be $300 per airplane per year, for a total impact of approximately $84,000 per year.

The Proposed Amendment

Accordingly, the Federal Aviation Administration (FAA) proposes to amend § 39.13 of the Federal Aviation Regulations (14 CFR 39.13) by amending Airworthiness Directive T81-06-51 (Amendment 39-4110; 46 FR 25248 dated May 7, 1981) as follows:

1. Revise paragraph 1. to read as follows:

"1. Perform a one-time visual inspection and repeat visual inspections at intervals not exceeding one year, in accordance with Boeing Service Bulletin A3308, Revision 2, dated July 10, 1981, or later revision approved by the Chief, Seattle Area Aircraft Certification Office, FAA Northwest Mountain Region."

2. Delete the following NOTE:

Note.—Close visual inspection of the forward and aft inboard and outboard lower chords in accordance with D6-44860 (Supplemental Inspection Document) is an approved alternate means of compliance with paragraph 1 above.

The manufacturer's specifications and procedures identified and described in this amendment are incorporated herein and made a part hereof pursuant to 5 U.S.C. 552(a)(1).

All persons affected by this directive who have not already received the service document from the manufacturer may obtain copies upon request to The Boeing Company, P.O. Box 3707, Seattle, Washington 98124. These documents also may be examined at FAA Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington 98108.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.89)

Note.— The FAA has determined that this document involves a proposed regulation that is not major under the provisions of Executive Order 12291, because of its minimal economic impact, as summarized earlier in this document. It has been further determined that this proposed regulation is not significant under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). A copy of the draft regulatory evaluation for this action is contained in the regulatory docket. A copy of it may be obtained by contacting the person identified above under the caption "FOR FURTHER INFORMATION CONTACT." In addition, it has been determined under the criteria of the

Regulatory Flexibility Act that this proposed rule, at promulgation, will not have a significant impact on a substantial number of small entities, since it involves few, if any, small entities.

Issued in Seattle, Washington on December 15, 1982.

Robert O. Brown,

Acting Director, Northwest Mountain Region.

BILLING CODE 4910-13-M

14 CFR Part 39

[Airworthiness Docket No. 81-ASW-61]

Air Tractor Model AT-300, AT-301, AT-302, and AT-400 Airplanes; Airworthiness Directives

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document proposes to adopt a new airworthiness directive (AD) for Air Tractor Model AT-300, AT-301, AT-302, and AT-400 airplanes. The proposed AD will establish a retirement life for the main landing gear struts, require periodic inspection of both struts for deterioration and cracks, and require replacement of struts found to be damaged or to have reached or exceeded the retirement life of the part. The proposed AD is needed to correct an unsafe condition resulting from main landing gear strut failures.

DATES: Comments must be received on or before January 24, 1982.

ADDRESSES: Send comments on the proposal in duplicate to: Regional Counsel, Attention: Docket No. 81-ASW-61, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Texas 76101.

The applicable service letter may be obtained from: Air Tractor, Inc., P.O. Box 485, Olney, Texas 76374. Copies of the service letter are contained in the Rules Docket at the Office of the Regional Counsel, Southwest Region, FAA, 4400 Blue Mound Road, Fort Worth, Texas.

FOR FURTHER INFORMATION CONTACT: William A. Simmons, Airframe Branch, Aircraft Certification Division, ASW-120, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Texas 76101, telephone (817) 624-4911, extension 516.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments will be considered by the Director before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Office of Regional Counsel, Federal Aviation Administration, Southwest Region, 4400 Blue Mound Road, Fort Worth, Texas, for examination by interested persons. A report summarizing each FAA-public contact, concerned with the substance of the proposed AD, will be filed in the docket.

There have been several reports of broken main landing gear struts. In one instance a taxiing airplane experienced failure of both main landing gear struts causing the airplane to drop to its belly and the propeller to impact the ground. The FAA has determined that this is an unsafe condition and is likely to exist or develop on other airplanes with the same landing gear strut type design. The proposed AD will (1) establish a retirement life for the main landing gear struts, (2) require periodic inspection of both struts for deterioration and cracks, and (3) require replacement of struts found to be damaged or to have reached or exceeded the retirement life of the part. Snow Engineering Company Service Letter Number 45 issued November 1, 1981, refers to this same subject.

The Proposed Amendment

Accordingly, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) by adding the following new airworthiness directive:

Air Tractor: Applies to Air Tractor Model AT-300, S/N 300-0001 through 300-9999; AT-301, S/N 301-0001 through 301-9999; AT-302, S/N 302-0001 through 302-9999; AT-400, S/N 400-0244 through 400-9999 airplanes certified in all categories and equipped with 1-inch-thick main landing gear struts (P/N 40007-2 or P/N 40058-1) (Airworthiness Docket No. 81-ASW-61).

Compliance required as indicated.

To prevent possible failure of the main landing gear struts (P/N 40007-2 or P/N 40058-1) accomplish the following:

a. Within the next 20 hours' time in service or 100 landings, and thereafter at intervals of 100 hours' time in service or 500 landings, whichever comes first, since last compliance, inspect AT-300 and AT-301 airplanes with 1,000 or more hours' time in service or 5,000 or more landings, whichever is greater, and AT-302 and AT-400 airplanes with 600 or more hours' time in service or 3,000 or more landings, whichever is greater, in accordance with paragraph (b).

b. Remove the left and right outboard fuselage clamp blocks. Remove all minor corrosion on both main landing gears by sandblasting, with special attention in the areas of strut contact with the clamp blocks. Inspect both main landing gears using dye penetrant or magnetic particle inspection procedures. Replace all parts which are damaged, cracked, or have severe corrosion pitting with new parts of the same part number before further flight. All struts returned to service must be painted. Snow Engineering Company Service Letter No. 45 dated November 1, 1981, covers this same subject.

c. For AT-300 and AT-301 airplanes with 1,900 or more hours' time in service or 7,000 or more landings, whichever is greater, and for AT-302 and AT-400 airplanes with 1,100 or more hours' time in service or 5,500 or more landings, whichever is greater, replace the main landing gear struts with new parts of the same part numbers within the next 100 hours' time in service or 500 landings, whichever comes first.

d. This airworthiness directive establishes the retirement life of the 1-inch-thick main landing gears (P/N 40007-2 or P/N 40058-1) installed on the Model AT-300 and AT-301 airplanes to be limited to 2,000 hours' time in service or 7,500 landings, whichever comes first. This airworthiness directive establishes the retirement life of the 1-inch-thick main landing gears (P/N 40007-2 or P/N 40058-1) installed on the Model AT-302 and AT-400 airplanes to be limited to 1,200 hours' time in service or 6,000 landings, whichever comes first.

Equivalent methods of complying with this AD must be approved by the Chief, Aircraft Certification Division, FAA, Southwest Region.

A special flight permit may be issued in accordance with FAR 21.197 to allow flight of the aircraft to a location where this AD can be accomplished.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended, (49 U.S.C. 1354(a), 1421, and 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.85).

Note.—The FAA has determined that this proposed regulations involves a regulation which is not considered to be major under Executive Order 12291 or significant under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979) and will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act since it involves a relatively low cost per aircraft. A draft evaluation has been prepared for this proposed regulation and has been placed in the docket. A copy of it may be obtained by contacting the person identified under the caption "FOR FURTHER INFORMATION CONTACT."

Issued in Fort Worth, Texas, on December 9, 1981.

F. E. Whitfield,

Acting Director, Southwest Region.

14 CFR Part 39

[Airworthiness Docket No. 81-ASW-67]

Airworthiness Directives; Bell Model 206L and 206L-1 Helicopters

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to adopt an airworthiness directive (AD) that would require modification, replacement, or retirement of the horizontal stabilizer assembly on Bell Models 206L and 206L-1 helicopters. The proposed AD is needed to prevent possible failure of the horizontal stabilizer which could result in loss of the helicopter.

DATES: Comments must be received on or before January 22, 1982.

ADDRESSES: Send comments on the proposal in duplicate to: Regional Counsel, Attention: Docket No. 81-ASW-67, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Texas 76101.

The applicable service information may be obtained from Product Support Department, Bell Helicopter Textron, P.O. Box 482, Fort Worth, Texas 76101.

These documents may also be examined at the Office of the Regional Counsel, Southwest Region, Federal Aviation Administration, 4400 Blue Mound Road, Fort Worth, Texas, or Rules Docket in Room 916, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C.

FOR FURTHER INFORMATION CONTACT: Tom Dragset, Airframe Branch, Aircraft Certification Division, ASW-120, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Texas 76101, telephone (817) 624-4911, extension 516.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments will be considered by the Director before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Office of Regional Counsel, Federal Aviation Administration, Southwest Region, 4400 Blue Mound Road, Fort Worth, Texas, for examination by interested persons. A report summarizing each FAA-public contact, concerned with the substance of the proposed AD, will be filed in the docket.

Amendment 39-3358 (43 FR 56647) AD 78-24-06, amended by Amendment 39-4032 (46 FR 25428) requires repetitive inspection and modification or horizontal stabilizers, P/N 206-023-119, all dash numbers, installed on Bell Models 206L and 206L-1 helicopters. The AD was issued as a result of in-flight failures of the horizontal stabilizer.

The Federal Aviation Administration has determined, based on additional flight strain data obtained on the horizontal stabilizer, that the stabilizers should be modified, replaced, or retired, depending on which part number stabilizer is installed. Therefore, the FAA is proposing further mandatory action for all Bell Model 206L helicopters and certain serial number 206L-1 helicopters. The proposed AD would require removal and replacement of stabilizer assembly P/N 206-704-143-105, -113, and -131, and replacement of or modification to stabilizer assembly P/N 206-023-119-011, -075, -107, and -113, and 206-961-439-003.

Accordingly, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) by adding the following new airworthiness directive.

Bell: Applies to Bell Models 206L helicopters, all serial numbers, and 206L-1, helicopters, serial numbers 45154 through 45398, 45400 through 45491, 45493 through 45543, 45545, through 45614, 45616 through 45634, 45636 through 45638, 45643 through 45647, 45649 through 45652, and 45655 through 45657, certificated in all categories (Airworthiness Docket No. 81-ASW-67).

Compliance is required as indicated, unless previously accomplished.

To prevent possible failure of the horizontal stabilizer, accomplish the following, in accordance with Bell Helicopter Textron Alert Service Bulletin 206L-81-23, Revision A, dated October 23, 1981, or FAA approved equivalent.

a. Remove horizontal stabilizer assemblies, P/N 206-704-143-105, -113, and -131, from service within 25 hours' time in service after March 31, 1982, and replace with a serviceable stabilizer.

b. Inspect horizontal stabilizer assemblies, P/N 206-023-119-011, -075, -107, and -113, and P/N 206-961-439-003, in accordance with paragraph B1 of Accomplishment Instructions of ASB 206L-81-23, Revision A, or FAA approved equivalent, within 25 hours' time in service after March 31, 1982.

c. Remove horizontal stabilizer assemblies, P/N 206-023-119-011, -075, -107, and -113, and P/N 206-961-439-003, that do not meet the inspection criteria for modification within 25 hours' time in service after March 31, 1982, and replace with a serviceable stabilizer.

d. Modify horizontal stabilizer assemblies, P/N 206-023-119-011, -075, -107, and -113, and P/N 206-961-439-003, that meet the inspection criteria for modification, at one of the approved service centers listed in ASB 206L-81-23, Revision A, or remove from service within 25 hours' time in service after March 31, 1982, and replace with a serviceable stabilizer.

e. A serviceable horizontal stabilizer assembly (reference page 5 of ASB 206L-81-23) is one which is marked with modified P/N 206-704-040-003, -011, -075, -107, or -113, or current production P/N 206-023-119-151 or -703.

f. Compliance with this airworthiness directive and AD 78-24-06 is not required if serviceable horizontal stabilizer assemblies, modified P/N 206-704-040-003, -011, -075, or -107, or -113, or current production P/N 206-023-119-151, or -703, are installed.

g. Compliance with this airworthiness directive eliminates the requirement for modification of the stabilizer supports and the daily inspection requirement for cracks required by AD 78-24-06, Amendment 39-3358, as amended by Amendment 39-4032.

h. The helicopter may be flown in accordance with FAR 21.197 to a base where compliance with this AD can be performed.

(Sections 313(a), 601, and 603, Federal Aviation Act of 1958, as amended, (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.85)

Note.—The FAA has determined that this document involves a proposed regulation which is not considered to be major under Executive Order 12291 or significant under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979) and will not have significant economic effect on a substantial number of entities under the criteria of the Regulatory Flexibility Act since it involves relatively low cost per aircraft. A draft regulatory evaluation has been prepared for this proposed regulation and has been placed in the docket. A copy of it may be obtained by contacting the person identified under the caption "FOR FURTHER INFORMATION CONTACT."

Issued in Fort Worth, Texas, on December 8, 1981.

C. R. Melugin, Jr.

Director, Southwest Region.

BILLING CODE 4910-13-M

14 CFR Part 39

[Airworthiness Docket No. 81-ASW-58]

Airworthiness Directives; Bell Helicopter Textron Model 214B Series Helicopters

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to adopt an airworthiness directive (AD) that would require a magnetic particle inspection of the tail rotor yokes on U.S. Registered Bell Helicopter Model 214B series helicopters, Serial Numbers 28001 through 28060. This magnetic particle inspection is needed to detect possible inclusions which could lead to a fatigue failure of the yoke.

DATES: Comments must be received on or before January 23, 1982.

ADDRESSES: Send comments on the proposal in duplicate to: Regional Counsel, Attention: Docket No. 81-ASW-58, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Texas 76101.

The applicable service information may be obtained from Bell Helicopter Textron, P.O. Box 482, Fort Worth, Texas 76101, ATTN: Product Support Department.

FOR FURTHER INFORMATION CONTACT: H. A. Armstrong, Airframe Branch, Aircraft Certification Division, ASW-120, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Texas 76101, telephone (817) 624-4911, extension 516.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments will be considered by the Director before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Office of Regional Counsel, Federal Aviation Administration, Southwest Region, 4400 Blue Mound Road, Fort Worth, Texas, for examination by interested persons. A report summarizing each FAA-public contact, concerned with the substance of the proposed AD, will be filed in the docket.

During recent machining of new tail rotor yokes, surface pits were detected. These pits had been subsurface inclusions, and they were exposed during the machining process. Thirty-seven additional yokes were inspected using a magnetic-particle inspection process. Four of these yokes were found to have subsurface inclusions. Prior to this time, the yokes had been penetrant inspected only. The magnetic particle inspection process is now also being employed. The presence of an inclusion causes stress concentrations which could lead to a fatigue failure of the tail rotor yoke and loss of a helicopter. Helicopters Serial Number 28061 and subsequent will have the appropriate inspections performed prior to delivery as new aircraft.

The Proposed Amendment

Accordingly, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) by adding the following new airworthiness directive:

Bell Helicopter Textron (BHT): Applies to Model 214B series helicopters, Serial Numbers 28001 through 28060, certificated in all categories (Airworthiness Docket No. 81-ASW-58).

a. To prevent fatigue failure of tail rotor yokes, Part Numbers 214-010-702-001, -105, and -107, accomplish the following:

(1) Inspect the tail rotor yoke by magnetic particle inspection in accordance with Bell Helicopter Textron Alert Service Bulletin No. 214-81-18 dated September 18, 1981, or FAA approved equivalent, at the next flapping/pitch change bearing replacement following the effective date of this AD or, in any case not later than February 1, 1982. (The inspection is not required if the applicable Bell Helicopter Textron Alert Service Bulletin has previously been complied with.)

(2) If any inclusions are detected, the yoke shall be rejected and replaced with a like serviceable part.

b. Any equivalent method of compliance with this AD must be approved by the Chief, Aircraft Certification Division, Southwest Region, Federal Aviation Administration.

c. In accordance with FAR 21.197, flight is permitted to a base where the inspection required by this AD may be accomplished.

(Sections 313(a), 601, and 603, Federal Aviation Act of 1958, as amended, (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.85)

Note.—The FAA has determined that this document involves a proposed regulation which is not considered to be major under Executive Order 12291 or significant under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979) and will not have significant economic effect on a substantial number of small entities under the criteria of the Regulatory Flexibility Act since it involves a relatively low cost per aircraft. A draft regulatory evaluation has been prepared for this proposed regulation and has been placed in the docket. A copy of it may be obtained by contacting the person identified under the caption "FOR FURTHER INFORMATION CONTACT."

Issued in Fort Worth, Texas, on December 9, 1981.

14 CFR Part 71

[Airspace Docket No. 81-AGL-41]

Proposed Designation of Transition Area; Blue Earth, MN

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The nature of this Federal action is to designate controlled airspace near Blue Earth, MN, to accommodate a new instrument approach into Blue Earth Municipal Airport, established on the basis of a request from Blue Earth Municipal Airport officials and the State of Minnesota to provide that facility with instrument approach capability.

The intended effect of this action is to insure segregation of the aircraft using approach procedures in instrument weather conditions from other aircraft operating under visual weather conditions.

DATES: Comments must be received on or before January 15, 1982.

ADDRESS: Send comments on the proposal to FAA Office of Regional Counsel, AGL-7, Attention: Rules Docket Clerk, Docket No. 81-AGL-41, 2300 East Devon Avenue, Des Plaines, Illinois 60018.

A public docket will be available for examination by interested persons in the Office of the Regional Counsel, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois 60018.

FOR FURTHER INFORMATION CONTACT: Edward R. Heaps, Airspace and Procedures Branch, Air Traffic Division, AGL-530, FAA, Great Lakes Region, 2300 East Devon Avenue, Des Plaines, Illinois 60018, Telephone (312) 694-7360.

SUPPLEMENTARY INFORMATION: The floor of the controller airspace in this area will be lowered from 1200' above ground to 700' above ground. The development of the proposed instrument procedures require that the FAA lower the floor of the controlled airspace to insure that the procedure will be contained within controlled airspace. The minimum descent altitude for this procedure may

be established below the floor of 700-foot controlled airspace.

Aeronautical maps and charts will reflect the area of the instrument procedure, which will enable other aircraft to circumnavigate the area in order to comply with applicable visual flight rule requirements.

Comments Invited

Interested persons may participate in the proposed rulemaking by submitting such written data, views or arguments as they may desire. Communications should be submitted in triplicate to Regional Counsel, AGL-7, Great Lakes Region, Rules Docket No. 81-AGL-41, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois 60018. All communications received on or before January 15, 1982, will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

Availability of NPRM

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Avenue, SW., Washington, D.C. 20591, or by calling (202) 426-8058. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2 which describes the application procedures.

The Proposal

The FAA is considering an amendment to Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to establish a 700-foot controlled airspace transition area near Blue Earth, MN. Subpart G of Part 71 was published in the **Federal Register** on January 2, 1981 (46 FR 540).

The Proposed Amendment

Accordingly, the FAA proposes to amend § 71.181 of Part 71 of the Federal Aviation Regulations as follows:

In § 71.181 (46 FR 540), the following transition area is added:

Blue Earth, Minnesota

That airspace extending upward from 700 feet above the surface within a 5-statute-mile radius of the Blue Earth Municipal Airport (latitude 43°35'52"N, longitude 94°05'33"W) at Blue Earth, Minnesota, and 3 miles either side of the 156° bearing from the Blue Earth NDB extending from the 5-mile radius to 8.5 miles.

(Section 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); sec. 11.61 of the Federal Aviation Regulations (14 CFR 11.61))

The FAA determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); (3) does not warrant preparation of a regulatory evalution as the anticipated impact is so minimal; (4) is appropriate to have a comment period of less than 30 days; and (5) at promulgation, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Des Plaines, Illinois, on December 8, 1981.

Paul K. Bohr,

Acting Director, Great Lakes Region.

BILLING CODE 4910-13-M

---

14 CFR Part 71

[Airspace Docket No. 81-AGL-43]

Proposed Designation of Transition Area; Delavan, Wis.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The nature of this Federal action is to designate controlled airspace near Delavan, Wisconsin, to accommodate a new instrument approach into Lake Lawn Airport, Delavan, Wisconsin, established on the basis of a request from the Lake Lawn Airport officials to provide that facility with instrument approach capability.

The intended effect of this action is to insure segregation of the aircraft using approach procedures in instrument weather conditions from other aircraft operating under visual weather conditions.

DATES: Comments must be received on or before January 14, 1982.

ADDRESS: Send comments on the proposal to FAA Office of Regional Counsel, AGL-7, Attention: Rules Docket Clerk, Docket No. 81-AGL-43, 2300 East Devon Avenue, Des Plaines, Illinois 60018.

A public docket will be available for examination by interested persons in the Office of the Regional Counsel, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois 60018.

FOR FURTHER INFORMATION CONTACT: Edward R. Heaps, Airspace and Procedures Branch, Air Traffic Division, AGL-530, FAA, Great Lakes Region, 2300 East Devon Avenue, Des Plaines, Illinois 60018, Telephone (312) 694-7360.

SUPPELMENTARY INFORMATION: The floor of the controlled airspace in this area will be lowered from 1,200' above ground to 700' above ground. The development of the proposed instrument procedures requires that the FAA lower the floor of the controlled airspace to insure that the procedure will be contained within controlled airspace. The minimum descent altitude for this procedure may be established below the floor of the 700 foot controlled airspace. Aeronautical maps and charts will reflect the area of the instrument procedure which will enable other aircraft to circumnavigate the area in order to comply with applicable visual flight rule requirements.

Comments Invited

Interested persons may participate in the proposed rulemaking by submitting such written data, views or arguments as they may desire. Communications should be submitted in triplicate to Regional Counsel, AGL-7, Great Lakes Region, Rules Docket No. 81-AGL-43, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois 60018. All communications received on or before January 14, 1982, will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

Availability of NPRM

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Avenue, SW, Washington, D.C. 20591, or by calling (202) 426-8058. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2 which describes the application procedures.

The Proposal

The FAA is considering an amendment to Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to establish a 700 foot controlled airspace transition area near Delavan, Wisconsin. Subpart G of Part 71 was published in the **Federal Register** on January 2, 1981 (46 FR 540).

The Proposed Amendment

Accordingly, the FAA proposes to amend Subsection 71.181 of Part 71 of the Federal Aviation Regulations as follows:

In § 71.181 (46 FR 540) the following transition area is added:

Delavan, Wisconsin

That airspace extending upward from 700 feet above the surface within a 6-mile radius of the Lake Lawn Airport, Delavan, Wisconsin (latitude 42°37'55" N., long ude 88°36'05" W.), excluding the Lake Geneva 700-foot transition area.

This amendment is proposed under the authority of section 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); sec. 11.61 of the Federal Aviation Regulations (14 CFR 11.61).

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal; (4) is appropriate to have a comment period of less than 30 days; and (5) at promulgation, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Des Plaines, Ill., on December 8, 1981.

14 CFR Part 71

[Airspace Docket No. 81-AGL-42]

Proposed Designation of Transition Area, New Holstein, Wis.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The nature of this Federal action is to designate controlled airspace near New Holstein, Wisconsin, to accommodate a new instrument approach into New Holstein Municipal Airport, which was established on the basis of a request from the New Holstein Municipal Airport officials to provide that facility with instrument approach capability. The VOR/DME–A procedure under consideration will be based on the Oshkosh, Wisconsin, VORTAC.

The intended effect of this action is to insure segregation of the aircraft using approach procedures in instrument weather conditions from other aircraft operating under visual weather conditions.

DATES: Comments must be received on or before January 14, 1982.

ADDRESS: Send comments on the proposal to FAA Office of Regional Counsel, AGL–7, Attention: Rules Docket Clerk, Docket No. 81–AGL–42, 2300 East Devon Avenue, Des Plaines, Illinois 60018.

A public docket will be available for examination by interested persons in the Office of the Regional Counsel, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois 60018.

FOR FURTHER INFORMATION CONTACT: Edward R. Heaps, Airspace and Procedures Branch, Air Traffic Division, AGL–530, FAA, Great Lakes Region, 2300 East Devon Avenue, Des Plaines, Illinois 60018, Telephone (312) 694–7360.

SUPPLEMENTARY INFORMATION: The floor of the controlled airspace in this area will be lowered from 1,200′ above ground to 700′ above ground. The development of the proposed instrument procedures requires that the FAA lower the floor of the controlled airspace to insure that the procedure will be contained within controlled airspace. The minimum descent altitude for this procedure may be established below the floor of the 700-foot controlled airspace.

Aeronautical maps and charts will reflect the area of the instrument procedure which will enable other aircraft to circumnavigate the area in order to comply with applicable visual flight rule requirements.

Comments Invited

Interested persons may participate in the proposed rulemaking by submitting such written data, views or arguments as they may desire. All communications received on or before January 14, 1982, will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

Availability of NPRM

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA–430, 800 Independence Avenue, S.W., Washington, D.C. 20591, or by calling (202) 426–8058. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11–2 which describes the application procedures.

The Proposal

The FAA is considering an amendment to Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to establish a 700-foot controlled airspace transition area near New Holstein, Wisconsin. Subpart G of Part 71 was published in the **Federal Register** on January 2, 1981 (46 FR 540).

The Proposed Amendment

Accordingly, the FAA proposes to amend Subsection 71.181 of Part 71 of the Federal Aviation Regulations as follows:

In § 71.181 (46 FR 540) the following transition area is added:

New Holstein, Wisconsin

That airspace extending upward from 700 feet above the surface within a five-mile radius of the New Holstein Municipal Airport (latitude 43°56'41" N., longitude 88°08'57" W.) within two and one-half miles each side of the Oshkosh VORTAC 096° radial extending from the five-mile radius area to seven miles west of the airport.

This amendment is proposed under the authority of section 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); sec. 11.61 of the Federal Aviation Regulations (14 CFR 11.61).

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal; (4) is appropriate to have a comment period of less than 30 days; and (5) at promulgation, will not have a significant economic impact on a

substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Des Plaines, Ill., on December 8, 1981.

BILLING CODE 4910-13-M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Parts 2 and 35

[Docket No. RM81-38]

Inclusion of Construction Work in Progress for Public Utilities; Order Directing Service and Extending the Time for Reply Comment

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Order directing service and extending the time for comment.

SUMMARY: Pursuant to its Notice of Proposed Rulemaking regarding the inclusion of construction work in progress (CWIP) in the rate base of public utilities to relieve severe financial difficulty (46 FR 39445, August 3, 1981), the Commission established a procedure for the service of initial comments on all persons requesting to be placed on a Service List (46 FR 45624, September 14, 1981). Due to some non-compliance by participants in this procedure, the Commission directs these persons to serve their comments on all other persons on the Service List and to certify that this has been done. Failure to comply could result in penalties. The Reply comment deadine is extended as set forth in the Order.

DATES: Service of initial comments must be completed not later than December 23, 1981. Certification of service must be submitted to the Secretary by all participants not later than December 31, 1981. Reply comments must be submitted not later than January 15, 1982.

ADDRESSES: All filings should reference Docket No. RM81-38 and should be addressed to: Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426.

FOR FURTHER INFORMATION CONTACT: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, (202) 357-8400.

SUPPLEMENTARY INFORMATION:

Issued: December 17, 1981.

On September 4, 1981, the Commission established a service list for comments on the inclusion of construction work in progress in the rate base of electric utilities, in order to facilitate the exchange of written comments among all persons who indicated to the Secretary an intent to file written comments (46 FR 45624, September 14, 1981). The Order stated that any commenter whose name was thereby placed on the Service List should serve initial comments on all other persons on the Service List on the same day those comments were filed with the Commission.

During the comment period, the Commission was advised that numerous persons who filed to be placed on the Service List failed to serve their comments on other parties. In addition, certain commenters have moved the Commission to compel service of initial comments.[1]

The commission established the Service List procedure, in addition to the public comment procedure announced in the Notice of Proposed Rulemaking (46 FR 39445, August 3, 1981), to encourage prompt and efficient responses to the arguments raised by initial comments and to ensure fairness to all persons who may have an interest in rebutting the positions taken by other commenters. Any person who submitted a notice of intent to file written comments, in order to be placed on the list and to obtain service of the comments of others, implicitly agreed to participate fully in this procedure. Many commenters expended money and resources in reliance on that full participation. The Commission believes that it is inequitable for some persons to reap this benefit, without reciprocating by serving their comments on all parties. Moreover, such conduct undermines the objective of this procedure, that is, to provide a thorough and meaningful discussion on the record of all issues relating to CWIP. In light of the customary opportunity to comment on the proposed rule which has been afforded the public generally, without any obligation to participate in a special service procedure, the failure by persons on the Service List to serve all other parties on that list is unacceptable. Such failure diminishes the value of the reply comment procedure established by the Commission.

The Commission therefore directs all persons on the attached Service List, who have not served initial comments on all other persons listed, to do so not later than December 23, 1981 and to certify to the Secretary of the Commission under 18 CFR 1.17(b) and 1.51 that such service has been made, not later than December 31, 1981. In addition, all other persons on the Service List must also certify by December 31, 1981 that such service has been made. The Commission will consider the possibility of penalties for failure to serve initial comments as directed, including striking the comments of those failing to provide service from consideration in this proceeding. In any event, all interested persons are apprised that copies of all comments, including comments filed by persons not participating in the Service List procedure, are available for inspection by participants in this proceeding and the general public at the Commission's Division of Public Information, Room 1000, 825 North Capitol Street, N.E., Washington, D.C., during regular business hours.

In order to provide sufficient opportunity to respond to any late-served comments, the Commission also extends the deadline for filing reply comments. Reply comments must be filed not later than January 15, 1982.

The motions filed to compel and ensure service of comments are granted to the exent provided in this order.

By the Commission.

Kenneth F. Plumb,

Secretary.

[1] On December 4, 1981, counsel for three groups of publicly- or cooperatively-owned utility systems filed in this docket a Motion to Compel Service of Certain Initial Comments and to Compel Disclosure by Utility Company Parties of Certain Actions Taken and Plans Formulated Under the Economic Recovery Tax Act of 1981. On December 9, 1981, counsel for two of these groups of utility systems also filed a Motion for Adoption of Procedures to Insure Service of Comments On all Interested Parties. This order addresses only the issue of inadequate service of initial comments.

NAVAJO AND HOPI INDIAN RELOCATION COMMISSION

25 CFR Part 700

Commission Operations and Relocation Procedures, Recodification, Revision and Additions

AGENCY: Navajo and Hopi Indian Relocation Commission.

ACTION: Proposed rule.

SUMMARY: On March 9, 1981, the Commission published proposed rules (FR Vol. 46, No. 45 at pp. 15720–15743) which would recodify, revise, and expand the existing regulations contained in 25 CFR Part 700. Many comments were received which were considered by the Commission. The Commission has adopted most of the proposed rules which will be published in the near future. In connection with §§ 700.143—Payments for Divorced or Separated Relocatees and 700.145—Payments to Estates, the Commission wishes to republish a new draft of these regulations and solicit further comment before taking final action on these rules.

DATE: Comments must be received on or before January 25, 1982.

ADDRESS: Send comments to: Paul M. Tessler, CFR Liaison Officer, Navajo and Hopi Indian Relocation Commission, P.O. Box KK, Flagstaff, Arizona, 86002.

FOR FURTHER INFORMATION CONTACT: Paul M. Tessler, CFR Liaison Officer, Telephone No. (602) 779–3311, Extension 1376, FTS: 261–1376.

The principal author is William G. Lavell, General Counsel, Navajo and Hopi Indian Relocation Commission, P.O. Box KK, Flagstaff, Arizona 86002, Telephone (602) 779–3311, Extension 1376, FTS: 261–1376.

PART 700—COMMISSION OPERATIONS AND RELOCATION PROCEDURES

Accordingly Part 700 of Title 25 of the Code of Federal Regulations is proposed to be amended by adding regulations designated as §§ 700.143—Payments for divorced or separated relocatees and 700.145—Payments to estates as follows:

§ 700.143 Payments for divorced or separated relocatees.

(a) General. The following considerations apply to Certified Eligible Heads of Households who separate or divorce and intend to establish separate eligibility.

(b) Determination of Benefits. Eligibility for relocation benefits is determined by the residence of the Certified Eligible Head of Household as of the time that benefits were first applied for, rather than at the time of displacement or after relocation.

(1) If the divorce or separation took place before benefits were first applied for and one of the spouses vacated the property at that time, the vacating spouse would not be eligible for benefits and all relocation benefits would accrue to the spouse remaining in occupancy.

(2) If both husband and wife are in possession at the time that benefits are first applied for, and are otherwise eligible for benefits, they qualify together as a displaced family. Their maximum benefit is the amount the family would have received had the man and wife relocated together.

(c) Proration of Relocation Benefits. Relocation benefits may be divided between the husband and wife in any portion they agree upon. This procedure requires a written agreement signed by both parties, which clearly sets forth the method of division and the agreed percentage which each party claims. The agreement may not thereafter be changed without the written consent of both parties. In the absence of an agreement, the benefits shall be divided equally regardless of custody of minor children, if any, or support of emancipated children.

(d) Claimants may agree upon a division of the moving expense payment which differs from division of other relocation benefits. Moving expense payments can be based on actual costs or alternate method; however, the two methods cannot be mixed.

(1) The parties may move at different times; however, all moving expense benefits shall be calculated from the time benefits are first applied for.

(2) If the parties cannot reach an agreement, their moving expense benefits will be determined as if the family had relocated together. The claim form need be signed by only one party; however, the benefit checks will be made payable to both individuals.

§ 700.145 Payments to estates.

Relocation assistance payments can be made to the estate of a Certified

Eligible Head of Household who was certified and qualified for payment during his lifetime under the following circumstances:

(a) The actual cost of removing personal property may be paid to an estate if the decedent was in occupancy of the acquired property at the date benefits were first applied for and the personal property was removed from the premises thereafter.

(b) Replacement housing payments may be paid to an estate only when a Certified Eligible Head of Household qualified for such a housing payment pursuant to the Act and signed a Relocation Contract but died before the replacement housing was completed. The estate of a Certified Eligible Head of Household who had not signed a Relocation Contract at the time of his/her death is not eligible for payment of a replacement housing benefit.

(c) If one of a married couple who was a Certified Eligible Head of Household dies, the surviving spouse may be paid the same moving expense and replacement housing payments the couple would have received had death not occurred. If there is no surviving spouse another member of the household may be designated by the Commission as a Head of Household and may receive all relocation assistance payments.

Roger Lewis,

Chairman, Navajo and Hopi Indian Relocation Commission.

BILLING CODE 6820-BB-M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Ch. VII

Public Hearing and Public Comment Period on the Resubmitted Illinois Permanent Regulatory Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Proposed Rule; Schedule for Public Hearing and Public Comment Period.

SUMMARY: OSM is announcing procedures for the public comment period and hearing on the substantive adequacy of those portions of the proposed Illinois regulatory program under the Surface Mining Control and Reclamation Act of 1977 (SMCRA) which have been resubmitted by the State. The resubmission includes those portions of the proposed regulatory program which were disapproved by the Secretary of the Interior in his initial decision on October 31, 1980 (45 FR 72468–72505) and any other changes which have been made since that decision.

This notice sets forth the times and locations that the Illinois program is available for public inspection; the date when and the location where OSM will hold a public hearing on the resubmission; the comment period during which interested persons may submit written comments and data on the proposed program and other information relevant to public participation during the comment period and public hearings.

DATES: A public hearing to review the substance of the portions of the Illinois program not previously approved by the Secretary of the Interior will be held at 1:30 p.m. on January 18, 1982 at the address listed under "ADDRESSES."

Comments from members of the public must be received before the close of business on January 25, 1982 in order to be considered in the Secretary's decision on those elements of the proposed Illinois program which were not approved in the initial decision on the proposed program.

ADDRESSES: The public hearing will be held at the Illinois Department of Transportation, Springfield, Illinois. Written comments should be sent to: Office of Surface Mining, Attention: Illinois Program Review, 46 East Ohio Street, Indianapolis, Indiana 46204–1994.

Copies of the full text of the proposed program, a listing of scheduled public meetings and copies of all written comments are available for review and copying at the OSM Region III Office and the office of the State Regulatory Authority listed below, Monday through Friday, 8:00 a.m.–4:30 p.m., excluding holidays.

Office of Surface Mining, Region III, 46 East Ohio Street, Indianapolis, Indiana 46204–1994, Phone (317) 269–2629

Department of Mines and Minerals, Division of Land Reclamation, 227 South 7th Street, Suite 204, Springfield, Illinois 62706

Department of Mines and Minerals, Division of Land Reclamation, Southern District Field Office, Route 6, Box 140A, Marion, Illinois 62959

FOR FURTHER INFORMATION CONTACT: Office of Surface Mining—Region III, Attention: Illinois Program Review, 46 East Ohio Street, Indianapolis, Indiana 46204–1994, Phone (317) 269–2629.

SUPPLEMENTARY INFORMATION: On March 3, 1980, the State of Illinios submitted to OSM a proposed State regulatory program. Pursuant to the provisions of 30 CFR Part 732 (44 FR 15326–15328), the Regional Director published notification of receipt of the program in the March 11, 1980 **Federal Register** (45 FR 15583–15584) and in newspapers of general circulation within the State. In accordance with that announcement, public comments were solicited and a public meeting was held in Springfield, Illinois on April 10, 1980, concerning the program's completeness.

Public hearings on the adequacy of the Illinois submission were held on July 24, 1980 in Springfield, Illinois, and on July 25, 1980 in Marion, Illinois, after due notice on June 26, 1980 in the **Federal Register** (45 FR 43221–43223) and in newspapers of general circulation within the State.

The full chronology of the events leading to the Secretary's initial decision is contained in the **Federal Register** notice of partial approval by the Secretary (45 FR 72468–72505) published on October 31, 1980. That notice also contained the Secretary's findings, detailed explanations of those findings and the Secretary's decision, which approved and disapproved specific parts of the Illinois program.

In accordance with the procedures set forth in 30 CFR 732.13(f), the State of Illinois would have had 60 days from the date of publication of the Secretary's partial approval decision in which to submit a revised program for consideration. However, on December 11, 1980, prior to the Secretary's decision, the State was enjoined by the Seventh Judicial Circuit Court of Sangamon County, Illinois from submitting or resubmitting to OSM the Illinois permanent program for a period of one year. This injunction terminated on December 11, 1981. Under the general statement of policy issued by OSM on August 26, 1981 (46 FR 43041–43043), the State then had 60 days within which to resubmit its program. The State resubmitted its revised program on December 22, 1981.

In keeping with the public participation mandate of SMCRA and 30 CFR 732.13(f), a 30 day public comment and review period is being allowed for the Illinois program submission. The public review and comment period for the Illinois program ends at 4:30 p.m. on January 25, 1982. During this period the Secretary is soliciting comments from the Administrator of the Environmental Protection Agency, the Secretary of Agriculture and the heads of other federal agencies, as well as the general public.

Subsequent to the public hearing and review of all comments, the Regional Director will transmit to the Director a recommended decision along with a record composed of the hearing transcript, written presentations, exhibits, and copies of all public comments.

Upon receipt of the Regional Director's recommendation, the Director will consider all relevant information in the record and will recommend to the Secretary that those portions of the program that were not approved in the Secretary's initial decision now be approved, disapproved or conditionally approved. The recommendation will specify the reasons for the decision. The procedures for the recommended decisions of the Regional Director and the Director are established in 30 CFR 732.12(d) and (e) (44 FR 15326–15327). For further details, refer to 30 CFR 732.12 and 732.13 of the permanent regulatory program (44 FR 15326–15327) and corresponding sections of the preamble (44 FR 14959–14961). The Illinois State program will be evaluated by the Secretary under the criteria set forth in 30 CFR 732.15, including the recent amendment to the definition of "consistent with," which sets a new standard for comparison of State programs with the Federal regulations, 30 CFR 730.5(a) and 732.15(a) (46 FR 53376–53384, October 28, 1981).

The Secretary's decision on the program as resubmitted will constitute the final decision by the Department. If the revised program is approved, the State of Illinois will have primary jurisdiction for the regulation of surface coal mining and reclamation and coal exploration on non-Federal and non-Indian lands in Illinois. If the revised program is approved, the Secretary and the Governor may also enter into a Cooperative Agreement governing regulation of these activities on Federal lands in Illinois. Such an agreement would be the subject of a separate rulemaking and **Federal Register** notice. If the revised program is disapproved, a Federal program will be implemented and OSM will have primary jurisdiction for the regulation of the above activities in Illinois.

To codify decisions on State matters, OSM has established Subchapter T of 30 CFR Chapter VII. Subchapter T will consist of Parts 900 through 950. Provisions relating to Illinois will be found in 30 CFR Part 913 after the Illinois resubmission has been approved or disapproved.

At the public hearing on January 18, 1982, parties wishing to comment on the proposed program will be asked to register for placement on the agenda. The hearing will begin at 1:30 p.m. and will continue until all persons scheduled to speak have been heard. Persons in the audience who have not been scheduled to speak and who wish to do will be heard at the end of the scheduled speakers. Persons not scheduled to testify but wishing to do so, assume the risk of having the public hearing adjourned unless they are present in the audience at the time all scheduled speakers have been heard. Written comments, data, or other relevant information may be submittted to supplement, or in lieu of, an oral presentation at the hearing.

In addition, the Regional Director has prescribed the following hearing format and rules of procedures in accordance with 30 CFR 732.12(b)(1) (44 FR 15326).

1. The hearing shall be informal and follow legislative procedures.

2. Based on the number of speakers in attendance, each participant may be limited to 10 minutes.

3. Participants will be called in the order in which they register.

Public participation in the review of State programs is a vital component in fulfilling the purposes of SMCRA. On September 19, 1979, OSM published guidelines in the **Federal Register** (44 FR 54444–54445) governing contacts between the Department of the Interior and both State officials and members of the public. It is hoped that issuance of these guidelines will encourage full cooperation by all affected persons.

Interested members of the public are encouraged to read the Secretary's partial approval of the initial Illinois program submission (45 FR 72468–72505) published on October 31, 1980. That document contains detailed findings and explanations relating to the parts of the initial submission which were specifically approved and disapproved. Unless a change has been made to part of the program previously approved, the Secretary will only consider comments relating to those portions previously disapproved or to any portions of the program first appearing in the resubmission.

Set forth below is a summary of the contents of the Illinois program including resubmission material.

(a) State Law and Regulation
(b) Other Related State Laws
(c) Attorney General's Opinion
(d) Delegation of Regulatory Authority
(e) Structural Organization—Staffing Functions
(f) Supporting Agreements Between Agencies
(g) Narrative Description for:
(1) Issuing Exploration for Mining Permits
(2) Assessing Permit Fees
(3) Bonding—Insurance
(4) Inspecting and Monitoring
(5) Enforcing the Administrative, Civil and Criminal Sanctions
(6) Administering and Enforcing Permanent Program Standards
(7) Assessing and Collecting Civil Penalties
(8) Issuing Public Notices and Holding Public Hearings
(9) Coordinating with Other Agencies
(10) Consulting with Other Agencies
(11) Designating Lands Unsuitable for Mining
(12) Restricting Financial Interests
(13) Training, Examining and Certifying Blasters
(14) Providing for Public Participation
(15) Providing Administrative and Judicial Review
(16) Providing a Small Operator Assistance Program (S.O.A.P.)
(h) Statistical Information
(i) Summary of Staff with Titles, Functions, Job Experience and Training
(j) Description of Staffing Adequacy
(k) Projected Use of Other Professional and Technical Personnel
(l) Budget Information
(m) Physical Resources Information
(n) Other Programs Administered by the Regulatory Authority

Additional Determinations

The Office of Management and Budget has granted OSM an exemption from Sections 3, 4, 7 and 8 of Executive Order 12291 for State program approvals, emendments, and removal of conditions. Therefore, this rule is exempt from the Determination of Effects requirements of the Executive Order.

No Environmental Impact Statement is being prepared in connection with the process leading to the approval or disapproval of the proposed Illinois program. Under Section 702(d) of SMCRA (30 U.S.C. 1292(d)), approval does not constitute a major action within the meaning of Section 102(2)(c) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332).

Dated: December 21, 1981.

J. Steven Griles,

Acting Director, Office of Surface Mining.

BILLING CODE 4310-05-M

ENVIRONMENTAL PROTECTION AGENCY

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 159

40 CFR Part 140

[CGD 81-097]

Marine Sanitation Devices

AGENCY: Environmental Protection Agency and Coast Guard, DOT.

ACTION: Notice of Program Review.

SUMMARY: This Notice invites public participation in a regulatory program review currently being conducted by the Coast Guard and the Environmental Protection Agency (EPA). A review of the costs and benefits of and the alternatives to the current Marine Sanitation Device (MSD) program has been initiated by the agencies because of the many complaints by the public regarding the costs and impracticability of the existing program. Also, a report has been prepared by EPA at the request of the Senate Appropriations Committee that analyzes the existing program and evaluates alternatives. The public is invited to submit written comments and data relating to the existing program and possible alternatives and to submit comments on the contents of the report.

DATES: Written comments must be received on or before February 22, 1982 to be considered in the review.

ADDRESS: Written comments may be mailed or delivered to and will be available for inspection and copying at the Marine Safety Council (G-CMC), Room 4402, U.S. Coast Guard Headquarters, 2100 Second St., S.W., Washington, DC 20593, between the hours of 7:00 a.m. and 5:00 p.m., Monday through thursday, except holidays. The report to the Senate Appropriations Committee may be inspected and copied at this address during the same work day. Requests for copies of this report should be directed to the above address; the cost is $4.30 per copy.

FOR FURTHER INFORMATION CONTACT: Ensign J. E. Arner, U.S. Coast guard, (202) 755-7917. Normal working hours are 6:00 A.M. to 4:30 P.M., Monday through Thursday, except holidays. Jonathan Amson, U.S. EPA, (202) 472-3401. Normal working hours 9:30 A.M. to 6:00 P.M. Monday through Friday, except holidays.

SUPPLEMENTARY INFORMATION: The MSD program review will involve an analysis of Coast Guard regulations and enforcement, EPA standards, and the requirements of Section 312 (Marine Sanitation Devices) of the Clean Water Act (Pub. Law 95-217, 91 Stat. 596, 33 USC 1322). The public is invited to participate in this review by submitting written comments or data relating to the program and alternatives to the program.

The public is invited to comment on the current MSD program:

- Vessels must meet Federal standards requiring at least Type I's for vessels 65 feet in length or less and at least Type II's for vessels over 65 feet.
- States may adopt more stringent standard ("no-discharge") if EPA finds that adquate pump-out facilities are reasonably available in the area and EPA approves the State request.
- Manufacturers must meet Coast Guard certification requirements.
- There is Federal enforcement of the program.

Comments are also invited on the following program alternatives which are discussed in more detail in the EPA report to the Congress, referred to above:

(a) Abolish by law all Federal requirements for MSDs. Under this option—

- States could adopt and enforce their own equipment design and effluent discharge standards.
- There would be no Coast Guard certification requirements for manufacturers of MSD's.
- There would be no Federal involvement in any aspect of MSD enforcement.

(b) By law, abolish Federal MSD requirements for recreational and small commercial vessels 65 feet in length or less and allow States to substitute their own programs for these vessels based upon Federal design standards (Type I, II, or III) or have no program. Larger commercial vessels would still be subject to federal MSD requirements and Federal enforcement. Under this option—

- By law, States could adopt any one of three types of MSD requirements for recreational and small commercial vessels (Type I, II, or III; see 33 CFR 159) or could decide not to have any requirements.
- There would still be national design standards and Coast Guard certification requirements for manufacturers.
- There would be no Federal enforcement of MSD requirements for recreational vessels and commercial vessels 65 feet in length or less; there would be Federal enforcement for commercial vessels over 65 feet.

(c) By law, allow optional State programs based on the Federal design standards (Type I, II, or III) or States could elect to have no program. Existing Federal requirements would also be retained as a model. Under this system—

- National certification requirements for manufacturers are retained.
- There would be no Federal enforcement of MSD requirements.
- States may choose sewage treatment standards appropriate for their waters, including a no-treatment standard if so desired.

(d) By law, establish Federal Type I as the minimum Federal standard. States would have the option to establish a Type II or III standard. Under this option—

- States could adopt more stringent standards that exceed the Federal minimum standard (i.e. Type II or III).
- There would still be Coast Guard certification requirements for manufacturers.
- There would be Federal enforcement.
- There would be State enforcement if the State has chosen a stricter standard.

(e) By law, establish Federal Type I as the minimum standard; States could not establish a more stringent standard. Under this option—

- All vessels on the navigable waters would have to meet the minimum standard.
- There would still be Coast Guard certification requirements for manufacturers.
- There would be Federal enforcement.

(f) By law, establish a Federal no-discharge standard (Type III) and require the installation of pump-out facilitate at marinas. Under this option—

- All vessels in U.S. navigable waters would have to meet the no-discharge standard.
- There would be Coast Guard certification requirements for manufacturers.
- There would be Federal enforcement.

In particular, comments are invited on the following program alternative derived from option (b) with additional provisions for assurance of relatively unrestricted interstate travel. For instance the following alternative addresses four factors (further explained in the report) which appear to be central to any MSD program. They are: certainty for affected parties; States' interests; interstate travel and commerce; enforcement.

Abolish Federal MSD discharge requirements for all recreational vessels

and small commercial vessels 65 feet in length or less, but allow States to adopt discharge standards for these vessels based on the present Federal design standards (i.e., Type I, II, or III). Alternatively, States could choose to adopt no program at all. Federal MSD discharge requirements would be retained for all commercial vessels over 65 feet, as would all Federal design standards for manufacturers of MSD's. Since MSD requirements for recreational and small commercial vessels would be a State responsibility, remove and Federal enforcement of MSD requirements for these vessels (leaving such enforcement responsibilities to the individual States). Retain Federal enforcement of MSD requirements for all larger commercial vessels. Allow for unimpeded travel by recreational and small commercial vessels between States for a specified period of time (such as 14 days), as long as the vessel has a certified MSD installed. Travel within a State's waters would be restricted only by individual State requirements. For example, a vessel registered in a State that requires no MSD would be free to travel in that State with no treatment device installed; should that vessel owner choose to travel to (or through) an adjoining State that requires Type II MSD's, he would have to install a certified MSD, and he would be able to remain in the adjoining State's waters for only a specified period of time (such as 14 days), unless he installed a Type II or Type III MSD; similarly, a vessel in a State requiring Type III MSD's would need either a Type I or Type II MSD and be able to remain for only the specified time unless a Type III MSD is installed. For commercial vessels over 65 feet this provision would not apply.

In addition, comments are solicited on—

(a) the cost to purchase, install, and operate MSD's;

(b) the need for the current regulations in the various geographic regions of the U.S. (for example—fresh water areas, salt water areas, brackish tidal areas);

(c) the practicality of the MSD regulations for the various classes, sizes, and types of vessels (for example—recreational, sail and power vessels, commercial vessels such as passenger, fishing, and cargo vessel);

(d) Coast Guard certification procedures.

(e) the beneficial or detrimental environmental impacts of either the current or alternative programs; and

(f) the beneficial or detrimental effects of State promulgation of standards and State enforcement of the standards.

Note.—This Notice does not serve as a Notice of Proposed Rulemaking which would follow separetly as part of the formal rulemaking procedures if any recommendation for legislative and/or regulatory change is made at the final outcome of this review.

Dated: December 1, 1981.

Bruce R. Barrett,

Acting Assitant Administrator for Water.

Dated: December 9, 1981.

W. E. Caldwell,

Rear. Admiral, U.S. Coast Guard, Chief, Office of Marine Environment and Systems.

BILLING CODE 6560-26-M

DEPARTMENT OF ENERGY

41 CFR Ch. 9

Proposed Amendments to the DOE Procurement Regulations

AGENCY: Department of Energy.

ACTION: Proposed rule.

SUMMARY: This proposed rule adds a new § 9-1.355, "Contracts conditioned upon the availability of funds"; amends § 9-1.405, "Ratification of unauthorized contract awards," to clarify the requirements which must be met to allow ratifications of unauthorized actions; revises § 9-1.705, "Cooperation with the Small Business Administration," to increase from $2 million to $3 million the ceiling for small business class set-aside procurements of construction; deletes Subpart 9-1.53, "Options"; revises § 9-3.805-51, "Noncompetitive procurement," regarding approval procedures for noncompetitive procurements to assure that the approving official is outside the initiating office and at least one level above the individual processing the action and to emphasize the prudence of early coordination with legal counsel; amends § 9-3.809, "Contract audit as a pricing aid," to increase preaward audit thresholds; revises Subpart 9-4.57, "Program Opportunity Notices," and Subpart 9-4.58, "Program Research and Development Announcements," to simplify the approval process for using these solicitation methods; revises §§ 9-7.203 and 9-7.403, "Clauses to be used when applicable," to provide for use of a Cost and Schedule Control Systems clause under appropriate circumstances; revises § 9-7.402-59, "Stop work order," to make that clause optional rather than mandatory for contracts with educational and other nonprofit institutions; revises Subpart 9-50, "Operating and on-site service contracts," relating to procurement procedures for operating and on-site contractors; and clarifies § 9-51.102, "Contract actions requiring advance Headquarters' review and approval," regarding the requirement for Headquarters review of certain contract actions. This proposed rule is the result of operational experience which has shown a need to update and revise the regulations as described in this proposed rule.

DATE: Comments must be received on or before January 25, 1982 to be considered.

ADDRESS: Comments should be addressed to the Department of Energy, Procurement Policy Branch (MA931.1), Forrestal Building, Washington, D.C. 20585.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Langston, Procurement Policy Branch (MA931.1), Policy and Procedures Division, Procurement and Assistance Management, Department of Energy (202) 252-6188

Mr. E. Barclay Van Doren, DAGC for Procurement and Financial Incentives, Office of General Counsel (GC44), Department of Energy (202) 252-6902

SUPPLEMENTARY INFORMATION:

I. Background
II. Statutory and Regulatory Requirements
III. Public Comments

I. Background

Under section 644 of the Department of Energy Organization Act (hereinafter referred to as "the Act") Pub. L. 95–91, 91 Stat. 565 (41 U.S.C. 7254), the Secretary of the Department is authorized to prescribe such procedural rules and regulations as may be deemed necessary or appropriate to accomplish the functions vested in him. Accordingly, the Department of Energy Procurement Regulations (DOE–PR) were promulgated with an effective date of June 30, 1979 (44 FR 34434, June 14, 1979), 41 CFR Chapter 9.

II. Statutory and Regulatory Requirements

Pursuant to section 501 of the Act (42 U.S.C. 7191) relating to the opportunity for oral presentations on proposed regulations, the Department has determined that no substantial issue of fact or law exists and that this proposed rule is unlikely to have a substantial impact on the Nation's economy, or large number of individuals or businesses. Accordingly, public hearings relating to this proposed regulation will not be held. However, all written comments received by the Department in response to this proposed amendment will be carefully assessed and fully considered in the formulation of the Department's final rule.

Note.—The Department has concluded that the regulation will not affect the quality of the environment and that the requirements of section 7(c)(2) of the Federal Administration Act of 1974, Pub. L. 93–275, do not apply. Additionally, since the proposed rulemaking involves a procurement regulation, it is accordingly exempt from the special clearance procedures required by Executive Order 12291.

III. Public Comments

Interested persons are invited to participate by submitting data, views or arguments with respect to the proposed DOE–PR amendments set forth in this notice. All written comments received will be carefully assessed and fully considered prior to publication of the proposed amendment as a final regulation.

For the reasons set out in the preamble, Chapter 9 of Title 41 of the Code of Federal Regulations is proposed to be amended as set forth below.

(Sec. 644, Department of Energy Organization Act, Pub. L. 95–91, 91 Stat. 565 (42 U.S.C. 7254))

Issued in Washington, D.C. December 14, 1981.

Hilary J. Rauch,

Director, Procurement and Assistance Management.

The regulations in 41 CFR Chapter 9 are proposed to be amended as set forth below.

Authority: Section 644 of the Department of Energy Organization Act, Pub. L. 95–91, 91 Stat. 599, (42 U.S.C. 7254).

Note.—As an aid in identifying specific proposed changes to the DOE Procurement Regulations, a two digit identification number is given each specific change. The first digit represents the numerical sequence of proposed changes, thus, this is change 5 to indicate that this is the fifth time that DOE has issued a notice of proposed rulemaking for the purpose of amending 41 CFR Chapter 9. The second digit is the numerical sequence of specific changes proposed within a particular notice, thus, the first change within the fifth notice is identified as Change 5.1.

Change 5.1

The Table of Contents for Part 9–1, "General," is amended by adding a new § 9–1.355 titled "Contracts conditioned upon the availability of funds," and by removing and reserving Subpart 9–1.53, "Options," the provisions of which have been superseded by FPR Amendment 213, dated January 12, 1981. The revised text will read:

Subpart 9–1.0—Regulation System

Sec.

* * * * *

9–1.355 Contracts conditioned upon the availability of funds.

* * * * *

Subpart 9–1.53 [Reserved]

Change 5.2

Subpart 9–1.3, "General Policies," is amended by adding a new § 9–1.355, "Contracts conditioned upon the availability of funds." The new section will read:

§ 9–1.355 Contracts conditioned upon the availability of funds.

(a) There are many day-to-day supplies and services which must be provided on a continuing basis if the Department is to function efficiently. These requirements are generally funded under yearly operation and maintenance appropriations. A disruption in providing these requirements would seriously impact the orderly operation of the Department.

(b) When it is necessary to initiate a procurement properly chargeable to funds of a new fiscal year prior to the availability of such funds, the clause in (c) below shall be included in the contract.

This clause shall be used only for administrative operations and continuing services (such as rentals, utilities, and guard services) which are necessary for normal operation and for which the Congress consistently appropriates funds.

(c) The following clause shall be used as described in paragraph (b) of this section:

Availability of Funds

Funds are not presently available for this procurement. The Government's obligation hereunder is contingent upon the availability of appropriated funds from which payment for the contract purposes can be made. No legal liability on the part of the Government for payment of any money shall arise unless and until the funds are made available to the Contracting Officer for this procurement and notice of such availability, to be confirmed in writing by the Contracting Officer, is given to the contractor.

(d) When the clause in (c) above is used, the supplies or services shall not be accepted by the Department until funds are available to the Contracting Officer for the procurement and until the Contracting Officer has given notice to the contractor (to be confirmed in writing) of such availability. Records shall be maintained to insure adequate administrative control of funds.

Change 5.3

Section 9–1.405, "Ratification of unauthorized contract awards," is amended by revising paragraphs (b)(c)(2), and (c)(3) and by adding a sentence at the end of paragraph (c)(1) to clarify the types of actions that can be ratified and what approvals are required. The revised text will read:

§ 9–1.405 Ratification of unauthorized contract awards.

* * * * *

(b) Ratifications shall not be approved unless it would have been otherwise proper to enter into a contract prior to the commitment. As used herein, the phrase "otherwise proper" means that a ratification of unauthorized commitments can be made only if there occurred no violation of any substantive legal requirements, e.g., there can be no ratification unless a sole source can be justified; a determination made that the contractor is not debarred or otherwise ineligible for award; the required Organizational Conflict of Interest reviews and determinations are completed; and where all other substantive legal requirements have been met. Any person performing work as a result of an unauthorized commitment shall be contacted by the cognizant procuring office and told to stop work until such time as the Contracting Officer determines whether it is appropriate to establish a contract.

If the work being performed is outside the procuring office's normal area of cognizance, the matter shall be referred to the Senior Procurement Official, or designee, immediately following notice to the performer. The Contracting Officer shall direct the disposition of all products and deliverables received by the Government as a result of an unauthorized commitment.

(c) * * *

(1) * * * Under exceptional circumstances, the Senior Procurement Offical, may waive the requirement that the responsible employee initiate and document the request; *Provided* the cognizant Assistant Secretary or the Head of the Procuring Activity determines in writing that the commitment was in fact made by an employee who shall be identified in the determination.

(2) The request for ratification, an approved justification for noncompetitive procurement, and the information required by Section 9-1.405(c)(1) must be forwarded to the cognizant program Assistant Secretary, or HPA, based on the source of funds for the proposed contract, for that person's concurrence, together with recommended corrective actions to preclude reoccurrence.

(3) If the Assistant Secretary, or HPA concurs with the request for ratification, the request and concurrence shall be forwarded to the Senior Procurement Official. The Senior Procurement Official will review the request, the Justification for Non-Competitive Procurement, any comments or information submitted by the Contracting Officer which should be considered in evaluation of the request, and the information submitted in accordance with DOE-PR 9-1.405(c)(2). Based upon this review and advice from the Office of General Counsel, the Senior Procurement official, will proceed as follows:

(i) If the request submitted does not appear to be justified, it will be returned to the concurring Assistant Secretary or equivalent official without approval.

(ii) If the request and the recommended corrective actions appear justified and adequate, the Senior Procurement Official may ratify the action, return the file to the Contracting Officer for action and monitor the implementation of the corrective action plan.

(iii) A detailed record of the review shall be maintained for audit purposes.

* * * * *

Change 5.4

Subpart 9-1.7, "Small Business Concerns," is amended by revising § 9-1.705-3(b)(1) to increase the class set-aside ceiling for procurements of construction to $3,000,000, and by adding a new § 9-1.706-1(e) to read:

§ 9-1.705-3 Screening of procurements.

* * * * *

(b) * * *

(1) Class Set-Asides. By agreement with SBA, DOE has established a class set-aside for procurements of construction where the estimated value is from $10,000 through $3,000,000, including new construction and repair and alteration of structures. Lists of other class set-asides shall be maintained by all DOE procuring offices, including contractors who manage Government-owned sites. These lists shall be updated at least annually.

* * * * *

§ 9-1.706-1 General

* * * * *

(e)(1) In lieu of the set-aside priorities set forth in FPR 1-1.706-1 (a) and (e), DOE shall award contracts, and encourage the placement of subcontracts for procurement to small business concerns in the following manner:

(i) Concerns which are small business concerns and which are located in labor surplus areas, on the basis of a total set-aside;

(ii) Concerns which are small business concerns, on the basis of a total set-aside;

(iii) Concerns which are small business concerns and which are located in a labor surplus area, on the basis of a partial set-aside;

(iv) Concerns which are small business concerns, on the basis of a partial set-aside.

(2) After priority is given to the small business concerns specified in subsection (e), priority shall also be given to the awarding of contracts and the placement of subcontracts, on the basis of a total set-aside, to concerns which:

(i) Are not eligible under subsection (e);

(ii) Are not small business concerns; and

(iii) Will perform a substantial proportion of the production of those contracts and subcontracts within areas of concentrated unemployment or underemployment or within labor surplus areas.

(3) See FPR 1-1.801 for the definition of a concern located in a labor surplus area.

Change 5.5

Subpart 9-1.53 entitled "Options" is removed and reserved because Amendment 213 to the Federal Procurement Regulation (46 FR 7966, January 26, 1981) has added coverage of this topic to the FPR and makes DOE-PR coverage unnecessary. The revised text will read:

Subpart 9-1.53 [Reserved]

Change 5.6

Section 9-3.805-50, "Selection procedures," is amended by revising paragraph (a)(1)(iv) to provide that the Source Selection Official may be an official designated by the HPA at a level higher than the Contracting Officer. As revised the text will read:

§ 9-3.805-50 Selection procedures.

(a)(1) * * *

(iv) The Source Selection Official shall be the HPA, an official designated by the HPA who is higher than the Contracting Officer, or the Contracting Officer.

* * * * *

Change 5.7

Section 9-3.805-51, "Noncompetitive procurement", is amended by revising paragraph (a)(2) by removing the words "an approved" and substituting the words "a recommended" and by removing the present text of paragraph (d) and inserting new language in its place. The effect of the change is that the justification will be in the form of a recommendation by the initiating office with approval outside the initiating office. The revised text will read:

§ 9-3.805-51 Noncompetitive procurement.

(a) * * *

(2) For a noncompetitive procurement, a recommended justification shall be attached to the procurement request when the request is sent to a Contracting Officer for action.

* * * * *

(d) Review and approval. The justification shall contain a recommendation, concurrence (when needed) and approval as follows: (In the case of cost shared contracts, review levels shall be based on the sum of the contractor and Government shares.)

(i) Concurrences in the recommendation shall be obtained within the initiating office at such levels as are deemed appropriate by the Senior Program Official for procurements initiated by Headquarters or the Head of the Procuring Activity for field initiated procurements. In establishing levels for approval of such recommendations, the Senior Program Official or Head of the Procuring Activity shall assure that the

recommendation approval is at least one level above the initiator. The objective of maximizing the use of competitive procurement procedures as well as the complexity or cost of a procurement should be used as a guide in establishing the appropriate level of responsibility for approval of noncompetitive recommendation.

(ii) The more complex and costly justifications will benefit from early coordination with counsel. Justifications exceeding $1,000,000, or such lower level as counsel may determine, shall be submitted by the initiator to counsel, at the headquarters or field location of the initiator, for concurrence prior to forwarding to the Contracting officer. The heads of the Procuring Activities, in consultation with counsel, are encouraged to establish more restrictive thresholds and conditions specific to their organizations and circumstances.

(iii) The justification, following approval of the recommendation and concurrences of counsel (if required or considered appropriate), shall be forwarded to the Contracting Officer who will seek final approval of justification at such level as the Head of the Procuring Activity may require. In specifying levels of review for final approval, the HPA shall assure that justifications of more than $10,000 are approved at a level above the Contracting Officer as required by § 1–3.101(d) of the FPR and that the final approval authority is outside the initiating organization.

(iv) Justifications exceeding the HPA's delegated contract authority may be approved by the HPA but an information copy shall be furnished to the Contract Business Clearance Division, Procurement Management Office, Headquarters for advisory purposes.

Change 5.8

Section 9–3.809 is amended by revising paragraph (b)(1) to increase the preaward audit thresholds from $100,000 to $500,000 for fixed price contracts and from $250,000 to $1,000,000 for cost reimbursement type contracts, and by correcting an erroneous FPR reference at the end of the second sentence and replacing it by reference to FPR 1–3.807–2 and 1–3.809(b)(ii). The revised text will read:

§ 9–3.809 Contract audit as a pricing aid.

* * * * *

(b) Auditor's reports on contract price proposals.

(1) Prior to negotiation of any contract or modification resulting from a proposal in excess of $500,000 for firm fixed-price and fixed-price with economic price adjustment provisions or $1,000,000 for all other contract types [including initial prices, estimated costs of cost-reimbursement types, interim and final price redeterminations, escalation, target and settlement of price redeterminations, target and settlement of incentive types where the price will be based on cost or pricing data (FPR 1–3.807–3) submitted by the contractor], the Contracting Officer or authorized representative shall request an audit review by the contract audit activity. Also see FPR 1–3.807–2 and 1–3.809(b)(ii).

* * * * *

Change 5.9

Section 9–4.5702–2 is amended by revising paragraphs (a)(2), (b)(2), and (b)(3) to remove the requirement that the prior concurrence of the Senior Procurement Official be obtained on determinations to use the Program Opportunity Notice type of solicitation and its content. The revised text will read:

§ 9–4.5702–2 Determination to use and approval of content.

(a) * * *

(2) The Senior Program Official or designee may approve the determination.

* * * * *

(b) * * *

(2) When a source evaluation board is not required, notices may be approved by the Senior Program Official or designee after prior concurrence by Counsel.

(3) When an SEB is required, notices shall be reviewed and approved by the SEB after prior concurrence by Counsel, and the Senior Program Official, or designee.

* * * * *

Change 5.10

Section 9–4.5802–2 is amended by revising paragraph (a)(1) by removing the final sentence which requires the prior concurrence of the Senior Procurement Official for use of the Program Research and Development Announcement under $2 million, by removing and reserving paragraph (a)(2) which requires additional justification for use of the Program Research and Development Announcement for individual award situations expected to exceed $2 million and by deleting the requirement at paragraph (b)(2) that the content of Program Research and Development Announcements have the prior concurrence of the Senior Procurement Official, Headquarters. The revised text will read:

§ 9–4.5802–2 Determination to use and approval of content.

(a) * * *

(1) Before the PRDA is selected by the program office as the appropriate solicitation procedure, a written program determination shall be made to show that the conditions in § 9–4.5802–1(c) exist to support the conclusion that the use of the PRDA procedure is both necessary and appropriate. The determination must not be merely conclusory but shall be supported by specific facts and explanations.

(2) [Reserved]

* * * * *

(b) * * *

(2) The PRDA content may be approved by the Senior Program Official or designee after prior concurrence by counsel.

* * * * *

Change 5.11

The Table of Contents of Part 9–7 is revised to add new §§ 9–7.203–58 and 9–7.403–75 entitled "Cost and schedule control systems." The new text will read:

PART 9–7—CONTRACT CLAUSES

Sec.

* * * * *

9–7.203–58 Cost and schedule control systems.

* * * * *

9–7.403–75 Cost and schedule control systems.

* * * * *

§ 9–7.203–58 Cost and schedule control systems.

In those instances where the procurement request identifies the procurement as one for which cost and schedule control systems criteria are applicable pursuant to DOE Order 2250.1 and DOE/CR 0015, "Implementation Guide for Cost and Schedule Control Systems Criteria for Contract Performance Measurement," the specific systems criteria required shall be set forth in the contract and the following clause shall be included:

Cost and Schedule Control Systems

(a) In the performance of this contract, the contractor shall establish, maintain, and use cost and schedule control systems (management control systems) meeting the criteria set forth in the contract and as described in detail in DOE/CR–0015, "Cost and Schedule Control Systems Criteria for Contract Performance Measurement—Implementation Guide," annexed hereto and hereinafter referred to as the "Guide." Prior to acceptance by the Contracting Officer and within —— calendar days after contract award, the contractor shall be prepared to demonstrate systems operation to the Government to verify that the proposed

systems meet the designated criteria. As a part of the review procedures, the contractor shall furnish the Government a description of the cost and schedule control systems applicable to this contract in such form and detail as indicated by the Guide, or as required by the Contracting Officer. The contractor agrees to provide access to all pertinent records, data, and plans as requested by representatives of the Government for the conduct of systems review.

(b) The description of the management control systems accepted by the Contracting Officer, identified by title and date, shall be referenced in the contract. Such systems shall be maintained and used by the contractor in the performance of this contract.

(c) Contractor changes to the reviewed systems shall be submitted for review and approval as required by the Contracting Officer. When Contracting Officer approval is required, the Contracting Officer shall advise the contractor of the acceptability of such changes within sixty (60) days after receipt from the contractor. When systems existing at the time of contract award do not comply with the designated criteria, adjustments necessary to assure compliance will be made at no change in contract price or fee.

(d) The contractor agrees to provide access to all pertinent records and data requested by the Contracting Officer, or duly authorized representative, for the purpose of permitting Government surveillance to insure continuing application of the accepted systems to this contract. Deviations from the systems description identified during contract performance shall be corrected as directed by the Contracting Officer.

(e) The contractor shall require that each selected subcontractor, as mutually agreed to between the Government and the contractor and as set forth in the schedule of this contract, meet the criteria for cost and schedule control systems as set forth in subcontract and shall incorporate in all such subcontracts adequate provisions for review and surveillance of subcontractor's systems to be carried out by the prime contractor, or by the Government when requested by either the prime or subcontractor.

* * * * *

§ 9-7.403-75 Cost and schedule control systems.

In those instances where the procurement request identifies the requirement as one for which cost and schedule control systems criteria are applicable, insert the clause set forth at § 9-7.203-58.

* * * * *

Change 5.12

Section 9-7.402-59 is amended by adding a preamble which will make the Stop Work Order clause optional for use rather than mandatory for use in contracts with educational or nonprofit institutions. The revised text will read:

§ 9-7.402-59 Stop work order.

Use of this clause is optional if the contract is for research and development being performed by an educational or nonprofit institution.

* * * * *

Change 5.13

Section 9-15.5006-4 is amended by designating the present text as paragraph (a) and adding new text designated as paragraph (b). The revised text will read:

§ 9-15.5006-4 Precontract costs.

(a) Precontract costs are those incurred prior to the effective date of the contract directly pursuant to the negotiation and in anticipation of the award of the contract where such incurrence is necessary to comply with the proposed contract delivery schedule. Such costs are allowable to the extent that they would have been allowable if incurred after the date of the contract. They do not include costs of preparing bids or of participation in the negotiation. The allowability of precontract costs is dependent upon appropriate coverage in the contract.

(b) *Limitations.*

(1) Precontract cost authorizations shall not be used to cover a period in excess of 15 days and shall not be extended or renewed. If longer coverage is necessary, a letter contract shall be issued in accordance with DOE-PR 9-3.408.

(2) All precontract cost authorizations shall be reviewed and approved at a management level above the Contracting Officer.

(3) Retroactive precontract cost authorizations and the predating of contractual agreements shall not be used.

(4) Precontract cost authorizations shall not authorize the delivery or furnishing of any goods or services from a contractor until after the contract is executed.

Change 5.14

The Table of Contents of Part 9-50, "Operating and On-site Service Contracts," is amended by inserting a new entry § 9-50.704-48, "Cost and Schedule Control Systems" and by removing and reserving § 9-50.2002, "Compensation approval requirements. The revised entry will read:

PART 9-50—OPERATING AND ON-SITE SERVICE CONTRACTS

Sec.

* * * * *

9-50.704-48 Cost and Schedule Control Systems.

* * * * *

9-50.2002 [Reserved]

Change 5.15

Section 9-50.104, paragraph (c) (45 FR 24380, April 9, 1980) is revised to increase the ceiling for small business class set-asides of procurement of construction, including new construction and repair and alteration of structures, from $2 million to $3 million. The revised text will read:

§ 9-50.104 Small business and small disadvantaged business concerns.

(a) * * *

(c) Procurement of construction between $2,500 and $3 million, including new construction, and repair and alteration of structures, shall be set-aside on a class basis for small business concerns. When, in the judgment of the contractor, a particular procurement falling within these dollar limits is determined to be unsuitable for a small business set-aside, notification to SBA shall be made through the DOE Contracting Officer. Unless SBA appeals the decision (see FPR 1-1.706-2), the contractor shall proceed to process the procurement on an unrestricted basis. Small business set-aside preferences should be considered for construction procurements in excess of $3 million on a case-by-case basis, with such preferential participation of small business to be favored, whenever appropriate.

* * * * *

Change 5.16

Section 9-50.704 is amended by adding a new § 9-50.704-48, "Cost and Sechedule Control Systems." The new text will read:

* * * * *

§ 9-50.704-48 Cost and schedule control systems.

In those instances where Cost and Schedule Control Systems criteria are applicable pursuant to DOE Order 2250.1 and DOE/CR 0015 "Implementation Guide for Cost and Schedule Control Systems Criteria for Contract Performance Measurement," the specific systems criteria required shall be set forth in the contract and the following clause shall be included:

Cost and Schedule Control Systems

(a) In the performance of this contract, the contractor shall establish, maintain, and use cost and schedule control systems (management control systems) meeting the criteria set forth in the contract and described in detail in DOE/CR-0015, "Cost and Schedule Control Systems Criteria for Contract Performance Measurement—Implementation Guide," annexed hereto and hereinafter referred to as the "Guide." Prior

to acceptance by the Contracting Officer and within —— calendar days after contract award, the contractor shall be prepared to demonstrate systems operation to the Government to verify that the proposed systems meet the designated criteria. As a part of the review procedures, the contractor shall furnish the Government a description of the cost and schedule control systems applicable to this contract in such form and detail as indicated by the Guide, or as required by the Contracting Officer. The contractor agrees to provide access to all pertinent records, data, and plans as requested by representatives of the Government for the conduct of systems review.

(b) The description of the management control systems accepted by the Contracting Officer, identified by title and date, shall be referenced in the contract. Such systems shall be maintained and used by the contractor in the performance of this contract.

(c) Contractor changes to the reviewed systems shall be submitted for review and approval as required by the Contracting Officer. When Contracting Officer approval is required, the Contracting Officer shall advise the contractor of the acceptability of such changes within sixty (60) days after receipt from the contractor. When systems existing at the time of contract award do not comply with the designated criteria, adjustments necessary to assure compliance will be made at no change in contract price or fee.

(d) The contractor agrees to provide access to all pertinent records and data requested by the Contracting Officer, or duly authorized representative, for the purpose of permitting Government surveillance to insure continuing application of the accepted systems to this contract. Deviations from the systems description identified during contract performance shall be corrected as directed by the Contracting Officer.

(e) The contractor shall require that each selected subcontractor, as mutually agreed to between the Government and the contractor as set forth in the schedule of this contract, meet the creiteria for cost and schedule control systems as set forth in subcontract and shall incorporate in all such subcontracts adequate provisions for review and surveillance of subcontractor's systems to be carried out by the prime contractor, or by the Government when requested by either the prime or subcontractor.

Change 5.17

Section 9–50.1510–14 is amended by revising paragraph (d) to increase from $40,000 to $45,000 the level at which individual employees compensation for operating and on-site employees must be approved by the Contracting Officer. The revised text will read:

§ 9–50.1510–14 Compensation for personal services.

* * * * *

(d) Review and approval of compensation paid individual employees. In determining the resonableness of compensation, the compensation of each individual contractor employee normally need not be subjected to review and approval. Generally, the compensation paid individual employees should be left to the judgment of contractors subject to the limitations of DOE-approved compensation policies, programs, classification systems, and schedules, and amounts of money authorized for wage and salary increases for group of employees. However, in the case of operating and on-site contracts, all compensation due an individual of $45,000 or more shall require the Contracting Officer's or designee's review and approval. In addition, in the case of operating and on-site contracts, it will often be necessary that employee compensation be subjected to review and approval on an individual basis at a level below $45,000, when the Contracting Officer finds it appropriate for the particular situation. The contract shall specifically provide for the approval by the Contracting Officer of the cost of compensating an individual contractor employee above the level determined by the Contracting Officer, if a total of 50 percent or more of such compensation is reimbursed under DOE cost-type contracts. For purposes of determining the level for individual review and approval, total compensation as used in this paragraph includes only the employee's base salary and bonus or incentive compensations. As in the case of other personnel and compensation costs, it is intended that Contracting Officer review and approval of individual compensation normally will be prior to incurrence of costs.

* * * * *

Change 5.18

Section 9–50.2002, "Compensation approval requirements," is removed as its content is duplicative of 9–50.1510–14(d). The revised entry will be:

§ 9–50.2002 [Reserved]

Change 5.19

Section 9–51.102, paragraph (b)(3) is revised by adding the word "intitial" before "proposed contract" to clarify the meaning and by changing the word "will" to "may" to better reflect the nature of estimates of future actions. A new subparagraph (5) is added to paragraph (b) to clarify that the estimated cost in the case of cost-shared procurements is the sum of the contractor and Government shares for purpose of ascertaining whether the action requires Headquarters review. The revised text will read:

§ 9–51.102 Contract actions requiring advance headquarter's review and approval.

* * * * *

(b) * * *

(3) Any initial proposed contract or subcontract, regardless of amount, which in the opinion of the Head of the Procuring Activity may as a result of extension, follow-up work, or other-wise increase the contract or subcontract, or lead to a contract or subcontract with the same contractor, in an amount in excess of the delegated authority.

(4) * * *

(5) In the case of cost-shared contracts, the estimated cost shall be considered to be the sum of the contractor and Government shares for the purpose of ascertaining whether Headquarters review and approval is required.

* * * * *

Forest Service

Sierra National Forest Grazing Advisory Board; Meeting

The Sierra National Forest Grazing Advisory Board will meet February 1, 1982 at 9:00 a.m. at Room 4305, Federal Building, 1130 "O" Street, Fresno, California 93721.

Agenda of the meeting includes:

A. Recognize new Board members.

B. Agree on method Board will use to furnish recommendations for use of Range Betterment Funds.

C. Discuss relationship of the draft Sierra NF land management plan to grazing use.

D. Identify meeting objectives and trip dates for 1982.

E. Public statements, comments, or questions.

The meeting is open to the public. Matters identified by the public will be considered by the Board at the close of the above agenda.

James C. Bates,

Acting Forest Supervisor, Sierra National Forest.

December 18, 1981.

BILLING CODE 3410-11-M

Packers and Stockyards Administration

Beck & McCord Auction Co., Sikeston, Missouri, et al.; Deposting of Stockyards

It has been ascertained, and notice is hereby given, that the livestock markets named herein, originally posted on the respective dates specified below as being subject to the Packers and Stockyards Act, 1921, as amended (7 U.S.C. 181 et seq.), no longer come within the definition of a stockyard under said Act and are, therefore, no longer subject to the provisions of the Act.

Facility No., name, and location of stockyard	Date of posting
MO-200 Beck & McCord Auction Co., Sikeston, Missouri.	August 27, 1970.
MO-244 Missouri Feeder Pig Auctions, Inc., Middletown, Missouri.	March 22, 1978.

Notice or other public procedure has not proceded promulgation of the foregoing rule. There is no legal justification for not promptly deposting a stockyard which is no longer within the definition of that term contained in the Act.

The foregoing is in the nature of a change relieving a restriction and may be made effective in less than 30 days after publication in the **Federal Register.** This notice shall be come effective December 24, 1981.

(42 Stat. 159, as amended and supplemented; (7 U.S.C. 181 et seq.))

Done at Washington, D.C., this 21st day of December, 1981.

Jack W. Brinckmeyer,

Chief, Financial Protection Branch, Livestock Marketing Division.

BILLING CODE 3410-03-M

Sun Valley Livestock Auction Holbrook, Arizona, et al.; Proposed Posting of Stockyards

The Chief, Financial Protection Branch, Packers and Stockyards Administration, United States Department of Agriculture, has information that the livestock markets named below are stockyards as defined in section 302 of the Packers and Stockyards Act, 1921, as amended (7 U.S.C. 202), and should be made subject to the provisions of the Act.

AZ-112—Sun Valley Livestock Auction, Holbrook, Arizona

MO-254—Laclede County Livestock Producers Association, Lebanon, Missouri

NC-152—Eastern Carolina Livestock Arena, Rocky Mount, North Carolina

VA-155—Abingdon Livestock Market, Abingdon, Virginia

TN-180—M. L. Hickerson's Livestock Market, Manchester, Tennessee

Notice is hereby given, therefore, that the said Chief, pursuant to authority delegated under the Packers and Stockyards Act, 1921, as amended (7 U.S.C. 181 *et seq.*), proposes to designate the stockyards named above as posted stockyards subject to the provisions of the Act as provided in section 302 thereof.

Any person who wishes to submit written data, views, arguments concerning the proposed designation, may do so by filing them with the Chief, Financial Protection Branch, Packers and Stockyards Administration, United States Department of Agriculture, Washington, D.C. 20250, by January 8, 1982.

All written submissions made pursuant to this notice shall be made available for public inspection in the office of the Chief of the Financial Protection Branch during normal business hours.

Done at Washington, D.C., this 16th day of December, 1981.

Jack W. Brinckmeyer,

Chief, Financial Protection Branch, Livestock Marketing Division.

Office of the Secretary

Intent To Establish the Joint Committee on the Future of Cooperative Extension

December 21, 1981.

Notice is hereby given that the Secretary of Agriculture intends to establish the Joint Committee on the Future of Cooperative Extension.

The purpose of the Committee is to provide recommendations from members of the land-grant university system to the Secretary of Agriculture on the mission, scope and direction of Cooperative Extension. The Committee will present Extension's future role and priorities, long-range goals and suggested systematic measurement of progress toward their attainment.

The establishment of the Committee is in the public interest in connection with the duties of the Department.

Written comments on the proposed establishment of the Committee may be submitted to Mary Nell Greenwood, Extension Administrator, Room 340 Administration Building until January 8, 1982.

John E. Schrote,

Deputy Assistant Secretary for Administration.

BILLING CODE 3410-01-M

Meat Import Limitations; First Quarterly Estimate

Public Law 88-482, approved August 22, 1964, as amended by the Meat Import Act of 1979, (hereinafter referred to as the "Act") provides for limiting the quantity of fresh, chilled, or frozen meat of cattle, sheep except lamb, and goats (TSUS 106.10, 106.22, and 106.25), and certain prepared or preserved beef and veal products (TSUS 107.55, 107.61, and 107.62), which may be imported into the United States in any calendar year. Such limitations are to be imposed when it is estimated by the Secretary of Agriculture that imports of articles provided for in TSUS 106.10, 106.22, 106.25, 107.55 and 107.62 (hereinafter referred to as "meat articles"), in the absence of limitations under the Act during such calendar year, would equal or exceed 110 percent of the estimated aggregate quantity of meat articles prescribed for calendar year 1982 by subsection 2(c) as adjusted under subsection 2(d) of the Act.

In accordance with the requirements of the Act, I have made the following estimates:

1. The estimated aggregate quantity of meat articles prescribed by subsection 2(c) as adjusted by subsection 2(d) of the Act for calendar year 1982 is 1,182 million pounds.

2. The first quarterly estimate of the aggregate quantity of meat articles which would, in the absence of limitations under the Act, be imported during calendar year 1982 is 1,210 million pounds.

Done at Washington, D.C. this 21st day of December 1981.

John R. Block,

Secretary.

BILLING CODE 3410-01-M

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[Docket No. 23-81]

Application for Subzone at the Nissan Truck Manufacturing Plant in Smyrna, Tenn.

Notice is hereby given that an application has been submitted to the Foreign-Trade Zones Board (the Board) by the Metropolitan-Nashville Davidson County Port Authority (the Port Authority) requesting authority for a special-purpose subzone at the truck and parts manufacturing and assembly facility of Nissan Motor Manufacturing Corporation U.S.A. in Smyrna, Tennessee, adjacent to the Nashville Customs port of entry. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 CFR Part 400). It was formally filed on December 18, 1981. The applicant is authorized to make this proposal under Section 7-5-107(6), Tennessee Code Annotated. The Port Authority has an application for a general-purpose foreign-trade zone in Nashville, filed November 6, 1981, currently pending before the Board (Docket 20-81, 46 FR 56226, 11-16-81).

The Nissan plant, now under construction, will cover 825 acres on U.S. Route 41-70S in Smyrna, some 20 miles southeast of the Nashville Metropolitan Airport. Operations will include stamping, welding, painting and assembly. The plant's incoming shipments will include: engines, transmissions, drive trains, steering and electrical systems, instrumentation, suspensions, wheels, tires, chassis, body parts, and metal products. Trucks, with production estimated at 156,000 annually, and parts will be produced for domestic and overseas markets. At the outset, the foreign content is expected to be 60 percent of total material value, dropping to 40 percent as additional domestic sources are established.

Zone procedures will allow Nissan to avoid duty and drawback procedures on its exports. On its domestic sales, the company will be able to avoid duty on scrap and rejects and to defer duty on finished products until entry into Customs territory. Because the duty on trucks (25% A.V.) is higher that that on components (average 5% A.V.) Nissan plans to elect privileged status, making its Customs entries on the foreign components. Subzone status is considered an important factor in Nissan's shifting production from overseas to the Tennessee facility, which will employ 2,200 persons.

In accordance with the Board's regulations, an Examiners Committee has been appointed to investigate the application and report to the Board. The committee consists of Dennis Puccinelli (Chairman), Foreign-Trade Zones Staff, U.S. Department of Commerce, Washington, D.C. 20230; Max G. Willis, District Director, U.S. Customs Service, Region V, 423 Canal Street, Room 244, New Orleans, Louisiana 70130; and Colonel Lee W. Tucker, District Engineer, U.S. Army Engineer District, Nashville, P.O. Box 1070, Nashville, Tennessee 37202.

Comments concerning the proposed subzone are invited in writing from interested persons and organizations. Submissions shall include 12 copies. They should be addressed to the Board's Executive Secretary at the address below and postmarked on or before January 29, 1982.

A copy of the application is available for public inspection at each of the following locations:

U.S. Dept. of Commerce Satellite Office, Room 1024, Andrew Jackson Building, Nashville, Tennessee 37219.

Office of the Executive Secretary, Foreign-Trade Zones Board, U.S. Department of Commerce, 14th and E Streets, NW., Room 3721, Washington, D.C. 20230.

Dated: December 18, 1981.

John J. Da Ponte, Jr.,

Executive Secretary, Foreign-Trade Zones Board.

[FR Doc. 81-36685 Filed 12-23-81; 8:45 am]

BILLING CODE 3510-25-M

International Trade Administration

Certain Castor Oil Products From Brazil; Final Results of Administrative Review of Countervailing Duty Order

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of Final Results of Administrative Review of Countervailing Duty Order.

SUMMARY: On July 20, 1981, the Department of Commerce published in **Federal Register** a notice of the preliminary results of its administrative review of the countervailing duty order on certain castor oil products from Brazil. The review is based upon information for the period January, 1, 1979 through December 31, 1979. The notice stated that the Department had preliminarily determined the amount of the net subsidy to be 2.71 percent *ad valorem*. Interested parties were invited to comment on these preliminary results. Upon review and analysis of all comments received, the Department determines that countervailing duties in the amount of 1.72 percent *ad valorem* shall be assessed on all entries of this merchandise exported from December 7, 1979 through December 31, 1979. The Department further determines that a cash deposit of estimated countervailing duties of 2.53 percent *ad valorem* shall be required on all shipments entered, or withdrawn from warehouse, for consumption on or after the date of publication of these final results.

EFFECTIVE DATE: December 24, 1981.

FOR FURTHER INFORMATION CONTACT: Paul J. McGarr, Office of Compliance, Room 2802, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230 (202–377–1167).

SUPPLEMENTARY INFORMATION:

Procedural Background

On July 20, 1981, the Department of Commerce ("the Department") published in the **Federal Register** (46 FR 37299) a notice of "Preliminary Results of Administrative Review of Countervailing Duty Order" on certain castor oil products from Brazil (T.D. 76–80, 41 FR 11018). The Department has now completed that administrative review.

Scope of the Review

Imports covered by the review are hydrogenated castor oil and 12-hydroxystearic acid imported directly or indirectly from Brazil. These import are currently classifiable under items 178.20 and 490.26, respectively, of the Tariff Schedules of the United States.

There are three known exporters of this merchandise to the United States. The review is based on information from two of these exporters (representing 96% of exports) for the period January 1, 1979 through December 31, 1979, and is limited to the benefits received under programs for preferential financing for exports and income tax exemptions for export earnings.

Analysis of Comments Received

Interested parties were invited to comment on our preliminary results. The Department received comments only from the Brazilian government and one importer.

The Brazilian government submitted several comments pertaining to the Department's methodology for calculating the value of the net subsidy.

1. Comment: The Brazilian government argues that benefits derived from its program for income tax exemption on export earnings should be allocated over total revenues rather than export revenues. Under this program, exporters reveived an exemption from Brazilian income tax at the end of the fiscal year based on the ratio of export to total sales, provided, of course, that the firm has made an overall profit on total production. The Brazilian government argues that, because the determining factor in a firm's eligibility for this benefit is its overall profitability for a given year, the benefit accrues to the operations of the whole firm and not just to exports. Further, an exemption calculated on this basis cannot directly affect the price of the exported product; it can only have a general effect on all prices, both domestic and export. Thus, by allocating the benefits only to export revenues, the Department overstates the value of the subsidy, and allocating the tax savings over total revenues would more accurately reflect the true value of the benefit conferred.

Determination: When a firm must export to be eligible for benefits under a subsidy program and when the amount of the benefit received is tied directly or indirectly to the firm's level of exports, that program is an export subsidy. The fact that the firm as a whole must be profitable in order to benefit from this program does not detract from the program's basic function as an export subsidy. The possiblity that a firm may not be profitable in a particular year and, due to this uncertainty, could not specifically apply benefits from this program to its export prices is not relevant to our determination. Therefore, the Department will continue to allocate the benefits under this program over the firm's export revenues instead of total revenues.

2. Comment: Under the income tax exemption program, the benefit from the tax savings earned during a particular tax year is not calculable by the firm until its books are closed, sometime during the following year, when the firm can determine with finality its income for tax year. Therefore, the numerator in the calculation of this benefit contained in the preliminary results, which ascribes the full value of the tax savings to the year in which it is earned, is incorrect. The Department should recognize this delay and choose as the appropriate numerator either the tax savings adjusted to reflect the loss in the value of the subsidy resulting from its deferred receipt, or alternatively, use the tax savings received during the review period (i.e., that earned during the previous year and calculated during the review period, when the company closed its books).

Determination: The Department agrees that we should use the tax savings received during the period under review. It is our general policy to allocate benefits over the period in which they are received. In the past, it has been our practice to consider benefits from any income tax-related subsidy program as received in the same year in which they were earned. In other words, tax benefits calculated on the basis of company performance in a given fiscal year were allocated over the same period. However, in light of the comments submitted by the Brazilian government, we now recognize that the period over which the benefits are earned is not necessarily coincident with the period in which the benefit is received and used by the firm. Therefore, in such situations of uncertain benefits, tax savings earned as a result of company performance in a given fiscal year will now be allocated over the fiscal year in which they are received.

Although this is entirely consistent with our policies and principles, it represents a change in our method of allocation of many income tax-related subsidies to one year or another. In those cases where an order is outstanding, this change in methodology will necessitate a transitional reallocation of benefits. For example, in the instant case, because the tax savings received during this period of review have already been countervailed as though they were received in the prior period of review, we will not countervail the same benefits again for entries during the current period of review. Benefits earned as a result of company performance during the current period of review will be allocated over exports for the next administrative review. Therefore, for the purpose of this annual review, the estimated duty deposit rate on future entries will include estimated benefits under this program based on the new method of calculation, but no countervailing duties will be actually assessed for this program for the period

for which benefits have already been countervailed.

With the adoption of the above procedure the alternate proposal, of adjusting the tax savings to reflect the loss in value of the subsidy resulting from its deferred receipt, becomes moot.

3. Comment: The Department overstates the benefit conferred by working-capital loans received through the preferential financing program by assuming that the entire interest savings from these short-term loans accrues during the review period in which the loans are granted, even if the loan occurs late in the period and can only affect those entries after the date of the loan. In allocating loans contracted for during the current period of review, the Department should prorate the benefit throughout the duration of a loan, to the extent that such loans extend into a subsequent period of review. Loans from an earlier period which extend into the time covered by the current review should be allocated on the same basis. The Department's current method anticipates the actual receipt of the benefit and does not fully allow for factors, such as increased or decreased exports, which will affect the ultimate *ad valorem* value of the benefits.

Determination: Normally, in a program such as this where access to preferential loans is based upon a fixed percentage of the previous year's exports, there would be little difference between the method the Department employed in its preliminary notice and that proposed by the Brazilian government. However, when each year there is substantial growth in the value of exports over the previous year, the administrative convenience of allocating the whole loan to the period of review in which it was granted can create a distortion and overstate the *ad valorem* value of the benefit. Consequently, the Department agrees with the Brazilian government and is adopting the method proposed.

4. Comment: The Department calculated the deposit rate of estimated countervailing duties for future entries based upon the maximum level of utilization possible under the preferential financing program rather than on the actual level of utilization during the period of review. By doing so, the Department makes the unrealistic assumptions that all loans made under this program have a duration of one full year and that there will be no growth in the value of exports over the previous year. This procedure fails to recognize that the causes for underutilization of the program during the period of review are inherent in the way the program operates and that the actual level of utilization during the review period is a reasonably accurate projection of future utilization.

Determination: The Department chose the method used in the preliminary results believing that the underutilization during the period of review was an anomaly. Thus, we departed from the normal procedure of calculating estimated duties by projecting forward results from the review period, because we believed that such rates would mislead importers and lead to unexpected future liability. We believed that the maximum level of utilization possible under this program would more accurately reflect the results of future reviews.

Upon re-examination of information from the original investigations in this and other Brazilian countervailing duty cases and using corrected information for one of the other pending annual reviews of these cases, we have discovered that the apparent underutilization of this program is not unusual. Consequently, we have determined to use the usual method of projecting results from the review period when calculating the estimated countervailing duty deposit rate.

5. Comment: The Department calculated the country-wide weighted-average net subsidy based upon each firm's share of the total exports to all countries. This is inappropriate since these firms do not export to the United States in the same proportion as their total exports.

Determination: The Department agrees and has adjusted its calculations accordingly.

6. We received a comment from an importer with respect to the Department's preliminary determination to assess countervailing duties at a rate significantly higher than the deposit rate in effect during the period of review. Specifically, since countervailing duties are designed to protect American industry, there is no need to raise the countervailing duty rate. The cost structure of American producers permits them to sell at a price that includes a comfortable profit even when meeting the prevailing import price for hydrogenated castor oil.

Determination: In conducting its section 751 review, the Department follows its legal obligation to determine the value of the net subsidy during the period of review. We are not bound by the deposit rate of estimated duties that prevailed during the period reviewed. The International Trade Commission ("the ITC") determines whether there is material injury or likelihood of material injury to a domestic industry. We note that the Department received notification from the ITC on July 22, 1981 that the Government of Brazil had requested an injury determination with respect to this merchandise under section 104(b) of the Trade Agreements Act of 1979.

Final Results of the Review

As a result of our analysis of the comments received, we determine that during the period of review the net subsidy under the income tax exemption program was 0.17 percent *ad valorem* and under the preferential financing program 1.72 percent *ad valorem*. However in light of our determination in comment 2, the net subsidy conferred by the Government of Brazil on the export of certain castor oil products for purposes of this annual review is 1.72 percent *ad valorem*. With respect to the estimated duty deposit rate, by also taking into account the legal changes in the preferential financing program discussed in our notice of preliminary results of review, we have determined the appropriate rate for deposit of estimated duties to be 2.53 percent *ad valorem* on future entries.

The U.S. Customs Service shall assess countervailing duties of 1.72 percent of the f.o.b. invoice price on all unliquidated entries of certain castor oil products exported from Brazil during the period December 7, 1979 through December 31, 1979. All unliquidated entries exported from Brazil before December 7, 1979 shall be liquidated according to instructions in earlier **Federal Register** notices dated March 16, 1976 (41 FR 11018), July 3, 1979 (44 FR 38839), September 28, 1979 (44 FR 55825) and February 26, 1980 (45 FR 12413).

Further, as provided by section 751(a)(1) of the Tariff Act of 1930 ("the Tariff Act"), the Customs Service shall collect a cash deposit of estimated countervailing duties of 2.53 percent of the f.o.b. invoice price on all shipments entered, or withdrawn from warehouse, for consumption on or after the date of publication of these final results.

This deposit requirement will remain in effect until publication of the final results of the next administrative review. The Department intends to conduct the next review by the end of March, 1982. The amount of countervailing duties to be imposed on entries made during 1980 will be determined in the next administrative review. Consequently, the suspension of liquidation previously ordered will continue for all shipments exported from Brazil on or after January 1, 1980.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1))

and § 355.41 of the Commerce Regulations (19 CFR 355.41).

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

December 21, 1981.

BILLING CODE 3510-25-M

Washington State University, et al.; Consolidated Decision on Applications for Duty-Free Entry of Electron Microscopes

The following is a consolidated decision on applications for duty-free entry of electron microscopes pursuant to Section 6(c) of the Educational, Scientific and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR Part 301). (See especially § 301.11(e).)

A copy of the record pertaining to each of the applications in this consolidated decision is available for public review between 8:30 a.m. and 5:00 p.m. in Room 2119 of the Department of Commerce Building, 14th and Constitution Avenue, NW., Washington, D.C. 20230.

Docket No. 81-00303. Applicant: Washington State University, 103 Science Hall, Pullman, WA 99164. Article: Electron Microscope, Model H-300 with Accessories. Manufacturer: Hitachi Scientific Instruments, Ltd., Japan. Intended use of article: See Notice on page 42093 in the **Federal Register** of August 19, 1981. Article ordered: March 27, 1981.

Docket No. 81-00304. Applicant: Washington State University, 103 Science Hall, Pullman, WA 99164. Article: Electron Microscope, Model H-600-2 with Accessories. Manufacturer: Hitachi Scientific Instruments, Ltd., Japan. Intended use of article: See Notice on page 42093 in the **Federal Register** of August 19, 1981. Article ordered: March 27, 1981.

Docket No. 81-00315. Applicant: Carnegie Institution of Washington, 1530 P Street, NW., Washington, D.C. 20005. Article: Electron Microscope, Model JEM 100S with Accessories. Manufacturer: JEOL Ltd., Japan. Intended use of article: See Notice on page 42895 in the **Federal Register** of August 25, 1981. Article ordered: March 30, 1981.

Docket No. 81-00319. Applicant: St. John Medical Center, 1923 S. Utica Avenue, Tulsa, Oklahoma 74104. Article: Electron Microscope, Model EM 109 with Accessories. Manufacturer: Carl Zeiss, West Germany. Intended use of article: See Notice on page 43729 in the **Federal Register** of August 31, 1981. Article ordered: June 23, 1981.

Docket No. 81-00323. Applicant: Medical University of South Carolina, 171 Ashley Avenue, Charleston, South Carolina 29425. Article: Electron Microscope, Model JEM 100S with Sheet Film Camera and 100 Film Cassettes. Manufacturer: JEOL Ltd., Japan. Intended use of article: See Notice on page 43729 in the **Federal Register** of August 31, 1981. Application received by Commissioner of Customs: July 17, 1981.

Comments: No comments have been received with respect to any of the foregoing applications. Decision: Applications approved. No instrument or apparatus of equivalent scientific value to the foreign articles, for such purposes as these articles are intended to be used, was being manufactured in the United States at the time the articles were ordered. Reasons: Each foreign article to which the foregoing applications relate is a conventional transmission electron microscope (CTEM). The description of the intended research and/or educational use of each article establishes the fact that a comparable CTEM is pertinent to the purposes for which each is intended to be used. We know of no CTEM which was being manufactured in the United States either at the time of order of each article described above or at the time of receipt of application by the U.S. Customs Service.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to any of the foreign articles to which the foregoing applications relate, for such purposes as these articles are intended to be used, which was being manufactured in the United States either at the time of order or at the time of receipt of application by the U.S. Customs Service.

BILLING CODE 3510-25-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Amending the Import Restraint Level for Certain Wool Textile Products From the Republic of Singapore

December 21, 1981.

AGENCY: Committee for the Implementation of Textile Agreements.

ACTION: Increasing from 20,000 dozen to 26,000 dozen the level of restraint established for wool sweaters in Category 445/446, produced or manufactured in Singapore and exported during the twelve-month period which began on January 1, 1981.

(A detailed description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on February 28, 1980 (45 FR 13172), as amended on April 23, 1980 (45 FR 27463), August 12, 1980 (45 FR 53506), December 24, 1980 (45 FR 85142), May 5, 1981 (46 FR 25121), October 5, 1981 (46 FR 48963) and October 27, 1981 (46 FR 52409))

SUMMARY: The Governments of the United States and Singapore have consulted and agreed to amend the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of September 21 and 22, 1978, as amended, to increase the designated consultation level for wool textile products in Category 445/446 during the agreement year which began on January 1, 1981 to 26,000 dozen. Agreement was also reached on levels for the category for the three succeeding years.

EFFECTIVE DATE: December 24, 1981.

FOR FURTHER INFORMATION CONTACT: Ronald Sorini, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, Washington, D.C. 20230 (202/377-5423).

SUPPLEMENTARY INFORMATION: On December 19, 1980, there was published in the **Federal Register** (45 FR 83649) a letter dated December 16, 1980 from the Chairman of the Committee for the Implementation of Textile Agreements to the Commissioner of Customs, which established ceilings for certain specified categories of cotton, wool and man-made fiber textile products, including Category 445/446, produced or manufactured in Singapore, which may be entered into the United States for consumption, or withdrawn from warehouse for consumption, during the twelve-month period which began on January 1, 1981 and extends through December 31, 1981. In the letter published below the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to increase the twelve-month level of restraint previously established for wool textile products in Category 445/446 to 26,000 dozen.

Arthur Garel,

Acting Chairman, Committee for the Implementation of Textile Agreements.

December 21, 1981.

Committee for the Implementation of Textile Agreements

Commissioner of Customs,
Department of the Treasury, Washington, D.C.

Dear Mr. Commissioner: This directive further amends, but does not cancel, the directive of December 16, 1980 from the Chairman, Committee the Implementation of Textile Agreements, concerning imports into the United States of certain cotton, wool and man-made fiber textile products, produced or manufactured in Singapore.

Under the terms of the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as extended on December 15, 1977; pursuant to the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of September 21 and 22, 1978, as amended, between the Governments of the United States and the Republic of Singapore; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended by Executive Order 11951 of January 6, 1977, you are directed to prohibit, effective on December 24, 1981, and for the twelve-month period beginning on January 1, 1981 and extending through December 31, 1981, entry into the United States for consumption and withdrawal from warehouse for consumption of wool textile products in Category 445/446, produced or manufactured in Singapore, in excess of 26,000 dozen.[1]

The action taken with respect to the Government of the Republic of Singapore and with respect to imports of wool textile products from Singapore has been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, these directions to the Commissioner of Customs, which are necessary for the implementation of such actions, fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the Federal Register.

Sincerely,

Arthur Garel,

Acting Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-25-M

[1] The level of restraint has not been adjusted to reflect any imports after December 31, 1980.

DEPARTMENT OF DEFENSE

Department of the Air Force

USAF Scientific Advisory Board; Meeting

December 16, 1981.

The USAF Scientific Advisory Board Strategic Cross-Matrix Panel will meet at the Pentagon, Washington, D.C. on February 1 and 2, 1982. The purpose of the meeting will be to review the air defense threat of a precursor attack. The meeting will convene at 8:30 a.m. and adjourn at 5:00 p.m. each day.

The meeting concerns matters listed in Section 552b(c) of Title 5, United States Code, specifically subparagraph (1) thereof, and accordingly, will be closed to the public.

For further information, contact the Scientific Advisory Board Secretariat at (202) 697-8845.

Winnibel F. Holmes,

Air Force Federal Register Liaison Officer.

BILLING CODE 3910-01-M

Corps of Engineers, Department of the Army

Intent To Prepare a Draft Environmental Impact Statement (DEIS) for a Proposed Multipurpose Dam on Palo Duro Creek, Hansford County, Texas.

AGENCY: Army Corps of Engineers, DOD, Tulsa District.

ACTION: Notice of Intent to Prepare a Draft Environmental Impact Statement (DEIS).

SUMMARY: 1. The proposed action is to constuct a multipurpose reservoir on Palo Duro Creek to satisfy the water resource needs in the area.

2. Reasonable Alternatives: The alternatives evaluated include no action and four multipurpose dam alternatives (Plans 9, 10, 13, and 14) at river mile 34.7 on Palo Duro Creek. Plans 9 and 10 include a 2,122-acre lake at conservation pool elevation 2887.2 feet National Geodetic Vertical Datum (NGVD). Plan 13 includes a 7,152-acre lake at conservation pool elevation 2949.6 feet NGVD, and Plan 14 includes a 13,110-acre lake at conservation pool elevation 2985.8 feet NGVD.

3. Scoping Process:

a. Public Involvement. A comprehensive public involvement program was developed as a means of disseminating information and soliciting public views. A variety of techniques including formal public meetings, meetings with local interests, and meetings with local news media were employed to involve Federal, State, and local agencies, citizen committees, organizations, and the public in the planning studies.

b. Significant Issues Requiring In-Depth Analysis. None.

c. Assignments. The US Fish and Wildlife Service is preparing formal consultation as outlined in Section 7 of the Endangered Species Act, and a Fish and Wildlife Coordination Act Report. The US Soil Conservation Service will report on prime and unique farmlands.

d. Environmental Review and Consultation Requirements. The draft environmental impact statement will be circulated for review and all comments will be incorporated into the final environmental impact statement.

4. A scoping meeting will not be held.

5. Estimated date when the DEIS will be available to the public: February 1982.

ADDRESS: Mr. Buell O. Atkins, Chief, Environmental Resources Branch, US Army Corps of Engineers, Tulsa District, PO Box 61, Tulsa, OK 74121, (918) 581-7857—FTS 736-7857.

Dated: December 17, 1981.

James J. Harmon,

Colonel, Corps of Engineers, District Engineer.

Office of the Secretary

DOD Advisory Group on Electronic Devices; Advisory Committee Meeting

Working Group A (Mainly Microwave Devices) of the DoD Advisory Group on Electronic Devices (AGED) will meet in closed session on 9 February 82 at the Advisory Group on Electron Devices, 1925 North Lynn St. Arlington, VA. 22209.

The mission of the Advisory Group is to provide the Under Secretary of Defense for Research and Enginering, the Director, Defense Advanced Research Projects Agency and the Military Departments with technical advice on the conduct of economical and effective research and development programs in the area of electron devices.

The Working Group A meeting will be limited to review of research and development programs which the military propose to initiate with industry, universities or in their laboratories. This microwave device area includes programs on developments and research related to microwave tubes, solid state microwave, electronic warfare devices, millimeter wave devices, and passive devices. The review will include classified program details throughout.

In accordance with 5 U.S.C. App 1, section 10(d)(1976), it has been determined that this Advisory Group meeting concerns matters listed in 5 U.S.C. 52(b)(c)(1) (1976), and that

accordingly, this meeting will be closed to the public.

M. S. Healy,

OSD Federal Register Liaison Officer, Department of Defense.

December 18, 1981.

BILLING CODE 3810-01-M

DEPARTMENT OF ENERGY

Economic Regulatory Administration

[ERA Docket No. 81-CERT-027]

Capco Pipe Company, Inc.; Application for Recertification of the Use of Natural Gas To Displace Fuel Oil

On December 28, 1980, Capco Pipe Company, Inc. (Capco), formerly Cement Asbestos Products Company, 1400 Twentieth Street, South, P.O. Box 3435, Birmingham, Alabama 35255, was granted a recertification of an eligible use of natural gas to displace fuel oil by the Administrator of the Economic Regulatory Administration (ERA) (Docket No. 80-CERT-041). The recertification involved the purchase of natural gas from Alabama Gas Corporation for use by Capco at its production facility located in Ragland, Alabama. The gas was transported by the Southern Natural Gas Company. The ERA certificate expires on December 27, 1981.

On December 7, 1981, Capco filed an application for recertification of an eligible use of natural gas to displace fuel oil at the Ragland facility pursuant to 10 CFR Part 595 (44 FR 47920, August 16, 1979). More detailed information is contained in the application on file with the ERA and available for public inspection at the ERA, Division of Natural Gas Docket Room, Room 6013, 2000 M Street, NW., Washington, D.C., from 8:30 a.m. to 4:30 p.m. Monday through Friday, except Federal holidays.

In its application, Capco states that the volume of natural gas for which it requests recertification is up to 575 Mcf per day. The use of this gas is estimated to displace the use of up to 4164 gallons (99 barrels) of No. 2 fuel oil (0.12 percent sulfur) per day at the Ragland facility.

The eligible seller of the natural gas is Alabama Gas Corporation, 1918 First Avenue, Birmingham, Alabama 35295. The gas will be transported by Southern Natural Gas Company, P.O. Box 2563, Birmingham, Alabama 35202.

In order to provide the public with as much opportunity to participate in this proceeding as is practicable under the circumstances, we are inviting any person wishing to comment concerning this application to submit comments in writing to the Economy Regulatory Administration, Room 6304, RG-13, 2000 M Street, NW., Washington, D.C. 20461, Attention: Paula A Daigneault, within ten (10) calendar days of the date of publication of this notice in the **Federal Register.**

An opportunity to make an oral presentation of data, views, and arguments either against or in support of this application may be requested by any interested person in writing within the ten (10) day comment period. The request should state the person's interest, and if appropriate, why the person is a proper representative of a group or class of persons that has such an interest. The request should include a summary of the proposed oral presentation and a statement as to why an oral presentation is necessary. If ERA determines that an oral presentation is necessary, further notice will be given to Capco and any persons filing comments and will be published in the **Federal Register.**

Issued in Washington, D.C., on December 16, 1981.

T. Wendell Butler,

Acting Assistant Administrator, Economic Regulatory Administration.

BILLING CODE 6450-01-M

Office of Energy Research

DOE/NSF Nuclear Science Advisory Committee Subcommittee on Electromagnetic Interactions; Open Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463, 86 Stat. 770), notice is hereby given of the following subcommittee meeting:

Name: DOE/NSF Nuclear Science Advisory Committee, Subcommittee on Electromagnetic Interactions

Date and Time: Thursday, January 14, 1982—9:00 a.m.–6:00 p.m. Friday, January 15, 1982—9:00 a.m.–4:00 p.m.

Place: National Science Foundation, 1800 G Street, NW., Room 1242, Washington, D.C.

Contact: John R. Erskine, Department of Energy, Division of Nuclear Physics, ER-23 GTN, Washington, D.C. 20545, Telephone: 301-353-3613.

Purpose of Parent Committee

To provide advice to the Department of Energy and the National Science Foundation on the management of and long range planning for basic nuclear research programs.

Tentative Agenda:

- Review the draft of the committee's report
- Discussion of recommendations
- Public Comment (10 minute rule)

Public Participation

The meeting is open to the public. The Chairperson of the Subcommittee is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the subcommittee will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements pertaining to agenda items should contact the Advisory Committee Management Office at 202-252-5187. Requests must be received at least 5 days prior to the meeting and reasonable provision will be made to include the presentation on the agenda.

Transcripts:

Available for public review and copying at the Public Reading Room, Room 1E190, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. between 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, D.C. on December 18, 1981.

Howard H. Raiken,

Deputy Advisory Committee Management Officer.

[FR Doc. 81-36806 Filed 12-23-81; 8:45 am]

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket No. GP81-49-000]

U.S.G.S. New Mexico, Section 108 NGPA Determination, Arapahoe Drilling Company, Schalk 52-4 Well, U.S.G.S. Docket No. NM 0115-79, FERC No. JD 79-11689; Request To Withdraw Final Well Category Determination

Issued: December 17, 1981.

On February 9, 1981, Arapahoe Drilling Co. (Arapahoe) filed with the Federal Energy Regulatory Commission (Commission) a request to withdraw its application for a section 108 well category determination under the Natural Gas Policy Act of 1978 (NGPA), 15 U.S.C. 3301-3432 (Supp. II 1978) for the above-listed well. The United States Geological Survey in Albuquerque, New Mexico notified the Commission that the subject well qualified as a stripper well under section 108 of the NGPA on July 5, 1979, and that determination became final on August 20, 1979, pursuant to

§ 275.202(a) of the Commission's regulations, 45 days after the Commission received notice.

Subsequent to the time the determination became final, Staff review of monthly production records (Operator's Monthly Report Form C-115) filed by Arapahoe with the New Mexico Oil Conservation Division in Santa Fe indicates that the total production from the subject well may have exceeded 60 Mcf per production day during September, October and November 1978, the 90-day production period upon which the application was based. In response to a Staff inquiry dated January 12, 1981, Arapahoe stated that the original filing for stripper well status for the subject well was calculated by using net Mcf's sold instead of total Mcf's produced (which included gas used on the lease).

With respect to the question of refunds arising out of Arapahoe's request for withdrawal of the subject final well category determination, notice is hereby given that the question of whether refunds, plus interest computed under 18 CFR 154.102(d), will be required is a matter subject to the review and final decision of the Commission.

Any person desiring to be heard or to protest this request should, on or before January 25, 1982, file with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, a protest or petition to intervene in accordance with the requirements of the Commission's Rules of Practice and Procedures (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered but will not make the protestants parties to the proceeding. Any person wishing to become a party to the proceeding or to participate as a party in any hearing must file a petition to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-36717 Filed 12-23-81; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP81-301-001]

American Natural Rocky Mountain Co.; Amendment to Application

December 16, 1981.

Take notice that on November 12, 1981,[1] American Natural Rocky Woodward Avenue, Detroit, Michigan 48226, filed in Docket No. CP81-301-001 an amendment to its application filed pursuant to Section 7(c) of the natural Gas Act so as to reflect the construction and operation of pipeline and compressor facilities and gas transportation service for Michigan Wisconsin Pipe Line Company (Mich Wis), all as more fully set forth in the amendment which is on file with the Commission and open to public inspection.

It is stated that Applicant is presently not a "natural-gas company" within the meaning of the Natural Gas Act but is a subsidiary of Mich Wis which is a "natural-gas company". Applicant explains that upon completion of the proposed construction and operation and the commencement of the transportation service for Mich Wis Applicant would be a "natural-as company" within the meaning of the Natural Gas Act. Applicant further explains that the proposed pipeline facilities would be constructed and operated subject to Applicant's direction and control by Mich Wis.

Applicant submits that it filed an application in the instant docket on April 24, 1981, seeking authorization to construct and operate, *inter alia*, approximately 375 miles of 24-inch O.D. pipeline (the Pathfinder Project) connecting the transmission system of Colorado Interstate Gas Company (CIG) in Weld County, Colorado, and Mich Wis' southwest transmission system in Kiowa County, Kansas. Applicant explains that Mich Wis is engaged in an extensive gas exploration, acquisition and development program within the Rocky Mountain areas of Colorado, Wyoming, Utah, and Montana. Applicant further explains that Mich Wis currently uses exchange-displacement service with CIG to effectuate receipt of Mich Wis' gas supplies. It is stated that the continuance of the exchange-displacement service between Mich Wis and CIG is dependent upon a major expansion of CIG's system. Applicant submits that the purpose of its application was therefore to minimize or eliminate the need on CIG's part to expand its system east of Cheyenne, Wyoming, incident to rendering transportation services for Mich Wis.

Mich Wis, it is asserted, has indicated that based on Applicant's application CIG would still be required to transport Mich Wis' gas west of Cheyenne, Wyoming. To permit CIG to use the capacity of its system for its existing customers Applicant therefore proposes to amend its application by including the additional pipeline and compressor facilities necessary to extend the Pathfinder Project from its present terminus in Weld County, Colorado, to the supply and gathering system presently owned and operated by Mich Wis in Fremont County, Wyoming. It is explained that the proposal would permit Mich Wis' Rocky Mountain gas supplies to be delivered directly to its own system in an efficient, economic and environmentally desirable fashion. Furthermore, Applicant maintains that the need on CIG's part to construct and operate facilities necessary to render transportation services for Mich Wis would be completely eliminated.

Applicant specifically proposes to construct and operate the following:

1. 520 miles of 24-inch O.D. pipeline extending southeasterly from a proposed compressor station (the Cedar Ridge Station) to be located in Carbon County, Wyoming, to a point near Greensburg, Kansas, where such line would be connected to Mich Wis' transmission system in Kiowa County, Kansas.

2. 114 miles of 20-inch O.D. pipeline extending northerly from the aforementioned Cedar Ridge Station and terminating at the proposed interconnection with Mich Wis' existing gas-supply and gathering facilities in Fremont County, Wyoming.

3. The Cedar Ridge Station comprising approximately 3,200 horsepower of compression.

4. A second compressor station (the Sand Hills Station) comprising approximately 2,000 horsepower of compression to be located in Washington County, Colorado.

It is stated that the estimated cost of the facilities is $231,153,990 which would be financed initially with an equity contribution of $58,000,000 and the remainder with bank loans. It is explained that the bank loans would be repaid with proceeds from the subsequent issuance of long-term debt securities.

Applicant states that the proposed facilities would have an initial daily capacity of 115,000 Mcf without compression and an initial daily capacity of 175,000 Mcf upon placement in service of the two compressor stations proposed herein. Applicant asserts that the initial capacity of the pipeline system could be readily expanded to over 285,000 Mcf per day with the installation of still additional compression which presently is estimated to cost approximately $30,000,000. Applicant submits that for an approximate 13 percent increase in investment the capability exists to increase the capacity of the initial

[1] This amendment was initially tendered for filing on November 12, 1981; however, the fee required by § 159.2(c) of the Regulations under the Natural Gas Act (18 CFR 159.2(c)) was not paid until December 2, 1981; thus, filing was not completed until the latter date.

system by over 60 percent to readily accommodate additional volumes as such may be developed.

Applicant maintains that Mich Wis is presently attempting to acquire additional gas supplies in the Overthrust Region. Applicant also asserts that Mich Wis has been conducting an extensive gas exploration program in the Rockies for some years and currently has a gas call covering over 1,000,000 acres. Furthermore, it is stated that many of the gas call acres are concentrated in several distinct areas and that exploratory activity has been clustered in the Lysite in Fremont County. Applicant contends there are substantial gas reserves in the Rocky Mountains to be tapped and the opportunities for new gas supplies would be substantially increased. The proposed pipeline would provide both the capacity and the flexibility for providing transportation for other pipeline companies, it is averred.

Applicant also proposes to transport natural gas for Mich Wis with the proposed pipeline system. It is asserted that Applicant would receive and transport through its proposed facilities gas tendered by Mich Wis for transportation up to the contract demand which is initially 175,000 Mcf per day. Applicant submits that Mich Wis would be charged for the transportation service at a level calculated to enable Applicant to recover its costs, including a reasonable return on its investment.

Any person desiring to be heard or to make any protest with reference to said amendment should, on or before January 11, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules. All persons who have heretofore filed need not file again.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-36744 Filed 12-23-81; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 5687-000]

City of Canyonville; Application for Preliminary Permit

December 21, 1981.

Take notice that City of Canyonville (Applicant) filed on November 24, 1981, an application for preliminary permit pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r) for Project No. 5687 to be known as the Copeland Creek Hydropower Project located on Copeland Creek in Douglas County, Oregon in the Umpqua National Forest. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: City of Canyonville, P.O. 765, Canyonville, Oregon 97417, Attn: Mayor Winston W. Walker.

Project Description—The proposed project would consist of: (1) A natural rock and reinforced concrete diversion structure 5 feet high with negligible impoundment; (2) a diversion channel 2.6 miles long; (3) a penstock 800 feet long; (4) a powerhouse containing a turbine generator with 1.9 MW capacity and 10.6 GWh annual energy output; (5) transmission line 1,500 feet long; and (6) appurtenant facilities. Power will be distributed through a hookup with existing lines and will be used to offset power purchases made by the City.

Proposed Scope of Studies under Permit—A preliminary permit, if issued, does not authorize construction. The Applicant seeks issuance of a preliminary permit for a term of 24 months, during which time engineering, economic and environmental studies will be conducted to ascertain project feasibility and to support application for a license to construct and operate the project. The estimated cost of permit activities is $100,000.

Competing Applications—Anyone desiring to file a competing application for preliminary permit must submit to the Commission, on or before February 24, 1982, the competing application itself, or a notice of intent to file such an application (see: 18 CFR 4.30 et seq. (1981); and Docket No. RM81–15, issued October 29, 1981, 46 FR 55245, November 9, 1981.)

The Commission will accept applications for license or exemption from licensing, or a notice of intent to submit such an application in response to this notice. A notice of intent to file an application for license or exemption must be submitted to the Commission on or before February 24, 1982, and should specify the type of application forthcoming. Any application for license or exemption from licensing must be filed in accordance with the Commission's regulations (see: 18 CFR 4.30 et seq. 4.101 et seq. (1981), as appropriate).

Submission of a timely notice of intent to file an application for preliminary permit, allows an interested person to file an acceptable competing application for preliminary permit no later than April 22, 1982.

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions to Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the rules of practice and procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's rules may become a party to the proceding. Any comments, protests, or petitions to intervene must be received on or before February 24, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each respresentative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-36745 Filed 12-23-81; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 5686-000]

City of Canyonville; Application for Preliminary Permit

December 21, 1981.

Take notice that City of Canyonville (Applicant) filed on November 24, 1981, an application for preliminary permit (pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)) for Project No. 5686 to be known as the Elk Creek Hydropower Project located on Elk Creek in Douglas County, Oregon in the Umpqua National Forest. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: City of Canyonville, P.O. Box 765, Canyonville, Oregon 97417, Attn: Mayor Winston W. Walker.

Project Description—The proposed project would consist of: (1) A reinforced concrete diversion structure 7 feet high with negligible impoundment; (2) a diversion channel 2.8 miles long; (3) a penstock 500 feet long; (4) a powerhouse containing a turbine generator with 3.2 MW capacity and 17.0 GWh annual energy output; (5) transmission line 0.25 miles long; and (6) appurtenant facilities. Power would be distributed through an intertie with Pacific Power & Light and used to offset power purchases made by the City.

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. The Applicant seeks issuance of a preliminary permit for a term of 24 months, during which time engineering, economic and environmental studies will be conducted to ascertain project feasibility and to support application for a license to construct and operate the project. The estimated cost of permit activities is $100,000.

Competing Applications—Anyone desiring to file a competing application for preliminary permit must submit to the Commission, on or before February 24, 1982, the competing application itself, or a notice of intent to file such an application (see: 18 CFR 4.30 et seq. (1981); and Docket No. RM81–15, issued October 29, 1981, 46 FR 55245, November 9, 1981.)

The Commission will accept applications for license or exemption from licensing, or a notice of intent to submit such an application in response to this notice. A notice of intent to file an application for license or exemption must be submitted to the Commission on or before February 24, 1982, and should specify the type of application forthcoming. Any application for license or exemption from licensing must be filed in accordance with the Commission's regulations (see: 18 CFR 4.30 et seq. or 4.101 et seq. (1981), as appropriate).

Submission of a timely notice of intent to file an application for preliminary permit, allows an interested person to file an acceptable competing application for preliminary permit no later than April 22, 1982.

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the rules of practice and procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before February 24, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

BILLING CODE 6717-01-M

[Docket No. ES82-27-000]

Citizens Utilities Co.; Application

December 17, 1981.

Take notice that on December 15, 1981, Citizens Utilities Company (Applicant) filed an application seeking an order pursuant to Section 204 of the Federal Power Act, authorizing the issuance of short-term promissory notes during the period ending January 27, 1984, in an aggregate principal amount not to exceed $35,000,000 outstanding at any one time.

Any person desiring to be heard or to make any protest with reference to the application should on or before January 7, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, petitions or protests in accordance with the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). The application is on file with the Commission and is available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-36718 Filed 12-23-81; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP82-93-000]

Columbia Gas Transmission Corp., Application

December 21, 1981.

Take notice that on November 24, 1981, Columbia Gas Transmission Corporation (Applicant), P.O. Box 1273, Charleston, West Virginia 25325, filed in Docket No, CP82–93–000 and application pursuant to Section 7 of the Natural Gas Act and § 157.7(g) of the Regulations thereunder (18 CFR 157.7(g)) for a certificate of public convenience and necessity authorizing the construction and for permission and approval to abandon for the 12-month period commencing March 1, 1982, and operation of various field compression and related metering and appurtenant facilities, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

The stated purpose of this budget-type application is to enable Applicant to act with reasonable dispatch in constructing and abandoning facilities which would not result in changing Applicant's system salable capacity or service from that authorized prior to the filing of the instant application.

Applicant requests waiver of the total and single project cost limitations prescribed by § 157.7(g) of $3,000,000 and $500,000, respectively. Applicant

proposes a total cost limitation of $7,000,000 with no single project to exceed $1,000,000. Applicant asserts that such waiver is necessary because of the increase in the construction costs for compression facilities since 1973 when the cost limitations for field gas compression facilities were established. Such costs, it is stated, would be financed from funds generated from internal sources.

Any person desiring to be heard or to make any protest with reference to said application should on or before January 12, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate and permission and approval for the proposed abandonment are required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP82-92-000]

Columbia Gas Transmission Corp.; Application

December 21, 1981.

Take notice that on November 24, 1981, Columbia Gas Transmission Corporation (Applicant), P.O. Box 1273, Charleston, West Virginia 25325, filed in Docket No. CP82-92-000 an application pursuant to Section 7(c) of the Natural Gas Act and § 157.7(c) of the Regulations thereunder (18 CFR 157.7(c)) for a certificate of public convenience and necessity authorizing the constuction during the 12-month period commencing March 1, 1982, and operation of facilities to make miscellaneous rearrangements on its system, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

The stated purpose of this budget-type application is to augment Applicant's ability to act with reasonable dispatch in making miscellaneous rearrangements which would not result in any material change in transportation and sales service presently rendered by Applicant.

It is stated that the total cost of such rearrangements would not exceed $300,000 which cost would be financed from funds generated from internal sources.

Any person desiring to be heard or to make any protest with reference to said application should on or before January 12, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

BILLING CODE 6717-01-M

[Project No. 3525-001]

Edward S. Cruz and William L. Beaver; Application for Exemption of Small Conduit Hydroelectric Facility

December 16, 1981.

Take notice that on November 9, 1981, Edward S. Cruz and William L. Beaver (Applicant) filed an application under section 30 of the Federal Power Act (Act) (16 U.S.C. 823(a)), for exemption of a proposed hydroelectric project from requirements of Part I of the Act. The proposed Cottonwood Canyon Ranch Hydroelectric Project (FERC Project No. 3525) would be located on the existing Cottonwood Canyon and Lone Tree Canyon aqueducts in Mono County, near Bishop, California. Correspondence with the Applicant should be directed to: Messrs. Edward S. Cruz, William L. Beaver, Route 4, Box 15, Bishop, California 93514, with a copy to Mr. James E. Earles, CH2M Hill, 555 Capitol Mall, Suite 1290, Sacramento, California 95814.

Purpose of Project—Electric energy generated by the project is proposed to be sold to Southern California Edison Company.

Project Description—The proposed project would consist of: (1) A powerhouse to contain a Pelton-type, turbine-generating unit with a rated capacity of 840 kW; and (2) a tailrace channel.

Agency Comments—The U.S. Fish and Wildlife Service and the California Department of Fish and Game are requested, pursuant to Section 30 of the Federal Power Act, to submit within 45 days from the date of issuance of this notice appropriate terms and conditions to protect any fish and wildlife resources or otherwise carry out the provisions of the Fish and Wildlife Coordination Act. If no comments are filed within this time period, an agency will be presumed to have determined

that no terms or conditions to the exemption are necessary. Other Federal, State, and local agencies that receive this notice through direct mailing from the Commission are requested to provide any comments they may have in accordance with their duties and responsibilities. Comments are due within 45 days from the date of issuance of this notice. No other formal requests for comments will be made. Comments should be confined to substantive issues relevant to the granting of an exemption. One copy of an agency's comments must also be sent to the Applicant's representatives.

Comments, Protests, or Petitions to Intervene—Anyone desiring to be heard or to make any protests about this application should file a petition to intervene or a protest with the Commission, in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). Comments not in the nature of a protest may also be submitted by conforming to the procedures specified in § 1.10 for protests. In determining the appropriate action to take, the Commission will consider all protest or other comments filed, but a person who merely files a protests or comments does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules. Any comments, protests, or petitions to intervene must be received on or before January 29, 1982. The Commission's address is: 825 North Capitol Street, N.E., Washington, D.C. 20426. The application is on file with the Commission and is available for public inspeciton.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-36719 Filed 12-23-81; 8:45 am]

BILLING CODE 6717-02-M

[Docket No. ER82-147-000]

Duke Power Co.; Filing

December 17, 1981.

The filing Company submits the following:

Take notice that Duke Power Company (Duke) on December 10, 1981, tendered for filing a contract between Duke and the United States of America, Department of Energy, acting by and through the Southeastern Power Administration (SEPA) dated October 26, 1981. This contract supersedes the prior contract on file with the Commission and contains a proposed change in its transmission rate for wheeling power and energy from the reservoir projects constructed by the Department of the Army in the Savannah River Basin, known as the Hartwell and Clark Hill Projects, to certain preference customers of the United States Government located in Duke's service area in North Carolina and South Carolina. Based on a 12-month period ending November 30, 1981, Duke estimates that the proposed change in transmission rates will increase annual revenues from SEPA by $850,773.00.

Duke has requested that the contract become effective on the date of tender for filing or January 1, 1982, or as soon as the Commission deems appropriate. If waiver is not granted, however, Duke requests an effective date no later than sixty (60) days after the date of tender for filing or February 8, 1982.

Duke states that copies of the filing were served upon the Southeastern Power Administration, the North Carolina Utilities Commission, and the South Carolina Public Service Commission.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before January 5, 1982. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of the filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-36747 Filed 12-23-81; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 5656-000]

Flathead Joint Board of the Flathead, Mission and Jocko Valley Irrigation Districts; Application for Preliminary Permit

December 18, 1981.

Take notice that Flathead Joint Board of the Flathead, Mission and Jocko Valley Irrigation Districts (Applicant) filed on November 16, 1981, an application for preliminary permit (pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)) for Project No. 5656 to be known as the Dry Creek Power Project located on Dry Creek in Lake County, Montana. The project will lie on lands within the Flathead Indian Reservation. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. Everitt Foust, President, Flathead Joint Board of the Flathead, Mission and Jocko Valley Irrigation Districts, P.O. Box 69, Moiese, Montana 59824.

Project Description—The proposed project would consist of: (1) The existing Tabor Dam, St. Marys Lake Reservoir, a spillway and outlet works; (2) the Tabor Dam power site which would utilize the existing outlet works to convey flows to a powerhouse; (3) the Dry Creek power site which would consist of a check and intake structure; a 6-foot diameter, 27,000-foot long penstock, and a powerhouse; and (4) a 5.5-mile long transmission line. The Tabor Dam powerhouse would contain a single generating unit with an installed capacity of 500 kW and the Dry Creek powerhouse would contain two generating units with a total rated capacity of 5,000 kW. Applicant estimates that the total average annual energy production would be 22.40 GWh.

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. Applicant has requested a 36-month permit to prepare a definitive project report, including preliminary designs, geological, environmental and economic feasibility studies. The cost of the above activities, along with the preparation of an environmental impact report, obtaining agreements with the U.S. Bureau of Indian Affairs, and other Federal, State and local agencies, and preparing a license application, conducting final field surveys, and preparing designs is estimated by the Applicant to be $100,000.

Competing Applications—Anyone desiring to file a competing application for preliminary permit must submit to the Commission, on or before March 22, 1982, the competing application itself (see: 18 CFR 4.30 et seq. (1981)). A notice of intent to file a competing application for preliminary permit will not be accepted for filing.

The Commission will accept applications for license or exemption from licensing, or a notice of intent to submit such an application in response to this notice. A notice of intent to file an application for license or exemption must be submitted to the Commission on or before February 22, 1982, and should specify the type of application forthcoming. Applications for licensing or exemption from licensing must be filed in accordance with the

Commission's regulations (see: 18 CFR 4.30 et seq. or 4.101 et seq. (1981), as appropriate).

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before February 22, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. ER82-148-000]

Florida Power & Light Co.; Filing

December 17, 1981.

The filing Company submits the following:

Take notice that Florida Power & Light Company (FP&L) on December 10, 1981, tendered for filing documents entitled "Exhibit I to Service Agreement For Interchange Transmission Service Implementing Specific Transactions Under Service Schedules A (Emergency Service), B (Short Term Firm Service), C (Economy Interchange Service) and D (Firm Service) of Contracts for Interchange Service." FP&L states that this filing is proposed to amend FERC Electric Tariff Original Volume II (Sheet Nos. 1–19).

FP&L further states that under Exhibit I FP&L will transmit power and energy for the City of Vero Beach (Vero Beach) as is required by Vero Beach in the implementation of its interchange agreement with the City of Tallahassee.

FP&L requests waiver of the Commission's notice requirements to allow the proposed Exhibit to become effective immediately.

According to FP&L, copies of the filing were served on the City Manager, City of Vero Beach.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before January 5, 1982. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[Project No. 5555-000]

Town of Gold Bar, Wash.; Application for Preliminary Permit

December 18, 1981.

Take notice that the Town of Gold Bar (Applicant) filed on October 22, 1981, an application for preliminary permit (pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)) for Project No. 5555 to be known as the Olney Creek Falls Water Power Project located on Olney Creek near the Town of Gold Bar in Snohomish County, Washington. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. Ed Grant, Mayor, Town of Gold Bar, 501 Croft, P.O. Box 107, Gold Bar, Washington 98251.

Project Description—The proposed project would consist of:

(1) A 30-foot high dam constructed by increasing the height of an existing 20-foot high dam;

(2) A reservoir with a capacity of less than 10 acre-feet;

(3) A 54-inch diameter, 600-foot long steel penstock;

(4) A powerhouse with a total installed capacity of 1,050 kW;

(5) A switchyard located near the powerhouse; and

(6) A 12.47–kV transmission line interconnecting with an existing substation or transmission line owned by the Snohomish County PUD.

The Applicant estimates that the average annual production would be 5.95 million kWh.

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. The Applicant seeks issuance of a preliminary permit for a period of 18 months during which it would conduct technical, environmental, economic, and financial studies, prepare an FERC license exemption application; and conduct test borings. No new road would be required for conducting these studies which are estimated to cost $90,000.

Competing Applications—This application was filed as a competing application to the Carjen Company's application for Project No. 4741 filed on May 28, 1981. Public notice of the filing of the initial application, which has already been given, established the due date for filing competing applications or notices of intent. In accordance with the Commission's regulations, no competing application for preliminary permit, or notices of intent to file an application for preliminary permit or license will be accepted for filing in response to this notice. Any application for license or exemption from licensing, or notice of intent to file an exemption application, must be filed in accordance with the Commission's regulations (see: 18 CFR 4.30 et. seq. or 4.101 et seq. (1981), as appropriate).

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If any agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the

requirements of the Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before February 19, 1982.

Filing and Service of Responsive Documents—Any filing must bear in all capital letters the title "COMMENTS", "PROTEST", or "PETITION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Project No. 5685-000]

Grisdale Hill Co.; Application for Preliminary Permit

December 21, 1981.

Take notice that Grisdale Hill Company (Applicant) filed on November 24, 1981, an application for preliminary permit pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r) for Project No. 5685 to be known as the Christy Creek Hydroelectric Project located on Christy Creek in Lane County, Oregon in the Willamette National Forest. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Ms. Marilyn Tebor Shaw, esquire, Suite 1100, 1333 New Hampshire Avenue, NW., Washington, D.C. 20036.

Project Description—The proposed project would consist of: (1) A reinforced concrete diversion dam 8 feet high with negligible impoundment; (2) a low pressure water conveyance 9,500 feet long; (3) a surge tank and steel penstock 1,900 feet long; (4) a powerhouse containing a turbine generator with 4.0 MW capacity and 17.7 GWh annual energy output; (5) transmission line 10 miles long and (6) appurtenant facilities. Power would be sold to the Bonneville Power Administration or a local utility.

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. The Applicant seeks issuance of a preliminary permit for a term of 24 months, during which time engineering, economic and environmental studies will be conducted to ascertain project feasibility and to support application for a license to construct and operate the project. The estimated cost of permit activities is $125,000.

Competing Applications—Anyone desiring to file a competing application for preliminary permit must submit to the Commission, on or before February 24, 1982, the competing application itself, or a notice of intent to file such an application (see: 18 CFR § 4.30 et. seq. (1981); and Docket No. RM81–15, issued October 29, 1981, 46 FR 55245, November 9, 1981.)

The Commission will accept applications for license or exemption from licensing, or a notice of intent to submit such an application in response to this notice. A notice of intent to file an application for license or exemption must be submitted to the Commission on or before February 24, 1982, and should specify the type of application forthcoming. Any application for license or exemption from licensing must be filed in accordance with the Commission's regulations (see: 18 CFR 4.30 et. seq. or 4.101 et. seq. (1981), as appropriate).

Submission of a timely notice of intent to file an application for preliminary permit, allows an interested person to file an acceptable competing application for preliminary permit no later than April 22, 1982.

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the rules of practice and procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before February 24, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-36749 Filed 12-23-81; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 5423-000]

Hydro Electric Constructors, Inc.; Application for Preliminary Permit

December 21, 1981.

Take notice that Hydro Electric Constructors, Inc. (Applicant) filed on September 28, 1981, an application for preliminary permit (pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)) for Project No. 5423 to be known as the Las Vegas Wash Project located on Las Vegas Wash in Clark County, Nevada. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. Don Buckley, Hydro Electric Constructors, 1085 N. Main Street, Suite C, Orange, California 92667.

Project Description—The proposed project would consist of three entirely new developments described as follows: (A) site #1 would consist of: (1) A 20-foot long, 4-foot high diversion structure; (2) a 15,000 foot long conduit consisting of a 6-foot wide, 3-foot deep channel or a 5-foot diameter low pressure penstock; (3) a 600-foot long, 42 inch diameter, high pressure penstock; (4) a powerhouse containing two turbine-

generators with a total rated capacity of 1,200 kW; (5) a 12-kV transmission line; and (6) appurtenant facilities;

(b) Site #2 would consist of: (A) A 40-foot long, 3-foot high diversion structure; (2) a 14,000-foot long conduit consisting of either a 5-foot wide, 3-foot deep channel or a 4-foot diameter low pressure penstock; (3) a 400-foot long, 3-foot diameter, high pressure penstock; (4) a powerhouse containing a single 400-kW turbine-generator; (5) a 12-kV transmission line; and (6) appurtenant facilities;

(C) Site #3 would consist of: (1) A 40-foot long, 3-foot high diversion structure; (2) a 17,160-foot long, 4-foot diameter, low pressure penstock; (3) a 2,000-foot long, 3-foot diameter high pressure penstock; (4) a powerhouse containing a single 300 kW turbine-generator; (5) a 12-kV transmission line; and (6) appurtenant facilities. The total project would generate up to 16,000,000 kWh annually. Energy produced at the project would be sold to a local utility as yet undetermined. The project would be located on land owned by the U.S. Bureau of Land Management, Department of the Interior and Clark County Nevada Sanitation District and Public Works Department.

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. The work proposed under this preliminary permit would include economic evaluation, engineering plans, and an environmental assessment. Based on results of these studies, Applicant would decide whether to proceed with more detailed studies and the preparation of an application for license to construct and operate the project. Applicant estimates that the work to be performed under this preliminary permit would cost $50,000.

Competing Applications—Anyone desiring to file a competing application for preliminary permit must submit to the Commission, on or before February 24, 1982, the competing application itself, or a notice of intent to file such an application (see: 18 CFR 4.30 et. seq. (1981); and Docket No. RM81–15, issued October 29, 1981, 46 FR 55245, November 9, 1981.)

The Commission will accept applications for license or exemption from licensing, or a notice of intent to submit such an application in response to this notice. A notice of intent to file an application for license or exemption must be submitted to the Commission on or before April 22, 1982, and should specify the type of application forthcoming. Any application for license or exemption from licensing must be filed in accordance with the Commission's regulations (see: 18 CFR 4.30 et. seq. or 4.101 et. seq. (1981), as appropriate).

Subcommission of a timely notice of intent to file an application for preliminary permit, allows an interested person to file an acceptable competing application for preliminary permit no later than February 24, 1982.

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the rules of practice and procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments field, but only those who file a petition to intervene in accordance with the Commission's rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before February 24, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-35792 Filed 12-23-81; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 5664-000]

Hydro Management, Inc.; Application for Preliminary Permit

December 22, 1981.

Take notice that Hydro Management, Incorporated (Applicant) filed on November 16, 1981, an application for preliminary permit (pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)) for Project No. 5664 to be known as the Blue Sky Creek Power Project located on Blue Sky Creek in Lincoln County, Montana. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. M. H. Edelman, III, President, Hydro Management, Incorporated, Route 1, Box 169, Ronan, Montana 59864.

Project Description—The proposed project would consist of: (1) A 24-foot long, 3-foot high diversion structure on Blue Sky Creek; (2) 24,000-foot long, 16-inch diameter penstock; (3) a powerhouse with a total installed capacity of 1,000 kW; and (4) a 6,000-foot long, 14.4-kV transmission line from the powerhouse to the Grave Creek Power Project transmission line. The Applicant estimates that the average annual energy production would be 6.048 million kWh. The proposed project is located entirely on Federal lands owned by Kootenai National Forest.

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. The Applicant seeks issuance of a preliminary permit for a term of 36 months, during which it would conduct the technical, environmental and economic studies, and also prepare an FERC license application. The Applicant estimates that the cost of undertaking these studies would be $10,000.

Competing Applications—Anyone desiring to file a competing application for preliminary permit must submit to the Commission, on or before March 1, 1982, the competing application itself, or a notice of intent to file such an application (see: 18 CFR 4.30 et seq. (1981); and Docket No. RM81–15, issued October 29, 1981, 46 FR 55245, November 9, 1981.)

The Commission will accept applications for license or exemption from licensing, or a notice of intent to submit such an application in response to this notice. A notice of intent to file an application for license or exemption must be submitted to the Commission on or before March 1, 1982, and should specify the type of application forthcoming. Any application for license or exemption from licensing must be

filed in accordance with the Commission's regulations (see: 18 CFR 4.30 et seq. or 4.101 et seq. (1981), as appropriate).

Submission of a timely notice of intent to file an application for preliminary permit, allows an interested person to file an acceptable competing application for preliminary permit no later than April 30, 1982.

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the rules of practice and procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before March 1, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-38751 Filed 12-23-81; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 5657-000]

Hydro Management, Inc.; Application for Preliminary Permit

December 22, 1981.

Take notice that Hydro Management, Inc. (Applicant) filed on November 16, 1981, an application for preliminary permit (pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)) for Project No. 5657 to be known as the Clarence Creek Power Project located on Clarence Creek in Lincoln County, Montana. The project would lie within the Kootenai National Forest. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. W. H. Edelman, III, President, Route 1, Box 169, Ronan, Montana 59864.

Project Description—The proposed project would consist of: (1) A native rock diversion, 3 feet high with negligible storage; (2) a penstock 18,480 feet long; (3) a powerhouse containing a turbine generator with 750 kW capacity and 4,536 MWh annual energy output; (4) a transmission line 200 feet long; and (5) appurtenant facilities. Generated power would be sold to the Lincoln Electric Coop, Inc. or the Bonneville Power Administration.

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. The Applicant seeks issuance of a preliminary permit for a term of 36 months, during which time engineering, economic and environmental studies will be conducted to ascertain project feasibility and to support application for a license to construct and operate the project. The estimated cost of permit activities is $7,500.

Competing Applications—Anyone desiring to file a competing application for preliminary permit must submit to the Commission, on or before March 1, 1982, the competing application itself, or a notice of intent to file such an application (see: 18 CFR 4.30 et seq. (1981); and Docket No. RM81–15, issued October 29, 1981, 46 FR 55245, November 9, 1981.)

The Commission will accept applications for license or exemption from licensing, or a notice of intent to submit such an application in response to this notice. A notice of intent to file an application for license or exemption must be submitted to the Commission on or before March 1, 1982, and should specify the type of application forthcoming. Any application for license or exemption from licensing must be filed in accordance with the Commission's regulations (see: 18 CFR 4.30 et seq. or 4.101 et seq. (1981), as appropriate).

Submission of a timely notice of intent to file an application for preliminary permit, allows an interested person to file an acceptable competing application for preliminary permit no later than April 30, 1982.

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before March 1, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-38752 Filed 12-23-81; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 5660-000]

Hydro Management, Inc.; Application for Preliminary Permit

December 22, 1981.

Take notice that Hydro Management, Inc. (Applicant) filed on November 16, 1981, an application for preliminary permit (pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)) for Project No. 5660 to be known as the Deep Creek Water Power Project located on Deep Creek, near Eureka, within the lands of Kootenai National Forest in Lincoln County, Montana. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. W. H. Edelman III, President, Hydro Management, Inc., Route 1, Box 169, Ronan, Montana 59864.

Project Description—The project would consist of: (1)A 3-foot high, 19-foot long diversion structure and a 12,000-foot long, 14-inch diameter pipeline on Deep Creek; (2) a 3-foot high, 17-foot long diversion structure and a 6,000-foot long, 10-inch diameter pipeline on North Fork of Deep Creek; (3) a 19,680-foot long, 16-inch diameter penstock from pipeline interconnection; (4) a powerhouse with total capacity of 1,500 kW; and (5) a 4,000-foot long, 14.4-kV transmission line from powerhouse to an existing Lincoln Electric, Inc. transmission line. The Applicant estimates that the average annual energy production would be 9.223 million kWh.

Proposed Scope of Studies Under Permit—a preliminary permit, if issued, does not authorize construction. The applicant seeks issuance of a preliminary permit for a period of 36 months during which time it would conduct technical, environmental and economic analysis; and prepare an FERC license application. No new roads would be required for conducting these studies. The Applicant estimates that the cost of undertaking these studies would be $15,000.

Competing Applications—Anyone desiring to file a competing application for preliminary permit must submit to the Commission, on or before March 1, 1982, the competing application itself, or a notice of intent to file such an application (see: 18 CFR 4.30 et. seq. (1981); and docket No. RM81–15, issued October 29, 1981, 46 FR 55245, November 9, 1981.)

The Commission will accept applications for license or exemption from licensing, or a notice of intent to submit such an application in response to this notice. A notice of intent to file an application for license or exemption must be submitted to the Commission on or before March 1, 1982, and should specify the type of application forthcoming. Any application for license or exemption from licensing must be filed in accordance with the Commission's regulations [see: 18 CFR 4.30 et. seq. or 4.101 et seq. (1981), as appropriate].

Submission of a timely notice of intent to file an application for preliminary permit, allows an interested person to file an acceptable competing application for preliminary permit no later than April 30, 1982.

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the rules of practice and procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's rules may become a party to the proceeding. Any comments, protests or petitions to intervene must be received on or before March 1, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-36753 Filed 12-23-81; 8:45 am]
BILLING CODE 6717-01-M

[Project No. 5658-000]

Hydro Management, Inc.; Application for Preliminary Permit

December 16, 1981.

Take notice that Hydro Management, Incorporated (Applicant) filed on November 16, 1981, an application for preliminary permit (pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)) for Project No. 5658 to be known as the Stahl Creek Power Project located on Stahl Creek in Lincoln County, Montana. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. W. H. Edelman, III, President, Hydro Management, Incorporated, Route 1, Box 169, Ronan, Montana 59864.

Project Description—The proposed project would consist of: (1) A 22-foot long, 3-foot high diversion structure; (2) a 13,000-foot long, 16-inch diameter penstock; (3) a powerhouse with a total installed capacity of 750 kW; and (4) a 16,000-foot long, 14.4-kV transmission line from the powerhouse to the Williams Creek Power Project transmission line. The entire project is located on U.S. Federal lands owned by Kootenai National Forest.

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. The Applicant seeks issuance of a preliminary permit for a period of 36 months during which it would conduct technical, environmental and economic studies, and also prepare a FERC license application. No new roads would be needed for conducting these studies. The Applicant estimates that the cost of undertaking these studies would be $7,500.

Competing Applications—Anyone desiring to file a competing application for preliminary permit must submit to the Commission, on or before March 19, 1982, the competing application itself, or a notice of intent to file such an application (see: 18 CFR 4.30 et seq. (1981); and Docket No. RM81–15, issued October 29, 1981, 46 FR 55245, November 9, 1981.)

The Commission will accept applications for license or exemption from licensing, or a notice of intent to submit such an application in response to this notice. A notice of intent to file

an application for license or exemption must be submitted to the Commission on or before February 19, 1982, and should specify the type of application forthcoming. Any application for license or exemption from licensing must be filed in accordance with the Commission's regulations (see: 18 CFR 4.30 et seq. or 4.101 et seq. (1981), as appropriate).

Submission of a timely notice of intent to file an application for preliminary permit, allows an interested person to file an acceptable competing application for preliminary permit no later than April 19, 1982.

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before February 19, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. ES82-05-001]

Idaho Power Co.; Supplemental Application

December 17, 1981.

Take notice that on December 14, 1981, Idaho Power Company (Applicant) filed an amendment to its application in Docket No. ES82-05-000, seeking a supplemental authorization to increase the amount of short-term borrowings authorized from $120,000,000 to $150,000,000, with no change in the issuance or maturity dates.

Any person desiring to be heard or to make any protest with reference to the application should on or before January 7, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, petitions or protests in accordance with the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). The application is on file with the Commission and is available for public inspection.

Kenneth F. Plumb,

Secretary

BILLING CODE 6717-01-M

[Docket No. CP82-97-000]

Kansas-Nebraska Natural Gas Co. Inc.; Application

December 21, 1981.

Take notice that on November 30, 1981, Kansas-Nebraska Natural Gas Company, Inc. (Applicant), P.O. Box 15265, Lakewood, Colorado 80215, filed in Docket No. CP82-97-000 an application pursuant to Section 7(b) of the Natural Gas Act for permission and approval to abandon the sale of natural gas for resale to the City of Albert, Kansas, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that is presently sells natural gas for resale to the City of Albert, Kansas, pursuant to its Rate Schedules CD and WPS. Sales to the City of Albert's municipally-owned system totaled 18,345 Mcf for calendar year 1980 and 17,704 Mcf for the twelve months ending September 30, 1981.

Pursuant to the results of a town election, the City of Albert sold its distribution system to Applicant which would commence sale of natural gas at retail to the approximately 110 end use customers currently served at wholesale. Applicant, therefore, proposes the abandonment of the sale of natural gas for resale to the City of Albert.

Any person desiring to be heard or to make any protest with reference to said application should on or before January 12, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that permission and approval for the proposed abandonment are required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own review of the matter finds that permission and approval for the proposed abandonment are required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own review of the matter finds that permission and approval for the proposed abandonment are required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be

unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Project No. 5409-000]

Richard K. Linville; Application for Preliminary Permit

December 18, 1981.

Take notice that Richard K. Linville (Applicant) filed on September 22, 1981, an application for preliminary permit (pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)) for Project No. 5409 to be known as the C. Ben Ross Dam Project located on Little Weiser River in Adams County, Idaho. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. Richard K. Linville, 7021 Sand Point Way N.E., #B-305, Seattle, Washington 98115.

Project Description—The proposed project would consist of: (1) The existing C. Ben Ross Dam and Reservoir; (2) penstock 1,000 feet long; (3) powerhouse containing a turbine generator with a capacity of 2,050 kW and annual energy production of 3,455 MWh; (4) transmission line; and (5) appurtenant facilities. Generated power would be sold to the Idaho Power Company.

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. The Applicant seeks issuance of a preliminary permit for a period of 36 months, during which time engineering, economic and environmental studies will be conducted to ascertain project feasibility and to support application for a license to construct and operate the project. The estimated cost of these activities is $40,000.

Competing Applications—Anyone desiring to file a competing application must submit to the Commission, on or before March 22, 1982, either the competing application itself (See 18 CFR 4.33(a) and (c) (1980)) or a notice of intent (See 18 CFR 4.33(b) and (d) (1980)) or file a competing application. Submission of a timely notice of intent allows an interested person to file an acceptable competing application no later than the time specified in § 4.33(c).

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before February 22, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters, the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-36723 Filed 12-23-81; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 5602-000]

Live Oak Associates West; Application for Preliminary Permit

December 18, 1981.

Take notice that Live Oak Associates West (Applicant) filed on November 2, 1981, an application for preliminary permit (pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)) for Project No. 5602 to be known as the Alder Creek Hydroelectric Project located on Alder Creek in Humboldt County, Nevada. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. Alan L. Cain, Live Oak Associates West, Western Farm Management Company, P.O. Box 1386, Klamath Falls, Oregon 97601.

Project Description—The proposed project would consist of: (1) A 1.75-mile long diversion channel; (2) a 1.75-mile long penstock; (3) a 2-mile long, 16-inch diameter penstock; (4) a 500-foot long, 12-inch diameter penstock; (5) a powerhouse No. 1 with a rated capacity of 1,300 kW; (6) a powerhouse No. 2 with a rated capacity of 275 kW; and (7) a 3-mile long, 15-kV transmission line from the powerhouse to an existing 25-kV Harney Electric Cooperative, Inc. transmission line. The Applicant estimates that the average annual energy production would be 6 million kWh. The proposed project is located on Federal lands.

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. The Applicant seeks issuance of a preliminary permit for a period of 36 months during which it would conduct technical, environmental and economic studies, and also prepare an FERC license application. The Appplicant estimates that the cost of undertaking these studies would be $78,000.

Competing Applications—Any desiring to file a competing application for preliminary permit must submit to the Commission, on or before March 22, 1982, the competing application itself (see: 18 CFR 4.30 et seq. (1981)). A notice of intent to file a competing application for preliminary permit will not be accepted for filing.

The Commission will accept applications for license or exemption from licensing, or a notice of intent to submit such an application in response to this notice. A notice of intent to file an application for license or exemption must be submitted to the Commission on or before February 22, 1982, and should specify the type of application forthcoming. Applications for licensing or exemption from licensing must be filed in accordance with the Commission's regulations (see: 18 CFR 4.30 et seq. or 4.101 et seq. (1981), as appropriate).

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions to Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980).

In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before February 22, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-36724 Filed 12-23-81; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 4008-002]

Long Lake Energy Corp., Application for Exemption for Small Hydroelectric Power Project Under 5 MW Capacity

December 21, 1981.

Take notice that on November 20, 1981, Long Energy Corporation (Applicant) filed an application, under Section 408 of the Energy Security Act of 1980 (Act) (16 U.S.C. 2705, and 2708 *as amended*), for exemption of a proposed hydroelectric project from licensing under Part I of the Federal Power Act. The proposed small hydroelectric project (Project No. 4008) would be located on East Canada Creek, near the Village of Dolgeville in Herkimer and Fulton Counties, New York. Correspondence with the Applicant should be directed to: Mr. Paul J. Elston, Long Lake Energy Corporation, 330 Madison Avenue, 7th Floor, New York, New York 10017.

Project Description—The proposed project would consist of: (1) an existing limestone gravity dam, 19.5 feet high and 190 feet long; (2) an existing reservoir covering 15 acres and having a storage capacity of 180 acre-feet; (3) four existing gates leading to a new 10-foot in diameter steel penstock 710 feet long; (4) a new 28- by 38-foot powerhouse containing one 1.2 MW and one 3.6-MW turbine/generator unit; (5) a new tailrace; (6) a 100-foot long, 46-kv transmission line; and (7) appurtenant facilities.

Purpose of Exemption—An exemption, if issued, gives the Exemptee priority of control, development, and operation of the project under the terms of the exemption from licensing, and protects the Exemptee from permit or license applicants that would seek to take or develop the project.

Agency Comments—The U.S. Fish and Wildlife Service, The National Marine Fisheries Service, and the New York State Department of Environmental Conservation are requested, for the purposes set forth in Section 408 of the Act, to submit within 60 days from the date of issuance of this notice appropriate terms and conditions to protect any fish and wildlife resources or to otherwise carry out the provisions of the Fish and Wildlife Coordination Act. General comments concerning the project and its resources are requested; however, specific terms and conditions to be included as a condition of exemption must be clearly identified in the agency letter. If an agency does not file terms and conditions within this time period, that agency will be presumed to have none. Other Federal, State, and local agencies are requested to provide any comments they may have in accordance with their duties and responsibilities. No other formal requests for comments will be made. Comments should be confined to substantive issues relevant to the granting of an exemption. If an agency does not file comments within 60 days from the date of issuance of this notice, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

Competing Applications—Any qualified license applicant desiring to file a competing application must submit to the Comission, on or before February 3, 1982 either the competing license application that proposes to develop at least 7.5 megawatts in that project, or a notice of intent to file such a license application. Submission of a timely notice of intent allows an interested person to file the competing license application no later than 120 days from the date that comments, protests, etc. are due. Applications for preliminary permit will not be accepted.

A notice of intent must conform with the requirements of 18 C.F.R. 4.33(b) and (c) (1980). A competing license application must conform with the requirements of 18 C.F.R. 4.33(a) and (d) (1980).

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the rules of practice and procedure, 18 C.F.R. 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's rules may become a party to the proceeding. Any comments, protests or petitions to intervene must be received on or before February 3, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-36754 Filed 12-23-81; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ST82-62-000]

Louisiana Resources Co.; Application for Approval of Rates

December 18, 1981.

Take notice that on November 19, 1981, Louisiana Resources Company (Applicant), P.O. Box 3102, Tulsa, Oklahoma 74101, filed in Docket No. ST82-62-000 an application pursuant to Part 284 of the Commission's Regulations under the Natural Gas

Policy Act of 1978 for approval of rates charged for transporting natural gas for Faustina Pipe Line Company (Faustina), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that it and Faustina have entered into an agreement dated August 18, 1981, whereby Applicant would transport gas by exchange on behalf of Faustina from a point of interconnection between the facilities of Applicant and The Superior Oil Company's Lowry gas plant in Cameron Parish, Louisiana, to a point of interconnection between the facilities of Louisiana Intrastate Gas Corporation and Faustina located in St. James Parish, Louisiana.

Applicant proposes a base transportation charge of 22.25 cents per million Btu as a fair and equitable rate for the service rendered.

Any person desiring to be heard or to make any protest with reference to said application should on or before January 11, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-36728 Filed 12-23-81; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 5638-000]

Mill Pond Associates, Inc.; Application for Exemptin for Small Hydroelectric Power Project Under 5 mW Capacity

December 22, 1981.

Take notice that on November 9, 1981, Mill Pond Associates, Inc., (Applicant) filed an application under Section 408 of the Energy Security Act of 1980 (Act) (16 U.S.C. 2705 and 2708 *as amended*), for exemption of a proposed hydroelectric project from licensing under Part I of the Federal Power Act. The proposed small hydroelectric project (FERC Project No. 5638) would be located on the Squam River, Grafton County, Hew Hampshire. Correspondence with the Applicant should be directed to: Mill Pond Associate, Inc., Box 77A, RFD 3, Plymouth, New Hampshire 03264.

Project Description—The proposed project would consist of: (1) The existing concrete and stone Ashland Paper Mill Dam owned by the Applicant, 200 feet long and 14.5 feet high, with a 56-foot long controlled spillway having 3-foot high flashboards to be replaced; (2) an existing reservoir with negligible storage capacity at 485 feet elevation m.s.l.; (3) new trashracks and headgate; (4) an existing 5.5-foot diameter penstock, 19 feet long; (5) an existing powerhouse containing an existing 180 hp turbine (to be overhauled) to which would be connected a new 100 kW generator; (6) an existing tailrace; and (7) other appurtenances. Applicant estimates an annual generationof 630,000 kWh.

Purpose of Project—Project energy would be sold to the Public Service Company of New Hampshire.

Agency Comments—The U.S. Fish and Wildlife Service, the National Marine Fisheries Service, and the New Hampshire Fish and Game Department are requested, for the purposes set forth in Section 408 of the Act, to submit within 60 days from the date of issuance of this notice appropriate terms and conditions to protect any fish and wildlife resources or to otherwise carry out the provisions of the Fish and Wildlife Coordination Act. General comments concerning the project and its resources are requested; however, specific terms and conditions to be included as a condition of exemption must be clearly identified in the agency letter. If an agency does not file terms and conditions within this time period, that agency will be presumed to have none. Other Federal, State, and local agencies that receive this notice through direct mailing from the Commission are requested to provide any comments they may have in accordance with their duties and responsibilities. No other formal requests for comments will be made. Comments should be confined to substantive issues relevant to the granting of an exemption. If an agency does not file comments within 60 days from the date of issuance of this notice, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

Competing Applications—Any qualified license applicant desiring to file a competing application must submit to the Commission, on or before February 8, 1982, either the competing license application that proposes to develop at least 7.5 megawatts in that project, or a notice of intent to file such a license application. Submission of a timely notice of intent allows an interested person to file the competing license application no later than May 4, 1982. Applications for preliminary permit will not be accepted.

A notice of intent must conform with the requirements of 18 CFR 4.33(b) and (c) (1980). A competing license application must conform with the requirements of 18 CFR 4.33(a) and (d) (1980).

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of its rules of practice and procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before February 8, 1982.

Filing and Service of Responsive Documents—Any filings, must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB, 825 North Capitol Street, NE., Washington, D.C. 20426. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-36729 Filed 12-23-81; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP82-98-000]

Natural Gas Pipeline Company of America; Application

December 21, 1981.

Take notice that on December 1, 1981, Natural Gas Pipeline Company of America (Applicant), 122 South Michigan Avenue, Chicago, Illinois

60603, filed in Docket No. CP82–98–000 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale of natural gas to West Lake Arthur Distribution Company (West Lake) on an interruptible basis, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Pursuant to a June 4, 1981, gas sales agreement, Applicant proposes to sell up to 20,000,000 Mcf of natural gas to West Lake for a term of 363 days from the date of first deliveries. It is stated that Applicant would deliver the gas to Trunkline Gas Company (Trunkline) for West Lake's account at an existing delivery point in Texas. Trunkline would deliver the gas to Suger Bowl Gas Corporation which would transport the gas to West Lake in Louisiana.

It is asserted that Applicant would charge West Lake for each million Btu of gas sold hereunder a rate equal to the average of the rates effective under Applicant's currently effective Rate Schedules E-1, G-1 and WS-1 each minus the GRI surcharge which rate is presently approximately $2.95 per million Btu.

It is stated that West Lake would use the gas for its general system supply. Applicant states that it has sufficient supply to make this sale without impairing or reducing service to its present customers because of excess deliverability due to high take or pay obligations and a significant reduction in demand.

Any person desiring to be heard or to make any protest with reference to said application should on or before January 12 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to be come a party to a proceeding or to participate as a party in any hearing herein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designees on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81–36739 Filed 12–23–81; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. CP74–35]

Pacific Offshore Pipeline Co.; Applicant's Report on Financing and Petition for Approval of Financing and Petition for Approval of Financing Plan and for Adjustment of Certificate Procedures Regarding Authorized Returns on Equity

December 21, 1981.

Take notice that on November 4, 1981, Pacific Offshore Pipeline Company, formerly Exxon Pipeline Company of California (Applicant), P.O. Box 3249, Los Angeles, California 90051, filed in Docket No. CP74–35 a report on financing pursuant to Ordering Paragraph (I) of the Commission's order issued June 8, 1981, in the instant docket, and § 157.14(a)(14) of the Commission's Regulations, requesting Commission approval of its financing plan and a determination that the interest rates, the formula by which the rates would be adjusted annually and other provisions of the debt financing are reasonable and prudent, approval of the related tariff and other changes required to finance and build the Hindo-Las Flores Canyon Project, and authorization for an equity return of twenty percent during construction of the proposed project, all as more fully set forth in the report which is on file with the Commission and open to public inspection.

It is submitted that on March 17, 1981, Applicant was authorized to construct and operate facilities required to transport and treat portions of Exxon's Hondo gas and to sell the natural gas for resale to Pacific Lighting Gas Supply Company (PLGS).

It is stated that the Commission's order of June 8, 1981, authorized Applicant to file a request for adjustments when it had finalized its financing plan. Applicant states that it now has commitments for $85,000,000 from three insurance companies for construction and permanent debt financing of the project on a "project financing" basis and that fulfillment of these commitments is subject only to the preparation and execution of all necessary documentation.

Applicant explains that the debt financing plan consists of $50,000,000 of 18 percent Series A Adjustable Rate Notes due August 1, 2003, and $15,000,000 of 7¼ percent Series B Adjustable Rate Notes due February 1, 1992. In addition, Applicant would until June 1, 1983, have the option to draw down up to an additional $5,000,000 in the event that 70 percent of Applicant's actual construction expenditures would exceed $85,000,000. The initial rate of the Series A and B Notes would remain in effect through January 31, 1983. Thereafter, the rates for the Series A and B Notes would be reset annually at amounts equal to 123 percent and 119 percent, respectively, of the prior 4-weeks' average of 10-year Treasury Constant Maturity Index. The interest rate on the Series A and B Notes would not exceed 25 percent nor be less that 10 percent at any time and would be governed by the law of the State of New York. Interest on the Series A and B Notes would be paid semi-annually on February 1 and August 1 of each year beginning February 1, 1982 for the Series A Notes and August 1, 1982, for the Series B Notes. Beginning February 1, 1984, and continuing on each semi-annual note payment date until maturity, principal payments of 2.5 percent of the aggregate of the Series A and B Notes originally issued would be made. The Series A Notes may not be prepaid prior to March 1 1993; thereafter they may be prepaid under certain circumstances at a redemption price which ranges from 107.2 percent to 100 percent. The Series B Notes may not be prepaid at any time during the life of the Notes.

Applicant further explains that subject to a timely approval of the financing plan by the Commission and satisfactory completion of documentation, $16,500,000 of the Series A Notes would be available for delivery on or about December 15, 1981. The balance of the Series A Notes, $33,500,000, and the $15,000,000 of Series B Notes would be delivered on or about March 1, 1982.

It is asserted that as a requirement of the project financing, the lenders insisted on an assignment to the trustee of the revenues payable under

Applicant's approved tariff by the ultimate purchaser of Applicant's gas, Southern California Gas Company (SoCal). This assignment would have involved pledging the revenues due to PLGS from SoCal under the Resale Agreement. PLGS was unable to make such an assignment because of a negative pledge covenant in its present indenture, it is said. Therefore, a new resale agreement has been signed between Applicant and SoCal for whom this gas was and is ultimately destined. PLGS would not be a party to the gas purchase and sale transaction and SoCal would be substituted as buyer from Applicant. Payments by SoCal would continue to be made directly to Applicant and from Applicant to the lenders so long as Applicant is not in default.

Applicant estimates that the out-of-pocket capital costs for the pipeline from Exxon's Hondo platform to the gas treatment plant and for the plant would aggregate $92,900,000, including interest on debt during construction at an average rate of 17.83 percent. Applicant would finance 70 percent of such capital costs with the funds obtained from the sale of securities as outlined in the report. The remaining out-of-pocket capital costs would be financed with equity from Applicant's parent, Pacific Interstate Company, which in turn would receive such funds from its parent, Pacific Lighting Corporation. Assuming an equity return of 20 percent as requested herein the total investment for the project including equity AFUDC is expected to aggregate $100,600,000. On this basis the three year average cost of service produces an initial rate of $5.47 per million Btu, it is asserted.

Applicant states that when this project goes into operation, Applicant's capital structure would equate to 65 percent debt and 35 percent equity as follows:

	$M	Percent Debt	Percent Equity
Out-of-pocket capital costs: Estimated construction costs	[illegible]	70	30
Estimated interest during construction	12.0	70	30
Total	[illegible]	70	30
Equity AFUDC and other costs	7.7		100
Total project cost	100.6	65	35

It is further explained that the equity component to which an equity return allowance would be applied is comprised of 30 percent of the out-of-pocket capital costs including interest accrued during construction plus equity AFUDC, and the debt component is comprised solely of 70 percent of the capital costs.

Applicant states that it would deposit the proceeds from the sale of the Notes into an escrow account where funds would become available to Applicant to the extent of 70 percent of actual expenditures and upon presentation of a certificate to the escrow agent evidencing actual expenditures for construction and the escrowed funds would be invested in "eligible investments" as defined in the Summary of Terms of the Offering Memorandum. As between Applicant and Pacific Lighting Corporation, Applicant would be required to pay interest only on those funds drawn down for construction purposes; interest on funds not yet requested by Applicant would be paid by Pacific Lighting Corporation.

Applicant states that three principal changes have been made in the *Pro Forma* Tariff as submitted to the Commission in the Amendment to Application of Pacific Offshore Pipeline Company for a certificate of public convenience and necessity filed June 6, 1979. These changes, Applicant states, are as follows:

(1) The first principal change is in section 5 of the Rate Schedule G–1. Section 5 has been changed to reflect the treatment of revenues and costs during the initial year of operations as per Ordering Paragraph (F) of the June 8, 1981, order. According to this Ordering Paragraph, Applicant would treat all revenues and costs as "earnings and expenses during construction" and record AFUDC in accordance with 18 CFR Part 201 during the initial year of operation.

(2) Section 6 has been added to Rate Schedule G–1 describing the take-or-pay obligations between Buyer and Seller as specified in the Resale Agreement between Applicant and SoCal.

(3) An Interest Cost Adjustment Provision has been added as section 15 of the General Terms and Conditions to carry out the intent of the June 8, 1981, Order as stated on page 14 and Ordering Paragraph (I). Lenders are relying on the ability of Applicant to recoup promptly charges and debt service costs and have made Commission approval of this tariff provision a condition of their commitment. On Page 14 of the June 8, Order, the Commission stated,

> Applicant will be permitted to recover all actual prudent debt costs, that is, Applicant will be permitted to recover debt costs in the manner and under the terms set out in the proposed tariff, so long as the interest rate and other provisions of the debt financing are reasonable and prudent in the judgment of the Commission.

In addition, section 16 has been added at the request of the lenders to clarify the buyer's obligations under the Minimum Bill and Monthly Fixed Charge.

Applicant states that it requested an after-tax rate of return on equity of 15 percent when its amendment was filed in June of 1979. The March Decision provided for an equity return of 12.8 percent or one-half of one percentage point above the assumed cost of debt of 12.3 percent. The June 8 order increased the return on equity allowance to the level requested in 1979.

Applicant asserts that current economic and market conditions clearly demonstrate that the 15 percent return on equity proposed in 1979, when debt costs were assumed to be 10 percent is not reasonable nor appropriate for equity which must be committed to this project today. Accordingly, Applicant submits herewith an analysis of the cost of equity capital of Pacific Lighting Corporation, the equity source for this project. Applicant asserts that this analysis produces a range of 18.9 percent to 23.0 percent as the current cost of equity capital to Pacific Lighting Corporation, and is based on three methods:

(1) Earnings Valuation Method. This method relates the earnings of Pacific Lighting Corporation common stock to its market value. The investor's required return i.e., the company's cost of capital, is calculated by dividing earnings by the market price of the stock.

(2) Dividend Valuation Method. This method is based on the recognition that an investor in common stock is interested in the future return on his investment in the form of future dividends plus the value of his investment at the end of a future period. The cost of equity capital is determined by taking the current dividend yield and adding to it the estimated rate at which investors expect the dividend will grow in the future.

(3) Utility Bond to Equity Risk Premium Method. This method is based on investors' requirements of a higher return on common equity capital than on debt capital. The investors required return, i.e., the company's cost of equity capital, is calculated by adding a risk premium to the current bond yield.

It is indicated that the lower end of the range is reflected by the Earnings Valuation Method and in effect is the rate Pacific Lighting Corporation would realize if it repurchased its own shares in the open market. Applicant asserts that this obviously would entail none of the risks associated with investment in Applicant's project, and that,

accordingly, a return of equity of at least 20 percent is clearly warranted and appropriate for this project.

Applicant states that no matter what rationale is used, there is greater risk to equity in this project than to the debt, and that equity in this project continues to bear the completion risk, the market risk, the political risk, the reserve life risk, the force majeure risks and the risks inherent in a single source of associated gas, the production of which is in the sole control of Exxon Corporation. These are the risks in existence now and for which the equity is entitled to a fair and reasonable return now, it is asserted. Further, it is asserted, as the cost of debt has continued to increase, so too has the cost of equity, and that the equity investment in this project represents new equity money, for which the current market costs of equity money would be incurred. If that cost is not allowed as the equity rate of return, the result could only be a negative impact on the market price of Pacific Lighting Corporation's common stock, it is asserted. Applicant submits that this could then impair Applicant's ability to raise capital and would ultimately increase the cost of service to customers. Rates of return for new companies which require both new debt and new equity should not be constrained by rates of return existing for mature operating gas transmission companies, it is asserted. Applicant therefore urges this Commission, as part of its review and approval of the financing package, to adjust the return on equity for the interim period to reflect its actual current cost of at least 20 percent.

Any person desiring to be heard or to make any protest with reference to said report should on or before January 12, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

[Docket No. ER78-338]

Public Service Company of New Mexico; Compliance Filing

December 17, 1981.

The filing Company submits the following:

Take notice that on December 9, 1981, Public Service Company of New Mexico filed an additional compliance report in accordance with the Commission's Opinion No. 133, issued November 9, 1981. The compliance report contains the annualized test period revenues for the currently effective retail rates prescribed by the New Mexico Public Service Commission and a comparative rate of return analysis for retail service to the City of Gallup, New Mexico.

Any person desiring to be heard or to protest this filing should file comments with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, on or before January 7, 1982. Comments will be considered by the Commission in determining the appropriate action to be taken. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-36728 Filed 12-23-81; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 2937-001]

Quincy-Columbia Basin Irrigation District, East-Columbia Basin Irrigation District, and South-Columbia Basin Irrigation District; Application for a Major License

December 22, 1981.

Take notice that Quincy-Columbia Basin Irrigation District, East-Columbia Basin Irrigation District and South-Columbia Basin Irrigation District (Applicant) jointly filed on October 19, 1981, an application for license (pursuant to the Federal Power Act, 16 U.S.C. 791(a)—825(r)) for the proposed Quincy Chute Hydroelectric project, FERC No. 2937, to be located at the base of the U.S. Bureau of Reclamation's (USBR) Quincy Chute, a drop structure at canal mile 37.7 on the West Canal of the USBR's Columbia Basin Project in grant County, near Quincy, Washington. The project would affect lands for which the United States has easement rights and are under the administration of USBR. Correspondence with the Applicant should be directed to: Mr. Tom Cotton, Manager, Quincy-Columbia Basin Irrigation District, P.O. Box 188, Quincy, Washington 99848 with copies to: Mr. John Baird, Baird and White, P.O. Box 605, Ephrata, Washington 98823.

Project Description The proposed project would consist of: (1) An intake structure consisting of short canal, a bar screen structure, and a transition section; (2) a 1,470-foot long, 14-foot diameter steel penstock leading to; (3) a powerhouse to contain a Kaplan-type, turbine-generating unit with a rated capacity of 7.8 MW; (4) a tailrace channel; (5) a 1.8-mile long, 115-kV transmission line; and (6) a substation to be built next to an existing 115-kV Grant County PUD No. 2 Transmission line.

Purpose of Project—Project energy would be sold to Bonneville Power Administration or a utility company. The estimated average annual energy output is 29.23 million kWh. The West Canal, in the vicinity of the proposed project does not receive substantial recreational use and has limited potential for recreation. Applicant proposes no recreational facilities at the project site since the existing irrigation facilities have inherent safety hazards because of the chute. Applicant estimates the cost of the project to be about $13.7 million.

Competing Applications—Anyone desiring to file a competing application must submit to the Commission, on or before March 1, 1982, either the competing application itself [See 18 CFR 4.33(a) and (d)] or a notice of intent [See 18 CFR 4.33(b) and (c) to file a competing application. Submission of a timely notice of intent allows an interested person to file an acceptable competing application no later than the time specified in § 4.33(c) or § 4.101 et. seq. (1981).

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests or petitions to intervene must be received on or before March 1, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be

filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-36734 Filed 12-23-81; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 5810-000]

Town of Skykomish; Application for Preliminary Permit

December 18, 1981.

Take notice that the Town of Skykomish (Applicant) filed on November 5, 1981, an application for preliminary permit (pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)) for Project No. 5810 to be known as the Upper North Fork Skykomish Hydropower Project located on the North Fork of the Skykomish River in Snohomish County, Washington. The project would lie within Snoqualmie National Forest. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Town of Skykomish, P.O. Box 308, Skykomish, Washington 98288, Attention: Mayor.

Project Description—The proposed project would consist of: (1) A reinforced concrete and natural rock diversion dam 7 feet high with a negligible storage; (2) approximately 3 miles of open diversion channel and 1 mile of buried pipeline; (3) surge tank and 800 feet of penstock; (4) a powerhouse containing a turbine generator with 12.5 MW capacity and 60 GWh annual energy production; and (5) appurtenant facilities. Power produced would be used to offset power purchases made by the Town of Skykomish.

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. The Applicant seeks issuance of a preliminary permit for a term of 24 months, during which time engineering, economic and environmental studies will be conducted to ascertain project feasibility and to support application for a license to construct and operate the project. The estimated cost of those activities is $100,000.

Competing Applications.—Anyone desiring to file a competing application for preliminary permit must submit to the Commission, on or before March 22, 1982, the competing application itself, or a notice of intent to file such an application (see: 18 CFR 4.30 et seq. (1981)).

The Commission will accept applications for license or exemption from licensing, or a notice of intent to submit such an application in response to this notice. A notice of intent to file an application for license or exemption must be submitted to the Commission on or before February 22, 1982, and should specify the type of application forthcoming. Any application for license or exemption from licensing must be filed in accordance with the Commission's regulations (see: 18 CFR 4.30 et seq. or 4.101 et seq. (1981), as appropriate).

Submission of a timely notice of intent to file an application for preliminary permit, allows an interested person to file an acceptable competing application for preliminary permit no later than April 22, 1982.

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before February 22, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-36730 Filed 12-23-81; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP82-102-000]

Southern Natural Gas Co.; Application

December 21, 1981.

Take notice that on December 2, 1981, Southern Natural Gas Company (Applicant), P.O. Box 2563, Birmingham, Alabama 35202, filed in Docket No. CP82-102-000 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the acquisition and operation of certain natural gas facilities from Black Warrior Pipeline Company (Black Warrior), a wholly-owned subsidiary of Applicant, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant requests authorization to acquire approximately 9 miles of 8⅝-inch pipeline, approximately 8 miles of gathering pipeline and certain appurtenant facilities located in Monroe County, Mississippi. The facilities were originally constructed to gather and transport the total gas deliverable from reserves owned by certain producers in the Corinne Field, Monroe County, to Mississippi Valley Gas Company (MVG).

It is stated that W. R. Grace & Company committed to Applicant an approximate 50 percent interest in the North Corinne Field reserves which Black Warrior agreed to transport to the Muldon Storage Field, Monroe County, Mississippi, which service required Black Warrior to construct approximately 4.5 miles of additional pipeline and certain appurtenant facilities. Applicant explains that as a result of its inability to take all the gas available to it, MVG arranged to cancel its contract for the purchase of the North Corinne Field reserves and on November 11, 1980, Applicant contracted to purchase those reserves

from the sellers subject to receipt by Black Warrior of Commission approval of a long-term transportation service pursuant to section 311(a)(2) of the Natural Gas Policy Act of 1978.

It is stated that the November 11, 1980, gas purchase contract grants the parties the right to cancel the contract if an acceptable authorization is not issued to Black Warrior by November 11, 1981, but Applicant does not wish to cancel the contract and has notified the sellers that it would seek to acquire the facilities of Black Warrior in order to begin receiving the additional reserves in an expeditious manner. Applicant states that it would acquire all the facilities of Black Warrior at their book value by liquidation of Black Warrior at a total acquisition cost of $2,297,786.

It is asserted that Grace Petroleum Corporation would continue to operate a portion of said facilities pursuant to an operating agreement between Grace Petroleum Corporation and Black Warrior.

Any person desiring to be heard or to make any protest with reference to said application should on or before January 12, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-38735 Filed 12-23-81; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 5441-000]

Southern Utah Valley Power Project; Application for Short-Form License (Minor)

December 21, 1981.

Take notice that the Southern Utah Valley Power Project (Applicant) filed on September 24, 1981, an application for short-form license (minor) (pursuant to the Federal Power Act, 16 U.S.C. 791(a)—825(r)) for Project No. 5441 to be known as the Santaquin Project located on Summit Creek near Santaquin in Utah County, Utah. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. Clark Bigler, Executive, Southern Utah Valley Power Project, Box 371, Payson, Utah 84651 and Ronald G. Greening, Esquire, Duncan, Allen and Mitchell, 1575 Eye Street, N.W., Washington, D.C. 20005.

Project Description.—The proposed run-of-the-river project would consist of existing facilities including: (1) A small reinforced concrete diversion dam, 14.5 feet long and 5.5 feet high, with no significant impoundment; (2) a gated intake structure with trash screen; and new project works to include, (3) a 30-inch diameter steel penstock about 14,000 feet long, (4) a sheet metal-steel framed powerhouse, 20 feet wide and 30 feet long, housing an impulse-type turbine and generating unit rated at 600 kW or 800 kW capacity (depending on minimum flow release requirements yet to be decided upon by the Utah Division of Fish and Wildlife Resources); (5) a short 60-inch diameter steel discharge line; (6) a tailrace channel; (7) a 300-feet long 7.2/12.5-kV transmission line; (8) electrical facilities; and (9) other appurtenances. Applicant estimates annual generation would average 3,300,000 kWh without minimum flow requirments, and 1,800,000 kWh with minimum flow requirements. Project energy will be utilized within the Applicant's distribution system for sale to retail customers.

Competing Applications.—Anyone desiring to file a competing application must submit to the Commission, on or before February 24, 1982, the competing application itself, (See 18 CFR 4.33(a) and (d)) or a notice of intent (See 18 CFR 4.33(b) and (c)) to file such an application. Submission of a timely notice of intent allows an interested party to file an acceptable competing application no later than the time specified in § 4.33(c) or § 4.101 (c) or § 4.101 et seq. (1981).

Agency Comments.—Federal, State, and local agencies that receive this notice through direct mailing from the Commission are requested to provide comments pursuant to the Federal Power Act, the Fish and Widlife Coordination Act, the Endangered Species Act, the National Historic Preservation Act, the Historical and Archeological Preservation Act, the National Environmental Policy Act, Pub. L. No. 88-29, and other applicable statutes. No other formal requests for comments will be made.

Comments should be confined to substantive issues relevant to the issuance of a license. A copy of the application may be obtained directly from the Applicant. If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions To Intervene.—Any one may submit comments, a protest, or a petition to intervene in accordance with the requirements of the rules of practice and procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before February 24, 1982.

Filing and Service of Responsive Documents.—Any filings must bear in all capital letters the title "COMMENTS", "PROTESTS", or "PETITION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any petition to intervene must also be served upon each representative of the

Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. ST82-55-000]

Supenn Pipeline; Application for Approval of Rates

December 18, 1981.

Take notice that on November 16, 1981, Supenn Pipeline (Applicant), P.O. Box 51108, Lafayette, Louisiana 70505, filed in Docket No. ST82-55-000 an application pursuant to Part 284 of the Commission's Regulations under the Natural Gas Policy Act of 1978 for approval of rates charged for transporting natural Gas Company (Southern), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes a rate of 13.04 cents per Mcf as fair and equitable for transporting gas for both United and Southern.

Any person desiring to be heard or to make any protest with reference to said application should on or before January 11, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Lawrence R. Taft; Application for Preliminary Permit

December 18, 1981.

Take notice that Lawrence R. Taft (Applicant) filed on August 24, 1981, an application for preliminary permit (pursuant to the Federal Power Act, 16 U.S.C. 791(a)-825(r)) for Project No. 5286 to be known as the Cranberry Lake Power Project located on the East Branch Oswegatchie River in the Town of Clifton, St. Lawrence County, New York. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Philip J. Movish, Daverman & Associates, 500 South Salina Street, Syracuse, New York 13202.

Project Description—The proposed project would utilize existing facilities owned by the Oswegatchie River-Cranberry Lake Commission consisting of: (1) A 162-foot long and 17-foot high concrete gravity-type dam having a 110-foot long spillway section and having five sluice ways; (2) a reservoir having a surface area of 6,975 acres and a storage capacity of 60,100 acre-feet at normal maximum pool elevation 1,486 m.s.l.; and (3) appurtenant facilities.

Applicant proposes to construct a new powerhouse at the toe of the dam containing three generating units having a total rated capacity of 400 kW. Applicant estimates that the average annual energy output would be 2,450,000 kWh. Project energy would be sold to Niagara Mohawk Power Corporation.

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit for a period of 36 months, during which time it would perform technical and economic feasibility studies, investigations, and the work involved to prepare an application for a FERC license. Applicant estimates the cost of the studies under the permit would be $10,000.

Competing Applications—Anyone desiring to file a competing application for preliminary permit must submit to the Commission on or before March 19, 1982, the competing application itself, or a notice of intent to file such an application (see: 18 CFR 4.30 et seq. (1981); and Docket No. RM81-15, issued October 29, 1981, 46 FR 55245, November 9, 1981.)

The Commission will accept applications for license or exemption from licensing, or a notice of intent to submit such an application in response to this notice. A notice of intent to file an application for license or exemption must be submitted to the Commission on or before February 19, 1982, and should specify the type of application forthcoming. Any application for license or exemption from licensing must be filed in accordance with the Commission's regulations (see: 18 CFR 4.30 et seq. or 4.101 et seq. (1981), as appropriate).

Submission of a timely notice of intent to file an application for preliminary permit, allows an interested person to file an acceptable competing application for preliminary permit no later than April 19, 1982.

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before February 19, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP82-54-000]

Texas Eastern Transmission Corp.; Application

December 21, 1981.

Take notice that on November 24, 1981, Texas Eastern Transmission Corporation (Texas Eastern), P.O. Box 2521, Houston, Texas 77001, filed in

Docket No. CP82–94–000 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of natural gas for Elizabethtown Gas Company (Elizabethtown), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Pursuant to a transportation agreement dated November 16, 1981, Applicant proposes to transport up to 40,000 dekatherms (dt) equivalent of natural gas per day less quantities retained for applicable shrinkage for the account of Elizabethtown. It is submitted that Elizabethtown has purchased a supply of natural gas from Consolidated Gas Supply Corporation (Consolidated) to help fulfill its need for a greater natural gas supply.

Applicant states it would receive the subject gas by displacement from Consolidated at the existing point of interconnection between Applicant and Consolidated located at Applicant's meter station 082 in Westmoreland County, Pennsylvania, or at other mutually agreeable existing delivery points in Applicant's Zone C and would redeliver equivalent quantities to Elizabethtown at the existing point of interconnection between Applicant and Elizabethtown located at Applicant's meter station 275 in Middlesex County, New Jersey, or other mutually agreeable existing points of delivery. Applicant proposes in the alternative to transport and deliver the subject gas to Transcontinental Gas Pipe Line Corporation (Transco) for the account of Elizabethtown at the existing point of interconnection between Applicant and Transco at Transco's meter station 249 at Skippack, Pennsylvania, or Transco's meter station 244 located at Linden, New Jersey, for delivery to Elizabethtown.

Applicant states it would perform the proposed transportation service for a term of one year commencing on the date of initial delivery.

It is asserted that Applicant would charge Elizabethtown its presently applicable Rate Schedule TS–1 basic rate of 13.98 cents per dt equivalent; provided, however, for quantities transported and delivered by Applicant which when added to the quantities delivered to Elizabethtown under Applicant's Rate Schedules TS–1 and SS–11 and other transportation agreements exceed the combined total curtailment of natural gas sales to Elizabethtown under all of Applicant's firm sales rate schedules, Applicant would charge Elizabethtown the presently effective Rate Schedule TS–1 excess rate of 16.02 cents per dt equivalent. In addition, Applicant would retain 3.0 percent of all gas received for transportation from April 16 through November 15 of each year and 6.0 percent of all gas received for transportation from November 16 through April 15 of each year for shrinkage.

Applicant further proposes to retain all revenues resulting from transportation of gas for Elizabethtown.

The service proposed herein would enable Elizabethtown to implement its agreement to purchase gas from Consolidated.

Any person desiring to be heard or to make any protest with reference to said application should on or before January 12, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81–36740 Filed 12–23–81; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. CP82–95–000]

Transcontinental Gas Pipe Line Corp.; Application

December 21, 1981.

Take notice that on November 25, 1981, Transcontinental Gas Pipe Line Corporation (Applicant), P.O. Box 1396, Houston, Texas 77251, filed in Docket No. CP82–95–000 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of natural gas on behalf of UGI Corporation, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to transport natural gas which is available to UGI pursuant to a storage arrangement between Penn-York Energy Corporation (Penn-York) and UGI. It is asserted that Penn-York would make up to 20,000 dekatherms (dt) equivalent of natural gas per day available to its affiliate, National Fuel Gas Supply Corporation, which in turn, would redeliver equivalent quantities to Applicant. Applicant states it would redeliver thermally equivalent quantities of gas, less compressor fuel and line loss make-up, to Columbia Gas Transmission Corporation (Columbia) for the account of UGI at the existing delivery points between Applicant and Columbia at Downingtown, Pennsylvania, and Rockville, Maryland, or other existing delivery points within Applicant's Rate Zone 3.

Applicant proposes such service for a term beginning on the date of initial deliveries and ending March 31, 1982. The transportation would be interruptible at Applicant's sole discretion. It is stated that UGI would initially pay Applicant 7.0 cents per dt equivalent for the proposed service and Applicant would retain 0.7 percent of the quantities received for compressor fuel and line loss make-up.

It is asserted that UGI would use the subject gas to reduce its anticipated curtailment during the current winter heating season.

Any person desiring to be heard or to make any protest with reference to said application should on or before January 12, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the

appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket Nos. RM79-34 and ST82-1]

Transportation Certificates for Natural Gas Displacement of Fuel Oil and United Gas Pipe Line Co.; Self-Implementing Transactions

December 17, 1981.

Take notice that the following transactions have been reported to the Commission as being implemented pursuant to Part 284 of the Commission's Regulations and sections 311 and 312 of the Natural Gas Policy Act of 1978 (NGPA). The "Recipient" column in the following table indicates the entity receiving or purchasing the natural gas in each transaction.

The "Part 284 Subpart" column in the following table indicates the type of transaction. A "B" indicates transportation by an interstate pipeline pursuant to § 284.102 of the Commission's Regulations.

A "C" indicates transportation by an intrastate pipeline pursuant to § 284.122 of the Commission's Regulations. In those cases where Commission approval of a transportation rate is sought pursuant to § 284.123(b)(2), the table lists the proposed rate and expiration date for the 150-day period for staff action. Any person seeking to participate in the proceeding to approve a rate listed in the table should file a petition to intervene with the Secretary of the Commission.

A "D" indicates a sale by an intrastate pipeline pursuant to § 284.142 of the Commission's Regulations and section 311(b) of the NGPA. Any interested person may file a complaint concerning such sales pursuant to § 284.147(d) of the Commission's Regulations.

A "E" indicates an assignment by an intrastate pipeline pursuant to § 284.163 of the Commission's Regulations and section 312 of the NGPA.

An "F" indicates a fuel oil displacement transaction implemented pursuant to § 284.202 of the Commission's Regulations. Any interested persons may file a complaint concerning such transaction pursuant to § 284.205(d) of the Commission's Regulations.

A "G" indicates transportation by an interstate pipeline on behalf of another interstate pipeline pursuant to a blanket certificate issued under § 284.221 of the Commission's Regulations.

A "G (HT)" indicates transportation, sales or assignments by an Hinshaw Pipeline pursuant to a blanket certificate issued under § 284.222 of the Commission's Regulations.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP80-358-001]

United Gas Pipe Line Co.; Petition To Amend

December 18, 1981.

Take notice that on November 30, 1981, United Gas Pipe Line Company (Petitioner), P.O. Box 1478, Houston, Texas 77001, filed in Docket No. CP80-358-001 a petition to amend the order issued August 4, 1980, pursuant to Section 7(c) of the Natural Gas Act and § 157.7(b) of the regulations thereunder (18 CFR 157.7(b)) so as to authorize the construction and operation of a gas purchase facility project in excess of the single project cost limitation of $3,500,000, all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

Petitioner states that it was authorized by order issued August 4, 1980, to construct and operate certain natural gas facilities with a maximum total cost limitation of $20,000,000 with no single onshore project to exceed $2,500,000 and no single offshore project to exceed $3,500,000.

It is stated that Petitioner acquired the right to purchase production from gas reserves underlying South Pass Block 78 Area, offshore Louisiana. Southern Natural Gas Company (Southern) and Natural Gas Pipeline Company of America (Natural) also arranged to purchase production from reserves in the area. Petitioner explains that in order to make the South Pass 78 reserves available to the respective pipeline systems, Petitioner, Southern and Natural agreed to enter into a construction, ownership, operation and maintenance agreement which provides for construction of approximately 2.3 miles of 16-inch pipeline and appurtenant facilities at an estimated cost of $3,300,000.

It is submitted that due to delays attributed to bad weather, problems with the pipeline riser attachment and production platform repairs the actual cost of the project would exceed Petitioner's single project offshore limit by $1,800,000. Petitioner requests amendment of the order of August 4, 1980, so as to authorize the construction of the above described project at a cost not to exceed $5,300,000.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before January 11, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. ST80-12-001]

Valero Transmission Co., Extension Reports

December 17, 1981.

The companies listed below have filed extension reports pursuant to section 311 of the Natural Gas Policy Act of 1978 (NGPA) and Part 284 of the Commission's regulations giving notice of their intention to continue transportation and sales of natural gas for an additional term of up to 2 years. These transactions commenced on a self-implementing basis without case-by-case Commission authorization. The Commission's regulations provide that the transportation or sales may continue for an additional term if the Commission does not act to disapprove or modify the proposed extension during the 90 days preceding the effective date of the requested extension.

The table below lists the name and addresses of each company selling or transporting pursuant to Part 284; the party receiving the gas; the date that the extension report was filed; and the effective date of the extension. A letter "B" in the Part 284 column indicates a transportation by an interstate pipeline which is extended under § 284.105. A letter "C" indicates transportation by an intrastate pipeline extended under § 284.125. A "D" indicates a sale by an intrastate pipeline extended under § 284.146.

Any person desiring to be heard or to make any protest with reference to said extension report should on or before January 5, 1981 file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protest filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants party to a proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Valero Transmission Co.; Extension Reports

December 17, 1981.

The companies listed below have filed extension reports pursuant to section 311 of the Natural Gas Policy Act of 1978 (NGPA) and Part 284 of the Commission's regulations giving notice of their intention to continue transportation and sales of natural gas for an additional term of up to 2 years. These transactions commenced on a self-implementing basis without case-by-case Commission authorization. The Commission's regulations provide that the transportation or sales may continue for an additional term if the Commission does not act to disapprove or modify the proposed extension during the 90 days preceding the effective date of the requested extension.

The table below lists the name and addresses of each company selling or transporting pursuant to Part 284; the party receiving the gas; the date that the extension report was filed; and the effective date of the extension. A letter "B" in the Part 284 column indicates a transportation by an interstate pipeline which is extended under § 284.105. A letter "C" indicates transportation by an intrastate pipeline extended under § 284.125. A "D" indicates a sale by an intrastate pipeline extended under § 284.146.

Any person desiring to be heard or to make any protest with reference to said extension report should on or before January 14, 1981 file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants party to a proceeding. BILLING CODE 6717-02-M

[Project No. 1940]

Wisconsin Public Service Corp.; Expiration of License

December 18, 1981.

Take notice that the license for the Tomahawk Project No. 1940 will expire on December 31, 1986. The project is located on the Wisconsin River in Lincoln County, Wisconsin and is licensed to Wisconsin Public Service Corporation.

The principal project works currently licensed for Project No. 1940 are: A dam, a reservoir, a powerhouse with an installed capacity of 2.6 MW, and appurtenant facilities.

This notice is issued pursuant to the regulations of the Federal Energy Regulatory Commission, 18 CFR 16.2 (1981). The Commission licenses non-federal water-power projects for periods up to 50 years pursuant to the Federal Power Act, 16 U.S.C. 791a–825r. When a license expires, the Commission may issue a new license to the original licensee or to a new licensee, or may recommend to Congress that the United States acquire the project.

Under the Commission's regulations, the current licensee must file its application for a new license from three to five years before the current license expires. Any other entity seeking the license must file an application in accordance with 18 CFR 16.3(b). When an application is filed, notice will be published and interested persons will have a further opportunity to submit a competing application, file a protest or comment, seek to intervene, or recommend that the United States acquire the project.

BILLING CODE 6717-01-M

[Docket No. ER82-149-000]

Carolina Power & Light Co.; Cancellation

December 18, 1981.

The filing Company submits the following:

Take notice that the Carolina Power & Light Company (Carolina) on November 27, 1981, tendered for filing a Notice of Cancellation. Carolina states that per Agreement dated June 8, 1981, Pinehurst, Inc., sold to and transferred to Carolina its distribution system. Carolina states that notice is hereby given that effective October 29, 1981, Rate Schedule FPC No. 105, effective date June 1, 1973, and filed with the Federal Energy Regulatory Commission by Carolina is to be cancelled. Carolina further states that henceforth the customers served by Pinehurst, Inc., will receive service from Carolina under the Company's applicable retail rate schedule.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before January 8, 1982. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Central Power and Light Co. Order Accepting for Filing and Requiring Attachment of Exhibits to Rate Schedule, Waiving Notice Requirements, Granting Interventions, and Terminating Docket

Issued: December 21, 1981.

On August 7, 1981, as completed on October 23, 1981,[1] Central Power & Light Company (CP&L) tendered for filing a proposed rate schedule which makes available transmission service by CP&L and West Texas Utilities Company (WTU) to the City of Brownsville, Texas (Brownsville).[2] On September 28, 1981, WTU filed a certificate of concurrence together with a letter agreement which indicates the pertinent terms and conditions concerning WTU's participation in rendering transmission service to Brownsville. The agreement provides for firm and non-firm transmission service,[3] with non-firm service to be supplied on an if-and-when-available basis and interruptible at the option of the company. CP&L requests waiver of the notice requirements and an effective date to coincide with the filing date of the original submittal.

Notice of the filing was issued on August 17, 1981, with responses due on or before September 4, 1981. On September 4, 1981, separate petitions to intervene were filed by a group of WTU's cooperative customers [4] (Texas cooperatives) and by South Texas Electric Cooperative, Inc. and Medina Electric Cooperative (STEC/MEC). Because STEC/MEC and Texas Cooperatives presently receive or are interested in receiving transmission service from CP&L, they request intervention in the instant docket. However, neither STEC/MEC nor Texas Cooperatives has requested that a hearing be held. STEC/MEC does request that the Commission confirm STEC/MEC's belief that barring circumstances which would make the rendition of transmission services infeasible, a refusal by CP&L to provide STEC/MEC the same types of service under the same or similar circumstances as are described in the CP&L/Brownsville agreement would be discriminatory and unlawful.

On September 8, 1981, Brownsville filed a petition to intervene and a motion to enlarge the proposed rate schedule. Brownsville does not object to the CP&L's filing, the proposed effective date, or the request for waiver of notice, provided that the rate schedule is enlarged to include certain letters containing terms and conditions which, according to Brownsville, are an integral part of the contractual arrangements between the parties and must be included as part of the filed rate schedule.

On September 23, 1981, CP&L responded to Brownsville's petition to intervene, contending that the tendered rate schedule is complete and that the motion to enlarge the rate schedule should be denied. CP&L asserts that the letters referenced by Brownsville cover matters outside the scope of the proposed transmission service agreement and that all pertinent provisions of the letters relevant to the instant docket have been included in Exhibit C to the agreement.[5]

Discussion

We find that participation in this proceeding by each of the intervenors is in the public interest. Accordingly, the petitions to intervene will be granted.

Our analysis, based on CP&L's and WTU's average system transmission costs indicates that the proposed firm transmission service rates are cost-justified. Inasmuch as the intervenors have not objected to the proposed rates or the requested effective date, we find that good cause exists to grant waiver of the notice requirements and accept the submittal, with the modifications set forth below, to become effective on August 7, 1981, as requested.

We take this opportunity to advise CP&L that it will be necessary pursuant to Section 35.13 of the Commission's regulations, to timely file the formula methodology together with appropriate cost support, prior to the implementation of any change in the rate for firm transmission service. Further, CP&L must timely file the specific rate and appropriate cost support for any non-firm transmission service rendered under the agreement.

As noted, STEC/MEC has requested that the Commission respond to its interpretation of the effects of a hypothetical refusal by CP&L to cooperate in offering STEC/MEC the same types of service under the same or similar conditions as are described in the CP&L/Brownsville agreement. We are unaware of any such refusal to date and we decline to speculate as to the factual circumstances which might underlie such an occurrence. Thus, we shall deny STEC/MEC's motion for clarification as premature; however, we do so without prejudice to any subsequent findings by the Commission concerning requests for transmission service between STEC/MEC and CP&L.

Concerning Brownsville's motion for enlargement of the rate schedule, we note that CP&L has included in the tendered rate schedule excerpts from the letter agreements which relate to the subject transmission service. While it appears that CP&L has attempted to file a complete rate schedule aplicable to the proposed transmission services, we believe that the rate schedule on file with the Commission should include the complete contractual background and *quid pro quos* for establishment of the transmission service rate schedule between CP&L and Brownsville. Accordingly, the letter agreements appended as Attachment A to Brownsville's September 8, 1981 pleading will be designated as exhibits to CP&L's tendered transmission rate schedule. We are, however, cognizant of the fact that the letter agreements may encompass some matters not specifically related to the transmission service agreement and the current designation of the letter agreements should not be construed as a determination at this time with respect to the Commission's jurisdiction over the enforcement of provisions of the letter agreements unrelated to the tendered transmission service agreement.

The Commission orders:

(A) CP&L's request for waiver of the notice requirements is hereby granted.

---

21 By letter dated September 2, 1981, the company was advised that its original submittal was deficient.

22 See Attachment A for rate schedule designations.

23 The charge for non-firm transmission service is to be determined at the time of the transaction in accordance with the Texas Interconnected System Transmission Facilities Policy Guidelines in effect on the date that such service is provided. The proposed charge for firm service until December 31, 1983, is a flat rate depending on the systems involved and the total energy flow. Following that date, CP&L proposes to apply a formula methodology for determining the applicable transmission rate. CP&L states that it will file the formula methodology, the derivation of each component, and appropriate cost support in a timely manner for Commission approval prior to implementation of any change in the firm transmission service rate.

4 Kimble Electric Cooperative, Mid-Tex Electric Cooperative, which includes: Coleman County Electric Cooperative, Concho Valley Electric Cooperative, Dickens Electric Cooperative, Gate City Electric Cooperative, Lighthouse Electric Cooperative, McCullogh Electric Cooperative, Magic Valley Electric Cooperative, Midwest Electric Cooperative, Rio Grande Electric Cooperative, Southwest Texas Electric Cooperative, Stamford Electric Cooperative, and Taylor Electric Cooperative

5 CP&L notes one exception which it agrees should have been filed. That exception is a letter agreement containing certain assurances by WTU which has now been filed by WTU in conjunction with its certificate of concurrence in this docket.

(B) CP&L's submittal is hereby accepted for filing to become effective as of August 7, 1981, without suspension.

(C) CP&L is hereby informed that a timely filing of the rate or formula methodology together with appropriate cost support pursuant to § 35.13 of the Commission's regulations is required prior to the implementation of a change in rates for firm transmission service or the rendering of any non-firm transmission service.

(D) The petitions to intervene in this proceeding are hereby granted subject to the Commission's Rules of Practice and Procedure and the regulations under the Federal Power Act: *Provided, however,* that participation by such intervenors shall be limited to the matters set forth in their petitions to intervene; and *provided, further,* that the admission of such intervenors shall not be construed as recognition that they might be aggrieved by any order of the Commission in this proceeding.

(E) Brownsville's motion to enlarge the tendered rate schedule is hereby granted to the extent discussed above and the letter agreements appended as Attachment A to Brownsville's motion are hereby designated as exhibits to the rate schedule as shown on Attachment A to this order.

(F) Docket No. ER81-662-000 is hereby terminated.

(G) The Secretary shall promptly publish this order in the **Federal Register.**

By the Commission.

Kenneth F. Plumb,

Secretary.

DOCKET NO. ER81-662-000—RATE SCHEDULE

Designations	Description
Central Power & Light Company	
(1) Rate schedule FERC No. 65.	Transmission services agreement.
(2) Supplement No. 1 to rate schedule FERC No. 65.	Exhibit A—Transmission request CPL/Brownsville transmission services agreement.
(3) Supplement No. 2 to rate schedule FERC No. 65.	Exhibit B to transmission services agreement.
(4) Supplement No. 3 to rate schedule FERC No. 65.	Exhibit C—Other terms and conditions of transmission service to Brownsville.
(5) Exhibit A to rate schedule FERC No. 65.	Texas Interconnected System transmission facilities policy guidelines.
(6) Exhibit B to rate schedule FERC No. 65.	Letter dated January 22, 1981 (attachments A to Brownsville's petition to intervene).
(7) Exhibit C to rate schedule FERC No. 65.	Letter dated February 17, 1981 (exhibit 1 to attachment A to Brownsville's petition to intervene).
(8) Exhibit D to rate schedule FERC No. 65.	Letter dated January 22, 1981 (exhibit 2 to attachment A to Brownsville's petition to intervene).
(9) Exhibit E to rate schedule FERC No. 65.	Letter dated January 22, 1981 (exhibit 4 to attachment A to Brownsville's petition to intervene).

DOCKET NO. ER81-662-000—RATE SCHEDULE—Continued

Designations	Description
(10) Exhibit F to rate schedule FERC No. 65.	Letter dated January 21, 1981 (attachment to West Texas Utilities Company's certificate of concurrence).
West Texas Utilities Company	
(11) Rate schedule FERC No. 46 (concurs in (1) above).	Certificate of Concurrence.

BILLING CODE 6717-01-M

[Docket No. ER82-152-000]

El Paso Electric Co.; Filing

December 17, 1981.

The filing Company submits the following:

Take notice that on December 11, 1981, El Paso Electric Company (El Paso) tendered for filing an initial rate schedule pursuant to an "Agreement for the Purchase of Electric Service from El Paso Electric Company" dated December 8, 1980 (Agreement). El Paso states that this Agreement provides for the firm sale of electric power by El Paso to Texas/New Mexico Power Company (TNP) for a period of 15 years beginning on January 1, 1982.

El Paso requests waiver of the Commission's notice requirements to allow for an effective date of January 1, 1982.

According to El Paso copies of this filing have been served upon the Public Utility Commission of Texas, the New Mexico Public Service Commission and TNP.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 28, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petiton to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[Docket No. CP74-122, et al.]

Energy Terminal Services Corp.; Technical Conference

December 18, 1981.

Take notice that on December 29, 1981, the members of the Commission Staff and its consultants will meet with representatives of the Applicant herein to discuss some of the structural and design aspects of the liquefied natural gas tanks located at Rossville, New York. This technical conference will be held at 10:00 a.m. in Room A-367 of Building 226 at the National Bureau of Standards, Gaithersburg, Maryland. All interested parties may attend subject to the space limitations therein.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. ER82-151-000]

Florida Power & Light Co.; Filing

December 18, 1981.

The filing Company submits the following:

Take notice that Florida Power & Light Company (FP&L) on December 11, 1981, tendered for filing documents entitled "Exhibit I to Service Agreement For Interchange Transmission Service Implementing Specific Transactions Under Service Schedules A (Emergency Service), B (Short Term Firm Service), C (Economy Interchange Service) and D (Firm Service) of Contracts for Interchange Service." This filing is proposed to amend FERC Electric Tariff Original Volume II (Sheet Nos. 1-19).

FP&L states that under the Exhibit I FP&L will transmit power and energy for the Utilities Commission, City of New Smyrna Beach (New Smyrna) as is required by New Smyrna in the implementation of its interchange agreement with the City of Tallahassee.

FP&L requests that waiver of the Commission's Regulations be granted and that the proposed Exhibit be made effective immediately. FP&L states that copies of the filing were served on the Director of Utilities of New Smyrna Beach.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before January 8,

1982. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-36770 Filed 12-23-81; 8:45 am]
BILLING CODE 6717-01-M

[Project No. 5313-000]

Hydro Energies Corp.; Application for License (Over 5 MW)

December 22, 1981.

Take notice that Hydro Energies Corporation (Applicant) filed on September 3, 1981, an application for license [pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)] for construction and operation of a water power project to be known as the Dewey's Mills Project No. 5313. The project would be located on the Ottauquechee River in Windsor County, Vermont, and would utilize a Federally-owned dam and reservoir. Correspondence with the Applicant should be directed to: Mr. L. John Davidson, President, Hydro Energies Corporation, Post Office Box 500, Quechee, Vermont 05059.

Project Description—The proposed project would utilize a Federally-owned dam and reservoir located within the boundaries of the U.S. Army Corps of Engineers' North Hartland Flood Control Project. The project would consist of: (1) three-foot high flashboards to be installed at the existing Dewey's Mills Dam; (2) a new powerhouse with an installed generating capacity of 2,180 kW; (3) a new switchyard and 4,500-foot long transmission line; and (4) appurtenant works.

The average annual energy output would be between 6,150,000 kWh and 7,050,000 kWh per year.

Purpose of Project—Project energy would be sold to the Central Vermont Public Service Corporation.

Competing Applications—Anyone desiring to file a competing application must submit to the Commission, on or before March 1, 1982, either the competing application itself [See 18 CFR 4.33(a) and (d)] or a notice of intent [See 18 CFR 4.33(b) and (c)] to file a competing application. Submission of a timely notice of intent allows an interested person to file an acceptable competing application no later than the time specified in § 4.33(c) or § 4.101 et seq. (1981).

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before March 1, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTESTS", or "PETITION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-36771 Filed 12-23-81; 8:45 am]
BILLING CODE 6717-01-M

[Docket No. EL81-17-000]

Iowa Electric Light and Power Co.; Order Initiating Hearing

Issued: December 18, 1981.

On May 18, 1981, Iowa Electric Light and Power Company (Iowa Electric) filed a motion, pursuant to §§ 1.20 and 41.7 of the Commission's regulations, requesting that the Commission institute hearing procedures with respect to a notice of accounting deficiency sent to Iowa Electric on April 27, 1981.

The notice of deficiency was issued as a result of an audit conducted by the Commission staff of the company's books and records supporting changes in the recorded cost of electric and

common utility plant and related accumulated provisions for depreciation and amortization from January 1, 1974, through December 31, 1978. The audit staff required various adjustments to the company's accounts, some of which were accepted by Iowa Electric. The company, however, contested three correcting entries concerning the treatment of costs associated with the removal and replacement in 1978 of eight safe-ends [1] at the Duane Arnold Energy Center, a nuclear generating facility 70% owned by Iowa Electric.

Iowa Electric has treated the replacement of the safe-ends as the addition and retirement of retirement units of property, as defined at 18 CFR Part 101, Electric Plant Instruction 10(B)(1), and has capitalized the costs incurred. The Commission staff would treat the removal and replacement costs as "extraordinary property loss" expenses to be amortized over a period of time to be proposed by the company and subject to Commission approval.[2]

Discussion

Part 41 of the Commission's regulations provides for shortened procedures in order to resolve disputes regarding accounting matters. However, § 41.7 provides that where a party does not consent to the shortened procedures, or if at any stage of the proceeding prior to submission of the case to the Commission, a party in interest requests a hearing, the proceeding will be assigned for hearing as provided in § 1.20 of the Commission's Rules of Practice and Procedure. Therefore, we shall grant Iowa Electric's motion and order that a hearing be held.

The Commission orders:

(A) The motion of Iowa Electric filed on May 18, 1981, for the initiation of a hearing is hereby granted.

(B) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Commission by section 402(a) of the Department of Energy Organization Act and by the Federal Power Act, particularly section 301 thereof, and pursuant to the Commission's Rules of Practice and Procedure and the regulations under the Federal Power Act (18 CFR Chapter I), a public hearing shall be held concerning the accounting issues raised in the Commission's letter order of April 27, 1981.

(C) A presiding administrative law judge, to be designated by the Chief Administrative Law Judge, shall convene a prehearing conference on or before January 25, 1982, in a hearing room of the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. The presiding administrative law judge is authorized to establish procedural dates and to rule on all motions (except motions to consolidate or sever and motions to dismiss) as provided for in the Commission's Rules of Practice and Procedure.

(D) The Secretary shall promptly publish this order in the **Federal Register.**

By the Commission.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-38772 Filed 12-23-81; 8:45 am]

BILLING CODE 6717-01-M

---

[1] A safe-end is part of a nuclear reactor's piping system.

[2] The disputed figures amount to over $15,000,000.

[Project No. 5613-000]

Charles E. and Anne W. MacArthur; Application for License (5 MW or Less)

December 22, 1981.

Take notice that Charles E. and Anne W. MacArthur (Applicant) filed on November 4, 1981, an application for license [pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)] for continued operation of a water power project to be known as the Brown's Mill Project No. 5613. The project is located on the Piscataquis River in the town of Dover-Foxcroft, Piscataquis County, Maine. Correspondence with the Applicant should be directed to: Mr. Charles E. MacArthur, 16 Vaughn Street, Dover-Foxcroft, Maine 04426.

Project Description—The proposed project would consist of two existing developments described below:

(A) The Upper Development for which water rights are owned by the applicant consists of: (1) an existing 12-foot high, 200-foot long masonry and concrete dam owned by the town of Dover-Foxcroft; (2) a 26 acre reservoir at elevation 360 feet m.s.l. with usable storage capacity of 13 acre-feet at a drawdown of 6 inches; (3) an existing fish ladder; and (4) appurtenant facilities. The Upper Development provides stream regulation and limited storage capacity for the lower development.

(B) The Lower Development for which water rights and generating facility are owned by the Applicant consists of: (1) an existing 22-foot high, 26.5-foot long masonry and concrete dam owned by the town of Dover-Foxcroft; (2) a 4 acre reservoir at elevation 344 feet m.s.l. with negligible storage capacity; (3) an existing 172-foot long, 40 to 24-foot wide open canal; (4) an existing 24-foot wide, 84-foot long covered canal; (5) three

existing steel penstocks approximately 50 feet in length; (6) an existing powerhouse containing turbine-generators with a total rated capacity of 594 kW in operation; (7) an existing fish ladder; and (8) appurtenant facilities.

Purpose of Project—Energy produced at the project is sold to Central Maine Power Corporation.

Agency Comments—Federal, State, and local agencies that receive this notice through direct mailing from the Commission are requested to provide comments pursuant to the Federal Power Act, the Fish and Wildlife Coordination Act, the Endanagered Species Act, the National Historic Preservation Act, the Historical and Archeological Preservation Act, the National Environmental Policy Act, Pub. L. No. 88–29, and other applicable statutes. No other formal requests for comments will be made.

Comments should be confined to substantive issues relevant to the issuance of a license. A copy of the application may be obtained directly from the Applicant. If an agency does not file comments within the time set below, it will be presumed to have no comments.

Competing Applications—Anyone desiring to file a competing application must submit to the Commission, on or before March 1, 1982, either the competing application itself [See 18 CFR 4.33 (a) and (d)] or a notice of intent [See 18 CFR 4.33 (b) and (c)] to file a competing application. Submission of a timely notice of intent allows an interested person to file an acceptable competing application no later than the time specified in § 4.33(c) or § 4.101 et seq. (1981).

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest or a petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments protests, or petitions to intervene must be received on or before March 1, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS," "NOTICE OF INTENT TO FILE COMPETING APPLICATION," "COMPETING APPLICATION," "PROTEST," or "PETITION TO INTERVENE," as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717–01–M

[Docket No. ER81–150–000]

Missouri Power & Light Co.; Filing

December 18, 1981.

The filing Company submits the following:

Take notice that Missouri Power & Light Company (MPL) on December 11, 1981, tendered for filing a proposed Electric Service Agreement between MPL and the City of Linneus, Missouri (Linneus).

MPL states that the Agreement was approved by Bill No. BXXXVII, Ordinance No. BXXXVII of the City of Linneus, Missouri. The Electric Service Agreement between MPL and Linneus entered into on December 7, 1971 expires on December 6, 1981. MPL proposes that the new Agreement become effective on December 7, 1981. The new Agreement increases capacity from 500 kilovolt amperes under the hold Agreement to 1000 kilovolt amperes. The new Agreement requires Linneus to give MPL six (6) months' advance written notice of any proposed new municipal use or resale which will result in a 500 KW addition or more and to consult with MPL prior to such use or resale to determine that such use or resale is consistent with safe and reliable system operation. The new Agreement terminates on December 6, 1991, but is automatically renewed for successive two (2) year periods unless terminated by two (2) years advance written notice by either party to the chief executive officer of the other party. The Agreement is not terminable by either party during the first eight (8) years of the term. Rates to be charged under the new Agreement will remain the same as rates presently charged under the old Agreement and do not

differ from rates charged to other customers in the same class.

Copies of the filing were served upon MPL's jurisdictional customers and the Secretary of the Missouri Public Service Commission.

Any person desiring to be heard to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedures (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before January 8, 1982. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are open for public inspection.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6717-01-M

[Docket Nos. G-4283-002, et al.]

Mitchell Energy & Development Corporation, et al.; Applications for Certificates, Abandonment of Service and Petitions to Amend Certificates [1]

December 18, 1981.

Take notice that each of the Applicants listed herein has filed an application or petition pursuant to Section 7 of the Natural Gas Act for authorization to sell natural gas in interstate commerce or to abandon service as described herein, all as more fully described in the respective applications and amendments which are on file with the Commission and open to public inspection.

Any person desiring to be heard or to make any protest with reference to said applications should on or before January 5, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure a hearing will be held without further notice before the Commission on all applications in which no petition to intervene is filed within the time required herein if the Commission on its own review of the matter believes that a grant of the certificates or the authorization for the proposed abandonment is required by the public convenience and necessity. Where a petition for leave to intervene is timely filed, or where the Commissionon its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or to be represented at the hearing.

Kenneth F. Plumb,
Secretary.

[1] This notice does not provide for consolidation for hearing of the several matters covered herein.

Footnotes:
Filing Code: A—Initial Service; B—Abandonment; C—Amendment to add acreage; D—Amendment to delete acreage; E—Total Succession; F—Partial Succession.
[1] Applicant is filing under Gas Purchase Contract dated July 12, 1954, superseded by contract dated December 27, 1977 and amended by Amendment dated August 7, 1981.
[2] Shell Oil Company is no longer able to render service from the acreage involved in this application because it has no interest in the acreage.
[3] Leases released due to cessation of production. Well plugged and abandoned.
[4] Applicant is filing under Gas Purchase Contract dated May 25, 1964 amended by definitive agreement dated November 1, 1981.
[5] Applicant is filing under Gas Purchase Contract dated January 14, 1965 amended by definitive agreement dated November 1, 1981.
[6] By assignment dated May 13, 1974, Anadarko assigned all of its oil and gas rights as to all depths underlying the SE/4 of Section 32-4N-24ECM to Zoller and Danneberg Inc. which is now Premier Resources.
[7] The only well drilled on the lands covered by this application was dry and abandoned and Applicant's leases have been released.
[8] Applicant is filing to change the delivery point from the tailgate of the Dorchester Gas Producing Company's Texon Plant to El Paso Natural Gas Company's measuring facilities at the outlet of Union Texas Petroleum Corporation's Benedum Plant.
[9] Applicant is filing under Residue Gas Purchase Agreement dated April 25, 1977 amended by Amendment dated October 21, 1981.
[10] Applicant is filing under Gas Purchase Contract dated October 6, 1980, amended by Amendatory Agreement dated October 7, 1981.
[11] No longer producing in commercial quantities uneconomic.
[12] Applicant is filing under Gas Purchase Contract dated November 11, 1981.
[13] All leases have been released or surrendered and there is no gas production from acreage.
[14] Some acreage sold effective July 1, 1981. Remaining acreage released of record after wells plugged.
[15] By assignment dated November 3, 1981, to be effective August 6, 1981, Mitchell acquired the interests of Cities Service Company in certain leases.
[16] Applicant is filing under Contract dated October 7, 1981 which supersedes an October 7, 1966 contract between Cities Service Company and United Gas Pipe Line Company.
[17] Applicant is filing under Agreement dated September 6, 1982, as amended October 26, 1980 and March 17, 1981.

[Project No. 4805-001]

Victor and La Verta Page; Notice of Application for License (5 MW or Less)

December 22, 1981.

Take notice that Victor and La Verta Page (Applicant) filed on October 2, 1981, an application for license [pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)] for construction and operation of a water power project to be known as the Bloomfield Ranch Project No. 4805. The project would be located on the South Fork Kern River, near Bakersfield, in Kern County, California. Correspondence with the Applicant should be directed to: Victor W. Page, P.O. Box 5374, San Bernardino, California 92412.

Project Description—The proposed project would consist of: (1) a 6-foot high dike and headgate; (2) a 10,100-foot long and 60-inch diameter reinforced concrete and steel pipeline; (3) a concrete powerhouse containing 3 generating units, each rated at 830 kW; and (4) a transmission line. The average annual energy generation would be 13 million kWh.

Purpose of Project—The energy generated by the project would be sold to the Southern California Edison Company.

Agency Comments—Federal, State, and local agencies that receive this notice through direct mailing from the Commission are requested to provide comments pursuant to the Federal Power Act, the Fish and Wildlife Coordination Act, the Endangered Species Act, the National Historic Preservation Act, the Historical and Archeological Preservation Act, the National Environmental Policy Act, Pub. L. No. 88–29, and other applicable statutes. No other formal requests for comments will be made.

Comments should be confined to substantive issues relevant to the issuance of a license. A copy of the application may be obtained directly from the Applicant. If an agency does not file comments within the time set below, it will be presumed to have no comments.

Competing Applications—Anyone desiring to file a competing application must submit to the Commission, on or before March 1, 1982, either the competing application itself [See 18 CFR 4.33 (a) and (d)(1980)] or a notice of intent [See 18 CFR 4.33 (b) and (c)(1980)] to file a competing application. Submission of a timely notice of intent allows an interested person to file an acceptable competing application no later than the time specified in § 4.33(c).

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant). If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before March 1, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS," "NOTICE OF INTENT TO FILE COMPETING APPLICATION," "COMPETING APPLICATION," "PROTEST," or "PETITION TO INTERVENE," as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6717-01-M

[Docket Nos. CS82-6-000, et al.]

Puma Petroleum Co., et al.; Applications for "Small Producer" Certificates [1]

December 18, 1981.

Take notice that each of the Applicants listed herein has filed an application pursuant to Section 7(c) of the Natural Gas Act and § 157.40 of the Regulations thereunder for a "small producer" certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce, all as more fully set forth in the applications which are on file with the Commission and open to public inspection.

Any person desiring to be heard or to make any protest with reference to said applications should on or before January 5, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in

[1] This notice does not provide for consolidation for hearing of the several matters covered herein.

determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on all applications in which no petition to intervene is filed within the time required herein if the Commission on its own review of the matter believes that a grant of the certificates is required by the public convenience and necessity. Where a petition for leave to intervene is timely filed, or where the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

Kenneth F. Plumb,
Secretary.

[Project No. 5619-000]

R.D.D., Inc.; Application for Preliminary Permit

December 22, 1981.

Take notice that R.D.D., Inc. (Applicant) filed on November 6, 1981, an application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)] for Project No. 5619 to be known as the Knott Creek Hydroelectric Project located on Knott Creek in Humboldt County, Nevada. Part of the project is located on Bureau of Land Management land. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. Richard Drake, President, R.D.D., Inc., 440 Rhinehart Court, Winnemucca, Nevada 89445.

Project Description—The proposed project would consist of: (1) an existing 27-foot high dam and 450 acre-foot capacity reservoir, enlargement of which is proposed; (2) steel penstock 3.5 miles long; (3) a powerhouse containing a turbine generator with 940 kW capacity and 4.1 GWh annual energy production; (4) transmission line one mile long; and (5) appurtenant facilities. Generated power would be sold to either Sierra Pacific Power Company or Bonneville Power Administration.

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. The Applicant seeks issuance of a preliminary permit for a term of 36 months, during which time engineering, economic and environmental studies will be conducted to ascertain feasibility and to support application for a license to construct and operate the project. The estimated cost of the above activities is $72,000.

Competing Applications—Anyone desiring to file a competing application for preliminary permit must submit to the Commission, on or before March 1, 1982, the competing application itself [see: 18 CFR § 4.30 et seq. (1981)]. A notice of intent to file a competing application for preliminary permit will not be accepted for filing.

The Commission will accept applications for license or exemption from licensing, or a notice of intent to submit such an application in response to this notice. A notice of intent to file an application for license or exemption must be submitted to the Commission on or before April 30, 1982, and should specify the type of application forthcoming. Applications for licensing or exemption from licensing must be filed in accordance with the Commission's regulations [see: 18 CFR 4.30 et seq. or § 4.101 et seq. (1981), as appropriate].

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before March 1, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS," "NOTICE OF INTENT TO FILE COMPETING APPLICATION," "COMPETING APPLICATION," "PROTEST," or "PETITION TO INTERVENE," as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6717-01-C

The above notices of determination were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" before the section code. Estimated annual production (PROD) is in million cubic feet (MMCF). An (*) before the Control (JD) number denotes additional purchasers listed at the end of the notice.

The applications for determination are available for inspection except to the extent such material is confidential under 18 CFR 275.206, at the Commission's Division of Public Information, Room 1000, 825 North Capitol St., Washington, D.C. Persons objecting to any of these determinations may, in accordance with 18 CFR 275.203 and 275.204, file a protest with the Commission on or before January 8, 1982.

Categories within each NGPA section are indicated by the following codes:

Section 102–1: New OCS lease
102–2: New well (2.5 mile rule)
102–3: New well (1000 ft rule)
102–4: New onshore reservoir
102–5: New reservoir on old OCS lease
Section 107–DP: 15,000 feet or deeper
107–GB: Geopressured brine
107–CS: Coal seams
107–DV: Devonian shale
107–PE: Production enhancement
107–TF: New tight formation
107–RT: Recompletion tight formation
Section 108: Stripper well
108–SA: Seasonally affected
108–ER: Enhanced recovery
108–PB: Pressure buildup

Kenneth F. Plumb,

Secretary.

[FR Doc. 81–36779 Filed 12–23–81; 8:45 am]

BILLING CODE 6717–01–M

[Volume 561]

Determinations by Jurisdictional Agencies Under the Natural Gas Policy Act of 1978

Issued: December 18, 1981.

BILLING CODE 6717-01-C

The above notices of determination were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" before the section code. Estimated annual production (PROD) is in million cubic feet (MMCF). An (*) before the Control (JD) number denotes additional purchasers listed at the end of the notice.

The applications for determination are available for inspection except to the extent such material is confidential under 18 CFR 275.206, at the Commission's Division of Public Information, Room 1000, 825 North Capitol St., Washington, D.C. Persons objecting to any of these determinations may, in accordance with 18 CFR 275.203 and 275.204, file a protest with the Commission on or before January 8, 1982.

Categories within each NGPA section are indicated by the following codes:

Section 102–1: New OCS lease
102–2: New well (2.5 mile rule)
102–3: New well (1000 ft rule)
102–4: New onshore reservoir
102–5: New reservoir on old OCS lease
Section 107–DP: 15,000 feet or deeper
107–GB: Geopressured brine
107–CS: Coal seams
107–DV: Devonian shale
107–PE: Production enhancement
107–TF: New tight formation
107–RT: Recompletion tight formation
Section 108: Stripper well
108–SA: Seasonally affected
108–ER: Enhanced recovery
108–PB: Pressure buildup

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717–01–M

ENVIRONMENTAL PROTECTION AGENCY

[LCE—FRL–1985–7]

Findings of Administrator Preliminary to Lodging of a Consent Decree Under the Steel Industry Compliance Extension Act of 1981: Ford Motor Co.

AGENCY: Environmental Protection Agency.

ACTION: Notice of findings preliminary to lodging of amended consent decree.

SUMMARY: The Administrator indicates her preliminary intention to exercise her discretion and agree to extensions of compliance dates of Ford Motor Company under the Steel Industry Compliance Extension Act of 1981.

EFFECTIVE DATE: December 24, 1981.

FOR FURTHER INFORMATION CONTACT: MIchael Alushin, U.S. Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460, (202) 755–0658.

SUPPLEMENTARY INFORMATION: On September 29, 1981, Ford Motor Company filed an application with the Environmental Protection Agency seeking certain compliance date extensions for steelmaking facilities at its River Rouge facility in Dearborn, Michigan under the provisions of section 113(e) of the Clean Air Act. This notice represents the Agency's formal determination that the applicant qualifies for an extension of the compliance date in its existing consent decree. Under section 113(e)(7)(A) of the Act, the Agency is not required to make proposed findings for public comment. The Agency will, however, receive public comments on these findings, and take such comments into account when preparing the amended consent decree. Persons wishing to comment should do so without delay because negotiation of the terms of the amended decree is underway. There will be additional opportunity for public comment, however. Pursuant to 28 CFR 50.7, the Department of Justice will publish notice in the **Federal Register** of the proposed amended decree and take public comment before finally submitting the decree to the court.

Findings

On the basis of information submitted by the applicant and other information available to me, I make the following findings:

(1) I find that the following compliance obligations (capital expenditures necessary to achieve compliance with SIP and RACT where applicable) may be extended:

Project description	Cost (million dollars)
1. Two one-spot rotary coke quench cars (one at Batteries C and Dx, one spare)	3.8
2. Blast furnace casthouse controls (Blast Furnaces A, B, and C)	3.0
Total	6.8

(2) I find (a) that the extensions of compliance are necessary to allow the company to make those capital investments in its iron- and steel-producing operations which are described below, (b) that each of the following investments will improve the efficiency and productivity of the company's iron- and steel-producing operations and (c) that each modernization investment is proposed to be made at its River Rouge facility in Dearborn, Michigan, a community which already contains iron- and steel-producing facilities.

Qualifying modernization investments	Cost (million dollars)
1. Modernize Pickle Line Welders	4.4
2. Modernize No. 2 Tandem Mill	6.1
Total	10.5

(3) I find that in order to achieve compliance with the Clean Air Act (and RACT, where applicable) at all sources in its iron- and steel-producing operations the company will be required to make at least the following capital expenditures:

Source	Amount (million dollars)
1. Two (2) One-Spot Rotary Coke Quench Cars	3.8
2. Blast Furnace Casthouse Controls	3.0
3. BOF Stack Controls	0.1
4. BOF Charging and Tapping	0.3
5. Iron Ladle Dumping	1.7
6. Coke Oven Mass Reinforcement	0.2
7. Coke Oven Combustion Stack Silica Welding	0.2
8. Coke Oven Combustion Stack "C" Precipitator	0.9
Total	10.2

(4) I find that a "phased program of compliance" (as defined in section 113(e)(2) of the Act) would require the company to make the capital expenditures on the following schedule:

At least $5.1 million by December 31, 1983.

At least a total of $7.65 million by December 31, 1984.

At least a total of $10.2 million by December 31, 1985.

(5) I find that an integration of the qualifying capital expenditures and the "phased program of compliance" schedule, when allowing for the required investments under § 113(e)(1)(B), results in the following required schedule of capital expenditures:

At least $3.4 million for non-deferred pollution control to meet SIP, RACT and decree by December 31, 1982.

At least $6.8 million for improving efficiency and productivity by July 16, 1983.

At least a total of $5.1 million for pollution control projects by December 31, 1983.

At least a total of $7.65 million for pollution control projects by December 31, 1984.

At least a total of $10.2 million for pollution control projects by December 31, 1985.

To the extent possible, the decree must incorporate this schedule.

(6) I find that the company will have overall capital expenditures set forth in the preceding section.

(7) I find that the company is in compliance with its existing Federal judicial decree (United States District Court for the Eastern District of Michigan, Civil Action No. 81–70392).

(8) I find that the extensions of compliance contemplated herein will not result in degradation of air quality during the term of the extension.

Based on those findings, I have decided to exercise my statutory discretion and preliminarily consent to the extension of certain deadlines of compliance, contingent upon the successful negotiation and agreement between the company and the United States of Federal judicial decree(s) containing the provisions outlined in section 113(e)(1)(C). This exercise of my discretion is entirely contingent upon such successful negotiation and should the parties be unable to frame a complete and total agreement, then no such extensions shall be granted.

In particular, I hereby give my preliminary consent to the entry of a proper decree which requires capital expenditures to be made on the schedule reflected in my finding number (5) above to the extent possible. The negotiation of such a decree is underway and a decree may be presented to me for my review within a few weeks. Persons desiring to make public comment on these preliminary findings should do so without delay. Comments should be sent to: Michael Alushin (EN–329), Office of Legal Counsel and Enforcement, U.S. Environmental Protection Agency, 401 M Street, S.W., Washington, D.C. 20460, Telephone: (202) 755–0658.

Notice is hereby given that in the event of successful negotiation and agreement between the company and the United States of such Federal judicial decree(s), such consent decree will be lodged and public comment opportunity provided under the provisions of 28 CFR 50.7 by **Federal Register** publication by the Department of Justice without any further **Federal Register** notice on behalf of the Environmental Protection Agency.

Dated: December 17, 1981.

Anne M. Gorsuch,

Administrator.

BILLING CODE 6560–41–M

[LCE–FRL–1985–6]

Findings of Administrator with Regard to Steel Industry Compliance Extension Act of 1981: Alabama By-Products Corp.

AGENCY: Environmental Protection Agency.

ACTION: Notice of Findings Preliminary to lodging of Amended Consent Decree. The Administrator indicates her preliminary intention to exercise her discretion and agree to an extension of a compliance date of the Alabama By-Products Corporation under the Steel Industry Compliance Extension Act of 1981.

DATE: Effective upon December 24, 1981.

FOR FURTHER INFORMATION CONTACT: Michael Alushin, U.S. Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460, (202) 755–0658.

SUPPLEMENTARY INFORMATION: On September 21, 1981, Alabama By-Products Corporation (hereinafter "ABC") filed an application with the Environmental Protection Agency seeking a certain compliance date extension for steelmaking facilities under the provisions of section 113(e) of the Clean Air Act (Pub. L. 97–23, 44 U.S.C. 4713.) This notice represents the Agency's formal determination that the applicant qualifies for an extension of the compliance date of its existing consent decree. (Civil Action No. 77–M–1455–S; *United States of America v. Alabama By-Products Corporation;* Northern District of Alabama, Southern Division; entered October 31, 1980. Hereinafter "existing consent decree".) Under section 113(e)(7)(A) of the Act, the Agency is not required to make Proposed Findings for public comment. The Agency will, however, receive public comments on these Findings, and take such comments into account when preparing the amended consent decree. Persons wishing to comment should do so without delay because negotiation of the terms of the amended decree will begin immediately. There will be additional opportunity for public comment, however. Pursuant to 28 CFR 50.7, the Department of Justice will publish notice in the **Federal Register** of the proposed amended decree, and take public comment before finally submitting the decree to the court.

FINDINGS: On the basis of information submitted by the applicant and other information available to me, I make the following findings:

(1) I find that the following compliance obligations may be extended:

Project description	Remaining cost
Emission control system for coke pushing operation at coke battery Nos. 1, 5 and 6.	Approximately $6,650,200.

(2) (a) I find that the above extension is necessary to allow the company to make the capital investment in its iron- and steel-producing operations described below.

(b) I find that the investment described below will improve the efficiency and productivity of the company's iron and steel-producing operations.

(c) I find that the investment described below is proposed to be made in a community which already contains iron and steel-producing facilities.

QUALIFYING MODERNIZATION INVESTMENT

Project description	Remaining cost
Replacement of existing boilers with new boilers of higher energy efficiency at Tarrant facility.	At least $6,650,200.

(3) For the capital investment listed below, I find that the capital investment is not within the scope of the company's iron-and steel-producing operations.

Non-Qualifying Capital Investment

That project described at paragraph (B)2.b. of page 1, under tab 113(e)(1)(B) of ABC's application. The company has claimed the description of this project to be confidential business information, and EPA has determined, pursuant to section 113(e)(3) and 40 CFR Part 2, that this description does qualify for confidential treatment.

(4) I find that in order to achieve compliance with the Clean Air Act at all sources in its iron-and steel-producing operations, ABC will be required to make at least the following capital expenditures:

Source	Amount
Emission control system for coke oven pushing on coke batteries Nos. 1, 5 and 6.	Approximately $6,650,200.

ABC has been given the initial notification of violation contemplated in section III.C.3.(b) of the existing consent decree. Under the provisions of the decree, ABC my be required to spend an additional sum of approximately $3,500,000 for a gas cleaning device for combustion stack number 4.

(5) I find that a "phased program of compliance" (as defined in section 113(e)(2) of the Act) would require ABC to make pollution control capital

expenditures on the following schedule, beginning with the entry of a decree:

$968,358—By June 30, 1983.
$3,227,859—By June 30, 1984.
$6,859,200—By June 30 1985.

This phased program of spending does not comport exactly with the statutory definition found in Section 113(e)(2). However, because the extension will be granted for only one project, this schedule does represent a phased program of spending, "to the extent possible." Section 113(e)(2). The policy behind the phased program requirement of the statute is furthered by may requirement that the project be completed by June 30, 1985.

(6) I find that an integration of the "qualifying modernization investment" and the "phased program of compliance" schedule, when allowing for the required investments under section 113(e)(1)(B) of the Act, results in the following required schedule of capital expenditures:

At least $6,859,200 for qualifying modernization investment—By July 17, 1983.
At least $968,358 for pollution control—By June 30, 1983.
At least $3,227,859 for pollution control—By June 30, 1984.
At least $6,859,200 for pollution control—By June 30, 1985.

This schedule does not include expenditures which may be necessary for the combustion stack No. 4 Gas Cleaner referred to in finding (4) above. If ABC fails to comply after the notice periods provided and therefore is required to install this equipment, it must obligate the additional sum of approximately $3,500,000 in accordance with the schedule in the existing consent decree, section III.c.3.(b).

(7) I find that ABC will have sufficient funds to comply with the capital expenditure requirements set forth in finding (6).

(8) I find that the company has violated the following provisions of the existing consent decree, but that such violations have been corrected or are *de minimis:*

(a) *Consent Decree Provisions III.C.1. and III.D.1.: Charging Emissions from Coke Batteries Nos. 5 and 6*

Violations have been documented on June 2 and June 3, 1981; however, more recent data from Jefferson County and EPA inspections have shown the source to be in compliance. ABC has committed in writing to operation and maintenance procedures, beyond those expressly required in the existing decree, designed to provide continuing compliance. These operation and maintenance procedures will be included in the amendment to the existing decree.

(b) *Consent Decree Provisions III.C.3. and III.D.3.: Combustion Stack No. 4*

Violations of the emission limitation applicable to this stack have been documented by EPA and the Jefferson County Department of Health beyond the December 30, 1980 final compliance date, and ABC has recently been notified of such violations. Pursuant to section III.C.3.(b) of the existing consent decree, ABC must install a gas cleaning device on the stack and demonstrate compliance within 25 months after being formally notified by EPA of a violation continuing more than 60 days after initial notice. The emission violations are considered *de minimis* because ABC has not been given notice of continuing violation and has not, therefore, subsequently failed to begin the procedures required to install a gas cleaning device.

(c) *Consent Decree Provisions III.A.4., III.C.2., and III.D.2.: Pushing Emissions from Coke Batteries Nos. 1, 5, and 6*

Under the existing consent decree, ABC was required to initiate on-site construction or installation of a pushing emission control system on April 30, 1981. The company actually began foundation work in the first week of August 1981. Because this delay was not so great as to preclude compliance with the final compliance date in the decree, this violation is considered *de minimis.*

(9) I find that the extension of compliance contemplated herein will not result in degradation of air quality during the term of the extension. This finding is predicated on the company's assurance that adequate operation and maintenance procedures will be followed.

Based on those findings, I have decided to exercise my statutory discretion and preliminarily to consent to the extension of certain deadlines of compliance, contingent upon the successful negotiation and agreement between the company and the United States, of a Federal judicial decree containing the provisions outlined in section 113(e)(1)(C). This exercise of my discretion is entirely contingent upon such successful negotiation and should the parties be unable to frame a complete and total agreement, then no such extensions shall be granted.

In particular, I hereby give my preliminary consent to the entry of a proper decree which requires capital expenditures to be made on the schedule reflected in my finding number (5) above. The negotiation of such a decree is under way and a decree may be presented to me for my review within a few weeks. Persons desiring to make public comment on these preliminary findings should do so without delay. Comments should be sent to: Michael Alushin, Office of Enforcement Counsel, U.S. Environmental Protection Agency, 401 M St., SW., Washington, D.C. 20460, Telephone: (202) 755–0658.

Notice is here given that in the event of successful negotiation and agreement between the company and the United States of such Federal judicial decree, such consent decree will be lodged and public comment opportunity provided under the provisions of 28 CFR 50.7 by **Federal Register** publication by the Department of Justice without any further **Federal Register** notice on behalf of the Environmental Protection Agency.

BILLING CODE 6560-37-M

FEDERAL MARITIME COMMISSION

Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for review and approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement and the justification offered therefor at the Washington office of the Federal Maritime Commission, 1100 L Street, N.W., Room 10427; or may inspect the agreement at the Field Offices located at New York, NY., New Orleans, Louisiana, San Francisco, California, Chicago, Illinois, and San Juan, Puerto Rico. Interested parties may submit comments on the agreement, including request for hearing, to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, within 10 days after the date of the **Federal Register** in which this notice appears. Comments should include facts and arguments concerning the approval, modification, or disapproval of the proposed agreement. Comments shall discuss with particularity allegations that the agreement is unjustly discriminatory or unfair as between carriers, shippers, exporters, importers, or ports, or between exporters from the United States and their foreign competitors, or operates to the detriment of the commerce of the United States, or is contrary to the public interest, or is in violation of the Act.

A copy of any comments should also be forwarded to the party filing the agreement and the statement should indicate that this has been done.

Agreement No. T-4010.

Filing party: Joseph F. Mullins, Jr., Esquire, Denning & Wohlstetter, 1700 K Street, N.W., Washington, D.C. 20006.

Summary: Agreement No. T-4010, between Federal Marine Terminals, Inc. (FMT), and Eastport Port Authority (Authority), provides for the lease by the Authority to FMT, of the surface area of the Federal Breakwater, Steel Faced Pier and Stone Appropach located in the Eastport, Maine Harbor. The premises are to be used exclusively by FMT as a marine terminal. The term of the lease is for thirteen months, commencing December 1, 1981, and terminating December 31, 1982, with a renewal option for two additional terms of one year each. FMT shall pay a rental of $12,000 for the period January 1, 1982 to December 31, 1982, if renewed; for the period January 1, 1983 through December 31, 1983; $13,200 and for the period January 1, 1984 through December 31, 1984; $14,520. Assignments, liability and maintenance are as agreed to by the parties in the agreement.

Dated: December 31, 1981.

By Order of the Federal Maritime Commission.

Francis C. Hurney,

Secretary.

[FR Doc. 81-36872 Filed 12-23-81; 8:45 am]

BILLING CODE 6730-01-M

Petition for the Removal of Portwide Exemption

Notice is hereby given that the Florida Customs Brokers and Forwarders Association Inc. through the law firm of Sandler & Travis, P.A. located at Rivergate Plaza, 444 Brickell Avenue, Miami, Florida 33131, filed a petition for the removal of portwide exemptions granted by the Commission to the Ports of Pensacola, Port Everglades and Tampa, Florida pursuant to § 510.33(e) of Federal Maritime Commission General Order 4 (46 CFR 510.33(e)).

Section 510.33(e) of General Order 4 prohibits a licensed independent ocean freight forwarder from collecting compensation if it requests the carrier or its agent to perform any of the forwarding services. This section further provides an exemption from this prohibition to licensee/agents in the port of loading upon application therefor and upon a finding by the Commission that an adequate supply of forwarding services is not being held out by nonagent licensees domiciled at the port of loading. By Orders served on November 28, 1966 the Commission granted the Ports of Pensacola and Tampa, Florida portwide exemptions. Port Everglades, Florida was granted a portwide exemption by Commission Order served on May 2, 1967.

The Florida Customs Brokers and Forwarders Association Inc. alleges that an adequate supply of forwarding services is now being held out by nonagent licensees at Pensacola, Port Everglades and Tampa, Florida and that the present exemptions are no longer justified on this basis.

Interested parties may inspect and obtain a copy of the petition at the Washington office of the Federal Maritime Commission, 1100 L St., N.W., Room 10105. Comments with reference to the petition, including a request for hearing, if desired, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, on or before January 13, 1982. A copy of any such statement or request for a hearing should also be forwarded to the petitioner (as indicated herein), and the comments should indicate that this has been done.

Dated: December 21, 1981.

By Order of the Federal Maritime Commission.

Francis C. Hurney,

Secretary.

[FR Doc. 81-36872 Filed 12-23-81; 8:45 am]

BILLING CODE 6730-01-M

[Agreements Nos. T-3738-1, T-3933-1 and T-4004]

Availability of Findings of No Significant Impact

Upon completion of environmental assessments, the Federal Maritime Commission's Office of Energy and Environmental Impact has determined that the Commission's decision on the proposed actions listed below will not constitute major Federal actions significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969, 42 U.S.C. 4321 *et seq.*, and that preparation of environmental impact statements is not required.

Agreement No. T-3738-1 is between the South Carolina States Ports Authority (the Port; Authority) and Orient Overseas Container Lines

(OOCL). This amendment modifies the basic agreement which provides for the Port's five-year lease to OOCL of certain premises at the Port's North Charleston terminal, Charleston, South Carolina.

Agreement No. T–3933–1, between the City of Long Beach and Toyota Motor Sales U.S.A., Inc. (Toyota), provides for certain realignment of the boundaries of the present premises. The realignment, however, will not change the amount of acreage specified in the original agreement. This acreage is used by Toyota to handle and stow automobiles.

Agreement No. T–4004, between the Port of Portland and six Japanese-flag lines, provides for the preferential assignment of 14 acres at Terminal 6 including one berth, one crane and adjacent backup container working area.

The Findings of No Significant Impact (FONSI) will become final on or before January 13, 1982, unless petitions for review are filed pursuant to 46 CFR 547.6(b).

The FONSI and related environmental assessments are available for inspection on request from the Office of the Secretary, Room 11101, Federal Maritime Commission, Washington, D.C. 20573, telephone (202) 523–5725.

Francis C. Hurney,

Secretary.

BILLING CODE 6730–01–M

FEDERAL RESERVE SYSTEM

Bank Holding Companies; Proposed de Novo Nonbank Activities

The bank holding companies listed in this notice have applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and 225.4(b)(1) of the Board's Regulation Y (12 CFR 225.4(b)(1)), for permission to engage *de novo* (or continue to engage in an activity earlier commenced *de novo*), directly or indirectly, solely in the activities indicated, which have been determined by the Board of Governors to be closely related to banking.

With respect to each application, interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interest, or unsound banking practices." Any comment on an application that requests a hearing must include a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of that proposal.

Each application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank indicated for that application. Comments and requests for hearings should identify clearly the specific application to which they relate, and should be submitted in writing and, except as noted, received by the appropriate Federal Reserve Bank not later than January 12, 1982.

A. Federal Reserve Bank of Philadelphia (Thomas K. Desch, Vice President) 100 North 6th Street, Philadephia, Pennsylvania 19105:

Provident National Corporation, Philadelphia, Pennsylvania (data processing activities; nationwide): to engage, through its subsidiary, Provident Financial Processing Corporation, in data processing activities, including the performance of transfer agency services in connection with an integrated financial services program available through certain national brokerage firms on a nationwide basis. These activities would be conducted from an office at 105 Foulk Road, Wilmington, Delaware, serving a nationwide geographic area.

B. Federal Reserve Bank of Cleveland (Harry W. Hunning, Vice President) 1455 East Sixth Street, Cleveland, Ohio 44101:

AmeriTrust Corporation, Cleveland, Ohio (financing, servicing, leasing activities; Illinois): to engage, through its *de novo* subsidiary, AT Financial Corporation, in the following activities: making or acquiring and servicing for its own account or for the account of others, loans and extensions of credit, including commercial loans secured by a borrower's inventory and accounts receivable; making leases of personal property or acting as agent, broker or advisor in leasing such property; and making or acquiring other extensions of credit such as would be made by a commercial finance company. These activities would be conducted from a *de novo* office to be located in Chicago, Illinois, serving the Chicago SMSA.

C. Federal Reserve Bank of Richmond (Lloyd W. Bostian, Jr., Vice President) 701 East Byrd Street, Richmond, Virginia 23261:

Suburban Bancorporation, Hyattsville, Maryland (financing and leasing activities; Virginia and North Carolina): proposes to engage, through a relocation of the Richmond, Virginia office of its subsidiary, Suburban Funding Corporation, in the business of a commercial finance company; making and acquiring loans and other extensions of credit for itself or for others; leasing real and personal property and acting as agent, broker and advisor in the leasing of real and personal property; servicing loans, leases and other extensions of credit for itself and others; and arranging financing, financial structuring and analysis of equipment and financing problems. These activities will be conducted from an office in Charlottesville, Virginia, serving Virginia and North Carolina.

D. Federal Reserve Bank of Chicago (Franklin D. Dreyer, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Detroitbank Corporation*, Detroit, Michigan (trust company activities; Florida): to engage, through a subsidiary known as DBT Trust Company of Florida, in the following: activities that may be carried on by a trust company, including activities of a fiduciary, investment advisory, agency, or custodial nature. Such activities will be conducted at an office located at 5550 Blades Road, Boca Raton, Florida, serving the Boca Raton-West Palm Beach Standard Metroplitan Statistical Area, which is comprised of Palm Beach County, Florida. Comments on this application must be received not later than January 6, 1982.

2. *Shaw Investment Company*, New Hampton, Iowa (bookkeeping and data processing services; Iowa): to engage, through its subsidiary, Management Reporting Systems, Ltd., in bookkeeping and data processing services for the internal operations of Applicant and its subsidiaries, the storing and processing of other banking financial, or related economic data, such as performing payroll, accounts receivable or payable, or billing services. These services are to be provided to the Applicant, its subsidiaries and others. These activities would be conducted from an office in New Hampton, Iowa, serving the communities of New Hampton, Fredericksburg, and sumner, Iowa and the surrounding rural areas.

E. Federal Reserve Bank of San Francisco (Harry W. Green, Vice President) 400 Sansome Street, San Francisco, California 94120:

1. *BankAmerica Corporation*, San Francisco, California (underwriting insurance activities; expansion of geographic scope; Missouri, North Dakota and Wisconsin): to continue to engage, through its indirect subsidiary, BA Insurance Company, Inc., a California corporation, in the activity of underwriter, initially as reinsurer, to the

extent permitted by relevant state law for credit-related life insurance and credit-related accident and health insurance which is directly related to extensions of credit by BankAmerica Corporation and its nonbank subsidiaries. The activities of BA Insurance Company, Inc. will be conducted from an exising office located in San Francisco, California, serving the states of Missouri, North Dakota, and Wisconsin.

2. *Moore Financial Group, Inc.,* Boise, Idaho (financing and leasing activities; Washington, Oregon, Nevada, Utah, Colorado, Wyoming, Montana, and Idaho); to engage, through its subsidiary, Moore Corporate Financial services, Inc., in making or acquiring commercial loans or other similar extensions of credit; servicing loans; and making leases or acting as an agent, broker, or advisor in the leasing of real or personal property. These activities would be conducted from an office in Boise, Idaho serving the eight states listed in the caption to this notice.

3. *U.S. Bancorp,* Portland, Oregon (commercial finance; leasing; credit insurance; California): to engage *de novo* through its subsidiary, U.S. Bancorp Financial, Inc., in the making, acquiring and servicing of loans and other extensions of credit, either secured or unsecured, for its own account or for the account of others, including but not limited to, commercial, rediscount, installment sales contracts and other forms of receivables, and leasing of personal property in conformity with the provisions of 225.4(a)(i)(3) and (6)(a) of Regulation Y and acting as insurance agent with respect to credit life and disability insurance, property and casualty insurance solely in connection with extensions of credit by Bancorp Financial in conformity with the provisions of section 225.4(a)(9)(i) of Regulation Y. These activities will be conducted from an office in Sacramento, California, and will serve the Central Valley area.

F. **Other Federal Reserve Banks:** None.

Board of Governors of the Federal Reserve System, December 17, 1981.

Theodore E. Downing, Jr.,

Assistant Secretary of the Board.

[FR Doc. 81-36608 Filed 12-24-81; 8:45 am]

BILLING CODE 6210-01-M

Bank Holding Companies; Proposed De Novo Nonbank Activities

The bank holding companies listed in this notice have applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and 225.4(b)(1) of the Board's Regulation Y (12 CFR 225.4(b)(1)), for permission to engage *de novo* (or continue to engage in an activity earlier commenced *de novo*), directly or indirectly, solely in the activities indicated, which have been determined by the Board of Governors to be closely related to banking.

With respect to each application, interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interest, or unsound banking practices." Any comment on an application that requests a hearing must include a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of that proposal.

Each application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank indicated for that application. Comments and requests for hearings should identify clearly the specific application to which they relate, and should be submitted in writing and, except as noted, received by the appropriate Federal Reserve Bank not later than January 15, 1982.

A. **Federal Reserve Bank of New York** (A. Marshall Puckett, Vice President) 33 Liberty Street, New York, New York 10045:

1. *Barclays Bank Limited* and its subsidiary, *Barclays Bank International Limited,* London England (consumer finance, insurance activities; Florida, Texas, Washington): To relocate offices of their subsidiaries and continue to engage through their subsidiaries, BarclaysAmerican Corporation, a North Carolina corporation ("BAC"); BarclaysAmerican/Financial, Inc., a North Carolina corporation ("BAF"); BarclaysAmerican/Industrial Loan Company, a Washington corporation ("BAI"); and BarclaysAmerican/Mortgage, Inc., a North Carolina corporation ("BAM"); in making direct consumer loans, including loans secured by real estate, and purchasing of sales insurance contracts representing extensions of credit such as would be made or acquired by a consumer finance company, and wholesale financing (floor planning); and acting as agent for the sale of related credit life, credit accident and health and credit property insurance. Credit life and credit accident and health insurance sold as agent may be underwritten or reinsured by BAC's insurance underwriting subsidiaries. These activities would be conducted from an office of BAF and BAM located in Gainesville, Florida, which will service the city of Gainesville, Florida and the area within a 25-mile radius, as well as continue to service existing accounts in Cross City, Florida; an office of BAF located in Dallas, Texas which will service the area within a 10-mile radius of the Dallas, Texas office; and an office of BAF and BAI located in East Wenatchee, Washington, which will service the city of East Wenatchee, Washington.

2. *Chemical New York Corporation,* New York, New York (financing and insurance activities; Oklahoma and Arizona): To engage through its subsidiary, Sunamerica Corporation, in generating and servicing loans and other extensions of credit; making or acquiring loans to consumers; acquiring installment contracts from retail sellers covering the time sale of goods and related services; making or acquiring loans and other extensions of credit to businesses (including but not limited to, inventory financing); making or acquiring extensions of credit secured by personal property lease contracts; making available to its debtors credit life, credit accident and health, mortgage life, mortgage disability, and property and casualty insurance, all directly related to extensions of credit. These activities will be conducted from offices in Oklahoma City, Oklahoma and Phoenix, Arizona, serving the states of Oklahoma and Arizona, respectively. Credit life and credit accident and health insurance provided by this office in connection with the proposed activities will be reinsured through Sun States Life and/or Great Lakes Insurance Companies, indirect subsidiaries of the applicant.

3. *Citicorp,* New York, New York (commercial lending and leasing activities; Colorado, Utah, and Wyoming): To engage through a *de novo* office of Citicorp Industrial Credit, Inc. in making or acquiring, for its own account or for the account of others, commercial loans and other extensions of credit; and leasing personal or real property or acting as agent, broker, or advisor in leasing such property and servicing such leases, subject to all of the qualifications specified in 12 CFR 225.4(a)(6) (a) and (b), where the leases serve as the functional equivalent of an extension of credit to the lessee of the property. Such activities would be conducted from an office in

Albuquerque, New Mexico serving the states identified in the caption above.

4. *Citicorp,* New York, New York (commercial lending and leasing activities; Arizona, California): To engage through a *de novo* office of Citicorp Industrial Credit, Inc. in making or acquiring, for its own account or for the account of others, commercial loans and other extensions of credit; and leasing personal or real property or acting as agent, broker, or advisor in leasing such property and servicing such leases, subject to all of the qualifications specified in 12 CFR 225.4(a)(6)(a) and (b), where the leases serve as the functional equivalent of an extension of credit to the lessee of the property. Such activities would be conducted from an office in Irvine, California serving the area identified in the caption above.

5. *Citicorp,* New York, New York (lease financing activities; Georgia, South Carolina, Tennessee, Alabama, Mississippi, and eastern Arkansas): To engage through a *de novo* office of Citicorp Industrial Credit, Inc. in leasing personal or real property or acting as agent, broker, or advisor in leasing such property and servicing such leases, subject to all of the qualifications specified in 12 CFR 225.4(a)(6)(a) and (b), where the leases serve as the functional equivalent of an extension of credit to the lessee of the property. Such activities would be conducted from an office in Atlanta, Georgia, serving Georgia, South Carolina, Tennessee, Alabama, Mississippi, and eastern Arkansas.

6. *Citicorp,* New York, New York (consumer finance and credit related insurance activities; Missouri and Illinois): To relocate an existing office of its indirect subsidiary, Citicorp Homeowners, Inc. (Delaware), from Clayton, Missouri to a new location in St. Louis, Missouri, and to expand the activities and service area of Citicorp Homeowners, Inc. at this location; and to expand the activities of an existing office of Citicorp Person-to-person Financial Center, Inc. at the same St. Louis, Missouri location. The activities to be conducted from this location by Citicorp Homeowners, Inc. and Citicorp Person-to-Person Financial Center, Inc. will include: the making or acquiring of loans and other extensions of credit, secured or unsecured, for consumer and other purposes; the making, acquiring, and servicing, for its own account and for the account of others, of extensions of credit to individuals secured by liens on residential or non-residential real estates; the extension of loans to dealers for the financing of inventory (floor planning) and working capital purposes; the purchasing and servicing for its own account of sales finance contracts; the sale of credit related life and accident and health or decreasing or level (in the case of single payment loans) term life insurance by licensed agents or brokers, as required; the sale of credit related property and casualty insurance protecting real and personal property of credit, to the extent permissible under applicable state insurance laws and regulations; the sale of mortgage life and mortgage disability insurance directly related to extensions of mortgage loans; th sale of consumer oriented financial management courses; and the servicing, for any person, of loans and other extensions of credit. The service area of Citicorp Homeowners, Inc. and Citicorp Person-to-Person Financial Center, Inc., at this location will include the entire states of Missouri and Illinois for all of the aforementioned activities. Credit related life, accident and health insurance may be written by Family Guardian Life Insurance Company, an affiliate of Citicorp Person-to-Person Financial Center, Inc. and Citicorp Homeowners, Inc.

7. *First National State Bancorporation,* Newark, New Jersey (community reinvestment activities; New Jersey): To engage, through its subsidiary, First National State Community Development Corporation, in the following activities: To assist local and governmental groups in the economic revitalization, rehabilitation and development of both commercial and residential areas located in low and moderate-income areas in the State of New Jersey. This assistance will consist of debt and equity investments, when appropriate in residential, commercial and industrial projects. The subsidiary will acquire, own, renovate, develop, lease, manage, exchange, sell or promote real and/or personal property in order to provide the necessary assistance. The subsidiary will also provide financial counseling to all sectors of the community, especially the small business sector. Finally the subsidiary will engage, coordinate, and arrange joint ventures or participations to provide financial assistance to low and moderate-income areas of the state of New Jersey. The initial focus of the subsidiary will be on the small business community located in Atlantic City and Atlantic County. Such activities will be conducted at offices in Newark, and Atlantic City, New Jersey. Comments on this application must be received not later than January 9, 1982.

8. *National Westminster Bank Limited,* London, England, and its wholly-owned subsidiary, *NatWest Holdings Inc.,* Wilmington, Delaware (factoring, financing servicing and leasing activities; United States): To engage indirectly through a *de novo* subsidiary of NatWest Holdings Inc., NatWest Commercial Services, Inc., in the following activities: Factoring and servicing of accounts receivable arising out of U.S. domestic and international transactions; the acquisition from other factors of accounts receivable arising primarily from international transactions; the financing of accounts receivable and inventory by direct loans, guarantees of letters of credit and issuing other guarantees; unsecured loans primarily to factoring clients; the financing of equipment for clients through the acquisition of conditions sales contracts, servicing of such to direct leasing. These activities will be conducted at the principal office of NatWest Commercial Services, Inc., in Bergan County, New Jersey, and at a sales office in New York, New York, serving the entire United States, but primarily the Eastern Seaboard. Comments on this application must be received not later than January 8, 1982.

B. **Other Federal Reserve Banks:** None.

Board of Governors of the Federal Reserve System, December 16, 1981.

Theodore E. Downing, Jr.,

Assistant Secretary of the Board.

BILLING CODE 6820-26-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Alcohol, Drug Abuse, and Mental Health Administration

National Advisory Council on Drug Abuse; Meetings

In accordance with Section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C. Appendix I), announcement is made of the following national advisory body scheduled to assemble during the month of January 1982.

National Advisory Council on Drug Abuse, January 19–20; 9:00 a.m., Conference Room 8, Building 31C, National Institutes of Health, 9000 Rockville Pike, Bethesda, Maryland 20205.

Open—January 19, 9:00 a.m. to 12:00 Noon; January 20, 9:00 a.m. to 3:00 p.m.

Closed—January 19, 1:30 p.m. to 5:00 p.m.

Contact: Mrs. Jean Collins, Room 10–22 Parklawn Building 5600 Fishers Lane, Rockville, Maryland 20857 (301) 443–1644

Purpose. The National Advisory Council on Drug Abuse advises and makes recommendations to the Secretary of Health and Human Services; the Administrator, Alcohol, Drug Abuse, and Mental Health Administration; and, the Director, National Institute on Drug Abuse, on the development of new initiatives and priorities and the efficient administration of drug abuse research, training, demonstration, prevention, and community services programs. The Council also gives advice on policies and priorities for drug abuse grants and contracts, and reviews and makes recommendations on grant applications.

Agenda. On January 19, from 9:00 a.m. to 12:00 Noon, and January 20, from 9:00 a.m. to 3:00 p.m., the session will be open to the public for discussion of program developments and policy issues. On January 19, from 1:30 p.m. to 5:00 p.m., the session will be closed to the public for the final review of grant applications for Federal assistance, in accordance with the determination by the Administrator, Alcohol, Drug Abuse, and Mental Health Administration, pursuant to the provisions of Section 552b(c)(6), Title 5 U.S. Code, and Section 10(d) of Pub. L. 92–463 (5 U.S.C. Appendix I).

On January 20, from 1:30 p.m. to 3:00 p.m., the Council will hear statements from interested organizations in the drug abuse field. Persons interested in appearing should contact the Executive Secretary to be scheduled. The oral presentation shall be no longer than 10 minutes, although written statements may be submitted in supplement.

An agenda, roster of members, and minutes may be obtained from the contract person listed above.

Dated: December 10, 1981.

Elizabeth A. Connolly,

Committee Management Officer, Alcohol, Drug Abuse, and Mental Health Administration.

[FR Doc. 81–36660 Filed 12–23–81; 8:45 am]

BILLING CODE 4160–20–M

Food and Drug Administration

[Docket No. 81N–0392]

Meeting; Availability of Draft Standards Policy for Medical Devices

AGENCY: Food and Drug Administration.

ACTION: Notice of public meeting and availability of draft standards policy for medical devices.

SUMMARY: The Food and Drug Administration (FDA) announces a meeting to allow public discussion of a draft standards policy for medical devices developed by the Bureau of Medical Devices. FDA also announces the availability of this draft standards policy.

DATES: The meeting will be held on January 26, 1982, from 9 a.m. to 5 p.m.; requests to make a formal presentation at the meeting should be submitted to the contact person by December 31, 1981; summaries of any presentations to be made at the meeting should be submitted to the contact person by January 19, 1982.

ADDRESSES: The meeting will be held in the auditorium on the main floor (Rm. 1073) of the Health and Human Services—North Building, 330 Independence Ave. SW., Washington, D.C. 20201. FDA's draft standards policy is on public display in the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857, 301–443–1751, and copies of the draft standards policy may be obtained by contacting that office. Requests should be identified with the docket number found in brackets in the heading of this document.

FOR FURTHER INFORMATION CONTACT: Neal Dunning, Bureau of Medical Devices (HFK–60), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7184.

SUPPLEMENTARY INFORMATION: The purpose of this meeting is to allow public discussion of a draft standards policy for medical devices that have been classified into class II (performance standards). The standards policy has been developed by FDA's Bureau of Medical Devices. The meeting is to be conducted under provisions of FDA's administrative practices and procedures regulations (21 CFR 10.65(b)).

This meeting is intended by FDA to encourage public discussion of FDA's policies concerning medical device standards and promote cooperation among all persons affected by the regulation by FDA of medical devices. The meeting will begin with a series of formal presentations on medical device standards policy made by interested persons who may respond to this notice. FDA suggests that the presentations be limited to 10 minutes or less each. FDA will schedule the presentations on a first-come first-served basis. Any person who wishes to make a formal presentation at the meeting should notify the contact person by December 31, 1981; and, by January 19, 1982, the person should submit to the contact person the person's name, address, business affiliation, and a summary of the planned presentation. The meeting will be open to the public. Seating will be available on a first-come first-served basis. To the extent that time permits, interested persons who did not request an opportunity to make a formal presentation will be given an opportunity to make an oral presentation at the conclusion of the meeting. Copies of FDA's draft standards policy are available from the Dockets Management Branch (address above).

Dated: December 21, 1981.

Joseph P. Hile,

Associate Commissioner for Regulatory Affairs.

[FR Doc. 81–36666 Filed 12–21–81; 2:51 pm]

BILLING CODE 4160–01–M

Health Care Financing Administration

Privacy Act of 1974; Report of Altered System

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Notice of altered system.

SUMMARY: In accordance with 5 U.S.C. 552a(e)(4), we propose to amend the following notice of system of records:

Health Insurance Master Record, HHS/HCFA/BPO, No. 09–70–0502.

We have provided background information about the proposed alteration in the "Supplementary Information" section below.

DATES: HCFA filed a report of altered system with the Speaker of the House, the President of the Senate, and the Director, Office of Management and

Budget (OMB) on December 17, 1981. The altered system of records will be effective February 16, 1982.

ADDRESS: The public should address comments to Shirley Mulhall, HCFA Privacy Officer, Office of Management and Budget, Health Care Financing Administration, Room G–C–3 East Low Rise, 6325 Security Boulevard, Baltimore, Maryland 21207. Comments received will be available for inspection at this location.

FOR FURTHER INFORMATION CONTACT: Ms. Jean Harris, Bureau of Program Operations, Room 598, East High Rise, 6325 Security Boulevard, Baltimore, Maryland 21207, Telephone (301) 594–9668.

SUPPLEMENTARY INFORMATION: We propose to alter these records by adding information regarding eligibility for VA benefits. The purpose of collecting this data is to maintain information on eligibility and costs in order to reply to inquiries from carriers and intermediaries and to maintain utilization data for health insurance bill and payment record processing.

The routine uses of System Notice 09–70–0502 are not being changed. Routine use 4 calls for disclosure to "providers and suppliers of services directly or dealing through fiscal intermediaries or carriers for administration of title XVIII." In the event a Medicare claim is filed for someone authorized to receive treatment at a non-VA facility on a fee-for-service basis, information about the VA authorization will be forwarded to the Medicare contractor processing the claim. The contractor will contact the provider of medical services prior to making payment to determine whether the VA is responsible for paying for the treatment.

The notice below contains the amended use as indicated above.

Dated: December 17, 1981.

Carolyne K. Davis,

Administrator, Health Care Financing Administration.

09–70–0502

SYSTEM NAME

Health Insurance Master Record, HHS/HCFA/BPO.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Health Care Financing Administration, Bureau of Support Services, 6325 Security Blvd., Baltimore, Md. 21207
HHS Parklawn Computer Center, 5600 Fishers Lane, Rockville, Maryland 20857.
Federal Records Centers

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals age 65 or over who have been, or currently are, entitled to health insurance (Medicare) benefits under title XVIII of the Social Security Act; individuals under age 65 who have been, or currently are, entitled to such benefits on the basis of having been entitled for not less than 24 months to disability benefits under title II of the Act or under the Railroad Retirement Act, and individuals who have been; or currently are, entitled to such benefits because they have end-stage renal disease.

CATEGORIES OF RECORDS IN THE SYSTEM:

The system contains information on enrollment, entitlement, authorization from the Veterans Administration (VA) to receive VA-financed medical services at non-VA facilities, Part A (Hospital) and B (Supplementary Medical) utilization, query and reply activity, health insurance bill and payment record processing, and Health Insurance Master Record maintenance.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Sections 1814 and 1833 of title XVIII of the Social Security Act (42 U.S.C. 1395f and 1395l).

PURPOSE(S):

To maintain information on Medicare beneficiary eligibility and costs in order to reply to inquiries from contractors and intermediaries and to maintain utilization data for health insurance bill and payment record processing.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USERS:

Disclosure may be made to: (1) The Railroad Retirement Board for administering provisions of the Railroad Retirement and Social Security Act relating to railroad employment.

(2) Statement Welfare Department pursuant to agreements with the Department of Health and Human Services for determining Medicaid and Medicare eligibility, for quality control studies, for determining eligibility of recipients of assistance under titles IV, XVIII, and XIX of the Social Security Act, and for the complete administration of the Medicaid program:

(3) State audit agencies for auditing State Medicaid eligibility considerations.

(4) Providers and suppliers of services directly or dealing through fiscal intermediaries or carriers for administration of title XVIII.

(5) A congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

(6) An individual or organization for a research, evaluation, or epidemiological project related to the prevention of disease or disability, or the restoration or maintenance of health if HCFA:

a. Determines that the use or disclosure does not violate legal limitations under which the record was provided, collected, or obtained;

b. Determines that the purpose for which the disclosure is to be made:

(1) Cannot be reasonably accomplished unless the record is provided in individually identifiable form.

(2) Is of sufficient importance to warrant the effect and/or risk on the privacy of the individual that additional exposure of the record might bring, and

(3) There is reasonable probability that the objective for the use would be accomplished;

c. Requires the information recipient to:

(1) Establish reasonable administrative, technical, and physical safeguards to prevent unauthorized use or disclosure of the record, and

(2) Remove or destroy the information that allows the individual to be identified at the earliest time at which removal or destruction can be accomplished consistent with the purpose of the project, unless the recipient presents an adequate justification of a research or health nature for retaining such information, and

(3) Make no further use or disclosure of the record except:

(a) In emergency circumstances affecting the health or safety of any individual.

(b) For use in another research project, under these same conditions, and with written authorization of HCFA.

(c) For disclosure to a properly identified person for the purpose of an audit related to the research project, if information that would enable research subjects to be identified is removed or destroyed at the earliest opportunity consistent with the purpose of the audit, or

(d) When required by law;

d. Secures a written statement attesting to the information recipient's understanding of and willingness to abide by these provisions.

(7) In the event of litigation where the defendant (is) (a) The Department, or any employee of the Department in his or official capacity; (b) The United States where the Department determines that the claim, if successful, is likely to direct affect the operations of the

Department or any of its components; or (c) any department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to present an effective defense, provided such disclosure is compatible with the purpose for which the records were collected.

(8) To a contractor when the Department contracts with a private firm for the purpose of collating, analyzing, aggregating, or otherwise refining records in this system. Relevant records will be disclosed to such a contractor. The contractor shall be required to maintain Privacy Act safeguards with respect to such records.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records maintained on paper, listings, microfilm, magnetic tape disc and punchcards.

RETRIEVABILITY:

System is in sequence by health insurance claim number, and is used to carry out the tasks of enrollment, query/reply activity, and health insurance bill and payment record processing. Copies of selected parts of the records will be used by the Office of Systems Analysis; data will be retrieved in Rockville from Baltimore via dialup telecommunications lines.

SAFEGUARDS:

Unauthorized personnel are denied access to the records areas. Disclosure is limited to routine use. For computerized records electronically transmitted between Central Office and field office location (including Medicare contractors), systems securities are established in accordance with DHHS ADP Systems Manual, Part 6, "ADP Systems Security." Safeguards include a lock/unlock password system, exclusive use of leased telephone lines, a terminal oriented transaction matrix, and an audit trail.

RETENTION AND DISPOSAL:

Records are generally added to the file several months prior to entitlement. After the death of a beneficiary, his or her records may be placed in an inactive file following a period of no billing or query activity. The current 5 years of Part B and current 5 spells of Part A utilization data are maintained. All noncurrent data is microfilmed prior to elimination from the system.

SYSTEM MANAGER(S) AND ADDRESS:

Health Care Financing Administration, Director, Bureau of Program Operations, 6325 Security Boulevard, Baltimore, Md. 21207

NOTIFICATION PROCEDURE:

Inquiries and requests for system records should be addressed to the most convenient social security office, the appropriate carrier or intermediary, the HCFA Regional Office, or to the system manager named above. The individual should furnish his or her health insurance claim number and name as shown on Medicare records.

RECORD ACCESS PROCEDURES:

Same as notification procedures. Requesters should also reasonably specify the record contents being sought. (These access procedures are in accordance with Department Regulations (45 CFR. Section 5b.5(a)(2).))

CONTESTING RECORD PROCEDURES:

Contact the official at the address specified under notification procedures above, and reasonably identify the record and specify the information to be contested. (These procedures are in accordance with Department Regulations (45 CFR, Section 5b.7)).

RECORD SOURCE CATEGORIES:

The data contained in these records are furnished by the individual. There are cases, however, in which the identifying information is provided to the physician by the individual; the physican then adds the medical information and submits the bill to the carrier for payment. Updating information is also obtained from the Master Beneficiary Record.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

[FR Doc. 81-36634 Filed 12-23-81; 8:45 am]

BILLING CODE 4120-03-M

National Institutes of Health

Board of Regents of the National Library of Medicine and the Extramural Programs Subcommittee

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the Board of Regents of the National Library of Medicine on February 4-5, 1982, in the Board Room of the National Library of Medicine, 8600 Rockville Pike, Bethesda, Maryland, and the meeting of the Extramural Programs Subcommittee of the Board of Regents on the preceding day, February 3, 1982, from 2:00 to 5:00 p.m., in the 5th-floor Conference Room of the Lister Hill Center Building.

The meeting of the Board will be open to the public from 9:00 a.m. to 5:00 p.m. on February 4 and from 9:00 to 11:00 a.m. on February 5 for administrative reports and program discussions. Attendance by the public will be limited to space available.

In accordance with provisions set forth in Sections 552b(c)(4), 552b(c)(6), Title 5, U.S. Code and Section 10(d) of Pub. L. 92-463, the entire meeting of the Extramural Programs Subcommittee on February 3 will be closed to the public, and the regular Board meeting on February 5 will be closed from 11:00 a.m. to adjournment for the review, discussion, and evaluation of individual grant applications. These applications and the discussion could reveal confidential trade secrets or commercial property, such as patentable material and personal information concerning individuals associated with the applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Mr. Robert B. Mehnert, Chief, Office of Inquiries and Publications Management, National Library of Medicine, 8600 Rockville Pike, Bethesda, Maryland 20209, Telephone Number: 301-496-6308, will furnish a summary of the meeting, rosters of Board members, and other information pertaining to the meeting.

(Catalog of Federal Domestic Assistance Program No. 13.879—Medical Library Assistance, National Institutes of Health)

NIH Programs are not covered by OMB Circular A-95 because they fit the description of "programs not considered appropriate" in section 8(b)(4) and (5) of that Circular.

Dated: December 18, 1981.

BILLING CODE 4140–01–M

National Advisory Council on Aging; Meeting

Pursuant to Public Law 92–463, notice is hereby given of the meeting of the National Advisory Council on Aging, National Institute on Aging, on January 28–29, 1982, in Building 1, Wilson Hall, National Institutes of Health, Bethesda, Maryland.

The meeting will be open to the public from 9:00 a.m. until 12:00 noon on January 28, and from 9:00 a.m. until adjournment on January 29, 1982. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in Section 552b(c)(4) and 552b(c)(6), Title 5, U.S. Code and Section 10(d) of Pub. L. 92–463, the meeting will be closed to the public on January 28, 1982, from approximately 1:00 p.m. until adjournment for the review, discussion and evaluation of grant applications. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Ms. June McCann, Council Secretary, National Institute on Aging, Building 31, Room 2C–05, National Institutes of Health, Bethesda, Maryland 20205 (Area Code 301, 496–5898), will furnish substantive program information.

(Catalog of Federal Domestic Assistance Program No. 13.866, Aging Research National, Institutes of Health)

NIH programs are not covered by OMB Circular A–95 because they fit the description of "programs not considered appropriate" in section 8(b)(4) and (5) of that Circular.

Dated: December 18, 1981.

Thomas E. Malone,

Acting Director, National Institutes of Health.

[FR Doc. 81–36930 Filed 12–23–81; 8:45 am]

BILLING CODE 4140–01–M

National Advisory Allergy and Infectious Diseases Council, Allergy and Immunology Subcommittee, Microbiology and Infectious Diseases Subcommittee; Meeting

Pursuant to Public Law 92–463, notice is hereby given of the meeting of the National Advisory Allergy and Infectious Diseases Council, National Institute of Allergy and Infectious Diseases, and its Subcommittees on January 28–29, 1981 at the Shoreham Hotel, 2500 Calvert Street, N.W., Washington, D.C. 20008.

The meeting will be open to the public on January 28 from approximately 9:00 to 9:30 a.m., and from 1:30 p.m. to approximately 5:00 p.m. On January 29 the meeting will be open to the public from approximately 9:00 a.m. to 9:30 a.m. This will be to discuss program policies and issues. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in Sections 552b(c)(4) and 552b(c)(6), Title 5, U.S. Code, and Section 10(d) of Pub. L. 92–463, the meetings of the NAAIDC Allergy and Immunology Subcommittee and of the NAAIDC Microbiology and Infectious Diseases Subcommittee will be closed to the public for approximately three hours for the review, evaluation, and discussion of individual grant applications. It is anticipated that this will occur from 9:30 a.m. until approximately 12:30 p.m. on January 28, 1981. The meeting of the full Council will be closed from approximately 9:30 a.m. until adjournment on January 29 for the review, evaluation, and discussion of individual grant applications. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications, disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Mr. Robert L. Schreiber, Chief, Office of Research Reporting and Public Response, National Institute of Allergy and Infectious Diseases, Building 31, Room 7A32, National Institutes of Health, Bethesda, Maryland 20205, telephone (301) 496–5717, will provide summaries of the meetings and rosters of the Council members as requested.

Dr. Luz A. Froehlich, Acting Director, Extramural Activities Program, NIAID, NIH, Westwood Building, Room 703, telephone (301) 496–7291, will provide substantive program information.

(Catalog of Federal Domestic Assistance Program Nos. 13.855, Pharmacological Sciences; 13.856, Microbiology and Infectious Diseases Research, National Institutes of Health)

NIH programs are not covered by OMB Circular A–95 because they fit the description of "programs not considered appropriate" in Section 8(b) (4) and (5) of that Circular.

Dated: December 18, 1981.

Thomas E. Malone,

Deputy Director, National Institutes of Health.

BILLING CODE 4140-01-M

National Advisory Dental Research Council; Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the National Advisory Dental Research Council, National Institute of Dental Research, on January 25-26, 1982, in Conference Room 6, Building 31-C, National Institutes of Health, Bethesda, Maryland. This meeting will be open to the public from 9:00 a.m. to adjournment on January 26 for general discussion and program presentations. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in Sections 552b(c)(4) and 552b(c)(6), Title 5, U.S. Code and Section 10(d) of Pub. L. 92-463, the meeting of the Council will be closed to the public on January 25 for 9:00 a.m. to adjournment for the review, discussion and evaluation of individual grant applications. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Mrs. Dorothy Costinett, Committee Management Assistant, National Institute of Dental Research, National Institutes of Health, Building 31-C, Room 2C17, Bethesda, MD 20205 (phone 301-496-2883), will furnish rosters of committee members, a summary of the meeting, and other information pertaining to the meeting.

(Catalog of Federal Domestic Assistance Programs Nos. 13.840—Caries Research, 13.841—Periodontal Diseases Research, 13.842—Craniofacial Anomalies Research, 13.843—Restorative Materials Research, 13.844—Pain Control and Behavioral Stidies, 13.845—Dental Research Institutes, 13.878—Soft Tissue Stomatology and Nutrition Research, National Institutes of Health)

NIH programs are not covered by OMB Circular A-95 because they fit the description of "programs not considered appropriate" in section 8(b) (4) and (5) of that Circular.

BILLING CODE 4140-01-M

National Advisory Environmental Health Sciences Council; Meeting

Pursuant to Public Law 92-463, notice is hereby given of the meeting of the National Advisory Environmental Health Sciences Council, National Institute of Environmental Health Sciences, January 25-26, 1982, at the National Institute of Environmental Health Sciences, Building 101 Conference Room, Research Triangle Park, North Carolina.

This meeting will be open to the public on January 25, 1982, from 9 a.m. to approximately 12 noon for the report of the Director, NIEHS, and for discussion of the NIEHS budget, program policies and issues, recent legislation, and other items of interest. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in Sections 552b(c)(4) and 552b(c)(6), Title 5, U.S. Code and Section 10(d) of Pub. L. 92-463, the meeting will be closed to the public on January 25, from approximately 1:00 p.m. to adjournment on January 26, 1982, for the review, discussion and evaluation of individual grant applications. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Leota B. Staff, Committee Management Officer, NIEHS, Building 31, Room 2B55, National Institutes of Health, Bethesda, Maryland 20205, (301) 496-3511, will provide summaries of the meeting and rosters of council members.

Dr. Wilford L. Nusser, Associate Director for Extramural Programs, National Institute of Environmental Health Sciences, P.O. Box 12233, Research Triangle Park, North Carolina 27709, (919) 541-7723, FTS 629-7723, will furnish substantive program information.

BILLING CODE 4140-01-M

Public Health Service

Removal of Restrictions on Royalty Distribution to Inventors

On August 21, 1981, the Department filed a Notice in the **Federal Register**, Vol. 46, No. 162, announcing its intention to remove the restrictions on the amount of royalties a grantee institution may share with its inventors. The Department solicited public comments within sixty days of publication, setting forth the reasons why it would *not* be in the best interests of the United States to remove present restrictions on royalty distribution to inventors.

The comments both from inventors and the institutions were all in favor of rescinding the restrictions. Several cited the positive effects on the grantee institutions: restoring equity among researchers/inventors receiving Federal research grants; eliminating the necessity to establish two separate patent policies—one for DHHS inventions and another for all other inventions; and removal of excessive administrative and clerical burdens created by the restrictions.

Senate Report 96–480 by the Committee on the Judiciary of the United States Senate notes that Section 202(c)(7)(c) of Pub. L. 96–517 gives special recognition to the equity of inventors and requires that nonprofit organizations share royalties with them, and that it is not intended that Federal agencies establish sharing ratios.

Accordingly, notice is hereby given that Section VI(f) of the Department's Institutional Patent Agreements and all determinations previously made pursuant to 45 CFR 8.2(b) are amended to remove the limitations on the share of royalty income that nonprofit organizations are permitted to share with their employee-inventors.

(5 U.S.C. 301; 42 U.S.C. 241)

Dated: December 18, 1981.

Edward N. Brandt, Jr.,

Assistant Secretary for Health.

School Construction Priorities List—Fiscal Year 1983

December 3, 1981.

This notice is published in exercise of authority delegated by the Secretary of Interior to the Assistant Secretary—Indian Affairs by 209 DM 8.

The school construction priority list has been revised for Fiscal Year 1983 as required by Pub. L. 95–561; 92 Stat. 2319. Section 1125(c) requires that: "At the time any budget request for school construction is presented, the Secretary shall publish in the **Federal Register** and submit with the budget request the current list of all school construction priorities".

This notice for fiscal year 1983 provides the current revised list of proposed construction projects.

Construction of these projects is subject to the availability of funds and/or the status of currently committed construction projects approved by Congress. These proposed projects are also subject to further review in terms of either replacement or rehabilitation.

This current list of school construction projects applies to fiscal year 1983. A revised list is developed and published for each succeeding fiscal year.

BIA AND CONTRACT SCHOOL CONSTRUCTION RANKING—FISCAL YEAR 1983

Ranking	School name	State
1	Hopi High School	AZ.
2	Laguna Junior High School	NM.
3	Black Mesa Day School	AZ.
4	Little Eagle Day School	SD.
5	San Simon Day School	AZ.
6	Beatrice Rafferty Day School	ME.
7	Indian Island Day School	ME.
8	Alamo Navajo Community School	NM.
9	Indian Township Day School	ME.
10	Pine Hill Middle School	NM.
11	Paschal Sherman Indian School	WA.
12	Low Mountain Boarding School	AZ.
13	St. Francis Indian School	SD.
14	Coeur D'Alene Indian School	ID.
15	Pinon Boarding School	AZ.
16	Ojibwa Indian School	ND.
17	Huerfano Dormitory	NM.
18	Wahpeton Boarding School	ND.

Further information regarding this list or the ranking process may be obtained from the Chief, School Facilities Staff, Bureau of Indian Affairs, P.O. Box 2147, Albuquerque, NM 87103–2147, Telephone: (505) 766–2985.

BILLING CODE 4310-84-M

Colorado and Wyoming; Green River-Hams Fork Regional Coal Team Hearings

AGENCY: Bureau of Land Management, Interior.

ACTION: Public Hearings and Comment Period on Regional Production Goals.

SUMMARY: The Colorado State Office of the Bureau of Land Management advises the public that hearings will be held to receive oral and written public comments to assist the Secretary of Interior, through the Regional Coal Team (RCT), in the review of the Federal Coal Production Goals for the Green River-Hams Fork Coal Production Region.

Oral and written comments will be accepted at the public hearings. Individuals commenting orally are asked to provide written copies, if possible. Written comments should be sent to the Colorado State Director at the address given below.

DATES: Public hearings will be held on the following schedule:

Date	City	Meeting place	Time
Jan. 5, 1982	Denver CO	Main Post Office, Room 467, 1823 Stout Street	1–4 p.m.
Jan. 6, 1982	Craig CO	Centennial Trailer, Craig District Office, 455 Emerson Street	7:00 p.m.
Jan. 12, 1982	Rawlins WY.	Holiday Inn, 1801 E. Cedar Street	7:00 p.m.
Jan. 13, 1982	Rock Springs WY.	Holiday Inn, 1675 Sunset Drive	7:00 p.m.

ADDRESS: Wrtiten comments on the production goals should be addressed to: State Director, Colorado, 1037 20th Street, Denver, Colorado 80202.

Written comments will be accepted up until 30 days after the date of this notice.

FOR FURTHER INFORMATION CONTACT: Kenneth Smith, Coal Program Specialist, Bureau of Land Management, at the above address, phone (303) 837–3008.

SUPPLEMENTARY INFORMATION: The Department of Energy (DOE) issued updated national and regional coal production goals in December of 1980. These goals are intended to guide the Department of Interior and the RCT in setting a Federal leasing target for the Green River-Hams Fork Federal Coal Production Region.

DOE Coal Production Goals

(Million Tons Annually)

Scenario	1985	1990	1995
Low	71.9	75.1	83.8
Medium	76.5	90.8	130.0
High	88.6	105.3	160.9

The coal production goals developed by DOE are provided at three levels of energy consumption growth rates—low, medium and high.

The Federal Coal Management regulations (43 CFR 3420.3–2(d) require that the RCT consider the regional situation and recommend adjustments to the regional production goals based on such factors as: (1) Public comment received in writing or in hearing(s) held by the team in the region, (2) State Government, Bureau of Land Management State Office, Indian Tribe and regional development policies, (3) administrative capacity to satisfy the indicated level of leasing based on the final production goals, and (4) other information available to the Regional Coal Team which they believe should receive consideration by the Secretary in his review of the final regional production goals.

Dated: December 16, 1981.

Bob Moore

Associate State Director, Colorado.

		23	E½	320.00
		35	All	640.00
Total				8,640.48
Grand total				17,688.36

The exchange will involve the surface estates only, of the above described lands. All of the lands both public and private, are hereby segregated from the workings of the land laws, and from mining claim locations.

DATE: For a period of 45 days interested parties may submit comments to the District Manager, BLM, Salt Lake District, 2370 South 2300 West, Salt Lake City, UT 84119. Any adverse comments will be evaluated by the District Manager who may vacate or modify this realty action and issue a final determination.

FOR FURTHER INFORMATION CONTACT: Detailed information concerning the exchange, including the environmental assessment, is available for review at the Salt Lake District Office, 2370 South 2300 West, Salt Lake City, Utah 84119, or call Evan N. Rudd at 524–5348.

SUPPLEMENTARY INFORMATION: The purpose of the exchange is to acquire nonfederal lands valuable for wildlife management purposes and to dispose of public lands designed for agricultural purposes. The exchange has been discussed with Box Elder County officials and is consistent with planning. The public interest will be well served by making this exchange.

The value of the lands to be exchanged are approximately equal and the acreage will be adjusted or money will be used to equalize the values, upon completion of the final appraisal of the lands. The terms and conditions applicable to the exchange will be as follows:

1. Reservation to the U.S. for construction of ditches and canals.

2. Reservation of all minerals, together with the rights of ingress and egress to prospect for, mine and remove the same under applicable law on the offered and the selected land.

3. Reservation of rights-of-way for the county roads which pass through selected lands.

4. Subject to oil and gas leases numbered U–26372, U–31571, U–31575, U–31576, U–31580, U–31581 and U–38548, name and address of leases on file at Utah State Office, BLM, 136 East South Temple, Salt Lake City, UT 84111.

Frank W. Snell,

District Manager.

BILLING CODE 4310–84–M

[W–4374]

Wyoming; Partial Termination of Proposed Withdrawal

1. The Bureau of Land Management filed an application for withdrawal which was published in the **Federal Register** on page 2588 of the issue for February 7, 1967, and amended by notices published on page 4030 of the issue of March 14, 1967, and page 4506 of the issue of March 24, 1967.

2. The foregoing application requested withdrawal of all public lands which are valuable or prospectively valuable for geothermal steam, from all appropriations under the public land laws, including, without limitation, the mining laws and the mineral leasing laws.

3. The notice published on page 4506 of the issue of March 24, 1967, identified and described lands located in the States of California, Nevada, Idaho, Montana and New Mexico as valuable or prospectively valuable for geothemral steam. No lands in the State of Wyoming have been identified as valuable or prospectively valuable for geothermal steam.

4. Subsequent to the filing of the application for withdrawal the Congress enacted the Geothermal Steam Act of 1970. That Act and the regulations contained in 30 CFR Part 270 and 43 CFR Part 3200 implementing the provisions of that act provide the necessary protections as well as provisions for the development of geothermal steam resources which obviates the need for the withdrawal.

5. Therefor, pursuant to the regulations contained in 43 CFR 2310.1–4, the application for withdrawal as far as it applies to public lands in the State of Wyoming is hereby terminated. This action will not open any land to the operation of the public land laws, mining laws or mineral leasing laws because no segregation from these laws was ever effected by identifying them as valuable or prospectively valuable for geothermal steam.

James H. O'Connor,

Acting State Director.

Wyoming; Modification of a Proposed Continuation of a Withdrawal

December 14, 1981.

The notice of a Proposed Continuation of a Bureau of Land Management Administrative Site Withdrawal appearing in the **Federal Register** Tuesday, June 9, 1981, page 30576 is hereby modified.

Further evaluation of the proposed action by the Bureau of Land Management has resulted in the determination that approximately 4.6 acres of the 13.3 acres currently under withdrawal are no longer needed for the administrative site. Partial revocation

and continuation of this withdrawal is pending.

Harold G. Stinchcomb,

Chief, Branch of Lands and Minerals Operations.

BILLING CODE 4310-84-M

[NM 51107]

New Mexico; Application

December 15, 1981.

Notice is hereby given that, pursuant to Section 28 of the Mineral Leasing Act of 1920 (30 U.S.C. 185), as amended by the Act of November 16, 1973 (87 Stat. 576), Natural Gas Pipeline Company of America has applied for a 4-inch natural gas pipeline right-of-way across the following lands:

New Mexico Principal Meridian, New Mexico

T. 20 S., R. 20 E., N.M.P.M.,
Sec. 23, SE¼SW¼, NE¼SE¼, S½SE¼;
Sec. 24, S½NE¼, SE¼NW¼, N½SW¼;
Sec. 26, N½NW¼;
Sec. 27, NE¼NE¼, S½N½, NW¼SW¼;
Sec. 28, S½SW¼, N½SE¼, SW¼SE¼;
Sec. 33, NW¼NW¼.
T. 20 S., R. 31 E., N.M.P.M.,
Sec. 17, SE¼NE¼, N½S½, SW¼SW¼;
Sec. 18, S½SE¼;
Sec. 19, Lots 1, 2, NW¼NE¼, NE¼NW¼.

This pipeline will convey natural gas across 6.589 miles of public land in Eddy County, New Mexico.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should promply send their names and address to the District Manager, Bureau of Land Management, P.O. Box 1397, 1397, Roswell, New Mexico 88201.

John L. Gregg,

District Manager.

BILLING CODE 4310-84-M

Nevada; Redelegation of Authority

SUMMARY: Section 1.1 of Bureau Order No. 701 dated July 23, 1964, as amended by notice published at 45 FR 6177 on Friday, January 25, 1980 (FR Doc. 80-2428 filed 1/24/80; 8:45 a.m.) and by notice published at 45 FR 81128 on Tuesday, December 9, 1980 (FR Doc. 80-38128 filed 12/8/80; 8:45 a.m.) authorizes the Bureau of Land Management State Directors the opportunity to redelegate the authority to grant or renew rights-of-way under Title I, Section 28 of the Mineral Leasing Act of 1920, as amended, and to redelegate all of their authority under Public Law 94-579 to District Managers. The authority, listed in Section 1.9 of Part 1 of Bureau Order No. 701, except title transfer actions and special project rights-of-way, is hereby redelegated to the Carson City District Manager.

This notice has no other effect on the provisions of FR Doc. 80-2428 or FR Doc. 80-38128.

EFFECTIVE DATE: This redelegation will become effective January 11, 1982.

FOR FURTHER INFORMATION CONTACT: Mike Moran, Bureau of Land Management, Nevada State Office, Post Office Box 12000, Reno, NV 89520.

California Desert District Grazing Advisory Board; Meeting

Notice is hereby given in accordance with Pub. L. 94-579, Title IV, Sec. 403, that a public meeting of the California Desert District Grazing Advisory Board will be held Thursday, February 4, 1982.

The meeting will begin at 10:00 a.m. in the Elks Lodge, 1000 Lily Hill Drive in Needles, California and adjourn by 5:00 p.m.

The agenda for the meeting will include (1) discussion of the reorganized Board and members roles; (2) the Rangeland Program Summary Update, including Desert Plan implementation completed to date and scheduled for this year; (3) Bureau changes in Rangeland Management Policy; (4) proposed Stewardship program in the Desert.

Comments and position statements may be submitted in advance to the Chairman of the Grazing Advisory Board, c/o Bureau of Land Management, 1695 Spruce Street, Riverside, California 92507.

Summary minutes of the board meeting will be maintained in the California Desert district and will be available during regular business hours for public inspection within 30 days following the meeting.

Gerald E. Hillier,

District Manager.

BILLING CODE 4310-84-M

[Serial No. I-1518]

Idaho; Partial Termination of Classification for Multiple-Use Management

December 16, 1981.

1. Pursuant to authority delegated to me by Bureau Order No. 701, dated July 23, 1964 (29 FR 10528), I hereby terminate the Bureau of Land Management Multiple-Use Classification Order dated October 27, 1967, (Serial No. I-1518), published in the **Federal Register**, November 2, 1967, 32 FR 15186, insofar as it affected the lands described below:

Boise Meridian, Idaho

Little Lost Campground

T. 9 N., R. 27 E.,
Sec. 4, Lot 2, SW¼NE¼, NW¼SE¼.

Badger Creek Campground

T. 9 N., R. 27 E.,
Sec. 28, W½SE¼, SW¼NE¼.

Wet Creek Campground

T. 9 N., R. 28 E.,
Sec. 20, SW¼NE¼

Hawley Mountain Campground

T. 9 N., R. 28 E.,
Sec. 4, S½NW¼.

Dry Creek Canal Campground

T. 10 N., R. 28 E., B.M.
Sec. 33, S½SE¼.

The areas described aggregate 439.12 acres in Butte County.

2. The segregative effect on the lands described in this order will terminate upon publication of this notice in the **Federal Register** as provided by the regulations in 43 CFR 2461.5(c)(2).

3. At 7:45 a.m. on January 25, 1982, the lands will be open to operation of the public land laws generally, subject to valid existing rights, the provisions of existing withdrawals and the requirements of applicable law. All valid applications received at or prior to 7:45 a.m. on January 25, 1982, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing.

4. The lands also will be open to location under the United States mining laws at 7:45 a.m. on January 25, 1982. The lands have been and continue to be open to applications and offers under the mineral leasing laws.

Inquiries concerning the lands should be addressed to the Chief, Branch of Lands and Minerals Operations, Bureau of Land Management, Federal Building, Box 042, Boise, Idaho 83724.

Theodore G. Bingham,
Acting State Director.

BILLING CODE 4310-84-M

INTERNATIONAL COMMUNICATION AGENCY

Privacy Act of 1974; Report of New System

AGENCY: International Communication Agency.

ACTION: Notice.

SUMMARY: In accordance with the requirements of the Privacy Act of 1974, the International Communication Agency published a notice in the **Federal Register** on November 6, 1981 (46 FR 55156) requesting comments on a new system of records which we proposed to establish. A report on the proposed new system was submitted to Congress and to the Office of Management and Budget on October 26, 1981. After considering the two comments received, the Agency is making two changes which are described below under the heading "Supplementary Information." Following these changes, the amended system notice is printed in its entirety.

DATE: The Public Affairs Contact System, as amended below, will be effective December 28, 1981.

SUPPLEMENTARY INFORMATION: Both parties commenting on the proposed new system of records questioned one of the routine uses which would have made information in the records available to other government agencies who have statutory or other lawful authority to maintain such information. The Agency has decided to delete this proposed routine use in its entirety.

The authority for maintenance of the system was also questioned. The Agency is amending this section to cite its enabling statutes, the U.S. Information and Educational Exchange Act of 1948, as amended (22 U.S.C. 1431 *et seq.*) and the Mutual Educational and Cultural Exchange Act of 1961, as amended (22 U.S.C. 2451 *et seq.*), in addition to the Federal Records Act.

SYSTEM NAME:

Public Affairs Contact System.

SECURITY CLASSIFICATION:

Unclassified.

SYSTEM LOCATION:

Office of the Director, International Communication Agency, 1750 Pennsylvania Ave., NW., Washington, D.C. 20547.

CATEGORIES OF INDIVIDUALS COVERED IN THE SYSTEM:

U.S. private sector leaders; key overseas contacts (non-Americans); legislative and executive branch personnel who deal with the International Communication Agency and U.S. foreign policy; private citizens and corporations interested in the International Communication Agency and American public diplomacy; U.S. businessmen overseas.

CATEGORIES OF RECORDS IN THE SYSTEM:

Biographic data (name, occupation, organization, substantive interests in foreign policy, mailing address); telephone number; records of participation in the International Communication Agency program overseas and formal or informal events in the United States.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Federal Records Act, 44 U.S.C. 3101, U.S. Information and Educational Exchange Act of 1948, as amended (22 U.S.C. 1431 *et seq.*) and the Mutual Educational and Cultural Exchange Act of 1961, as amended (22 U.S.C. 2451 *et seq.*).

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Identification of persons or organizations who may have interest in American public diplomacy initiatives and developments for distribution of information about International Communication Agency programming and trends in public diplomacy, identification and distribution of information to individuals with an interest in supporting Agency efforts to encourage participation of the private sector in Agency programs at least cost to the American public.

Information is made available on a need-to-know basis to personnel of the International Communication Agency as may be required in the performance of their official duties.

The International Communication Agency intends to establish a public affairs contact system for use by the Director, Deputy Director and their staffs. The system is intended to provide names, telephone numbers and mailing addresses of persons or institutions interested in public diplomacy and the mission of the International Communication Agency in international affairs. Individuals and institutions so identified may be contacted to provide

them with information on current developments, to solicit their views on new program initiatives or to obtain support for participation of the private sector in Agency programs.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

All information will be maintained on an automated system—on a magnetic disk for active use and on magnetic tape for system backup.

RETRIEVABILITY:

Records are retrieved by name, contact identification number, institutional affiliation, geographic location, occupation, interests, language ability, year of birth, sex, marital status, invitation lists, Agency publications received, contact history, invitation history, distribution lists, telephone number, and exchange program record.

SAFEGUARDS:

Files are to be called up by designated persons only with preassigned passwords on a terminal in the Office of the Director.

RETENTION AND DISPOSAL:

Files will be reviewed annually and retained, retired or destroyed as appropriate.

SYSTEM MANAGER(S) AND ADDRESS:

Executive Assistant to the Director, International Communication Agency, 1750 Pennsylvania Ave., NW, Washington, D.C. 20547.

NOTIFICATION PROCEDURE:

Chief, Office of Public Liaison, International Communication Agency, 1750 Pennsylvania Ave., NW, Washington, D.C. 20547.

RECORDS ACCESS PROCEDURES:

Requests from individuals should be addressed to: Chief, Public Liaison, International Communication Agency, 1750 Pennsylvania Ave., NW, Washington, D.C. 20547.

CONTESTING RECORD PROCEDURES:

The Agency's rules for access and for contesting contents and appealing initial determinations by the individual concerned are published in Part 505 of Title 22, Code of Federal Regulations.

RECORD SOURCE CATEGORY:

Information is provided by the individual concerned or from published sources.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

Dated: December 21, 1981.

Charles Z. Wick,

Director, International Communication Agency.

[FR Doc. 81-38701 Filed 12-23-81; 8:45 am]

BILLING CODE 8230-01-M

INTERSTATE COMMERCE COMMISSION

[Docket No. AB-1 (Sub-120)A]

Railroad Services Abandonment; Chicago & North Western Transportation Co.; Abandonment Between Fort Dodge, IA and Milepost 217.2 in Webster County, IA; Findings

The Commission has found that the public convenience and necessity permit Chicago and North Western Transportation Company to abandon its 3.1 mile rail line between Fort Dodge, IA at milepost 220.3 and milepost 217.2, in Webster County, IA. A certificate will be issued authorizing this abandonment unless within 15 days after this publication the Commission also finds that: (1) A financially responsible person (or government entity) has offered assistance (through subsidy or purchase) to enable the rail service to be continued; and (2) it is likely that the assistance would fully compensate the railroad.

Any financial assistance offer must be filed with the Commission and served concurrently on the applicant, with copies to Ms. Ellen Hanson, Room 5417, Interstate Commerce Commission, Washington, D.C. 20423, no later than 10 days from publication of this notice. Any offer previously made must be remade within this 10-day period.

Information and procedures regarding financial assistance for continued rail service are contained in 49 U.S.C. 10905 and 40 CFR 1121.38.

Agatha L. Mergenovich,

Secretary.

[FR Doc. 81-38646 Filed 12-23-81; 8:45 am]

BILLING CODE 7035-01-M

[Ex Parte No. MC-82]

Provisions for Foreseeable Future Costs and Requirements for Additional Data

AGENCY: Interstate Commerce Commission.

ACTION: Notice of decision on final procedures.

SUMMARY: The Commission adopts these procedures in accordance with the Motor Carrier Act of 1980, Section 13(a), to permit motor carriers of property to recover reasonable foreseeable future costs in their general increase filings. Under the procedures adopted, future costs will be recoverable at 6 month intervals. The procedures are intended to expedite the recovery of cost increases to reduce regulatory lag. In addition, the Commission is requiring the submission of information reflecting non-issue general commodity traffic not currently provided by the MC-82 rate bureaus.

EFFECTIVE DATE: January 25, 1982.

ADDRESS: Copies of the complete decision are available, upon request, from: The Office of the Secretary, Interstate Commerce Commission, 12th & Constitution Avenue NW., Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT: Paul R. Meder, (202) 275-7457.

SUPPLEMENTARY INFORMATION: By notice served July 7, 1981, (46 FR 35566, July 9, 1981), comments were solicited on certain proposed procedures with respect to the treatment of time frames and methodology in the computation of reasonable estimated or foreseeable future costs. Procedures for recovery of these costs were authorized by Section 13(a) of Pub. L. 96-296, amending 49 U.S.C. 10701 of the Motor Carrier Act of 1980. In addition, the Commission outlined provisions for the submission of data reflecting non-issue general commodity traffic handled by the traffic study carriers and relied on by the Ex Parte No. MC-82 motor rate bureaus.

Thirteen parties, including shippers, shippers' associations, and rate bureaus, filed comments. The comments received are generally favorable to the proposed procedures, however they suggest changes and arguments in opposition to certain of matters contained in the original order.

We have considered the matters raised by the parties and are convinced that the proposed procedures are warranted. A number of minor changes have been made in the proposed procedures in response to suggestions made in the comments. These changes are summarized below. The sections noted below correspond to the sections of the adopted procedures.

Section (B): In order to clarify our intent as to the requirements for filing for additional increases during the future six month period, our original language has been modified to read:

> If a rate bureau elects to rely on future cost increases prepared int he manner outlined herein, and in turn files another general increase during the six month duration, the rate bureau will be required to establish by a preponderance of the evidence and through appropriate documentation that the increase

sought has not been previously recaptured in the immediately preceding general increase filing.

Section (E): The motor rate bureaus are required to file a statement, in each general increase filing, indicating the absence of any material revenue increases as the result of independent actions taken during the period (between current level expense period and the effective date of a general increase) or indicate the nature of any material revenue increase due to independent actions and its impact on the updated revenue levels. This statement must be filed 15 days in advance of the effective date.

Section (F): Provision has been made for the inclusion of future costs in the calculation of constructed revenue in column 7 of Appendix A, part I. An additional column (7a) for future costs has been added.

Appendix A, part IV, line 21 (footnote): The footnote has been amended to read:

Excludes revenues from intrastate, Section 22, independent tariffs and other traffic not potentially includable as issue traffic subject to I.C.C. jurisdiction. Revenues from this traffic for the base year are $———. The remaining revenues are the sum of line 15 and 19 above.

Appendix A, Section 2 (Part V): We have amended Appendix A, Section 2 (Part V) by eliminating lines 15 through 24 and substituting the wording "all other revenues" on line 12 and providing for Total System Revenue on line 13. We have also eliminated the requirement for separation of LTL and TL revenues on lines 12 and 13 and only require total data. However, we do require that the motor rate bureaus provide updated total other revenues and total system revenues for the two levels indicated. These levels should agree with Appendix A, Section I, Part I, cols. 4, through 6a as appropriate.

A complete copy of the adopted procedures is included below. Since future cost projections are permitted but are not mandatory, there will be no changes in the present wording in the printed decision in § 1104.3(a) of Chapter X, Subchapter B, Title 49 of the Code of Federal Regulations.

Procedures

(A) In compliance with the provisions of the Motor Carrier Act of 1980, we permit the motor rate bureaus to provide additional and reasonable estimated or foreseeable future cost increases for a six month period following the effective date of any general increase filing.

(B) If a rate bureau elects to rely on future cost increases, prepared in the manner outlined herein, and in turn files another general increase during the six month duration, the rate bureau will be required to establish by a preponderance of the evidence and through appropriate documentation that the increase sought has not been previously recaptured in the immediately preceding general increase filing.

(C) Future expenses will be divided into three categories as follows:

1. *Simultaneously Scheduled Wage and Wage Related Increases.* Those expense increases which are scheduled to start simultaneously with the effective date of the general increase filing.

2. *Interim Scheduled Wage and Wage Related Increases.* Those expense increases which will become effective in varying amounts on varying dates. The motor rate bureaus will be required to document the results of all special labor studies in support of these future expense increases and include the results in their evidentiary filing. The motor rate bureaus will be permitted to rely on any reasonable forecasting methodology that clearly defines the various interim wage and wage related future increases. However, the overall impact cannot exceed an amount developed on the basis as provided in Table 1 below.

Table 1 below provides an illustration of how the computation of the total impact of these increases can be applied. The illustration assumes that there will be 5 separate interim wage increases. Each increase amounts to 8 percent, applies to 5 percent of total expenses, and occurs at different dates between April 1 and October 1. The impact of the wage increases can be calculated as follows:

TABLE 1.—DEVELOPMENT OF IMPACT OF INTERIM SCHEDULED WAGE AND WAGE RELATED INCREASES (BASED ON A GENERAL INCREASE TO BECOME EFFECTIVE APRIL 1)

Effective date of wage increase	Rate of increase	×	Portion of total expense	=	Impact to total expense	×	Portion of 6-month period in effect	Impact on total expense (percent)
May 1	8		5		.40		⅚ or 83.3 percent	33
June 1	8		5		.40		⅔ or 66.7 percent	27
July 1	8		5		.40		½ or 50.0 percent	20
Aug. 1	8		5		.40		⅓ or 33.3 percent	13
Sept. 1	8		5		.40		⅙ or 16.6 percent	07
								1 00

Total (5 individual increases applicable to 25 percent of total expenses = 1.0%).

These projected increased costs for the six month future time period, when relied on, will be included in the "future pro forma" cost level on the basis of the amount determined through the appropriate methodology.

The amount of expense increase not allowed from the application of future expenses calculated on the basis of table 1 above will be subject to recovery in the next general increase filing.

3. *Unscheduled Expense Increases (Non-labor Excluding Fuel and Fuel Related Expenses).* Unscheduled cost increases will be allowed on the basis of one-half of the estimated increase in the expenses at the end of the 6-month future period. For example, if the estimated future unscheduled cost increase for the period is 18 percent, a cost increase of 9 percent will be allowed over the length of the period. This approach will permit a reasonable recovery of short-run, non-scheduled expense increases, since it will assume a single cost increase over the entire six-month future cost period that is equivalent to the steadily rising costs covered by this area.

D. *Studies.*—The Commission will accept future expense estimates based on such established methods as Teamster related contractual wage increases (Trucking Management Inc. (TMI)), labor studies based on non-Teamster union contracts and non-union wage increases, the motor carrier non-labor index or other defined methods which will provide reasonable estimates. Regardless of the methodology relied upon, the burden of proof as to the reasonableness of the methodology and adequate support rests with the MC–82 motor rate bureaus.

Each rate bureau is to provide the Commission with the underlying workpapers supporting the calculations used in the preparation of rate adjustments subject to the provisions of Ex Parte No. MC–82, supra. Workpapers are to be sent to the Bureau of Accounts, Section of Cost Analysis.

(E) *Updated Study Carrier Data.*—The motor rate bureaus are required to file a statement, in each general increase filing, indicating the absence of any material revenue increases as the result of independent actions taken during the period (between the current level

expense period and the effective date of a general increase) or indicate the nature of any material revenue increase due to independent actions and its impacted on the updated revenue levels. This statement must be filed 15 days in advance of the effective date.

(F) *Issue Traffic.*—The motor bureaus are also required to include with their general increase submissions an expanded "Appendix A" for all carriers reflecting the revenue/expense comparisons for future cost increases under consideration. The impact of these changes shall be shown as follows: (1) Separately for system and issue traffic, (2) in addition to presently required revenue/expense comparisons and (3) identified as reflecting future costs.

We are also requiring, as we proposed, that the motor rate bureaus submit, as part of the justification statement in an MC–82 general increase filing, the data reflected in attachments 1 and 2.

Pursuant to 5 U.S.C. 605(b), we certify that the procedures adopted in this proceeding will not have a significant economic impact on a substantial number of small entities. The additional data required by this decision is currently available to rate bureaus and will require little or no additional input from the carriers, large or small, which they represent. In addition, inclusion of "foreseeable future costs" in rate requests filed by the rate bureaus is permissive, not mandatory. Finally, this action was mandated by the Motor Carrier Act of 1980.

This decision will not significantly affect the quality of the human environment or conservation of energy resources.

(49 U.S.C. 10321, 10701 and 10706, section 13(a) of the Motor Carrier Act of 1980, Pub. L. 96–296; and 5 U.S.C. 553.)

Dated: December 1, 1981.

By the Commission, Chairman Taylor, Vice Chairman Clapp, Commissioners Gresham and Gilliam.

Agatha L. Mergenovich,

Secretary.

[Finance Docket No. 29785]

Atchison, Topeka and Santa Fe Railway Co.; Exemption of Abandonment of 0.91 Mile of Track in Yavapai County, AZ

AGENCY: Interstate Commerce Commission.

ACTION: Notice of exemption.

SUMMARY: The Commission exempts from the requirements of prior approval under 49 U.S.C. 10903 the abandonment by the Atchison, Topeka and Santa Fe Railway Company of 0.91 miles of track in Yavapai County, AZ. This is a portion of the Prescott District, Albuquerque Division extending from MP 57.32 to MP 58.23 in the City of Prescott.

DATES: This exemption will be effective on January 22, 1982. Petitions for reopening and reconsideration of this action must be filed within 20 days after publication.

ADDRESSES: Send pleadings to: (1) Section of Finance, Room 5414, Interstate Commerce Commission, Washington, DC 20423; (2) Petitioner's Representative; R. K. Knowlton, 80 East Jackson Blvd., Chicago, IL 60604. Pleadings should refer to Finance Docket No. 29785.

FOR FURTHER INFORMATION CONTACT: Ellen D. Hansen, (202) 275-7245.

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. For a copy of the full decision, write to Interstate Commerce Commission, Room 2227, Washington, DC 20423, or call toll free 800-424-5403.

Dated: December 16, 1981.

By the Commission, Chairman Taylor, Vice Chairman Clapp, Commissioners Gresham and Gilliam.

Agatha L. Mergenovich,
Secretary.

BILLING CODE 7035-01-M

Motor Carriers; Finance Applications; Decision-Notice

The following applications, filed on or after July 3, 1980, seek approval to consolidate, purchase, merge, lease operating rights and properties, or acquire control of motor carriers pursuant to 49 U.S.C. 11343 or 11344. Also, applications directly related to these motor finance applications (such as conversions, gateway eliminations, and securities issuances) may be involved.

The applications are governed by Special Rule 240 of the Commission's Rules of Practice (49 CFR 1100.240). See Ex Parte 55 (Sub-No. 44), *Rules Governing Applications Filed By Motor Carriers Under 49 U.S.C. 11344 and 11349*, 363 I.C.C. 740 (1981). These rules provide among other things, that opposition to the granting of an application must be filed with the Commission in the form of verified statements within 45 days after the date of notice of filing of the application is published in the **Federal Register**. Failure seasonably to oppose will be construed as a waiver of opposition and participation in the proceeding. If the protest includes a request for oral hearing, the request shall meet the requirements of Rule 242 of the special rules and shall include the certification required.

Persons wishing to oppose an application must follow the rules under 49 CFR 1100.241. A copy of any application, together with applicant's supporting evidence, can be obtained from any applicant upon request and payment to applicant of $10.00, in accordance with 49 CFR 1100.241(d).

Amendments to the request for authority will not be accepted after the date of this publication. However, the Commission may modify the operating authority involved in the application to conform to the Commission's policy of simplifying grants of operating authority.

We find, with the exception of those applications involving impediments (e.g., jurisdictional problems, unresolved

fitness questions, questions involving possible unlawful control, or improper divisions of operating rights) that each applicant has demonstrated, in accordance with the applicable provisions of 49 U.S.C. 11301, 11302, 11343, 11344, and 11349, and with the Commission's rules and regulations, that the proposed transaction should be authorized as stated below. Except where specifically noted this decision is neither a major Federal action significantly affecting the quality of the human environment nor does it appear to qualify as a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient protests as to the finance application *or* to any application directly related thereto filed within 45 days of publication (or, if the application later becomes unopposed), appropriate authority will be issued to each applicant (unless the application involves impediments) upon compliance with certain requirements which will be set forth in a notification of effectiveness of this decision-notice. To the extent that the authority sought below may duplicate an applicant's existing authority, the duplication shall not be construed as conferring more than a single operating right.

Applicant(s) must comply with all conditions set forth in the grant or grants of authority within the time period specified in the notice of effectiveness of this decision-notice, or the application of a non-complying applicant shall stand denied.

Dated: December 21, 1981.

By the Commission, Review Board Number 3, Members Krock, Joyce, and Dowell.

MC–F–14713F, filed October 13, 1981. Talmadge E. Borden (Borden) d/b/a West Virginia Coach Lines (WVC) (P.O. Box 336, 105 Sycamore Street, Ravenswood, WV 26164)—Purchase (Portion)—(Greyhound Lines, Inc. (Greyhound) Greyhound Tower, Phoenix, AZ 85077); Correction [1] Representative: Anthony P. Carr, Esq., Greyhound Tower, Phoenix, AZ 85077. WVC seeks authority to purchase a portion of the interstate operating rights of Greyhound and Borden seeks to acquire control of the rights through the transaction. WVC seeks to purchase that portion of Greyhound's rights (1) in No. MC–1501 (Sub-No. 172) renumbered but not yet issued in No. MC–1515 (Sub-No. 172), and No. MC–1515 (Sub-No. 175) generally authorizing transportation of passengers and their baggage, express and newspapers between (a) Charleston, WV and the junction of WV Hwy 3 and Int. Hwy 77 (over U.S. Hwy 119 and WV Hwy 3 and 77); (b) the junction of U.S. Hwy 60 and WV Hwy 16 and Beckley, WV (over WV Hwy 16 and U.S Hwy 19 and an unnumbered Hwy); (c) betwen Clarksburg, WV and Charleston, WV (over U.S. Hwy 19, WV Hwy 4 and U.S. Hwy 119) or (over U.S. Hwys 19 and 119); and (d) between Glenville, WV and Millstone, WV (over U.S. Hwy 5 and WV Hwy 16). WVC holds authority to operate as a motor common carrier interstate or foreign commerce pursuant to No. MC–59235 (Sub-No. 41) issued to Virginia Stage Lines, Inc., d.b.a. Virginia Truckings and acquired by WVC in No. MC–FC–79275.

Note.—(1) An application for temporary authority has not been filed. (2) This application is directly-related to No. MC–157389 (Sub-No. 2) published elsewhere in the Federal Register of November 20, 1981.

(Hearing Site: Washington, DC).

MC–F–14722, filed December 1, 1981. Transferee: S&W FREIGHT LINES, INC. 1136 Haley Rd., Murfreesboro, TN 37130

Transferor; J&G Express, Inc., 489 Julienne, Jackson, MS 39204. Representative: Roland M. Lowell, 5th Floor, 501 Union St., Nashville, TN 37219. Transferee seeks authority to purchase Certificates No. MC–121142 (Subs 8, 14, and 20) from transferor (Harold J. Barkley, Jr., Trustee in Bankruptcy). Russell D. Easley and Barry Smotherman, who control transferee through control of its outstanding capital stocks, seek to acquire control of the rights through the transaction. Transferee holds rights under No. MC–121644 and is affiliated with A&M Express, Inc. (MC–145596). The Certificate to be purchased generally authorize general commodities (with exceptions) over regular and irregular routes in MS and TN. No TA lease is sought.

CAL GAS CORPORATION (CAL GAS) (P.O. Box 28397, Sacramento, CA 95828)—control—Petroleum Transportation Corporation (Petroleum) (9717 E. 42nd St., Tulsa, OK 74145). Representatives: Daryl A. Gault, P.O. Box 28397, Sacramento, CA 95828; and James R. Stiverson, P.O. Box 12241, Columbus, OH 43212. Cal Gas, a non-carrier, seeks authority to acquire control of Aminoil Marketing, Inc., a non-carrier, and thereby its subsidiary, Petroleum. Dillingham Corporation, a publicly-held non-carrier, is the sole stockholder of Cal Gas and seeks authority to acquire control of said rights and property through this transaction. Petroleum holds authority in MC–142905 (Sub-No. 14X), which authorizes the transportation, as a motor common carrier, over irregular routes, of (1) *petroleum products, animal feeds, and agriculture fertilizers and ingredients,* between points in Woodward County, OK, on the one hand, and, on the other, points in AR, CO, IA, KS, LA, MO, NE, NM, SD, and TX; (2) *Petroleum products and agriculture fertilizers and ingredients,* between points in Gage County, NE, on the one hand, and, on the other, points in CO, KS, IA, MN, NE, MO, OK, SD, and WY; (3) *agriculture fertilizers and ingredients,* between points in Rogers County, OK, on the one hand, and, on the other, points in AR, KS, MO, OK, and TX; and (4) *petroleum products,* between (a) points in Cowley, Reno, McPherson, and Rice Counties, KS, on the one hand, and, on the other, points in OK, and (b) points in OK on the one hand, and, on the other, points in AR. Condition: Dillingham Corporation, a non-carrier holding company shall be considered a carrier within the meaning of 49 U.S.C. 11348 and is subject to the requirements of 49 U.S.C. 11302 for those issuance of securities and assumptions of obligations which may relate to or affect the activities of its carrier subsidiaries. Regarding the reporting requirements of 49 U.S.C. 11145, Dillingham Corporation need only file such special reports as the Commission may from time to time require. Dillingham Corporation is not made subject to the accounting requirements of 49 U.S.C. 11142.

Notes.—(1) TA has been filed. (2) Cal Gas controls through stock ownership Propane Transport, Inc., a motor common carrier under MC–114989, which is authorized to transport commodities in bulk, between points in thirty-one States, basically east of the Mississippi River. (3) Dillingham Corporation also controls Foss Launch & Tug Co., a common carrier by water at docket W–587, operating generally between the West Coast, AK, and HI.

[FR Doc. 81–36708 Filed 12–23–81; 8:45 am]

BILLING CODE 7035–01–M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

The following applications, filed on or after February 9, 1981, are governed by Special Rule of the Commissions' Rules of Practice, see 49 CFR 1100.251. Special Rule 251 was published in the **Federal Register** of December 31, 1980, at 45 FR 86771. For compliance procedures, refer to the **Federal Register** issue of December 3, 1980, at 45 FR 80109.

Persons wishing to oppose an application must follow the rules under 49 CFR 1100.252. A copy of any application, including all supporting evidence, can be obtained from applicant's representative upon request and payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated a public need for the proposed operations and that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. This presumption shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication (or, if the application later becomes unopposed), appropriate authorizing documents will be issued to applicant with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Note.—All applications are for authority to operate as a motor common carrier in interstate of foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract".

Please direct status inquiries to the Ombudsman's Office, (202) 275–7326.

Volume No. OPI–323

Decided: December 14, 1981.

By the Commission, Review Board No. 1. Members Parker, Chandler, and Fortier.

FF 531 (Sub-2), filed December 2, 1981. Applicant: SECURITY HOUSEHOLD GOODS FORWARDING, INC. 100 W. Airline Hwy., Kenner, LA 70063. Representative: Alan F. Wohlstetter, 1700 K Street N.W., Washington, D.C. 20006, (202) 833–8884. As a *freight forwarder* in connnection with the transportation of *general commodities* (except household goods, unaccompanied baggage and used automobiles and classes A and B explosives), between points in the U.S.

MC 9291 (Sub-21) (republication), filed October 14, 1981, previously noticed in the **Federal Register** issue of November 1, 1981. Applicant: CARROL BALL TRANSPORT, INC., P.O. Box 53, Centerville, KS 66014. Representative: Clyde N. Christey, KS Credit Union Bldg., 1010 Tyler, Suite 110L, Topeka, KS 66612, (913) 233–9629. Transporting *such*

commodities as are dealt in by supermarkets and discount stores and food and related products, between points in KS, OK, and the Kansas City, MO, Commercial zone, on the one hand, and, on the other, points in MT, WY, CO, NM, ND, SD, NE, KS, OK, TX, MN, IA, MO, AR, LA, WI, IL, MS, AL, TN, KY, IN, OH, MI and GA.

Note.—The purpose of this republication is to correct the territorial description by including points in the Kansas City, MO, Commercial zone as originally proposed.

MC 28990 (Sub-11), filed December 2, 1981. Applicant: SEYMOUR TRANSFER LINES, INC., 800 E. Factory St., Seymour, WI 54165. Representative: Wayne W. Wilson, 150 E. Gilman St., Madison, WI 53703, (414) 833–2381. Over regular routes, transporting *general commodities* (except classes A and B explosives), (1) between Menominee and Rapid River, MI, over U.S. Hwy 41, (2) between Vulcan and Powers, MI, over U.S. Hwy 2, (3) between Menominee and Escanaba, MI, over MI Hwy 35, (4) between Waupun, WI, and junction WI Hwy 49 and U.S. Hwy 41, over WI Hwy 49, (5) between Fond du Lac and Theresa, WI, over WI Hwy 175, (6) between Fond du Lac, WI, and junction WI Hwy 28 and U.S. Hwy 41, over U.S. Hwy 41, (7) between Beaver Dam and Horicon, WI, over WI Hwy 33, (8) between Horicon, WI, and junction WI Hwy 28 and U.S. Hwy 41, over WI Hwy 28, (9) between Mayville and Brownville, WI, over Dodge City WI Hwy Y, (10) between junction Dodge City, WI Hwys Y and YY, and junction Dodge City, WI Hwys YY and 41, over Dodge City, WI, Hwy YY, (11) between Lomira, WI, and junction Dodge City, WI, Hwys Y and H, over Dodge City, WI, Hwy H, (12) between Stevens Point, WI, and junction U.S. Hwy 51 and WI Hwy 64, over U.S. Hwy 51, (13) between Merrill and Mountain, WI, over WI Hwy 64, and (14) between junction U.S. Hwy 10 and WI Hwy 34, and junction U.S. Hwy 51 and WI Hwy 34, over WI Hwy 34, serving all intermediate points in connection with routes (1) to (14) above, and serving Green Lake, WI, and points in Marathon and Shawano Counties, WI, and Delta, Dickinson and Menominee Counties, MI, as off route points.

Note.—Applicant intends to tack the sought rights to its existing authority.

MC 108531 (Sub-25), filed December 3, 1981. Applicant: BLUE BIRD COACH LINES, INC., 502–504 N. Barry St., Olean, NY 14760. Representative: Ronald W. Malin, Bankers Trust Bldg., 4th Fl., Jamestown, NY 14701, (716) 664–5210. Transporting *passengers and their baggage* in the same vehicle with passengers, in charter operations, between points in the U.S., under continuing contract(s) with Blue Bird World Travel, Inc., of Olean, NY.

MC 115581 (Sub-5), filed December 2, 1981. Applicant: THE CONNECTICUT COMPANY, d.b.a. AIRFIELD SERVICE, 2909 Main Street, Hartford, CT 06120. Representative: John E. Silliman, 101 Pearl Street, P.O Box 3197, Hartford, CT 06103, (203) 549–4500. Transporting *passengers and their baggage*, in the same vehicle with passengers, in charter and special operations, beginning and ending at points in CT and Hampden County, MA, and extending to points in the U.S.

MC 128220 (Sub-35), filed December 4, 1981. Applicant: RALPH LATHAM, d.b.a. LATHAM TRUCKING COMPANY, P.O. Box 598, Burnside, KY 42519. Representative: Robert H. Kinker, 314 West Main St., P.O. Box 464, Frankfort, KY 40602, (502) 223–8244. Transporting *general commodities* (except classes A and B explosives), between points in the U.S., under continuing contract(s) with Moorman Mfg. Co., of Quincy, IL.

MC 142920 (Sub-27), filed December 2, 1981. Applicant: OLIVER TRUCKING CORP., 620 South Belmont Avenue, Indianapolis, IN 46217. Representative: Morton E. Kiel, Suite 1832, 2 World Trade Center, New York, NY 10048–0640, (212) 466–0220. Transporting *general commodities* (except classes A and B explosives, household goods as defined by the Commission, and commodities in bulk), between points in the U.S. (except AK and HI), under continuing contract(s) with Walt Disney Productions, Burbank, CA.

MC 142920 (Sub-28), filed December 3, 1981. Applicant: OLIVER TRUCKING CORP., 620 South Belmont Ave., Indianapolis, IN 46217. Representative: Morton E. Agatha L. Mergenovich,

Secretary.

[FR Doc. 81–36712 Filed 12–23–81; 8:45 am]

BILLING CODE 7035–01–M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

The following applications, filed on or after February 9, 1981, are governed by Special Rule of the Commission's Rules of Practice, see 49 CFR 1100.251. Special Rule 251 was published in the **Federal Register** on December 31, 1980, at 45 FR 86771. For compliance procedures, refer to the **Federal Register** issue of December 3, 1980, at 45 FR 80109.

Persons wishing to oppose an application must follow the rules under 49 CFR 1100.252. Applications may be protested *only* on the grounds that applicant is not fit, willing, and able to provide the transportation service or to comply with the appropriate statutes and the Commission regulations. A copy of any application, including all supporting evidence, can be obtained from applicant's representative upon request and payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated a public need for the proposed operations and that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. This presumption shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication (or, if the application later becomes unopposed), appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after the publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract".

Please direct status inquiries to the Ombudsman's Office, (202) 275–7326.

Volume No. OPI–324

Decided: December 14, 1981.

By the Commission Review Board No. 1, Members Parker, Chandler, and Fortier.

MC 154861 (Sub-4), filed December 2, 1981. Applicant: CAROLINA MOTOR EXPRESS, INC., P.O. Box 550, Forest City, NC 28043. Representative: Eric Meierhoefer, Suite 1000, 1029 Vermont Ave., N.W., Washington, DC 20005, (202) 347–9332. (1) transporting, for or on behalf of the United States Government, *general commodities* (except used household goods, hazardous or secret materials, and sensitive weapons and munitions), and (2) as a *broker* of *general commodities* (except household goods), between points in the U.S.

MC 159511, filed December 1, 1981. Applicant: GEORGE W. SEIBERT, d.b.a. GEORGE'S TRANSPORT SERVICE, 10980 Almond Ave., Fontana, CA 92335. Representative: Lawrence Marquette, P.O. Box 629, Carmel Valley, CA 93924, (408) 625–2031. Transporting, (1) for or on behalf of the United States Government, *general commodities* (except used household goods, hazardous or secret materials, and sensitive weapons and munitions), and (2) *food and other edible products and byproducts intended for human consumption* (except alcoholic beverages and drugs), *agricultural limestone and fertilizer, and other soil conditioners* by the owner of the motor vehicle in such vehicle, between points in the U.S.

MC 159530, filed December 3, 1981. Applicant: MASTER MOVERS, INC., 2529 Drum Creek Road, Chesapeake, VA 22321. Representative: Blair P. Wakefield, Suite 1001 First and Merchants National Bank Building, Norfolk, VA 23510, (804) 627-0070. Transporting *used household goods* for the account of the United States Government incident to the performance of a pack-and-crate service on behalf of the Department of Defense, between points in the U.S.

Volume No. OPY-4-486

Decided: December 14, 1981.

By the Commission, Review Board No. 2. Members Carleton, Fisher, and Williams.

MC 159597, filed December 7, 1981. Applicant: ROY POWELL TRUCKING, INC., 407 Kirk St., Lawrenceburg, TN 38464. Representative: D. R. Beeler, P.O. Box 482, Franklin, TN 37064, (615) 790-2510. Transporting *food and other edible products and byproducts intended for human consumption* (except alcoholic beverages and drugs), *agricultural limestone and fertilizers, and other soil conditioners* by the owner of the motor vehicle in such vehicle, between points in the U.S.

Agatha L. Mergenovich,

Secretary.

[FR Doc. 81-36711 Filed 12-23-81; 8:45 am]

BILLING CODE 7035-01-M

[Volume No. 213]

Motor Carriers; Permanent Authority Decisions; Restriction Removals; Decision-Notice

Decided: December 16, 1981.

The following restriction removal applications, filed after December 28, 1980, are governed by 49 CFR 1137. Part 1137 was published in the Federal Register of December 31, 1980, at 45 FR 86747.

Persons wishing to file a comment to an application must follow the rules under 49 CFR 1137.12. A copy of any application can be obtained from any applicant upon request and payment to applicant of $10.00.

Amendments to the restriction removal applications are not allowed.

Some of the applications may have been modified prior to publication to conform to the special provisions applicable to restriction removal.

Findings

We find, preliminarily, that each applicant has demonstrated that its requested removal of restrictions or broadening of unduly narrow authority is consistent with 49 U.S.C. 10922(h).

In the absence of comments filed within 25 days of publication of this decision-notice, appropriate reformed authority will be issued to each applicant. Prior to beginning operations under the newly issued authority, compliance must be made with the normal statutory and regulatory requirements for comment and contract carriers.

By the Commission, Restriction Removal Board, Members Sporn, Ewing, and Shaffer.

Agatha L. Mergenovich,

Secretary.

MC 35358 (Sub-61)X, filed March 23, 1981 previously noticed in **Federal Register** of April 20, 1981, republished as follows: Applicant: BERGER TRANSFER & STORAGE, INC., 3720 Macalaster Drive N.E., Minneapolis, MN 55421. Representative: Andrew R. Clark, 1600 TCF Tower, Minneapolis, MN 55402. No. MC-43421 and Sub-Nos. 25, 26, 30, 31, 32, 33, 34, 35, 37, 38, 39, 41, 42, 43, 44, 45, 46, 47, 48, 51, 53, 55, 56, 59F, 61F, 62F, 63 and 67F certificates, acquired in MC-F-14490F, (1) change the general commodity descriptions, specifying exceptions of numerous combinations of commodities, as indicated: (a) to "except classes A and B explosives, household goods, and commodities in bulk," (b) to "except household goods, and commodities in bulk," (c) to "except classes A and B explosives, and commodities in bulk," and (d) to "except classes A and B explosives, and household goods; (2) expand other commodities, as follows: to (a) lead certificate, and "farm products, and food and related products" from agricultural commodities and creamery products; (b) Sub-No. 34, "metal products, except commodities in bulk," from iron and steel articles, except in bulk, and oilfield and pipeline commodities; (c) (Sub-No. 37, "machinery," from washing machines, ironers, vacuum cleaners, and parts: "pulp, paper and related products," from paper boxes: "food and related products," from groceries: "pulp, paper and related products, and such commodities as are used or dealt in by schools," from paper, paper products, and school supplies: "lumber and wood products, rubber and plastic products, metal products, and pulp, paper and related products," from toilet seats, and paper and paper products: "chemicals and related products," from chemicals: "textile mill products, and farm products," from wool: "textile mill products," from cotton tire fabric: "metal products," from nails: "rubber and plastic products," from rubber matting: and "textile mill products," from rayon and rayon fiber, rejected shipments of rayon, empty cases, fillers or cartons, cones, and spools; and (d) Sub-No. 59, "machinery, lumber and wood products, and metal products," from wheels or wheel blanks, including bogies or idlers for army tanks and pallets, platforms and racks; (3) authorize service at all intermediate points along authorized regular routes between named points; (4) broaden territorial descriptions in the irregular-route authorities from one-way to radial authority; and to two-way in the regular-route authorities; (5) broaden irregular-route points and plantsites to countywide, as follows: (a) lead certificate, Cook, DuPage, Kane, Lake, McHenry and Will Counties, IL and Lake and Porter Counties, IN (Chicago, IL commercial zone): St. Louis, MO, and Jefferson, St. Charles and St. Louis Counties, MO and Madison, Monroe and St. Clair Counties, IL (St. Louis, MO-East St. Louis, IL commercial zone); (b) Sub-No. 25, Anoka, Carver, Dakota, Hennepin, Ramsey, Scott and Washington Counties, MN and Pierce and St. Croix Counties, WI (Minneapolis, St. Paul, South St. Paul, and Newport, MN); (c) Sub-No. 37, Essex, Middlesex, Norfolk and Suffolk Counties, MA (Boston, MA and points in MA within 10 miles thereof): Worcester County, MA (Worcester): Hampden and Hampshire Counties, MA (Springfield, MA and points in MA within 10 miles thereof): Hartford County, CT (Hartford): Fairfield and New Haven Counties, CT (Bridgeport): Hampden and Hampshire Counties, MA (Holyoke): Lake and Geauga Counties, OH (Painesville): Providence County, RI (Woonsocket): Middlesex County, MA (Hudson): Cuyahoga, Medina, Lake, Lorain, Portage and Summit Counties, OH (Cleveland and Ravenna): Bristol County, MA (Norton): Plymouth and Bristol Counties, MA and Newport County, RI (New Bedford and Fall River): Summit, Medina, Portage, Stark and Wayne Counties, OH (Akron): Beaver County, PA (New Brighton): Columbiana and Mahoning Counties, OH (Salem): Cook, DuPage, Kane, Lake,

McHenry and Will Counties, IL and Lake and Porter Counties, IN (Chicago, IL); Worcester County, MA (Northbridge); and Kent and Providence Counties, RI (Pawtucket, Darlington, and West Warwick); (d) Sub-No. 42 (irregular route portion) Suffolk, Middlesex and Essex Counties, MA (points on US Hwy 1 between Boston and Danvers, MA, and points on MA Hwy 1A between Boston, and Beverly, MA); (e) Sub-No. 59, Adams County, IL (facilities at Quincy), and Hamilton County, IN (facilities at Noblesville); (f) Sub-No. 62, Marion County, IA (facilities at Pella), Jefferson, Bullitt and Oldham Counties, KY and Harrison, Floyd and Clark Counties, IN (Louisville), Marion, Boone, Hamilton, Hancock, Shelby, Johnson, Morgan and Hendricks Counties, IN (Indianapolis), Allen County, IN (Ft. Wayne), Clermont, Hamilton, Butler and Warren Counties, OH and Boone, Kenton, and Campbell Counties, KY (Cincinnati), Lorain, Cuyahoga, Medina, Summit, Lake and Portage Counties, OH (Cleveland), Greene and Montgomery Counties, OH (Kettering), and Lucas, Wood and Ottawa Counties, OH (Toledo); (6) broaden off-route points to countywide: (a) lead certifcate, Scott and Muscatine Counties, IL and Rock Island and Henry Counties, IL (Davenport, IA-Rock Island and Moline, IL commercial zone): St. Louis County, MO (plantsite near Robertson): McDonough and Fulton Counties, IL (Adair): Henry County, IL (Bishop Hill, and Osco): Knox County, IL (Dahinda, Williamsfield, and East Galesburg): Peoria County, IL (Edlestein): Stark County, IL (Elmira and Lafayette): Henderson County, IL (Gladstone): Adams County, IL (La Praire): Tazewell and Woodford Counties, IL (Peoria Heights): Hamilton County, OH (site near Fernald): Cook, DuPage, Kane, Lake, McHenry and Will Counties, IL and Lake and Porter Counties, IN (Chicago, IL commercial zone), Marion County, IN (those within 5 miles of Indianapolis): Porter and Jackson Counties, IN (Porter and Fleming), Montgomery, Greene, Miami and Clark Counties, OH (points within 10 miles of Dayton), Franklin County, OH (points within 10 miles of Columbus), and Hamilton, Butler, Warren and Clermont Counties, OH and Boone, Campbell and Kenton Counties, KY (Cincinnati, OH commercial zone): (b) Sub-No. 25, Jo Daviess County, IL (Hanover), Dubuque County, IA (Dubuque and Peru Townships), Cook County, IL (Chicago Heights): Crawford, Grant, Richland and Iowa Counties, WI and Allamakee and Clayton Counties, IA (Prairie du Chien, Muscoda, and Blue River, WI): Grant County, WI (Mt. Ida and Mt. Hope): Iowa, Grant and Lafayette Counties, WI (Rewey): Iowa and Grant Counties, WI (Dodgeville and Stitzer): Grant County, WI (British Hollow, Tennyson, Burton and Rockville): (c) Sub-No. 26, Dakota County, MN (plantsite located approx. 1 mile north of the junction of MN Hwys 55 and 49); (d) Sub-No. 31, Cook, DuPage, Kane, Lake, McHenry and Will Counties, IL and Lake and Porter Counties, IN (Chicago, IL commercial zone), Milwaukee, Ozaukee and Waukesha Counties, WI (Cudahy, Fox Point, Greendale, West Milwaukee, Shorewood, Wauwatosa, West Allis, and Whitefish Bay); (e) Sub-No. 32, Dakota County, MN (site in Eagan township); (f) Sub-No. 33, St. Louis County, MO (plantsite in Bridegeton); (g) Sub-No. 34, Putnam County, IL (plantsite in Putnam County); (h) Sub-No. 37, Summit County, OH (plantsite near Darrowville), and Cook, DuPage, Kane, Lake, McHenry and Will Counties, IL and Lake and Porter Counties, IN (Chicago, IL commercial zone); (i) Sub-No. 38, Medina County, OH (plantsite in Brunswick Hills Township); (j) Sub-No. 39, Jefferson County, KY (plantsite near Louisville); (k) Sub-No. 43, Jefferson County, MO (plantsite at Arnold); (l) Sub-No. 45, Scott County, IA (plantsite near Walcott); (m) Sub-No. 46, Macomb County, MI (plantsite at Romeo); (n) Sub-No. 47, Dakota, Hennepin and Scott Counties, MN (facilities at Burnsville); (o) Sub-No. 53, Hennepin County, MN (facilities near Maple Grove); (p) Sub-No. 55, Huntington County, IN (facilities near Huntington); (q) Sub-No. 61, Lee and Muscatine Counties, IA (Fort Madison and Muscatine); (r) Sub-No. 67, Macoupin, Madison, St. Clair and Monroe Counties, IL and St. Charles and St. Louis Counties, MO (East St. Louis and Alton, IL): Ottawa County, OK and Cherokee County, KS (Picher, OK), Washington and Osage Counties, OK (Bartlesville), Oklahoma and Cleveland Counties, OK (Midwest City, and Tinker A.F.B.): Pittsburg County, OK (Krebs, Alderson, Bache, Dow, Haileyville, and Hartshorne): Kay and Osage Counties, OK (Ponca City, Pawhuska, and Tallant): Pittsburg and Comanche Counties, OK (McAlester and Fort Sill): Jackson and Cass Counties, MO and Jackson County, KS (Grandview, MO), Crawford, Neosho and Cherokee Counties, KS (Capaldo, Walnut, West Mineral, Carona, Radley, and Chicopes), Craig and Ottawa Counties, OK and Cherokee County, KS (Welch and Hockerville, OK), Jackson, Clay and Platte Counties, MO and Wyandotte County, KS (points within 10 miles of Kansas City, MO): Jasper and Newton Counties, MO (points within 5 miles of Joplin), Lafayette, Ray, Saline, Johnson and Carroll Counties, MO; and (Mayview, Lexington, Mt. Leonard, and points within 10 miles of Higginsville): Johnson, Saline, Lafayette and Pettis Counties, MO (Warrensburg and Emma, MO): Tulsa, Wagoner, Osage, Rogers and Creek Counties, OK (Tulsa, OK commercial zone): Dallas, Ellis, Johnson, Tarrant, Denton, Collin, Rockwall and Kaufman Counties, TX (Dallas, TX commercial zone): Oklahoma, Cleveland and Canadian Counties, OK (Oklahoma City, OK commercial zone): Muskogee County, OK (Braggs and Camp Gruber, OK): Dakota County, MN (terminal site in Egan Township): Polk, Warren, Madison and Dallas Counties, IA (points within 12 miles of the central post office, Des Moines, IA): Johnson County, KS (Stanley and Morse): Clarke, Decatur, Story and Marshall Counties, IA (Indianola, Osceola, Leon, Lamoni, Nevada, Colo, and State Center); Harrison and Buchanan Counties, MO (Bethany and St. Joseph): Wyandotte, Leavenworth and Johnson Counties, KS and Jackson, Cass, Clay and Platte Counties, MO (Kansas City, KS/MO commercial zone): Hardin, Franklin, Carro Gordo, Black Hawk, Story, Marshall, Grundy, Floyd, Bremer, Mitchell, Benton, Tama, Linn, Johnson and Benton Counties, IA (Iowa Falls, Hampton, Mason City, Eldora, Waterloo, Nevada, Colo, State Center, Cedar Falls, Grundy Center, Ackley, Charles City, Waverly, Wellsburg, Osage, Belle Plaine, Gladbrook, Chelsea, and Cedar Rapids): and Freeborn, Mower, Steele, Anoka, Hennepin, Dakota, Ramsey, Washington, Scott and Carver Counties, MN (Albert Lea, Austin, Owatonna, and Minneapolis). Applicant also seeks to remove other restrictions involving: (a) limiting service at named intermediate points to pickup and delivery only; (b) interchange, interline or joinder of described regular routes for purposes of performing through service; (c) service limited to that originating at and/or destined to named points; (d) prohibiting shipments which are moving on Govt. bills of lading; and (e) various directional restrictions.

MC 97397 (Sub-15)X, filed November 24, 1981. Applicant: BARKLEY TRUCK LINES, INC., 604 Fourth St., P.O. Box 970, Watertown, SD 57201. Representative: Val M. Higgins, 1600 TCF Tower, 121 South 8th St., Minneapolis, MN 55402. Sub-Nos. 3, 11, 12, and 14F certificates, and No. MC-128530 permits: (1) remove all restrictions in the general commodities

descriptions "except classes A and B explosives, household goods, and commodities in bulk" (Sub-Nos. 3 and 12); (2) broaden to: (a) "food and related products" from meats, meat products and byproducts, and articles distributed by meat packinghouses, (except hides), and foodstuffs in mixed loads (Sub-No. 11), and from meat and meat products (Sub-No. 12); (b) "food and related products, and articles distributed by meat packinghouse," from foodstuffs, except commodities in bulk, and meats, meat products and byproducts, and articles distributed by meat packinghouses, except foodstuffs, hides, and commodities in bulk (Sub-No. 14); (3) authorize service at all intermediate points (Sub-Nos. 3 and 12); (4) broaden off-route points to countrywide: Sub-No. 3, Hamlin and Clark Counties, SD (Grover, Hazel, Naples, Vienna, and Willow Lake); Sub-No. 12, Codington, Clark and Day Counties, SD (Wallace, Bradley, Crocker, Lily, and Butler), Hamlin and Kingsbury Counties, SD (Thomas, Hayti, Lake Norden, Badger, and Erwin), Codington and Deuel Counties, SD (Kranzburg, Goodwin, Bemis, Altamont, Clear Lake, Brandt, Moritz, Tuner-Ville, And Gary); Hamlin, Deuel and Brookings Counties, SD (Johnsonville, Estelline, Stone Bridge, Dempster, and Castlewood); and Codington and Clark Counties, SD (Kampeska, Henry, Elrod, and Garden City); (5) broaden irregular-route territorial descriptions from one-way to radial authority, and the named points to countrywide: Sub-No. 11, Beadle County, SD (Huron); Sub-No. 12, Woodbury and Plymouth Counties, IA and Union County, SD (Sioux City, IA), Cass County, ND and Clay County, MN (Fargo, ND); and Sub-Nos. 12 and 14, Codington County, SD (Watertown); and (6) in the lead permit, (a) broaden the commodity description to "farm products and food and related products," from seeds, flour, animal and poultry feed; (b) remove the restriction limiting transportation of traffic to that originating at a specified point; and (c) broaden the territorial description to between points in the U.S. under continuing contract(s) with the named shipper.

MC 121654 (Sub-45)X, filed December 4, 1981. Applicant: COASTAL TRANSPORT & TRADING CO., P.O. Box 7438, Savannah, GA 31408. Representative: Alan E. Serby, 3390 Peachtree Road, NE., 5th Floor, Lenox Towers South, Atlanta, GA 30326. Subs 41F, 39F, 37F, 17F, 33F, 6. Sub-41F: remove special equipment restriction in general commodities authority; Sub 39F: broaden air pollution equipment (except that which because of size or weight requires the use of special equipment) to "machinery and machinery parts"; Duvall County, FL for Jacksonville, FL and Kern County, CA for Bakersfield, CA; Sub 37F: same commodity broadening as Sub 39; replace College Park, GA facilities with Fulton County, GA; Sub-17F: remove facilities limitation at Charleston, SC; Sub 33F: remove size/weight requiring special equipment restriction; Sub–6 broaden plywood panelling and composition board to "building materials"; remove facilities limitation at Charleston and Orangeburg, SC; broaden Subs 6, 17, 37 and 39 to radial authority.

MC 134134 (Sub-100)X, filed September 9, 1981, and previously noticed in the **Federal Register** September 25, 1981, republished as corrected this issue. Applicant: MAINLINER MOTOR EXPRESS, INC., 4202 Dahlman Avenue, Omaha, NE 68107. Representative: James F. Crosby 7363 Pacific Street, Suite 210B, Omaha, NE 68114. Applicant seeks to replace named points with counties: Kansas City, MO, with Jackson, Lafayette, Cass, Ray, Clay, Clinton and Platte Counties, MO and Wyandotte, Johnson, and Leavenworth Counties, KS in Sub-Nos. 52F and 90F; Cincinnati, OH with Hamilton, Butler, Warren, and Clermont Counties, OH; Dearborn County, IN; and Boone, Kenton, and Campbell Counties, KY in Sub-No. 71F. The purpose of this republication is to notice the expansion of the above cited city-wide points.

MC 135684 (Sub-170)X, filed December 15, 1981. Applicant: BASS TRANSPORTATION CO., INC., P.O. Box 391, Flemington, NJ 08822. Representative: Herbert Alan Dubin, 818 Connecticut Avenue NW., Washington, DC 20006. Subs 89F, 94F, and 102F: (1) remove except commodities in bulk restriction, Subs 89F and 102F, and in containers restriction, Sub 94F, (2) remove originating at/destined to restrictions and authorize radial service between named facilities in the U.S., and, points in the U.S. (exept AK and HI) in all Subs.

MC 145223 (Sub-2)X, filed November 20, 1981. Applicant: COLE FREIGHT COMPANY, 12805 Seneca Road, Palos Heights, IL 60463. Representative: James C. Hardman, 33 N. LaSalle Street, Chicago, IL 60602. Lead and Sub 1 (1) broaden to radial authority; (2) delete restrictions limiting service to shipments moving from, to, or between facilities of certain classes of consignors or consignees; (3) in the lead and Sub 1, broaden Columbus, Canton, Mansfield, Hamilton, Steubenville, Elyria, Cleveland, Akron, Kent, Medina, Zanesville, and Ashtabula, OH to Franklin, Stark, Buchland, Butler, Jefferson, Lorain, Cuyahoga, Summit, Portage, Medina, Muskingam, and Ashtabula Counties; Charleston and Huntington, WV to Kanawha and Cabell Counties; Lancaster, Ambler and Marcus Hook, PA to Lancaster, Montgomery and Delaware Counties; Kearney and Paulsboro, NJ to Essex and Gloucester Counties; East Walpole, Lawrence, Watertown and Canton, MA to Norfolk, Essex and Middlesex Counties; Albany, Port Chester, Syracuse, Buffalo, Niagara Falls and Troy, NY to Albany, Westchester, Onandaga, Erie, Niagara and Renesselaer Counties; East Berlin, Hartford, and Greenwich, CT to Hartford and Fairfield Counties; Clarksville, TN to Montgomery County; West Helena, AR to Phillips County; St. Louis and West Springfield, MO to St. Louis and Hampden Counties, MO and St. Louis, MO; and Chicago Heights, IL to Cook County; (4) broaden in the lead (a) books to "printed matter and pulp, paper or related products", (b) in the lead agricultural commodities and prepared foods to "farm products and food and related products", (c) in the lead canned and preserved foodstuffs to "food and related products", (d) in the lead linoleum, cork felt base floor covering or tiling, asphalt, composition tiling, and from floor covering, linoleum, steel rollers, wallboard, and pulpboard to "building materials" (e) in the lead prepared food products to "food and related products", (f) in Sub 1 conduit and pipe (other than iron and steel), attachments, parts and fittings therefor to "building materials" (g) in Sub 1 rubber products to "rubber and plastic products"; (h) in Sub 1 aluminum sidings to "metal products"; (i) in Sub 1 battery boxes and battery box parts to "lumber and wood products, pulp, paper and related products, coal and coal products, petroleum, natural gas and their products, rubber and plastic products, and metal products"; (5) replace facility at Portage County, OH, with Portage County in Sub 1; and facilities at Allen County, IN with Allen County in Sub 1; and (7) remove facility limitation at Medina, OH and West Springfield, MO, in Sub 1; and (8) remove in bulk and motor vehicle limitations in Sub-No. 1, Sheet No. 6.

MC 146322 (Sub-1)X, filed December 14, 1981. Applicant: METRO LIQUID CARRIERS, LTD., 4545 Boul. Lavoie, Parc Industriel, St. Vincent-de-Paul, Laval, Quebec H7C 1A1. Representative: Edward L. Nehez, P.O. Box Y, 7 Becker Farm Road, Roseland, NJ 07068. Lead: Broaden: liquid asphalt, in tank vehicles,

to "petroleum, natural gas and their products, and ores and minerals" and authorize radial service.

MC 149308 (Sub-17)X, filed December 11, 1981. Applicant: VICTORY FREIGHTWAY SYSTEM, INC., P.O. Box P, Sellersburg, IN 47172. Representative: William P. Jackson, Jr., P.O. Box 1240, Arlington, VA 22210. Sub 8F certificate: Broaden to county-wide authority: Hamilton County, OH (Cheviot, Bridgetown, and Miamitown).

MC 149563 (Sub-13)X, filed December 3, 1981. Applicant: SUPER TRUCKERS, INC., 3900 Commerce Avenue, Post Office Box 111, Fairfield, AL 35064. Representative: William P. Jackson, Jr., 3426 N. Washington Boulevard, Post Office Box 1240, Arlington, VA 22210. MC–148822, Sub-Nos. 2, 3, 5, 7, 9, and 10 permits, and MC–149563, Sub Nos. 1, 2 and 3 certificates: (1) broaden to "construction materials," from vinyl coated pressboard, plywood and gypsum board, in MC–148822, Sub No. 2; to "furniture and fixtures," from office furniture and parts and accessories for office furniture, in MC–148822, Sub No. 3; to "metal products," from metal articles, in MC–148822, Sub No. 5; to "clay, concrete, glass or stone products and materials, equipment, and supplies used in the installation thereof" from flat glass and materials, equipment and supplies used in the installation of flat glass in MC–148822 Sub-No. 7; to "metal products, machinery and rubber and plastic products," from (1) primary metal products, (2) fabricated metal products, (3) machinery, (4) plastic pipe and plastic fittings, in MC–148822, Sub No. 9; and to "pulp, paper and related products," from paper and paper articles, and to "metal products, lumber and wood products, and construction materials," from prefabricated buildings, knocked down, and iron and steel articles, and commodities used in the installation of prefabricated buildings, and iron and steel articles, in MC–148822, Sub No. 10; (2) broaden the territorial description to "between points in the United States (except AK and HI)" in MC–148822, Sub Nos. 2 and 10; (3) broaden to the following named counties or parishes from the points indicated: (Note—changes referred to in the following section all affect Sub-Nos. which are shown in parentheses to Docket No. MC–149563) AL: (South Calera-3), Shelby County (Shelby, Shelby Springs, and South Calera-3); LA: Avoyelles Parish (Big Bend, Bordelonville, Bunkie, Cottonport, Evergreen, Hamburg, Lettsworth, Longbridge, Mansura, Marksville, Moreauville, Plaucheville, and Simmesport-1), Pointe Coupee Parish (DuPont, Legonier, Lettsworth, Simmesport, and Torres-1), and Rapides Parish (Bunkie); MS: Coahoma County (Tutwiler-1), Humphreys County (Bellwood, Belzoni, Caile, Castleman, and Isola-1), Leflore County (Minter City, Ryall Chapel, and Somerville-1), Marion County (Kokomo-1), Pike County (Barto, Bear Town, Conerly, Fernwood, Holmesville, and McComb-1), Quitman County (Vance-1), Sunflower County (Baird, Blaine, Caile, Cottondale, Doddsville, Drew, Dwyer, Eastland, Fitzhugh, Goldfield, Indianola, Inverness, Isola, Jaquith, Markham, Milroy, Minot, Parchman, Pentecost, Rome, Ruleville, Sunflower, and Whitney-1), Tallahatchie County (Somerville, Tutwiler, and Vance-1), and Walthall County (Davo, Dillon, Knoxo, Lehr, Lexie, Mesa, Rushing, and Tylertown-1); Ohio: Hamilton County (Cheviot and Miamitown-2); TX: Hidalgo County (Hidalgo, Los Ebanos, and Sullivan City-1), and Starr County (Garciaville, Grulla, Rio Grande City, and Spaulding-1).

BILLING CODE 7035-01-M

[Ex Parte No. 290 (Sub-2)]

Railroad Cost Recovery Procedures; Approval of Railroad Cost Index

AGENCY: Interstate Commerce Commission.

ACTION: Notice of approval of railroad cost index.

SUMMARY: The Commission has decided to approve the cost of index filed by the Association of American Railroads under the procedures of Ex Parte No. 290 (Sub-No. 2), *Railroad Cost Recovery Procedures*. The application of the index provides a maximum increase of 4.7 percent above the level prescribed in our decision served September 28, 1981 [46 FR 48339, October 1, 1981]

EFFECTIVE DATE: December 24, 1981.

FOR FURTHER INFORMATION CONTACT:
Jane Mackall (202) 275–7656
or
Raymond Hobbs (202) 275–7457

SUPPLEMENTARY INFORMATION: By decision served April 17, 1981 (46 FR 22594, April 20, 1981), we outlined the procedures for calculation of the Interim Mid-Quarter Index of railroad costs and the methodology for computing the Rail Cost Adjustment Factor. We also decided to require the Association of American Railroads (AAR), no later than 20 days before the end of each quarter, to calculate and submit to the Commission the mid-quarter index.

We have received AAR's calculations of the mid-quarter index and have found that these calculations comply with the guidelines outlined in our decision served April 17, 1981.

We note that in addition to using the more current 1980 weighting factors in lieu of the 1979 weighting factors, AAR has updated the base period from 1979 to 1980. Although this adjustment is not necessary nor required by the April 17, 1981 guidelines, it does not result in any inaccuracies in ARR's calculations. The adjustment is, therefore, accepted.

The indices derived from ARR's calculations, verified by this Commission, are shown in the table below.

INTERIM MID-QUARTER INDEX

[1980=100]

Category	10/1/ [illegible]	Q4, 1981	Q1, [illegible]
Salaries, wages & supplements	102.7	117.3	128.0
Fuel	102.2	116.0	119.2
Materials and supplies	103.2	111.2	111.5
Other expenses	[illegible]	112.8	113.9
Weighted average [1]	102.7	115.4	[illegible]

[1] Based on the following 1980 weights: Salaries, wages & supplements, 47.2 percent; Fuel, 12.3 percent; Materials and supplies, 12.2 percent; Other Expenses, 28.3 percent.

The resulting Rail Cost Adjustment Factor for the first quarter, 1982 is 1.047 (120.9÷115.4).

In computing the first quarter index, allowance has been made for labor increases accuring to the period from April 1, 1981 to the present which was not forecast in previous indices.

For the reasons discussed in our September 28, 1981 decision, the carriers may not apply this increase to recyclable commodities, other than scrap iron or steel. While the rate reductions required by Ex Parte No. 394, *Cost Ratio for Recyclables—1980 Determination*, 364 I.C.C. 425 (1980), are required by December 26, 1981 we remain under an affirmative obligation to ensure that rates on these commodities do not exceed the maximum permissible level. Without more specific cost evidence, we cannot make such a finding. [2]

In our September 28, 1981 decision, we also indicated that we would begin a proceeding under the Ex Parte No. 290 docket to address the use of the cost recovery index to recyclables and their need for special treatment given Section 204 of the Staggers Act. We have decided to postpone that proceeding

[2] After December 26, 1981, carriers are free separately to propose (through nomal tariff filing procedures) rate increases on recyclables subject to Ex Parte No. 394, *supra*, subject to the condition that they prove compliance with the 146 percent cap.

until the reopened Ex Parte No. 319, *Investigation of Freight Rates for the Transportation of Recyclable or Recycled Commodities*, served April 13, 1981 is decided. In that proceeding, we are considering, among other things, the propriety and level of a maximum rate ceiling for scrap iron and steel. It would be unproductive to begin the Ex Parte No. 290-related rulemaking until it is decided whether ferrous scrap will be included.

This decision will not significantly affect the quality of the human environment or conservation of energy resources. Although this proceeding is not subject to Public Law 96–354, it is our opinion that it will not have a significant adverse impact on a substantial number of small entities.
(49 U.S.C. 10321, 10701O, 5 U.S.C. 553)

Dated: December 18, 1981.

By the Commission, Chairman Taylor, Vice-Chairman Clapp, Commissioners Gresham and Gilliam.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035–01–M

Motor Carriers; Finance Applications; Decision-Notice

As indicated by the findings below, the Commission has approved the following applications filed under 49 U.S.C. 10924, 10926, 10931 and 10932.

We find:

Each transaction is exempt from section 11343 (formerly section 5) of the Interstate Commerce Act, and complies with the appropriate transfer rules.

This decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

Petitions seeking reconsideration must be filed within 20 days from the date of this publication. Replies must be filed within 20 days after the final date for filing petitions for reconsiderations; any interested person may file and serve a reply upon the parties to the proceeding. Petitions which do not comply with the relevant transfer rules at 49 CFR 1132.4 may be rejected.

If petitions for reconsideration are not timely filed, and applicants satisfy the conditions, if any, which have been imposed, the application is granted and they will receive an effective notice. The notice will indicate that consummation of the transfer will be presumed to occur on the 20th day following service of the notice, unless either applicant has advised the Commission that the transfer will not be consummated or that an extension of time for consummation is needed. The notice will also recite the compliance requirements which must be met before the transferee may commence operations.

Applicants must comply with any conditions set forth in the following decision-notices within 30 days after publication, or within any approved extension period. Otherwise, the decision-notice shall have no further effect.

It is Ordered:

The following applications are approved, subject to the conditions stated in the publication, and further subject to the administrative requirements stated in the effective notice to be issued hereafter.

By the Commission, Review Board No. 3, Members Krock, Joyce, and Dowell.

MC–FC–79155. By decision of December 8, 1981, issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR 1132, Review Board Number 3 approved the transfer to Paul A. Himmer/dba Great Pond Service Center of Certificate No. MC–107897 issued November 14, 1962 to Edward J. Marsan/dba Eddie's Amoco authorizing the transportation of wreck or disabled motor vehicles over irregular routes from points in Maine, New Hampshire, Vermont, Rhode Island, Connecticut, and New York, to Lawrence and Methuen, Massachusetts, with no transportation for compensation on return except as otherwise authorized. Representative: Paul Himmer, 1060 Osgood Street, North Andover, MA 01845.

MC–FC–79250. By decision of December 10, 1981, issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR 1132, Review Board Number 3 approved the transfer to WORDEN SONS OF COLDWATER, INC. d/b/a McLAIN TRANSPORTATION, INC., of Hillsdale, MI of Permit No. MC–128159 issued September 29, 1967 to McLAIN TRANSPORTATION, INC., of Hillsdale, MI authorizing the transportation of *meats, meat products, and meat by-products*, between the plantsite of Bob Evans Farms, Hillsdale, MI and points in IL, IN, MI, OH and PA. *Spices*, between Cincinnati, OH and the plantsite of Bob Evans Farms, Hillsdale, MI. *Lard Cans* between Cincinnati, OH and the plantsite of Bob Evans Farms, Hillsdale, MI under continuing contract with Bob Evans Farms, Hillsdale, MI. TA lease is not sought. Transferee holds no authority. Representative is: James R. Neal, 1200 Bank of Lansing Bldg., Lansing, MI 48933.

Federal Register Notice

MC–FC–79383, republication. William Curtin, d.b.a. Curtin's Express. The application was originally published in the **Federal Register** in Volume 46, No. 208, page 53226, inadvertantly omitting a portion of the Certificate of Registration being transferred. In order to provide accurate notice of the commodities and territory involved in the application, the authority to be transferred being republished in its entirety.

Certificate of Registration No. MC–98247 (Sub-No. 1), issued February 24, 1964, to Alfred M. Carroll, doing business as Carroll's Express authorizing the transportation of (A) *general commodities*, over irregular routes, between points in Massachusetts, and (B) *general commodities*, between a point in Cambridge and a point in Dedham beyond Readville, passing through (1) Vassar Street and Massachusetts Ave. in Cambridge; Harvard Bridge; Boston Proper; Columbia Ave., Washington Street, Hyde Park Avenue, Milton Street and Sprague Street in Boston, and approximately ½ mile on Sprague Street in Dedham, (2) Vassar Street, Main Street in Cambridge; West Boston Bridge; Boston Proper; Albany Street, Hampton Street, Dedly Street and Blue Hill Avenue in Boston; Blue Hill Avenue, Brush Hill Road and Milton Street in Milton, Milton Street and Sprague Street in Boston, and approximately ½ mile on Sprague Street in Dedham.

MC–FC–79487. By decision of December 1, 1981, issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR 1132, Review Board Number 3 approved the transfer to CEE KAY MOTOR FREIGHT, INC. of Certificate No. MC–63411 (Sub-1) issued to BERGEN EXPRESS, CO. INC. authorizing over irregular routes, transporting cleaning compounds, chemicals, and refrigeration supplies, between New York, NY, on the one hand, and, on the other, points in CT, NY, NJ, and PA. Representative: C. Kasten, Jr., 23 Terminal Rd., Lyndhurst, NJ 07071. TA lease is not sought. Transferee is not a carrier.

MC–FC–79496. By decision of December 8, 1981, issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR 1132, Review Board Number 3 approved the transfer to Robert F. Nolan d/b/a John H. Nolan and Son, of Permit No. MC–113835 (Sub-No. 1) issued to John H. Nolan d/b/a John H. Nolan and Son, Robert F. Nolan and Jane R. Nolan, Executors authorizing the transportation of (1) *caskets;* from New Haven, CT to points in MA, NH, NY, RI, and VT, and (2) *empty containers*, used in the

transportation of caskets, from points in MA, NH, NY, RI, and VT, to New Haven, CT. Representative: Sidney L. Goldstein, 109 Church Street, New Haven, CT 06510.

Note.—Transferee is a non-carrier.

MC–FC–79501. By decision of December 8, 1981, issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR 1132, Review Board Number 3 approved the transfer to GOLDEN ISLES COACHES, INC., of Brunswick, GA, of Certificate No. MC–136102 (Sub-1), issued to SANDHILL STAGE LINES, INC., of Jacksonville, FL, authorizing the transportation of *passengers and their baggage*, in charter operations, beginning and ending at Hilton Head Island, SC, and extending to points in FL, GA, NC, SC, and TN. Representative: James Perry Fields, 1612 Union Street, P.O. Box 797, Brunswick, GA 31521.

Notes.—TA has not been filed. Transferee is not a carrier, but is affiliated with Coastal Trucking Co., Inc., which holds common carrier authority under MC–151141.

MC–FC–79517. By decision of December 14, 1981, issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR 1132, Review Board Number 3 approved the transfer to IDDINGS TRUCKING, INC., of Lowell, OH, of Certificate No. MC–101053 (Sub-No. 12X), issued July 27, 1981, to DRY BULK TRANSPORT, INC., of Marietta, OH, authorizing the transportation of (1) *commodities in bulk, coal and coal products, ores and minerals, and clay, concrete, glass, or stone products*, (a) between points in Hancock, Brooke, Ohio, Marshall and Wetzel Counties, WV, on the one hand, and, on the other, points in Guernsey, Noble and Monroe Counties, OH, and (b) between points in Pleasants and Wetzel Counties, WV, on the one hand, and, on the other, points in Jefferson, Belmont, Guernsey, Monroe, Harrison and Noble Counties, OH; and (2) *commodities in bulk*, (a) between points in Washington and Morgan Counties, OH, on the one hand, and, on the other, points in Pleasants and Wood Counties, WV, (b) between points in Noble County, OH, on the one hand, and, on the other, points in Wood County, WV, and (c) between points in Mason County, KY, and Washington County, OH, on the one hand, and, on the other, points in IL, IN, OH, PA, WV, and MI. Representative: Michael Spurlock, 275 East State Street, Columbus, OH 43215.

Notes.—(1) TA has not been filed. (2) Transferee is authorized to operate pursuant to No. MC–99656, as a common carrier in the States of OH, IN, IL, KY, MD, MI, MO, NY, PA, and WV. (3) No. MC–99656 (Sub-No. 8) is a direct application, filed and published in this same Federal Register issue.

The following operating rights applications, filed on or after July 3, 1980, are filed in connection with pending finance applications under 49 U.S.C. 10926, 11343 or 11344. The applications are governed by Special Rule 252 of the Commission's General Rules of Practice (49 CFR 1100.252).

Persons wishing to oppose an application must follow the rules under 49 CFR 1100.252. Persons submitting protests to applications filed in connection with pending finance applications are requested to indicate across the front page of all documents and letters submitted that the involved proceeding is directly related to a finance application and the finance docket number should be provided. A copy of any application, together with applicant's supporting evidence, can be obtained from any applicant upon request and payment to applicant of $10.00.

Amendments to the request for authority are not allowed. However, the Commission may have modified the application to conform to the Commission's policy of simplifying grants of operating authority.

Findings: With the exceptions of those applications involving duly noted problems (e.g., unresolved common control, unresolved fitness questions, and jurisdictional problems) we find, preliminarily, that each applicant has demonstrated that its proposed service warrants a grant of the application under the governing section of the Interstate Commerce Act. Each applicant is fit, willing, and able properly to perform the service proposed and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. Except where specifically noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient protests in the form of verified statements as to the finance application *or* to the following operating rights applications directly related thereto filed within 45 days of publication of this decision-notice (or, if the application later becomes unopposed), appropriate authority will be issued to each applicant (except where the application involves duly noted problems) upon compliance with certain requirements which will be set forth in a notification of effectiveness of this decision-notice. Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

Applicant(s) must comply with all conditions set forth in the grant or grants of authority within the time period specified in the notice by effectiveness of this decision-notice, or the application of a non-complying applicant shall stand denied.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Dated: December 18, 1981.

By the Commission, Review Board Number 3, Members Krock, Joyce, and Dowell.

MC–99656 (Sub-8), filed December 4, 1981. Applicant: IDDINGS TRUCKING, INC.—Extension State Route 60, Box 388, Lowell, OH 45744. Representative: Michael Spurlock, Esquire, 275 East State Street, Columbus, OH 43215. (1) *Commodities in bulk*, (a) between points in IL, IN, OH, PA, WV, MI and Mason County, KY, and (b) between points in IL, IN, OH, PA, WV, MI, and Mason County, KY, on the one hand, and, on the other, points in KY, MD, MO, and NY, and (2) *Coal and coal products, ores and minerals, and clay, concrete, glass or stone products*, between points in Hancock, Brooke, Ohio, Marshall, Pleasants, and Wetzel Counties, West Virginia, on the one hand, and, on the other, points in Ohio.

Notes.—This application is directly related to No. MC–FC–79517, published in this same Federal Register issue.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035–01–M

DEPARTMENT OF THE TREASURY

Office of the Secretary

National Productivity Advisory Committee; Meeting

December 21, 1981.

The National Productivity Advisory Committee will hold its first meeting on Wednesday, January 6, 1982, at 10:45 a.m. in Room 4121/5 of the Main Treasury Building, at 15th Street and Pennsylvania Avenue NW, Washington, D.C.

The National Productivity Advisory Committee was established by Executive Order 12332 on November 10, 1981. The Chairman of the Committee is William E. Simon. The Committee is composed of distinguished citizens, only one of whom is a full-time officer of the

Federal Government. The members serve at the pleasure of the President.

The Committee shall advise the President and the Secretary of the Treasury through the Cabinet Council on Economic Affairs on the Federal Government's role in achieving higher levels of national productivity and economic growth.

The meeting will be open to public observation. Written comments or statements may be submitted at any time before or after the meeting. Approximately 25 seats will be available on a first come, first served basis.

Roger B. Porter,

Executive Secretary, National Productivity Advisory Committee.

BILLING CODE 4810-25-M

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

Humanities Panel: Meetings

AGENCY: National Endowment for the Humanities.

ACTION: Notice of meetings.

SUMMARY: Pursuant to the provision of the Federal Advisory Committee Act (Pub. L. 92-463, as amended), notice is hereby given that the following meetings of the Humanities Panel will be held at 806 15th Street, NW., Washington, DC 20506:

1. Date: January 6, 1982.
   Time: 9:00 a.m. to 5:30 p.m.
   Room: 314.
   Program: This meeting will review applications for Summer Stipends in Philosophy I, submitted to the Division of Fellowships and Seminars, for projects beginning after May 1, 1982.
2. Date: January 7-8, 1982.
   Time: 9:00 a.m. to 5:30 p.m.
   Room: 807.
   Program: This meeting will review applications submitted for the Youthgrants Program, Division of Special Programs, for projects beginning after May 1, 1982.
3. Date: January 7-8, 1982.
   Time: 9:00 a.m. to 5:30 p.m.
   Room: 1134.
   Program: This meeting will review applications submitted for Research Material Program: Publications Panel, Division of Research Programs, for projects beginning after April 1, 1982.
4. Date: January 8, 1982.
   Time: 9:00 a.m. to 5:30 p.m.
   Room: 314.
   Program: This meeting will review applications for Summer Stipends in History I, submitted to the Division of Fellowships and Seminars, for projects beginning after May 1, 1982.
5. Date: January 9, 1982.
   Time: 9:00 a.m. to 5:30 p.m.
   Room: 314.
   Program: This meeting will review applications for Summer Stipends in Art History and Architecture, submitted to the Division of Fellowships and Seminars, for projects beginning after May 1, 1982.
6. Date: January 11, 1982.
   Time: 9:00 a.m. to 5:30 p.m.
   Room: 314.
   Program: This meeting will review applications for Summer Stipends in Recent U.S. History, submitted to the Division of Fellowships and Seminars, for projects beginning after May 1, 1982.
7. Date: January 13, 1982.
   Time: 9:00 a.m. to 5:30 p.m.
   Room: 911.
   Program: This meeting will review applications for Summer Stipends in Foreign Languages and Literatures II, submitted to the Division of Fellowships and Seminars, for projects beginning after May 1, 1982.
8. Date: January 13, 1982.
   Time: 9:00 a.m. to 5:30 p.m.
   Room: 314.
   Program: This meeting will review applications for Summer Stipends in Political Science, Economics, and Law and Jurisprudence, submitted to the Division of Fellowships and Seminars, for projects beginning after May 1, 1982.
9. Date: January 13, 1982.
   Time: 9:00 a.m. to 5:30 p.m.
   Room: 1134.
   Program: This meeting will review applications for Summer Stipends in History II, submitted to the Division of Fellowships and Seminars, for projects beginning after May 1, 1982.
10. Date: January 15, 1982.
    Time: 9:00 a.m. to 5:30 p.m.
    Room: 911.
    Program: This meeting will review applications for Summer Stipends in Religion, submitted to the Division of Fellowships and Seminars, for projects beginning after May 1, 1982.
11. Date: January 15, 1982.
    Time: 9:00 a.m. to 5:30 p.m.
    Room: 1023.
    Program: This meeting will review applications for Summer Stipends in Sociology, Psychology, and Education, submitted to the Division of Fellowships and Seminars, for projects beginning after May 1, 1982.
12. Date: January 15, 1982.
    Time: 9:00 a.m. to 5:30 p.m.
    Room: 314.
    Program: This meeting will review applications for Summer Stipends in Foreign Languages and Literatures I, submitted to the Division of Fellowships and Seminars, for projects beginning after May 1, 1982.

The proposed meetings are for the purpose of Panel review, discussion, evaluation and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the agency by grant applicants. Because the proposed meetings will consider information that is likely to disclose:

(1) Trade secrets and commercial or financial information obtained from a person and priviledged or confidential;

(2) Information on a personal nature the disclosure of which would constitute a clearly unwarranted invasion of personal privacy; and

(3) Information the disclosure of which would significantly frustrate implementation of proposed agency action;

pursuant to authority granted me by the Chairman's Delegation of Authority to Close Advisory Committee Meetings, dated January 15, 1978, I have determined that these meetings will be closed to the public pursuant to subsections (c)(4), (6) and (9)(B) of section 552b of Title 5, United States Code.

Further information about these meetings can be obtained from Mr. Stephen J. McCleary, Advisory Committee Management Officer, National Endowment for the Humanities, Washington, DC 20506, or call (202) 724-0367.

Stephen J. McCleary,

Advisory Committee Management Officer.

BILLING CODE 7536-01-M

National Council on the Arts; Visual Arts Panel (Painting); Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Public Law 92-463), as amended, notice is hereby given that a meeting of the Visual Arts Panel (Painting) to the National Council on the Arts will be held on January 12-15, 1982 from 9:00 a.m.-6:00 p.m. in the Consul Building West Lobby of the Columbia Plaza Office Complex, 2401 E Street, NW., Washington, D.C. 20506.

This meeting is for the purpose of Panel review, discussion, evaluation, and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the agency by grant applicants. In accordance with the determination of the Chairman published in the Federal Register of February 13, 1980, these sessions will be closed to the public pursuant to subsections (c) (4), (6) and 9(b) of

section 552b of Title 5, United States Code.

Further information with reference to this meeting can be obtained from Mr. John H. Clark, Advisory Committee Management Officer, National Endowment for the Arts, Washington, D.C. 20506, or call (202) 634–6070.

John H. Clark,

Director, Office of Council and Panel Operations, National Endowment for the Arts.

December 15, 1981.

NATIONAL TRANSPORTATION SAFETY BOARD

Responses; Availability

• **Recommendation Responses from—**

Federal Aviation Administration: Dec. 10, A–81–144: Plans to investigate questionable maintenance/inspection practices and use of unauthorized substitute parts. *Dec. 10, A–73–109:* Issued AD 74–18–09, Amendment 39–1947. *Dec. 10, A–78–57 and 58:* Believes –57 not feasible; has issued final rule, Airworthiness Review Program; Amendment 8A. *Dec. 10, A–79–9 and –10:* Following completion of "A Study to Determine the Need for Altitude Information on Surveillance Approaches," concludes that recommended actions are unwarranted. *Dec. 10, A–73–68:* Has amended 14 CFR 25.785 to provide improved flight attendant protection while seated. *Dec. 10, A–77–43 and –44:* Will not issue the recommended maintenance alert; will not conduct the recommended directed safety inspection. *Dec. 10, A–78–64:* Is collecting data to analyze bird ingestion criteria of large high bypass ratio turbofan engines.

Federal Railroad Administration: Dec. 1, R–74–9: The Consolidated Code of Operating Rules, Rule G, prohibits use of narcotics and intoxicants by railroad employees. *Dec. 1, R–74–2 through –4:* Believes recommendations are not justified. *Dec. 1, R–81–10 through –16:* Has issued a final rule on Docket HM–174; is reviewing other products for inclusion under 49 CFR 179.105; is modifying tank cars to minimize bottom outlet valve damage in train accidents; is using AAR–RPI data to analyze the need for regulatory action; will evaluate safe tank car placement in trains; will research and test tank car steels, breach mechanisms, and resistance to breaching. *Dec. 1, R–81–75:* Additional interim safety precautions believed to be unnecessary for unretrofitted tank cars.

U.S. Coast Guard: Nov. 24, M–81–32 and –33 and M–79–103: Will reevaluate exemption of passenger-carrying rivercraft from Algiers traffic lights; is establishing a monitoring/education program to reduce improper use of bridge-to-bridge radiotelephone; is cooperating with Federal Communication Commission; has requested vessel surveillance funding; New Orleans VTS participation is required.

National Cargo Bureau, Inc.: Dec. 1, M–81–70: Has emphasized to all surveyors that trimming of general cargo vessels cannot be overstressed.

Motor Vehicle Manufacturers Association: Dec. 9, H–81–63: In discussing with members inclusion of warning in owners manuals on hazards of riding in open cargo areas of pickup trucks.

State of Alaska: Nov. 24, H–81–68 and 69: State regulations permit riding in open cargo areas of pickup trucks; Department of Public Safety will evaluate the effect of prohibiting this practice in Alaska.

Note.—Single copies of responses are free on written request, identified by recommendation number, to: Public Inquiries Section, National Transportation Safety Board, Washington, D.C. 20594.

B. Sharon Flemming,

Director, Executive Secretariat.

BILLING CODE 4910–58–M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50–358]

Cincinnati Gas & Electric Co., et al.; Order Extending Construction Completion Date

The Cincinnati Gas and Electric Company, Columbus and Southern Ohio Electric Company and The Dayton Power and Light Company are the holders of Construction Permit No. CPPR–88 issued by the Atomic Energy Commission [1] on October 27, 1972 for construction of the William H. Zimmer Nuclear Power Station, Unit 1, presently under construction at a site located in Clermont County, Ohio.

On February 8, 1980, Cincinnati Gas & Electric Company filed a request for extension of the completion date for Unit 1 based on the time needed to comfortably accommodate the Commission's announcement of a pause in issuing operating licenses to the spring of 1980.

Subsequently, Cincinnati Gas & Electric Company filed an amended request by letter, dated March 16, 1981 for further extension of the completion date for Unit 1 based upon the Nuclear Regulatory Commission's report to Congress stating that a decision on a full power license for the William H. Zimmer Nuclear Power Station is expected in July of 1982.

As a result of the accident at the Three Mile Island, Unit 2 Nuclear Power Plant, the Nuclear Regulatory Commission (NRC) conducted an extensive investigation of potential design deficiencies in the plant, plant operator response to the accident, operator errors and/or misinterpretation of plant instrumentation, and all other aspects of the accident which might lead to information that would improve the safety of nuclear power plants. The findings of this investigation and from the comprehensive study of the President's Commission showed that certain plant modifications and improvements in utility organization structure were required to improve the safety of nuclear power plant operation and to upgrade the capability of utilities to cope with a severe accident. The NRC staff prepared an Action Plan for Commission review and approval that included new and/or improved safety objectives, the detailed criteria for their implementation and the various implementation deadlines. In order to accommodate a reasonable schedule needed to complete safety evaluations regarding the applicant's response to the Action Plan requirements and the subsequent licensing actions related to these new safety requirements, the Nuclear Regulatory Commission staff concluded that the requested completion date of construction for Unit 1 should be extended to December 31, 1982.

This action involves no significant hazards consideration; good cause has been shown for the delays; and the requested extension is for a reasonable period, the bases for which are set forth, in the staff's safety evaluation of the request for extension.

The preparation of an environmental impact statement for this particular action is not warranted because there will be no significant environmental impact attributable to the order other than that which has already been predicted and described in the Commission's Environmental Statements for the William H. Zimmer Nuclear Power Station, Unit 1 published in September 1972 and June 1977.

The Commission has determined that this action will not result in any significant environmental impact and, pursuant to 10 CFR 51.5(d)(4), an environmental impact statement, or negative declaration and environmental impact appraisal, need not be prepared in connection with this action.

The applicant's letters, dated February 8, 1980 and March 16, 1981, and the staff's safety evaluation supporting the Order are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. 20555 and at the local public document room established for the William H. Zimmer Nuclear

[1] Effective January 20, 1975, the Atomic Energy Commission became the Nuclear Regulatory Commission and Permits in effect on that day were continued under the authority of the Nuclear Regulatory Commission.

Power Station, Unit 1, at the Clermont County Library, Third and Broadway Streets, Batavia, Ohio 45103.

It is hereby ordered that the latest completion date for CPPR–88 be extended from April 1, 1980 to December 31, 1982 for Unit 1.

Dated: December 18, 1981.

Darrell G. Eisenhut,

Director, Division of Licensing, Office of Nuclear Reactor Regulation.

BILLING CODE 7590–01–M

OFFICE OF MANAGEMENT AND BUDGET

Agency Forms Under Review

Background

When executive departments and agencies propose public use forms, reporting, or recordkeeping requirements, the Office of Management and Budget (OMB) reviews and acts on those requirements under the Paperwork Reduction Act (44 U.S.C., Chapter 35). Departments and agencies use a number of techniques including public hearings to consult with the public on significant reporting requirements before seeking OMB approval. OMB in carrying out its responsibility under the Act and also considers comments on the forms and recordkeeping requirements that will affect the public.

List of Forms Under Review

Every Monday and Thursday OMB publishes a list of the agency forms received for review since the last list was published. The list has all the entries for one agency together and grouped into new forms, revisions, extensions (burden change), extensions (no change), or reinstatements. The agency clearance officer can tell you the nature of any particular revision you are interested in. Each entry contains the following information:

The name and telephone number of the agency clearance officer (from whom a copy of the form and supporting documents is available);

The office of the agency issuing this form;

The title of the form;

The agency form number, if applicable;

How often the form must be filled out;

Who will be required or asked to report;

The standard industrial classification (SIC) codes, referring to specific respondent groups that are affected;

Whether small businesses or organizations are affected;

A description of the Federal budget functional category that covers the information collection;

An estimate of the number of responses;

An estimate of the total number of hours needed to fill out the form;

An estimate of the cost to the Federal Government;

An estimate of the cost to the public;

The number of forms in the request for approval;

An indication of whether section 3504(H) of Pub. L. 96–511 applies;

The name and telephone number of the person or office responsible for OMB review; and

An abstract describing the need for an uses of the information collection.

Reporting or recordkeeping requirements that appear to raise no significant issues are approved promptly. Our usual practice is not to take any action on proposed reporting requirements until at least 10 working days after notice in the **Federal Register**, but occasionally the public interest requires more rapid action.

Comments and Questions

Copies of the proposed forms and supporting documents may be obtained from the agency clearance officer whose name and telephone number appear under the agency name. The agency clearance officer will send you a copy of the proposed form, the request for clearance (SF83), supporting statement, instructions, transmittal letters, and other documents that are submitted to OMB for review. If you experience difficulty in obtaining the information you need in reasonable time, please advise the OMB reviewer to whom the report is assigned. Comments and questions about the items on this list should be directed to the OMB reviewer or office listed at the end of each entry.

If you anticipate commenting on a form but find that time to prepare will prevent you from submitting comments promptly, you should advise the reviewer of your intent as early as possible.

The timing and format of this notice have been changed to make the publication of the notice predictable and

to give a clearer explanation of this process to the public. If you have comments and suggestions for further improvements to this notice, please send them to Jim J. Tozzi, Deputy Administrator, Office of Information and Regulatory Affairs, Office of Management and Budget, 726 Jackson Place, Northwest, Washington, D.C. 20503.

DEPARTMENT OF AGRICULTURE

Agency Clearance Officer—Richard J. Schrimper—202–447–6201

New

• Farmers Home Administration
Form FMHA 1942–31, Association Water or Sewer System
Grant Agreement
FMHA 1942–31
On occasion
State or local governments/businesses or other institutions
State and local gov't, non-profit organizations
SIC: 178, 494, 495
Small businesses or organizations
Area and regional development: 350 responses; 700 hours; $117,200 Federal cost; $8,400 public cost; 1 form; not applicable under 3504(h)
Nell Minow, 202–395–7340

FMHA needs this information to document the agreement between the grantor (FMHA) and the grantee (recipient).

• Food and Nutrition Service
Cereal Acceptability Study
Nonrecurring
Individuals or households
Low income prenatal women and preschool children in WIC
Food and nutrition assistance: 2,800 responses; 642 hours; $250,750 Federal cost; $2,915 public cost; 9 forms; not applicable under 3504(h)
Nell Minow, 202–395–7340

Through comments during rulemaking processes of 1978–1980, WIC program managers have been advised to improve participant satisfaction with the high-iron fortified cereals allowed in the WIC food package so that iron status in this population may be strengthened. The results of this study shall provide the department with the necessary, but previously unavailable, information needed to modify the current nutritional standard governing WIC cereals.

• Farmers Home Administration
7 CFR 1951–A, Account Servicing Policies
On occasion
Individuals or households/farms
Farm owners, operators and applicants for FMHA assistance
SIC: 011, 013, 016, 017, 018, 019, 021, 024, 025, 027
Farm income stabilization: 60 responses; 60 hours; $102,930 Federal cost; $360 public cost; 1 form; not applicable under 3504(h)
Nell Minow, 202–395–7340

Regulation establishes the policies and procedures used by FMHA in the collecting and servicing of existing loans. The information is needed to determine rescheduling, deferring and reamortizing of loans to enable borrowers to become more successful and to reduce FMHA loan losses.

• Farmers Home Administration
7 CFR 1942–I, Resource Conservation and Development (RCD)
Loans and watershed (WS) loans and watershed (WS) advances
On occasion
State or local governments/businesses or other institutions
Public bodies and non-profit corporations
SIC: 494, 497
Small businesses or organizations
Farm income stabilization: 90 responses; 195 hours; $75,200 Federal cost; $2,340 public cost; 1 form; not applicable under 3504(h)
Nell Minow, 202–395–7340

FMHA needs this information to make loans or advances to cover all or a part of the cost for watershed work or improvement. An addition, this regulation authorized resource conservation and development loans for land conservation and utilization and water and acquacultural purposes.

• Farmers Home Administration
7 CFR 1804–D, Planning and Performance Site Development Work
FMHA 424–20
On occasion
State or local governments/businesses or other institutions
Housing developers, non-profit housing organizations
SIC: 152, 153, 154, 161, 162
Small businesses or organizations
Mortgage credit and thrift insurance: 14,000 responses; 48,860 hours; $112,680 Federal cost; $4,794 public cost; 1 form; not applicable under 3504(h)
Nell Minow, 202–395–7340

Information is used by FMHA to determine if subdivisions and site developments will meet agency and other public authority requirements as they pertain to location, layout, utilities, streets, etc.

• Farmers Home Administration
7 CFR 1980–D, Rural Housing Program Loans
On occasion
Individuals or households/businesses or other institutions
Banks, savings & loan associations
SIC: 602, 612, 616
Small businesses or organizations
Mortgage credit and thrift insurance: 300 responses; 350 hours; $139,000 Federal cost; $3,500 public cost; 1 form; not applicable under 3504(h)
Nell Minow, 202–395–7340

Title V of the Housing Act of 1949, as amended, authorizes rural housing loans to above-moderate income applicants. Information collected is necessary for FMHA to guarantee the loan requested and to assure that appropriate loan servicing actions are taken.

• Farmers Home Administration
7 CFR 1980–B, Guaranteed Farmer Program Loans
FMHA 449–11, 449–12
On occasion
Individuals or households/State or local governments/farms/ businesses or other institutions
Farming proprietorships
SIC: 100, 103, 016, 017, 018, 019, 021, 024, 025, 027
Small businesses or organizations
Farm income stabilization: 13,220 responses; 15,262 hours; $367,990 Federal cost; 2 forms; $157,531 public cost; not applicable under 3504(h)
Nell Minow, 202–395–7340

FMHA needs the information collected to determine whether loan proposals are technologically and economically feasible and otherwise in compliance with the enabling legislation.

• Farmers Home Administration
7 CFR 1980–F, Guaranteed Economic Emergency Loans
On occasion
Businesses or other institutions
Lending institutions
SIC: 602
Small businesses or organizations
Farm income stabilization: 1,600 responses; 2,500 hours; $186,200 Federal cost; 1 form; $28,275 public cost; not applicable under 3504(h)
Nell Minow, 202–395–7340

FMHA needs this information to service loans made because of a lack of sufficient agricultural credit due to economic stresses such as a general tightening of agricultural credit or an unfavorable relationship between production costs and prices received for agricultural commodities.

Revisions

• Economics and Statistics Service

Peanut Cost of Production Survey
Nonrecurring
Farms
Peanut farms
SIC: 013
Small businesses or organizations
Agricultural research and services: 720 responses; 800 hours; $160,000 Federal cost; $160,000 public cost; 1 form; not applicable under 3504(h)

Statistical Policy Branch, 202–395–7313

The information is needed to estimate peanut production costs by type of cost, per pound and acre. The cost estimates serve as a basis setting peanut prices under existing and proposed support programs.

Extensions (Burden Change)

• Food Safety and Inspection Services
Regulations Governing Voluntary Reimbursable Inspection Service
MP–86, MP–225
On occasion
Businesses or other institutions
Meat slaughter and processing plants
SIC: 201
Consumer and occupational health and safety: 31 responses; 7 hours; $135 Federal cost; 1 form; not applicable under 3504(h)

Charles A. Ellett, 202–395–7340

Reimbursable services are provided under the Agriculture Maketing Services Act of 1946 to maintain the identity of federally inspected meat products through operations not subject to inspection.

DEPARTMENT OF COMMERCE

Agency Clearance Officer—Edward Michals—202–377–3627

Revisions

• Economic and Statistical Analysis

Small businesses or organizations
Other labor services 76 responses; 32 hours; $150 Federal cost; 1 form; $202 public cost; not applicable under 3504(h)
Laverne V. Collins, 202–395–6880

Area-wide plans under the jurisdiction of local representatives of construction contractors, unions, and minority communities must be updated and periodically reported to indicate that the plans are working effectively.

• Employment and Training Administration
Labor Market Information Performance Indicators
Monitoring
ETA–2224B
Quarterly
State or local governments
State employment security agencies
SIC: 944
Training and employemt: 212 responses; 212 hours; $2,500 Federal cost; 1 form; $2,200 public cost; not applicable under 3504(h)
Laverne V. Collins, 202–395–6880

This monitoring effort will collect quarterly information on the types, number and timeliness of labor market information publications produced by State employment security agencies (SESA). The information will permit an examination of the extent sesas are meeting planned publication schedules. Corrective actions to resolve any problems can then be undertaken.

Revisions

• Occupational Safety and Health Administration
Post Inspection Employer Questionnaire
Post Inspection Employee Questionnaire
OSHA–240
On Occasion
Businesses or other institutions
All employers inspected by OSHA, including businesses, etc.
SIC: multiple
Small Businesses or organizations
Consumer and occupational health and safety: 7,500 Responses; 1,125 hours $14,862 Federal cost; 2 forms $16,875 public cost; not applicable under 3504(h)
Laverne V. Collins, 202–395–6880

OSHA's goal is to foster cooperative relationships with employers and employees to promote safety and health most effectively. To achieve this, OSHA must rely on the professional conduct of its compliance officers. This survey will allow employers and employee representatives to react to OSHA's inspections and provide the information needed to develop a cooperative, non-adversarial program.

• Employment Standards Administration
Records to Be Kept by Employers Under The FSLA of 1938, as Amended (29 CFR 516)
WH–1261

State or local governments
Cities, townships, counties, Indian tribes, Alaskan Native
SIC: 999
Central fiscal operations: 39,000 Responses; 19,500 hours; $0 Federal cost; 1 form; not applicable under 3504(h)
Irene Montie, 202–395–6880

To aid the Office of Revenue Sharing in determining whether or not it has jurisdiction over alleged discrimination.

• Office of the Secretary
Collection of Information Needed to Determine Compliance With the Act
On Occasion
State or local governments
Cities, townships, counties, Indian tribes
SIC: 999
Central fiscal operations: 39,000 Responses; 39,000 hours; $0 Federal cost; 1 form; not applicable under 3504(h)
Irene Montie, 202–395–6880

Information requested to be collected and reported from time to time includes race, sex, ethnic origin of employees, data concerning to which minorities, females, aged and handicapped are beneficiaries of entitlement funds. Information must be retained and ors employees allowed access to the information. Reports must be made available on request to determine compliance with the Act.

• Office of the Secretary
Requirement for Retention of Audit Work Papers and Related Audit Reports for a 3-year period.
On Occasion
State or local governments
Cities, townships, counties, Indian tribes, Alaskan Natives
SIC: 999
Central fiscal operations; 12,000 Responses; 6,000 hours $0 Federal cost; 1 form; not applicable under 3504(h)

Irene Montie, 202–395–6880

Recipient Governments are required to retain audit reports and the work papers which document the reports for a period of 3 years to be submitted upon request of the Director or the Comptroller General of the United States.

• Office of the Secretary
Retention of Books, Documents, Papers and Records Needed to Determine Compliance With the Act.
On occasion
State or local governments
Cities, townships, counties, Indian tribes, Alaskan Native
SIC: 999
Central fiscal operations: 39,000 responses; 39,000 hours; $0 Federal cost; 1 form; not applicable under 3504(h)
Irene Montie, 202–395–6880

To require recipient governments to maintain for inspection by the director and the Comptroller General of the United States any books, documents, papers and other records as may be required to determine compliance with the act.

ENVIRONMENTAL PROTECTION AGENCY

Agency Clearance Officer—Christine Scoby—202–382–2742

New

• Construction Grant Project Review Information and Record Keeping—Consolidated Request II, Activity Under Revision (825, 827, 830, 834, 835, 838, 841, 900, 904, 905, and 906)
Nonrecurring
State or local governments
City, County, or other pub body, or Indian tribe, with, etc.
SIC: 999
Pollution control and abatement: 1,626 responses; 472,510 hours; $2,273,131 Federal cost; 1 form; not applicable under 3504(h)
Edward H. Clarke, 200–395–7340

This consolidated request (Req II) requests conditional clearance for 11 ICR's which are likely to be removed or reduced due to current regulations revision. The information is needed for wastewater treatment project reviews by States or EPA to determine eligibility for Federal construction grants. The clearance request for the ICR's will be resubmitted following final Federal Register publication of all chgs affecting 40 CFR 35. (See consolidated Req 1 and Att 1, etc.)

• Revisions of Closure and Post-Closure Cost Estimates
On occasion, annually, other—see SF83
State or local governments/businesses or other institutions
Owners/operators of establishments in hazardous waste
SIC: Multiple
Small businesses or organizations
Pollution control and abatement: 12,390 responses; 6,195 hours; $0 Federal cost; 1 form; not applicable under 3504(h)
Edward H. Clarke, 202–395–7340

Owners and operators of hazardous waste management facilities are required to revise their closure and post-closure cost estimates to account for inflation and changes in closure and post-closure plans.

• Information Requirements Regarding Changes to Hazardous Waste Management Facilities During "Interim Status"
On occasion
State or local governments/businesses or other institutions
Owners/operators of hazardous waste management facilities
SIC: Multiple
Small businesses or organizations
Pollution control and abatement: 500 responses; 1,500 hours; $10,500 Federal cost; 1 form; not applicable under 3504(h)
Edward H. Clarke, 202–395–7304

EPA published regulations on May 19, 1980 stating that certain types of changes made to hazardous waste management facilities during "Interim Status" (as defined under sec. 3005(e) of RORA) must be made with the knowledge, and in some cases, the consent, of EPA. The regulations require documentation from the facility owner or operator when such changes are planned.

• Unsaturated Zone Monitoring at Hazardous Waste Land Treatment Facilities
Other—See SF83
Businesses or other institutions
Hazardous waste land treatment facilities
SIC: Multiple
Small businesses or organizations
Pollution control and abatement: 200 responses; 20,000 hours; $0 Federal cost; 1 form; not applicable under 3504(h)
Edward H. Clarke, 202–395–7340

Information gained from unsaturated zone monitoring at hazardous waste land treatment facilities is used to (1) indicate the success or failure of the land treatment processes, (2) allow early detection of threats to ground-water quality, and (3) evaluate the potential for plant uptake of hazardous waste constituents.

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

Agency Clearance Officer—Thomas P. Goggin—202–634–6983

New

• Establishment Information
EEOC 447
On occasion
Farms/businesses or other institutions
Private sector employers subject to the EPA, etc.
SIC: Multiple
Small businesses or organizations
Federal Law Enforcement Activities: 200 Responses; 50 Hours; $1,056 Federal cost; 1 form; not applicable under 3504(h)
Laverne V. Collins, 202–395–6880.

Form 447 will be used to obtain basic EPA jurisdictional data from employers subject to investigation under the act. Use of this form in those few cases when EPA coverage/exemption status is not readily apparent will save the commission and respondents money over other investigatives approaches.

FEDERAL MARITIME COMMISSION

Extensions (no change)

• 46 CFR 536—Publishing and Filing of Tariffs by Common Carriers by Water in the Foreign Commerce of the U.S.—per Container Rates
Gen. order 13
On occasion
Businesses or other institutions
Waterborne common carriers in U.S. foreign commerce
SIC: 441
Water transportation: 426 responses; 426 hours; $8,200 Federal cost; 1 form; not applicable under 3504(h)
William T. Adams; 202–395–4814

Rule was previously approved October 6, 1981. New expiration date requested to coincide with related clearance 3072–0009, which expires on October 31, 1984.

FEDERAL RESERVE SYSTEM

Agency Clearance Officer—William Jones—202–452–2983

New

• Annual Survey of Foreign Fiduciary Assets
FFIEC 006
Annually
Businesses or other institutions
State-chartered member banks, Edge Act Corporations
SIC: 602, 604, 605

General Government: 21 responses; 189 hours; $500 Federal cost; 1 form: $2,835 public cost; not applicable under 3504(h)
Richard S. Stavneak, 202–395–6880.

A uniform interagency report providing the only available known source of the volume of trust or fiduciary activities of foreign banking affiliates of U.S. banking organizations. Report information is used for supervisory purposes including assessing the need for, and nature of supervisory inspections of those activities.

- Survey of Repurchase Agreements (RPS) on U.S. Government Securities and Nonreservable Due Bills

FR 3019A, B
Nonrecurring
Businesses or other institutions
Credit unions with total deposit of $200 million or more
SIC: 602, 603, 605, 612, 614
General government: 10,867 responses; 2,717 hours; $15,000 Federal cost; 2 forms; $40,755 public cost; not applicable under 3504(h)
Richard S. Stavneak, 202–395–6880

These data will be used to improve benchmark data for repurchase agreements (RPS) which are an important and highly volatile component of the monetary aggregates. In addition, survey results will be used to assess permanent data needs in the RP area.

Extensions (Burden Change)

- Report of Selected Borrowings

FR 2415 2415A
Weekly, other—see SF83
Businesses or other institutions
Large member banks
SIC: 602
General Government: 9,754 responses; 27,142 hours; $147,925 Federal cost; 2 forms; $542,840 public cost; not applicable under 3504(h)
Richard S. Stavneak, 202–395–6880

Report collects information on the outstanding balances of selected borrowings in immediately available funds of large member banks (i.e., those with total assets of $1 billion or more as 13/31.77). This report, which provides information mainly on Federal funds and repurchase agreements, is used in the analysis and formulation of monetary policy. Limited advance information is collected daily by telephone (FR 2415A) from the fifteen largest respondents.

Extentions (No change)

- Electric Power Survey

FR 2009
Monthly
Businesses or other institutions
Public and private owned electric utilities
SIC: 491, 261, 265, 281, 286, 331, 333
General Government: 7,200 responses; 49,464 hours; $17,000 Federal cost; 2 forms; $741,960 public cost; not applicable under 3504(h)
Richard S. Stavneak, 202–395–6880

Report collects information on the volume of electric power sold to mining or manufacturing establishments or generated by such establishments for their own use. Survey results are used as a proxy for physical production measures in certain categories of the industrial production index.

- Complaint form

On occasion
Individuals or households
Anyone with any complaint involving a State member bank General Government: 70 responses; 35 hours; $626 Federal cost; 1 form; $300 public cost; not applicable under 3504(h)
Richard S. Stavneak, 202–395–6880

This form is made available to the public for use in reporting consumer complaints involving State member banks.

GENERAL SERVICES ADMINISTRATION

Agency Clearance Officer—John F. Gilmore—202–566–1164

New

- Service Contract Act of 1965 (as amended)

2166
Other—See SF83
Businesses or other institutions
Individs, firms and organ performing SVCS on GSA contracts
SIC: 734, 739, 762
Small businesses or organizations
General property and records management: 2,500 responses; 250,000 hours; $253,250 Federal cost; 1 form; $1,705,000 public cost; not applicable under 3504(h)
Franklin S. Reeder, 202–395–3785

The GSA form 2166 provides information to prospective bidders and contractor on building service contracts and other nonpersonal service contracts regarding their obligations under the Service Contract Act of 1965.

INTERNATIONAL COMMUNICATION AGENCY

Agency Clearance Officer—Mary Jane Winnett—202–523–4308

Extensions (Burden Change)

- Certificate of International Educational Character Wall Chart, Map and Poster

IAP–8
On occasion
Businesses or other institutions
Producers and distributors of audio visual materials.
SIC: All
Foreign information and exchange activities: 25 responses; 25 hours; $0 Federal cost; 1 form; not applicable under 3504(h)
Phillip T. Balazs, 202–395–4814

Form is supplied on request to U.S. producers and distributors of educational, scientific and cultural visual and auditory materials (wall chart, map, and poster) who have interest in exporting their materials abroad.

- Application for certificate of International Educational Character—Motion Picture

IAP–1
On occasion
Businesses or other institutions
Producers and distributors of audio visual materials.
SIC: All
Foreign information and exchange activities: 25 responses; 400 hours; $0 Federal cost; 1 form; not applicable under 3504(h)
Phillip T. Balazs, 202–395–4814

Form is supplied on request to U.S. producers and distributors of educational, scientific and cultural visual and auditory materials abroad.

- Application for Certificate of International Education Character—Recording

IAP–2
On occasion
Businesses or other institutions
Producers and distributors of audio visual materials.
SIC: All
Foreign information and exchange activities: 25 responses; 75 hours; $0 Federal cost; 1 form; not applicable under 3504(h)
Phillip T. Balazs, 202–395–4814

Form is supplied on request to U.S. producers and distributors of educational, scientific and cultural visual and auditory materials—recording—who have interest in exporting their materials abroad.

NUCLEAR REGULATORY COMMISSION

Agency Clearance Officer—Stephen Scott—301–492–8585

New

- Generic Letter Re: Odyn Code

Nonrecurring
Businesses or other institutions
NRC licensees

Robert Veeder, 202–395–4814

Used by OPM and agencies to collect race, sex, and national origin data for determining impact of selection procedures and for complying with provisions as Luevanc V. Campbell, Civil Action 79–0271, U.S. District Court for D.C.

National Scurry,

Chief, Reports Management.

[FR Doc. 81–36328 Filed 12–23–81; 8:45 am]
BILLING CODE 3115–01–M

Agency Forms Under Review

December 21, 1981.

Background

When executive departments and agencies propose public use forms, reporting, or recordkeeping requirements, the Office of Management and Budget (OMB) reviews and acts on those requirements under the Paperwork Reduction Act (44 U.S.C. Chapter 35). Departments and agencies use a number of techniques including public hearings to consult with the public on significant reporting requirements before seeking OMB approval. OMB in carrying out its responsibility under the Act also considers comments on the forms and recordkeeping requirements that will affect the public.

List of Forms Under Review

Every Monday and Thursday OMB publishes a list of the agency forms received for review since the last list was published. The list has all the entries for one agency together and grouped into new forms, revisions, extensions (burden change), extensions (no change), or reinstatements. The agency clearance officer can tell you the nature of any particular revision you are interested in. Each entry contains the following information:

The name and telephone number of the agency clearance officer (from whom a copy of the form and supporting documents is available);

The office of the agency issuing this form;

The title of the form;

The agency form number, if applicable;

How often the form must be filled out;

Who will be required or asked to report;

The Standard Industrial Classification (SIC) codes, referring to specific respondent groups that are affected;

Whether small businesses or organizations are affected;

Adescription of the Federal budget functional category that covers the information collection;

An estimate of the number of responses;

An estimate of the total number of hours needed to fill out the form;

An estimate of the cost to the Federal Government;

An estimate of the cost to the public;

The number of forms in the request for approval;

An indication of whether section 3504(h) of Pub. L. 96–511 applies;

The name and telephone number of the person or office responsible for OMB review; and

An abstract describing the need for and uses of the information collection.

Reporting or recordkeeping requirements that appear to raise no significant issues are approved promptly. Our usual practice is not to take any action on proposed reporting requirements until at least 10 working days after notice in the Federal Register, but occasionally the public interest requires more rapid action.

Q Comments and Questions

Copies of the proposed forms and supportng documents may be obtained from the agency clearance officer whose name and telephone number appear under the agency name. The agency clearance officer will send you a copy of the proposed form, the request for clearance (SF83), supporting statement, instructions, transmittal letters, and other documents that are submitted to OMB for review. If you experience difficulty in obtaining the information you need in reasonable time, please advise the OMB reviewer to whom the report is assigned. Comments and questions about the items on this list shoud be directed to the OMB reviewer or office listed at the end of each entry.

If you anticipate commenting on a form but find that time to prepare will prevent you from submitting comments promptly, you should advise the reviewer of your intent as early as possible.

The timing and format of this notice have been changed to make the publication of the notice predictable and to give a clearer explanation of this process to the public. If you have comments and suggestions for further improvements to this notice, please send them to Jim J. Tozzi, Deputy Administrator, Office of Information and Regulatory Affairs, Office of Management and Budget, 726 Jackson Place NW., Nothwest, Washington, D.C. 20503.

DEPARTMENT OF AGRICULTURE

Agency Clearance Officer—Richard J. Schrimper—202–447–6201

New

• Food and Nutrition Service
Part 283, Food Distribution Program for Households on Indian reservations—(Recordkeeping)
On occasion
State or local governments
State agencies or Indian tribal organ acting as State, etc.
SIC: 943
Food and nutrition assistance: 54,800 responses; 9,400 hours; $69,562 Federal cost; 1 form; $94,000 public cost; not applicable under 3504(h)
Nell Minow, 202–395–7340

Part 283—Administration of the food distribution program on Indian reservations describes the terms and conditions under which commodity foods may be distributed to households on or near an Indian reservation and

how the program shall be administered by capable Indian tribal organizations.

• Food and Nutrition Service
Part 283, Food Distribution Program for Households on Indian Reservation
Household application form
On occasion
Individuals or households
Indian households or households on Indian reservations, etc.
Food and nutrition assistance: 27,000 responses; 13,500 hours; $90,062 Federal cost; 1 form; $135,000 public cost; not applicable under 3504(h)
Nell Minow, 202–395–7340

Part 283—Administration of the food distribution program on Indian reservations describes the terms and conditions under which commodity foods may be distributed to households on or near an Indian reservation and how the program shall be administered by capable Indian tribal organizations.

Revisions

• Food and Nutrition Service
Food Stamp Program Regulations—Part 278
FNS 252, 252–2, 252–3, 350
Annually
Businesses or other institutions
Wholesale food concerns, retail food stores
SIC: 540, 514
Small businesses or organizations
Food and nutrition assistance: 212,791 responses; 23,580 hours; $28,462 Federal cost; 4 forms; $35,800 public cost; not applicable under 3504(h)
Nell Minow, 202–395–7340

FNS needs applicants' gross and food sales volumes and statement of whether staple foods are more than half of eligible food sales to decide whether the applicants should be authorized. FNS uses sales volume with other data to detect the possibility of violations of the rules.

Extensions (Burden Change)

• Food and Nutrition Service
Part 283—Food Distribution Program for Households on Indian Reservations
On occasion, monthly, quarterly, annually
State or local governments
State agencies or Indian tribal organizations
SIC: 943
Food and nutrition assistance: 152,320 responses; 29,185 hours; $168,487 Federal cost; 1 form; $291,850 public cost; not applicable under 3504(h)
Nell Minow, 202–395–7340

Part 283—Administration of the food distribution program on Indian reservation describes the terms and conditions under which commodity may be distributed to households on or near an Indian reservation and how the program shall be administered by capable Indian tribal organizations.

Reinstatements

• Economics and Statistics Service
1981 National Pesticide Usage Survey
Annually
Farms
Producers of crops and livestock in 33 States
SIC: 011, 013, 019, 021, 024, 029
Small businesses or organizations
Agricultural research and services: 15,786 responses; 6,397 hours; $1,215,000 Federal cost; 4 forms; $102,352 public cost; not applicable under 3504(h)
Statistical policy branch, 202–395–7313

This survey provides for a continuing series of pesticide usage and pest management data. The data will be used for assessing the impact of U.S. EPA pesticide regulations, evaluating pesticide use patterns, research in pesticide use, and general information on pest control.

DEPARTMENT OF COMMERCE

Agency Clearance Officer—Edward Michals—202–377–3627

New

• Bureau of the Census
Background Survey Questionnaire
BC–1297
Nonrecurring
Individuals or households
Applicants for Tel Interviewer Positions, Random Digit, Etc., Other Advancement and Regulation of Commerce: 150 responses; 6 hours; $1,000 Federal cost; 1 form; not applicable under 3504(h)
Statistical Policy Branch, 202–395–7313

Plan is to collect information on telephone interviewer applicants in research study between March and August 1982. Information on race/ethnicity is required by uniform guidelines on employee selection procedures for use in adverse impact assessment. All information requested will be utilized in evaluating telephone interviewer personnel practices under study.

Revisions

• Economic and Statistical Analysis
Direct Transactions of U.S. Reporter with Foreign Affiliate Incorporated Abroad
DE–577
Quarterly
Businesses or other institutions
U.S. buss enterprises which have an equity int of 10%, etc.
SIC: All
Small businesses or organizations
Other advancement and regulation of commerce: 35,300 responses; 35,300 hours; $350,000 Federal cost; 1 form; $882,500 public cost; not applicable under 3504(h)
Statistical Policy Branch, 202–395–7313

Secures data on current and capital account transactions between U.S. persons and foreign business enterprises in which they have an equity interest of 10 percent of more. Consists of data on earnings; dividends, interest, and fees and royalties received; and outstanding debt and equity position. Authorized by the International Investment Survey Act of 1976 (P.L. 94–472). Required for the preparation of the U.S. balance of payment accounts.

• Bureau of the Census
Boundary and Annexation Survey
BAS–1, –2 –4, –5, –6, –6 BAS 33(L)
Annually
State or local governments
State and local governments
SIC: 999
Other advancement and regulation of commerce: 7,900 responses; 2,500 hours; $400,000 Federal cost; 4 forms; not applicable under 3504(h)
Statistical Policy Branch, 202–395–7313

The Bureau of the Census needs to have accurate up-to-date boundary information for tabulating, economic and decennial data for local areas.

• Bureau of the Census
Annual Retail Trade Report
B–151 B–151A B–152 B–53
Annually
Businesses or other institutions
Form will be mailed to a sample of stores in all retail, etc
SIC: Multiple
Small businesses or organizations
Other advancement and regulation of commerce: 32,000 responses; 12,800 hours; $492,000 Federal cost; 4 forms; $128,000 public cost; not applicable under 3504(h)
Statistical Policy Branch, 202–395–7313

The annual retail trade survey provides the only continuing authoritative measure of annual sales and industry. The annual sales and end-of-year inventory estimates are used as a benchmark for developing monthly retail sales and inventory estimates. The survey also provides the only complete sample results producing method of inventory valuation data.

Estensions (Burden Change)

• National Oceanic and Atmospheric Administration

Annually
State or local governments
State & local educational agencies
SIC: 999
Other advancement and regulation of commerce: 16,604 responses; 1,400 hours; $263,000 Federal cost; 4 forms; not applicable under 3504(h)
Federal Education Data Acquisition Council, 202-426-5030

The F-33 form is used to collect financial data for public school systems. Data are incorporated with other local government finance data and entered into the national income accounts. Data are also used in long established bureau reports and to determine revenue sharing entitlements.

DEPARTMENT OF EDUCATION

Agency Clearance Officer—Wallace McPherson—202-426-7304

Extensions (Burden Change)

• Office of Educational Research and Improvement
State-Level Personnel Exchange (Elementary-Secondary)
2428-1, 2428-2, 2428-3
Annually
State or local governments
State education agencies
SIC: 941
Research and general education aids: 96 responses; 48 hours; $27,680 Federal cost; 3 forms; $720 public cost; not applicable under 3504(h)
Federal Education Data Acquisition Council, 202-426-5030

NCES was mandated by P.L. 93-380 to "assist State and local educational agencies in improving and automating their statistical and data collection activities." As part of its assistance program, NCES has established a State-level personnel exchange to facilitate the interchange of information and expertise among States.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Agency Clearance Officer—Joseph Strnad—202-245-7488

New

• Departmental Management
Evaluation of the Medicare Mental Health Demonstration
National survey
OS-27-81
Nonrecurring
Businesses or other institutions
2,000 ambulatory mental health facilities
SIC: 808
Small businesses or organizations
Public assistance and other income supplements: 2,000 responses; 667 hours; $25,280 Federal cost; 1 form; not applicable under 3504(h)
Gwendolyn Pla, 202-395-6880

The evaluation is designed to assess the costs of medicare-financed ambulatory mental health care. Forty-five nationally selected mental health settings are receiving medicare waivers that modify some current medicare reimbursement limitations. A national survey of all ambulatory settings will be conducted on a one-time basis for extrapolating the demonstration results on a nationwide basis.

• Alcohol, Drug Abuse, and Mental Health Administration
Inventory of Mental Health Organizations
ADM 25-1
Biennially
Businesses or other institutions
Non-Federal mental health organizations
SIC: 806
Small businesses or organizations
Health: 1,425 responses; 2,138 hours; $213,809 Federal cost; 1 form; $21,380 public cost; not applicable under 3504(h)
Gwendolyn Pla, 202-395-6880

The inventory provides an updated universe of psychiatric organizations to serve as a sampling frame for sample surveys. It also provides descriptive information regarding facilities which is crucial to monitoring developments in the specialty mental health sector and to monitoring progress toward national mental health goals.

Revisions

OSHA–224
On occasion, annually
Business or other institutions
Employers having establishments N–nitrosodimethylamine
SIC: 281, 282, 286, 307
Small businesses or organizations
Consumer and Occupational Health and Safety: 423 responses; 212 hours; $500 Federal cost; 1 form; $1,558 public cost; not applicable under 3504(h)
Laverne V. Collins, 202–395–6880

Employers to maintain complete and accurate records of employee medical examinations conducted in connection with the standard and to forward them to the director of NIOSH upon termination of the employee's employment or in the event the employer ceases business without a successor.

• Occupational Safety and Health Administration
Cotton dust 29 CFR 1910.1043(K)
OSHA–226
On occasion, semiannually, annually
Business or other institutions
Employers with establishments involving cotton dust
SIC: 207, 221, 222, 224, 225, 228, 229, 251
Small businesses or organizations
Consumer and Occupational Health and Safety: 934,200 responses; 467,100 hours; $500 Federal cost; 3 forms; $2,347,172 public cost; not applicable under 3504(h)
Laverne V. Collins, 202–395–6880

This regulation requires employers to establish and maintain accurate records of exposure monitoring and medical surveillance for employees exposed to cotton dust. These records are useful to the employer, employee, physician and the Government in determining whether an employee's exposure to cotton dust has had an effect on his/her health.

• Occupational Safety and Health Administration
Assured equipment grounding conductor program records
OSHA–227
Nonrcurring; quarterly
Business or other institutions
Construction firms
SIC: Multiple
Small businesses or organizations
Consumer and occupational health and safety: 2,250,000 responses; 285,200 hours; $0 Federal cost; 1 form; $2,852,000 public cost; not applicable under 3504 (h)
Laverne V. Collins, 202–395–6880

These records are needed so that compliance with the other requirements of the assured grounding program can be checked. The records consist of a written description of the employer's program and records of all tests. Test records need not be written but may be in the form of color coding.

• Occupational Safety and Health Administration
Physician's Exam
OSHA–224
On occasion
Businesses or other institutions
25 heavy construction general contractors
SIC: 162
Small businesses or organizations
Consumer and occupational health and safety: 292 responses; 219 hours; $0 Federal cost; 1 form; $6,570 public cost; not applicable under 3504 (h)
Laverne V. Collins, 202–395–6880

The physicians' record is needed to ensure that an employees' physiological ability to function in a compressed air environment continues while assigned to such work.

• Employment Standards Administration
Medical Recordkeeping Requirement
ESA–CA–37
On occasion
Businesses or other institutions
Physicians and others providing medical treatment
SIC: 999
Small businesses or organizations
Income security: 795,000 responses; 26,500 hours; $0 Federal cost; 1 form; not applicable under 3504 (h)
Laverne V. Collins, 202–395–6880

Recordkeeping requirements for physicians treating and examining FECA claimants. Medical reports based on records are an important factor in the adjudication of the claims for benefits.

• Mine Safety and Health Administration
Escapeway and Escape Facilities
MSHA–225R
Weekly
Businesses or other institutions
Active underground coal mines in U.S.
SIC: 111 121
Small businesses or organizations
Consumer and occupational health and safety: 150,876 responses; 150,876 hours; $0 Federal cost; 1 form; not applicable under 3504 (h)
Laverne V. Collins, 202–395–6880

Requires examination of escapeway routes by a certified person. The information is used to ensure compliance with safety regulations. Authority established by Public Law 95–164.

• Mine Safety and Health Administration
Weekly Inspections of Fire Suppression Devices
MSHA–230R
Weekly
Businesses or other institutions
Nation's active coal mines
SIC: 111 121
Small businesses or organizations
Consumer and occupational health and safety: 2,320,800 responses; 232,080 hours; $0 Federal cost; 1 form; not applicable under 3504 (h)
Laverne V. Collins, 202–395–6880

The unhealthy mine environment requires frequent monitoring. The records indicate that emergency safety equipment has been inspected as required and reduces the possibility of equipment failure in an emergency. Authority established by Public Law 95–164.

• Mine Safety and Health Administration
Records of Fire Drills and Programs To Instruct and Train Miners in Location and Use of Fire-Fighting Equipment
MSHA–220R
Annually
Businesses or other institutions
Nation's active coal mines
SIC: 111 121
Small businesses or organizations
Consumer and occupational health and safety: 2,601 responses; 650 hours; $0 Federal cost; 1 form; not applicable under 3504 (h)
Laverne V. Collins, 202–395–6880

Requires operators to keep a record of fire drills and institute a program to train all miners in the use and location of fire-fighting equipment. Authority established by Public Law 95–164.

• Mine Safety and Health Administration
Mine Evacuation Drill Records
MSHA–423R
Semiannually
Businesses or other institutions
Underground metal/nonmetal mines
SIC: Multiple
Small businesses or organizations
Consumer and occupational health and safety: 900 responses; 75,000 hours; $0 Federal cost; 1 form; not applicable under 3504 (h)
Laverne V. Collins, 202–395–6880

Mine evacuation drills prepare the underground miner for immediate and appropriate response to an underground emergency. The semiannual drill requirement helps assure that new employees will receive the practice and all employees can be updated regarding evacuation plan changes.

• Mine Safety and Health Administration
Compressed Air Receivers and Pressure Vessels Inspection
MSHA–413R
Annually/biennially
Businesses or other institutions
Metal/nonmetal mining industry
SIC: Multiple
Small businesses or organizations
Consumer and occupational health and safety: 9,000 responses; 9,000 hours; $0 Federal cost; 1 form; not applicable under 3504 (h)
Laverne V. Collins, 202–395–6880

Standard recognizes the hazards of deteriorated pressure vessels and requires inspection by personnel with appropriate expertise. Records of these inspections are made by non-operator personnel and copies are maintained for MSHA check.

• Mine Safety and Health Administration
Instruction Records of Mine Emergency Training and Self-Rescuer Training
MSHA–406R
Annually
Businesses or other institutions
Underground metal/nonmetal mines
SIC: Multiple
Small businesses or organizations
Consumer and occupational health and safety: 900 responses; 56,250 hours; $0 Federal cost; 1 form; not applicable under 3504 (h)
Laverne V. Collins, 202–395–6880

Mine emergency training and self rescuer training is required for all underground personnel. The instructional material and instruction records must be retained for MSHA inspection to assure that all personnel involved will understand the appropriate emergency procedures, particularly self-protection afforded by the self rescuer during a fire.

• Mine Safety and Health Administration
Employee Instruction Record for Escape, Evacuation, Fire Alarm Signals, and Emergency Procedures (Underground)
MSHA–402R
Annually
Businesses or other institutions
Underground metal/nonmetal mines
SIC: multiple
Small businesses or organizations
Consumer and occupational health and safety: 900 responses; 37,500 hours; $0 Federal cost; 1 form; not applicable under 3504(h)
Laverne V. Collins, 202–395–6880

Escape and evacuation plans and procedures must be understood and quickly implemented by all underground employees. The instruction on a regular basis assures this understanding.

• Mine Safety and Health Administration
Work Site Examinations for Safety and Health Conditions
MSHA–407R
Other—see SF83
Businesses or other institutions
Metal/nonmetal mining industry
SIC: multiple
Small businesses or organizations
Consumer and occupational health and safety: 14,900 responses; 198,666 hours; $0 Federal cost; 1 form; not applicable under 3504(h)
Laverne V. Collins, 202–395–6880

Work-site examinations are required to be made by a competent person on each shift. Records must be retained for one year. Examinations which detect imminent danger situations must result in personnel removal from the area.

• Mine Safety and Health Administration
Impoundment or Refuse Pile Engineering Plans
MSHA–217 MSHA–216
Annually
Businesses or other institutions
Active coal mines
SIC: 111 121
Small businesses or organizations
Consumer and occupational health and safety: 90 responses; 78,150 hours; $5,385 Federal cost; 2 forms; not applicable under 3504(h)
Laverne V. Collins, 202–395–6880

Requires operators to submit reports concerning refuse piles construction prior to beginning any work. The information is used to monitor potential hazardous conditions. Authority established by Public Law 95–164.

• Mine Safety and Health Administration
Radon Daughter Sampling
MSHA–403R
Other—see SF83
Businesses or other institutions
Underground metal/nonmetal mines
SIC: multiple
Small businesses or organizations
Consumer and occupational health and safety: 300 responses; 27,000 hours; $0 Federal cost; 1 form; not applicable under 3504(h)
Laverne V. Collins, 202–395–6880

Requires that operator sampling be performed bi-weekly to determine radon daughter concentration where uranium is mined, quarterly where uranium is not mined, and that records be kept. Sampling is required to ensure that worker's are not exposed to concentrations of radon daughters in excess of permissible limits. The information is used to determine that the workers health is protected.

• Mine Safety and Health Administration
Instruction Records for Fire Alarm Signals and Procedures
MSHA–420R
Annually
Businesses or other institutions
All metal/nonmetal mine employees
SIC: multiple
Small businesses or organizations
Consumer and occupational health and safety: 14,900 responses; 306,600 hours; $0 Federal cost; 1 form; not applicable under 3504(h)
Laverne V. Collins, 202–395–6880

All mine employees must be familiar with fire alarm signals and fire procedures at their work site. This standard assures instruction and annual refresher instruction for all employees to assure their safety in the event of a fire or other similar emergency. Individual emergency duty of workers are also explained at this time. The inspector reviews records of the instruction during regular inspections.

• Mine Safety and Health Administration
Inspection Records of Pressure Vessel Gages, Devices, and Piping
MSHA–406R
Annually/biennially
Businesses or other institutions
Metal/nonmetal mining industry
SIC: multiple
Small businesses or organizations
Consumer and occupational health and safety: 9,000 responses; 9,000 hours; $0 Federal cost; 1 form; not applicable under 3504(h)
Laverne V. Collins, 202–395–6880

Standard recognizes the hazards of gages, valves, piping, and other safety devices fitted on pressure vessels and requires inspection of same by personnel with appropriate expertise. Inspections and records are made by non-operator personnel. Records are maintained for MSHA check.

• Mine Safety and Health Administration
Safety Defect Record of Self Propelled Equipment
MSHA–422R
Other—see SF83
Business or other institutions
Metal/nonmetal mining industry
SIC: multiple
Small businesses or organizations
Consumer and occupational health and safety: 14,900 responses; 2,731,696 hours; $0 Federal cost; 1 form; not applicable under 3540(h)
Laverne V. Collins, 202–395–6880

Required record keeping will assure that defects are known by the responsible supervisor who can schedule the repair. Record will assist operator in analysis of equipment defect history and provide this information for the inspectors perusal.

• Employment and Training Administration
Unemployment Insurance Quality Appraisal
Et No. 365
Annually
State or local governments
State employment security agencies
SIC: 944

Training and employment: 53 responses; 31,800 hours; $75,000 Federal cost; 28 forms; not applicable under 3504(h)
Laverne V. Collins, 202–395–6880

Annual Appraisal of State administration of unemployment insurance program. Results identify areas of deficiency which must then be addressed in Budget request for following fiscal year.

• Mine Safety and Health Administration
Petitions for Modification of Mandatory Safety Standards
MSHA–700
Other—see SF83
Businesses or other institutions

PACIFIC NORTHWEST ELECTRIC POWER AND CONSERVATION PLANNING COUNCIL

Receipt of Fish and Wildlife Program Recommendations

AGENCY: Pacific Northwest Electric Power and Conservation Planning Council.

ACTION: Notice.

The Pacific Northest Electric Power Planning and Conservation Act of 1980, Pub. L. 96–501, provided for the establishment of the Pacific Northwest Electric Power and Conservation Planning Council and directed the Council to develop and adopt a program to protect, mitigate, and enhance fish and wildlife, including related spawning grounds and habitat, on the Columbia River and its tributaries. Pursuant to Section 4 of the Act, the Council requested Federal and State fish and wildlife agencies, appropriate Indian tribes, water management agencies, regional electric power-producing agencies, Bonneville Power Administration customers, and members of the public to submit recomendations for such a program by November 15, 1981, The Council received more than 2,200 pages of recommendations and supporting documents in response to its request. Those recommendations are on file in the Council office at Suite 200, 700 S.W. Taylor Street, Portland, Oregon 97205. However, because of the volume of the recommendations and supporting documents, copies will not be available to the public before January 10, 1982. Forms for requesting copies are available at the Council office, at the address given above, or by telephoning Torian Donohoe, Associate Director of Public Involvement, at (503) 222–5161.

Further notice will be published in the **Federal Register** when copies of the recommendations and supporting documents are available for public distribution. The same notice will open a public comment period; establish a deadline for submitting written comemnts; specify dates, times and places for public hearings on the recommendations; and further describe Council procedures for development of a fish and wildlife program.

FOR FURTHER INFORMATION CONTACT:
Torian Donohoe, (503) 222–5161.

Edward Sheets,

Executive Director, Pacific Northwest Electric Power and Conservation Planning Council.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 22320; (70–6572)]

Columbia Gas System, Inc., et al.; Supplemental Notice Correcting Error in Return Date

December 15, 1981.

In the matter of the Columbia Gas System, Inc., et al., 20 Montchanin Road, Wilmington, Delaware 19807.

On December 2, 1981, this Commission issued a notice of the filing of the application-declaration in this proceeding and described the proposed transactions, which involve intrasystem financing and the issuance and sale of commercial paper and/or notes to banks by the holding company. The notice incorrectly gave a return date of December 31, 1981, by which comments or requests for a hearing should be filed. Such date should have been December 28, 1981.

The application-declaration and any amendments thereto are available for public inspection through the Commission's Office of Public Reference. Interested persons wishing to comment or request a hearing should submit their views in writing by December 28, 1981, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549, and serve a copy on the applicants-declarants. Proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. Any request for a hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in this matter. After said date, the application-declaration, as amended or as it may be further amended, may be granted and permitted to become effective.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010–01–M

[Release No. 22318; (70–6596)]

Consolidated Natural Gas Co., et al.; Proposal To Make Revolving Credit Advances by Parent to Subsidiaries

December 15, 1981.

In the matter of Consolidated Natural Gas Company, 100 Broadway, New York, New York 10005; CNG Coal Company, CNG Producing Company, CNG Research Company, Consolidated Gas Supply Corporation, Consolidated Natural Gas Service Company, Inc., Consolidated System LNG Company, The East Ohio Gas Company, The Peoples Natural Gas Company, The River Gas Company, and West Ohio Gas Company.

Consolidated Natural Gas Company ("Consolidated"), a registered holding company and its subsidiaries named above, have filed a post-effective amendment to the application-declaration in this proceeding pursuant to sections 12(b) and 12(f) of the Public Utility Holding Company Act of 1935 ("Act") and Rule 45 thereunder.

On June 15, 1981, the Commission issued an order (HCAR No. 22087) authorizing among other things, the issuance and sale to Consolidated of an aggregate of $113,000,000 of nonnegotiable, long-term notes, $83,000,000 by Consolidated Gas Supply Corporation ("Supply Corporation"), $27,000,000 by CNG Producing Company ("Producing Company"), $1,500,000 by West Ohio Gas Company ("West Ohio"), $1,000,000 by The River Gas Company ("River"), and $500,000 by Consolidated Natural Gas Service Company, Inc. ("Service Company"). Such notes were to bear interest at a rate predicated on and substantially equal to the effective cost of money to Consolidated through the sale of debentures in 1981. In the event Consolidated did not sell debentures in 1981, the notes were to bear interest at 13%, a rate predicated on and substantially equal to the effective cost of money to Consolidated through the sale, in October 1980, of its 12¼% Debentures Due October 1, 2000. That Commission order also authorized Consolidated to make, from time to time

up to May 31, 1982, open account advances for gas inventory financing and working capital. Such advances would be repaid within a year of the first advance to a subsidiary company. Principal amounts authorized were $50,000,000 for Producing Company and $100,000,000 for Supply Corporation. Due to capital market conditions, it now appears Consolidated will not sell debentures in 1981.

Therefore, Consolidated now proposes to make, from time to time up to May 31, 1982, revolving credit advances, which are the subject of the proceeding in File 70-6674, to provide financing to Supply Corporation and Producing Company for capital budget expenditures related to plant construction and for general corporate purposes. Such advances will be made up to $55,000,000 for Producing Company and $45,000,000 for Supply Corporation.

Consolidated also seeks authorization for open account advances for gas inventory financing, temporary financing of construction and working capital requirements. These advances will not exceed $1,000,000 for Service Company, $138,000,000 for Supply Corporation and $77,000,000 for Producing Company.

Total current subsidiary open account advances authorization will consequently increase from $279,500,000 to $345,500,000. However, advances will continue not to exceed the current authorized amount of $225,000,000 at any one time. Such advances may be made, repaid and remade as requested by the treasurer of such subsidiary company, upon letter agreement by each subsidiary company. Such open account advances will be repaid on or before the date not more than one year from the date of the first advance to such subsidiary company with interest at substantially the same effective rate of interest as the related gas inventory bank loan and sale of commercial paper or backup bank borrowings for commercial paper by Consolidated. If there is not outstanding short-term debt, the interest rate would be the prime commercial rate of interest in effect from time to time at The Chase Manhattan Bank, N.A.

The application-declaration and any amendments thereto are available for public inspection through the Commission's Office of Public Reference. Interested persons wishing to comment or request a hearing should submit their views in writing by January 7, 1982, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549, and serve a copy on the applicants-declarants at the addresses specified above. Proof of service (by affidavit or, in the case of an attorney at law, by certificate) should be filed with the request. Any request for a hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in this matter. After said date, the application-declaration, as filed or as it may be amended, may be permitted to become effective.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 22319 (70-6674)]

Consolidated Natural Gas Co.; Proposed Long-Term Bank Financing by Holding Company; Intrasystem Financing

December 15, 1981.

Consolidated Natural Gas Company ("Consolidated"), 100 Broadway, New York, New York 10005, a registered holding company, has filed an application-declaration pursuant to sections 6(a) and 7 of the Public Utility Holding Company Act of 1935 ("Act").

By supplemental order dated August 23, 1979 (HCAR No. 21198), the Commission authorized Consolidated to borrow up to $75,000,000 pursuant to a Credit Agreement with The Chase Manhattan Bank, N.A. ("Chase"), acting for itself and as agent for various other banks. Consolidated now proposes to terminate the aforementioned Credit Agreement and in lieu thereof to enter into a similar new Credit Agreement with Chase acting for itself and as agent for various other banks for a maximum of $100,000,000.

Under the terms of the new Credit Agreement, the bank loans will be in the form of revolving credits, commencing on December 15, 1981, or as soon thereafter as Commission approval is received, and may be converted to three-year loans on December 31, 1986. During the revolving credit period, each bank will make loans to Consolidated from time to time to and including December 30, 1986, up to the maximum of such bank's commitment under the Credit Agreement. During such period, Consolidated may borrow, pay or prepay and reborrow up to each bank's commitment. In accord with the terms of the Credit Agreement, Consolidated will have the right at any time, upon notice to Chase, as Agent, to terminate entirely or reduce the aggregate commitment of the banks.

Each loan during the revolving credit period will be evidenced by a Revolving Credit note. At the option of Consolidated, the interest rate will be (1) the prime commercial rate of interest in effect from time to time at Chase, at its principal office in New York City, (2) the London Interbank Offered Rate ("LIBOR") as quoted by the London Office of Chase plus an increment of three-eights of one percent (0.375%) or, (3) the average of the bid rates quoted in the secondary market for Certificates of Deposit of Chase as quoted from time to time by two recognized dealers ("CD Rate") plus an increment of one-half of one percent (0.500%) or, (4) at a Composite Rate determined by negotiations between the individual participating banks and Consolidated. (While each bank is bound by its individual rate as accepted by Consolidated, Consolidated will compute the weighted average of the accepted rates and refer to this computed rate as the Composite Rate.)

The LIBOR and CD Rate will be adjusted, if applicable, by dividing the rate then effective by such factor as will satisfy reserve requirements of Chase and the banks as set forth by regulation of the Board of Governors of the Federal Reserve System or other costs stipulated by the Board of Governors. Additionally, the CD Rate will be adjusted to reflect the cost of required deposit insurance.

Except for the Composite Rate, the rate of interest as quoted by Chase will include all costs and the above-mentioned increments. Interest will be payable quarterly in arrears on March 31, June 30, September 30 and December 31 or as specified or at prepayment date, as the case may be. A commitment fee of ⅛ of 1% per annum will be charged on the unused portion of the revolving credit commitment commencing on the effective date of the Credit Agreement.

Each bank would agree to make a three-year loan to Consolidated on December 31, 1986 ("Conversion Date"), in an amount not exceeding such bank's commitment on the date of such loan. Each term loan would be evidenced by Consolidated's Term Note, which would mature as to principal in six equal semi-annual installments, commencing June 30, 1987. In no event will the final maturity be later than December 31, 1989. Interest on each Term Note will be computed, at the option of Consolidated, as follows: (1) Prime commercial lending rate in effect from time to time at Chase at its principal office in New York City plus an additional one-eighth of one percent (0.125%), (2) LIBOR adjusted

rate as quoted by the London Office of Chase plus one-half of one percent (0.500%), (3) the average of the bid rates quoted in the secondary market for Certificates of Deposit of Chase as quoted from time to time by two recognized dealers (CD Rate) plus six-tenths of one percent (0.600%), or (4) at a Composite Rate hereinabove described in connection with the Revolving Credit.

During the revolving credit period under Consolidated's Credit Agreement with the banks, Consolidated will make loans to subsidiary companies for general corporate purposes. These will be in the form of revolving credit advances, upon letter agreement or note, payable to Consolidated on or before December 30, 1986. Following the conversion by Consolidated of its revolving credit into term loans under the Credit Agreement, such revolving credit advances to subsidiary companies shall be converted into Term Notes of such subsidiary companies with maturities substantially the same as Consolidated's related term loans under the Credit Agreement. Said revolving credit advances and Term Notes will bear interest at a rate predicated on and substantially equal to the effective cost of money to Consolidated under the Credit Agreement.

The application-declaration and any amendments thereto are available for public inspection through the Commission's Office of Public Reference. Interested persons wishing to comment on or request a hearing should submit their views in writing by January 7, 1982, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549, and serve a copy on the applicant-declarant at the address specified above. Proof of service (by affidavit or, in the case of an attorney at law, by certificate) should be filed with the request. Any request for a hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in this matter. After said date, the application-declaration, as filed or as it may be amended, may be granted and permitted to become effective.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[File No. 1-5865]

Gerber Scientific, Inc., Common Stock, $1 Par Value; Application To Withdraw From Listing and Registration

December 17, 1981.

The above named issuer has filed an application with the Securities and Exchange Commission pursuant to section 12(d) of the Securities Exchange Act of 1934 ("Act") and Rule 12d2-2(d) promulgated thereunder, to withdraw the specified security from listing and registration on the American Stock Exchange, Inc. ("Amex").

The reasons alleged in the application for withdrawing this security from listing and registration include the following:

1. The common stock of Gerber Scientific, Inc. ("Company") is listed and registered on the Amex. Pursuant to a Registration Statement on Form 8-A which became effective on September 30, 1980, the Company is also listed and registered on the New York Stock Exchange ("NYSE"). The Company has determined that the direct and indirect costs and expenses do not justify maintaining the dual listing of the common stock on the Amex and the NYSE.

2. This application relates solely to withdrawal of the common stock from listing and registration on the Amex and shall have no effect upon the continued listing of such stock on the NYSE. The Amex has posed no objection to this matter.

Any interested person may, on or before January 11, 1982, submit by letter to the Secretary of the Securities and Exchange Commission, Washington, D.C. 20549, facts bearing upon whether the application has been made in accordance with the rules of the Exchange and what terms, if any, should be imposed by the Commission for the protection of investors. The Commission, based on the information submitted to it, will issue an order granting the application after the date mentioned above, unless the Commission determines to order a hearing on the matter.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 22323; (70-6198)]

Kentucky Power Co. and Indiana and Michigan Electric Co.; Proposed Acquisition of Share of Power Plant by Affiliate and Financing for Acquisition

December 17, 1981.

Kentucky Power Company ("KPCo"), 1701 Central Avenue, P.O. Box 1428, Ashland, Kentucky 41101, and Indiana & Michigan Electric Company ("I&M"), One Summit Square, P.O. Box 60, Fort Wayne, Indiana 46801, electric utility subsidiaries of American Electric Power Company ("AEP"), a registered holding company, have filed an application-declaration and amendments thereto with this Commission pursuant to sections 6(a), 7, 9(a)(1), 10 and 12 of the Public Utility Holding Company Act of 1935 ("Act") and Rules 43, 45 and 50(a)(2) thereunder.

KPCo proposes to acquire a 15% undivided interest in the Rockport Plant currently under construction by I&M. KPCo also proposes to borrow up to $150,000,000 under a Revolving Credit Agreement for the purpose, among other things, of financing in part 15% of the construction costs of the Rockport Plant.

KPCo now owns and operates one generating station, the Big Sandy Plant located at Louisa, Kentucky, which consists of two coal-fired steam electric generating units with a net dependable capability of 1,060,000 kilowatts. KPCo serves approximately 140,000 retail customers in a 5,700 square-mile area in the eastern section of Kentucky with an estimated population of 357,000.

The Rockport Plant, located along the Ohio River in Spencer County near the Town of Rockport, Indiana, is currently under construction by I&M and will consist of two coal-fired generating units, each of 1,300,000 kilowatt capacity. The completed cost of the Rockport Plant is now estimated to be approximately $2,080,000,000, based upon projected commercial operation of Unit No. 1 in late 1984 and Unit No. 2 in late 1986.

KPCo estimates the peak demand in the winter of 1984-1985 would exceed its generating capacity by 200,000 kilowatts. I&M needs a substantial portion of the Rockport Plant to satisfy its projected load requirements. However, the proposed 15% participation by KPCo would be acceptable to I&M and would help to reduce the amount of additional capital which I&M would need to raise during the construction period.

It is anticipated that, prior to the commencement of commercial operation of Unit No. 1, KPCo and I&M will enter into an operating agreement pursuant to

which I&M will operate the Rockport Plant. Accordingly, KPCo proposes to enter into a Joint Ownership Agreement with I&M pursuant to which KPCo will acquire from I&M, and I&M will transfer to KPCo, a 15% undivided interest as tenant in common in the two Rockport Plant generating units (exclusive of related transmission facilities which will be owned by I&M). I&M will be obligated to convey such undivided interest to KPCo by Warranty Deed. KPCo's 15% undivided interest in the Rockport Plant would entitle KPCo to 15% of its generating capacity, or 390,000 kilowatts. Under the Joint Ownership Agreement, KPCo's acquisition of an undivided interest in Rockport Plant would be structured as a "buy-in"; that is, KPCo would be obligated to pay, commencing on the date of closing, all unpaid invoices from suppliers of materials, equipment and labor for construction of the Rockport Plant, and would continue to pay all such costs and expenses until such time as KPCo's investment in the Rockport Plant is equivalent to 15% of the total investment by KPCo and I&M. Thereafter, both KPCo and I&M will furnish funds for the completion of the Rockport Plant in proportion to their respective undivided interests. It is estimated that, at December 31, 1981, I&M's investment in the Rockport Plant will be approximately $770,000,000. KPCo's cost for a 15% undivided interest, assuming a purchase as of that date, would be approximately $115,000,000. KPCo's total cost for a 15% undivided interest in the completed Rockport Plant is estimated at $311,625,000.

KPCo expects to finance its proposed acquisition of a 15% interest in the Rockport Plant partially through cash available in its treasury and generated through internal sources, partially through common equity investments in it by AEP, and partially through bank borrowings made under a Revolving Credit Agreement. Under the Revolving Credit Agreement, KPCo proposes to borrow up to $150,000,000 from time to time through December 31, 1987, from a group of six banks ("Banks").

Borrowings made by KPCo under the Revolving Credit Agreement shall be evidenced by the promissory notes ("Notes") of KPCo, each of which shall be dated as of the date of borrowing and payable not less than 90 days from the date of borrowing nor later than December 31, 1987. Each borrowing evidenced by KPCo's Notes shall be made ratably from the Banks in proportion to their respective commitments. Each Note shall bear interest on the unpaid principal amount thereof, payable quarterly on the last day of each March, June, September and December, at the maturity thereof, and after maturity on demand. Interest prior to maturity shall be payable at a fluctuating rate per annum equal at all times to the prime commercial lending rate of Manufacturers Hanover Trust Company from time to time; and from maturity at a fluctuating rate per annum equal at all times to the sum of (i) 1% plus (ii) the announced prime commercial lending rate of Manufacturers Hanover Trust then in effect for 90-day unsecured domestic loans. KPCo may prepay any Notes, in whole or in part from time to time, without premium or penalty, and may terminate in whole or reduce in part the unused commitments of the Banks. Any prepayment or reduction in commitments shall be made ratably among the Banks.

KPCo will pay to each of the Banks a quarterly commitment fee computed at the rate of ⅜ of 1% per annum on the daily average unused amount of the commitment of each Bank, if any, from the date of the Revolving Credit Agreement to the date of expiration or termination of each commitment. KPCo will not be required to pay any other fees or charges to the Banks, or to maintain compensating balances, in connection with the borrowings under the Revolving Credit Agreement.

The proceeds from the Notes proposed to be issued by KPCo, together with other funds which may become available to KPCo, are proposed to be used to acquire the 15% interest in the Rockport Plant, in connection with KPCo's construction program, for working capital and other corporate purposes and to reimburse its treasury for money expended for such purposes.

The application-declaration and any amendments thereto are available for public inspection through the Commission's Office of Public Reference. Interested persons wishing to comment or request a hearing should submit their views in writing by January 11, 1982, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549, and serve a copy on the applicants-declarants at the addresses specified above. Proof of service (by affidavit or, in the case of an attorney at law, by certificate) should be filed with the request. Any request for a hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in this matter. After said date, the application-declaration, as filed or as it may be amended, may be granted and permitted to become effective.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 18343; (SR-MCC-81-9)]

Midwest Clearing Corp. ("MCC"); Order Approving Proposed Rule Change

December 17, 1981.

On October 14, 1981, MCC filed with the Commission pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), (the "Act") and Rule 19b-4 thereunder, a proposed rule change authorizing MCC to (i) modify the amounts of cash and securities which participants must contribute to MCC's participants' fund and (ii) modify the manner in which interest earned on the participants' fund is allocated among the participants and MCC.

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by publication of a Commission Release (Securities Exchange Act Release No. 18185 October 19, 1981) and by publication in the **Federal Register** (46 FR 56096, November 13, 1981). No letters of comment were received.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to registered clearing agencies, and in particular, the requirements of section 17A of the Act.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the proposed rule change referenced be, and it hereby is, approved.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[FR Doc. 81-36603 Filed 12-23-81; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 18344; (SR-MSE-81-10)]

Midwest Stock Exchange, Inc.; Order Approving Proposed Rule Change

December 17, 1981.

On October 28, 1981, the Midwest Stock Exchange, Inc. ("MSE"), 120 South LaSalle Street, Chicago, Illinois 60603, filed with the Commission, pursuant to

section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78(s)(b)(1) of the ("Act") and Rule 19b–4 thereunder, copies of a proposed rule change which permits any dispute with respect to transactions effected on the MSE trading floor between members or their nominees, which is not otherwise required to be brought before the MSE's Committee on Floor Procedure, to be settled by the MSE's Committee on Floor Procedure if both parties to such dispute agree to be bound by the decision of that Committee. If the parties to the dispute decline to accept this procedure, resolution would be by the existing arbitration procedures.

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by publication of a Commission Release (Securities Exchange Act Release No. 34–18247, November 6, 1981) and by publication in the **Federal Register** (46 FR 56097, November 13, 1981). No comments were received with respect to the proposed rule filing.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to national securities exchanges and in particular, the requirements of Section 6 and the rules and regulations thereunder.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the above-mentioned proposed rule change be, and it hereby is, approved.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[Release No. 18345; (SR–NYSE–81–24)]

New York Stock Exchange, Inc.; Order Approving Proposed Rule Change

December 17, 1981.

The New York Stock Exchange, Inc., 11 Wall Street, New York, New York 10005, submitted on November 3, 1981, copies of a proposed rule change pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act") and Rule 19b–4 thereunder, to increase, effective January 1, 1982, its equity listing fees.

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by the issuance of a Commission Release (Securities Exchange Act Release No. 18243, November 5, 1981) and by publication in the **Federal Register** (46 FR 56097, November 13, 1981). No comments were received with respect to the proposed rule filing.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange and, in particular, the requirements of section 6 of the Act, and the rules and regulations thereunder.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the above-mentioned proposed rule change be, and hereby is, approved.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

BILLING CODE [illegible]

[Release No. 12109; (812–4848)]

Northwestern Mutual Life Insurance Co., et al.; Order Granting Exemptions

December 15, 1981.

The Northwestern Mutual Life Insurance Company ("NML"), NML Equity Services, Inc. ("Equity"), and NML Variable Annuity Account I ("Account I"), 720 East Wisconsin Avenue, Milwaukee, Wisconsin 53202, filed an application on March 18, 1981, and an amendment thereto on October 9, 1981, for an order of the Commission pursuant to section 6(c) of the Investment Company Act of 1940 ("Act") for exemptions from sections 2(a)(32), 2(a)(35), 22(c), 26(a), 26(a)(2), 27(c)(1), 27(c)(2), and 27(d) of the Act and Rule 22c–1 thereunder to the extent necessary to permit the offering of variable annuity contracts providing for contingent deferred sales charges and other charges and to permit NML to perform custodian functions with respect to Account I. Account I is a unit investment trust registered under the Act. NML and Equity are the co-depositors of Account I, and Equity will serve as the underwriter of the variable annuity contracts issued in connection with Account I.

On November 10, 1981, a notice was issued (Investment Company Act Release No. 12032) of the filing of the application and the amendment thereto. The notice gave interested persons an opportunity to request a hearing and stated that an order disposing of the application would be issued as of course unless a hearing should be ordered. No request for a hearing has been filed, and the Commission has not ordered a hearing.

The matter has been considered and it is found that the granting of the application is appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act. Accordingly,

It is ordered, pursuant to section 6(c) of the Act, that the requested exemptions from sections 2(a)(32), 2(a)(35), 22(c), 26(a), 26(a)(2), 27(c)(1), 27(c)(2), and 27(d) of the Act and Rule 22c–1 thereunder be, and hereby are, granted effective forthwith.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE [illegible]

[Release No. 34–18341; File No. SR–BSECC–81–5]

Self-Regulatory Organizations; Proposed Change By Boston Stock Exchange Clearing Corp.

In the matter of an extension of the temporary 15% increase in Boston Stock Exchange Clearing Corporation billings to members. Comments requested on or before January 14, 1982.

Pursuant to Section 19(b) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on December 10, 1981, the Boston Stock Exchange Clearing Corporation filed with the Securities and Exchange Commission the proposed change as described in Item I, II, and III below, which items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

On May 5, 1981, approval was granted by the Securities and Exchange Commission to allow the Boston Stock Exchange Clearing Corporation to impose a temporary 15% increase on all Clearing Corporation billings to members effective for the period May 1, 1981 through September 30, 1981. Approval was subsequently granted to extend the increase through December 31, 1981. It is not proposed to continue the temporary 15% increase through March 31, 1982.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places set forth in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B) and (C) below, of the most significant aspects of such statements.

(A) Self-Regulatory Organization's Statement of the Purpose of, and Basis for, the Proposed Rule Change.

(a) The 15% increase on all Clearing Corporation billings to members was previously approved for the period May 1 through September 30, 1981 and subsequently extended through December 31, 1981. This increase was necessitated by increased costs in communications, data processing, leasehold and personnel expenses. The Committee appointed to complete a detailed study of all income and expenses of the Exchange has not completed its recommendations. The Board of Directors voted to extend the 15% increase through March 31, 1982.

(b) The proposed rule change is consistent with the requirements of the Securities Exchange Act of 1934 and the rules and regulations thereunder applying to the Boston Stock Exchange Clearing Corporation because it continues the equitable allocation of fees charged to all participants. The proposed rule change will be implemented consistently with the safeguarding of securities and funds in its custody or control or for which it is responsible because it would insure an efficient system for the settlement of trades and the safekeeping of assets.

(B) Self-Regulatory Organization's Statement on Burden on Competition.

No burden on competition is perceived by adoption of the proposed rule change.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others.

Comments have neither been solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Securities Exchange Act of 1934. At any time within 60 days of the filing of such rule change the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors or otherwise in furtherance of the purposes of the Securities Exchange Act of 1934.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 500 North Capitol Street, Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed change that are filed with the Commission, and all written communications relating to the proposed change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted on or before January 14, 1982.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Dated: December 16, 1981.

George A. Fitzsimmons,

Secretary.

[FR Doc. 81-36682 Filed 12-23-81; 8:45 am]
BILLING CODE 8010-01-M

[Release No. 34-18340; File No. SR-MSTC-81-6]

Self-Regulatory Organizations; Proposed Rule Change by Midwest Securities Trust Co.

In the matter of contributions of Participants to Participants Fund. Comments requested on or before January 14, 1982.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on December 4, 1981, the Midwest Securities Trust Company filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Sections 6 and 7 of Rule 8 of the Midwest Securities Trust Company Rules are hereby amended as follows:

Additions Italicized—[Deletions Bracketed]

Contributions of Participants to Participants Fund

Sec. 6. Each Depository Participant shall be required to contribute to the Participants Fund. The contribution of each Depository Participant shall be fixed by the Corporation, *in accordance with a formula, based upon the Participant's usage of the Corporation's facilities*, at the time such Participant's application for membership is approved. [and] *The contribution of a Participant to the Participants Fund* may thereafter from time to time be increased or reduced by the Corporation. The minimum *cash* contribution shall be [four] *five* thousand dollars. Contributions to the Participants Fund *in excess of the minimum cash contribution* may be either in cash or in unmatured negotiable debt securities which are direct obligations of, or obligations guaranteed as to principal and interest, by the United States government, and which mature one year or less from the date of issue. [; provided, however, that not less than 10% of each Participant's contribution shall be made in cash.] Securities contributed to the Participants Fund shall be valued at the lesser of the par value thereof or 100% of the current market value thereof. Cash contributions to the Participants Fund shall be paid to the Corporation. Contributions in the form of securities shall be made by depositing the securities with a bank or trust company approved by the Corporation, and delivering to the Corporation a depository receipt therefor, in such form as the Corporation shall prescribe. Any interest or gain on securities deposited by a Participant with an approved bank or trust company pursuant to this Section shall accrue to the Participant.

Investing of Participants Fund

Sec. 7. Cash contained in the Participants Fund may from time to time be partially or wholly invested by the Corporation for its account in securities

issued or guaranteed by the United States, certificates of deposit and commercial paper in the first, second or third ratings of any nationally known statistical service, and to the extent not so invested shall be deposited by the Corporation in its name in a special bank account or accounts in such depository or depositories as may be selected by the Corporation. Any interest received from such investments or deposits *of the required minimum cash contribution* shall accrue to the Corporation. *Interest received from investments or deposits of cash contributions which are in excess of the minimum cash contribution shall accrue to the Participant.* Securities in which the Participants Fund is invested may be deposited by the Corporation with regulatory authorities to the extent that such deposits may be required by law.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

(A) *Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change.*

The proposed changes in the Depository Participants Fund rules are necessary to establish a more equitable allocation of Depository Corporation liability among the Participants. The minimum contribution must now be made entirely in cash and is required of all Participants. In section 7 of Rule 8 the benefit of investment of the excess of the minimum cash contribution will now accrue to the Participant rather than to the Corporation. This will offset the increased cost to the Participant of having to deposit a larger minimum contribution in cash. The increase in the amount of the minimum cash contribution from $4,000 to $5,000 is necessitated because of greater potential exposure to the Trust Company due to increased activity.

The proposed rule change is consistent with section 17A of the Exchange Act in that it provides for increased safeguarding of securities and funds necessary to the protection of investors and provides for the equitable allocation of charges among participants.

(B) *Self-Regulatory Organization's Statement on Burden on Competition.*

The Midwest Securities Trust Company does not believe that any burdens will be placed on competition as a result of the proposed rule change.

(C) *Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others.*

Comments have neither been solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to section 19(b)(3) of the Securities Exchange Act of 1934 and subparagraph (e) of Securities Exchange Act Rule 19b–4. At any time within 60 days of the date of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Securities Exchange Act of 1934.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 500 North Capitol Street NW., Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 1100 L Street NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted on or before January 14, 1982.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Dated: December 16, 1981.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010–01–M

[Release No. 34–18342; File No. SR–NESDTC–81–5]

Self-Regulatory Organizations; Proposed Change by New England Securities Depository Trust Co.

In the matter of an extension of the 15% increase in New England Securities Depository Trust Company billings to participants. Comments requested on or before January 14, 1982.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on December 10, 1981, the New England Securities Depository Trust Company filed with the Securities and Exchange Commission the proposed change as described in Items, I, II and III below, which items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

On May 5, 1981, approval was granted by the Securities and Exchange Commission to allow the New England Securities Depository Trust Company to impose a temporary 15% increase on all Depository billings to participants effective for the period May 1, 1981 through September 30, 1981. Approval was subsequently granted to extend the increase through December 31, 1981. It is now proposed to continue the temporary 15% increase through March 31, 1982.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places set forth in Item IV below. The self-regulatory organization has prepared summaries, set forth in Sections (A), (B) and (C) below, of the most significant aspects of such statements.

(A) *Self-Regulatory Organization's Statement of the Purpose of, and Basis for, the Proposed Rule Change.*

(a) The 15% increase on all Depository billings to participants was previously approved for the period May 1 through September 30, 1981 and subsequently extended through December 31, 1981. This increase was necessitated by increased costs in communications, data processing, leasehold and personnel expenses. The Committee appointed to complete a detailed study of all income and expenses of the Exchange has not completed its recommendations. The Board of Directors voted to extend the 15% increase through March 31, 1982.

(b) The proposed rule change is consistent with the requirements of the Securities Exchange Act of 1934 and the rules and regulations thereunder applying to the New England Securities Depository Trust Company because it represents an equitable allocation of reasonable fees and other charges among its participants. It would also insure prompt and accurate clearance and settlement of security transactions and fosters cooperation and coordination among others engaged in the clearance and settlement of security transactions by making the Depository more competitive.

(b) *Self-Regulatory Organization's Statement on Burden on Competition.* No burden on competition is perceived by adoption of the proposed rule change.

(C) *Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others.*

Comments have neither been solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to section 19(b)(3)(A) of the Securities Exchange Act of 1934. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors or otherwise in furtherance of the purposes of the Securities Exchange Act of 1934.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 500 North Capitol Street, Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed change that are filed with the Commission, and all written communications relating to the proposed change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted on or before January 14, 1982.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Dated: December 10, 1981.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

Request for Public Comments; Certain Steel Rod Treating Apparatus

The United States International Trade Commission (the Commission) has found a violation of section 337 of the Tariff Act of 1930 in the importation into, or the sale in, the United States of steel rod treating apparatus, and components thereof, which were found to infringe U.S. Letters Patent No. 3,390,871, thereby causing substantial injury to an efficiently and economically operated domestic industry. The Commission issued an order excluding the articles in question produced by the respondents from importation into the United States.

Under section 337(g), the President may disapprove the determination of the Commission for policy reasons within sixty days of the date following receipt of the determination and record. Disapproval by the President would cause the determination and order of the Commission to be without force or effect. The President also may approve the determination expressly, making it final on the date the Commission receives notice, or he may take no action, allowing the order to become final following the sixty day period provided for review.

Interested parties are invited to submit comments concerning foreign or domestic policy issues which should be considered by the President in making his decision regarding the case. Parties submitting comments regarding domestic policy issues should refer to the portion of the Commission record in which information or comment concerning that issue was presented. If no presentation of the domestic policy issue being raised was made to the Commission, the interested party should include justification for having failed to make such a presentation. The Trade Representative will be reluctant to review comments concerning domestic policy issues not included in the Commission's proceeding, absent adequate justification for the failure of the interested party to present the issue before the Commission. Because foreign policy issues are considered only during the Presidential review, interested parties need not refer to the Commission record to submit comments based upon foreign policy.

Comments submitted should not be longer than 15 double spaced, letter sized pages, including attachments. The original and 19 copies of the submission should be delivered no later than close of business Friday, January 8, 1982, to the Secretary, Trade Policy Staff Committee, 600 17th St., N.W., Washington, D.C. 20506. Copies of comments received will be made available to other interested parties and additional comments will be accepted through the close of business, Friday, January 15, 1982. For further information, call Alice Zalik 295-3432.

Frederick L. Montgomery,

Chairman, Trade Policy Staff Committee.

BILLING CODE 3195-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Indemnification of Contractors who Participate in the Federal Aviation Administration's Computer Replacement Program

On December 7, 1981, the Secretary of Transportation authorized the Federal Aviation Administration to include in forthcoming Air Traffic Computer Replacement contracts a clause under which the United States will indemnify or "hold harmless" contractors and subcontractors for losses arising out of "the use, operation, malfunction, or failure of any hardware or software" provided under such contracts. The authority for this action is derived from Pub. L. 85-804 and Executive Order 10789, as amended. Such indemnities will extent only to losses which exceed $500,000,000 per accident or occurrence, and only for the amount or amounts by which such recoveries exceed $500,000,000. The determination of the

Secretary of Transportation is, in part, set forth below:

"The Federal Aviation Administrator has requested authority to include a provision in the Federal Aviation Administration's (FAA) En Route Air Traffic Computer Replacement contracts which would indemnify, or "hold harmless", contractors who furnish hardware or software for losses in excess of $500 million per single occurrence. My authority to provide such extraordinary relief is found in Public Law 85–804 which is implemented by Executive Order 10789 as amended.

"Under FAA's En Route Traffic Computer Replacement Program, equipment will be developed to update the present air traffic system. This operational system will be the primary tool used by the air traffic controller to perform a widespread and continuous safety function. This system will have automated control decisional functional capability so that in response to projected increasing congestion in the national airspace system, the potential for human error will be minimized or eliminated. The hardware and software developed for the program will be quite sophisticated, inasmuch as it will possess a fail safe capability, including self-test and evaluation capabilities. The replacement system will be capable of operating 24 hours a day and will possess technical characteristics, including reliability characteristics, which far exceed the technical requirements for hardware and software utilized in most commercial applications of computers. Statistically, there is a low probability of malfunction to the system; however, this cannot be reduced to zero. In the event that a malfunction leads to an accident, the potential claimants would be quite numerous, and the severity of potential damage could be catastrophic. While the risk of a catastrophic accident may be remote, if it occurs, it could be far in excess of the insurance coverage that reliably and reasonably could be obtained by manufactures in the marketplace for the life of the system.

"Under Public Law 85–804, authority, if in my judgment the national defense will be facilitated by the program, I am authorized to permit the FAA to provide for indemnification by the United States for claims or losses arising out of or resulting from risks that the contract defines as 'usually hazardous or nuclear in nature.' In addition to authorizing such indemnification, I am also authorized to permit indemnification for claims or losses arising out of or resulting from risks that subcontracts (or any tier) define as unusually hazardous or nuclear in nature. The use of an indemnification provision under Public Law 85–804, and the Executive Order, is an extraordinary contractual action and requires that in approving the use of indemnification and circumstances of its use, I take into account the availability, cost and terms of private insurance, self-insurance, other proof of financial responsibility and workmen's compensation insurance.

"I find it will facilitate the national defense if I exercise my authority under Public Law 85–805 and Executive Order 10789 to permit the Federal Aviation Administration to provide for the indemnification for contractors and subcontractors (of any tier) participating in the FAA En Route Air Traffic Control Computer Program under the following terms and conditions:

1. That each contract which provides for indemnification of a contractor shall be under the terms and conditions specified in Exhibit A.

2. That each subcontract (of any tier) may include the indemnification provision in Exhibit A upon the consent of the contracting officer. The procedures set forth in Exhibit B shall be accomplished before the contracting officer consents to the inclusion of the indemnification provision in Exhibit A in a subcontract.

3. That each contract containing the indemnification provision in Exhibit A require the contractor or subcontractor (of any tier) to maintain financial protection in the amount of at least $500 million per single occurrence for a malfunction of the software or hardware provided for under the contract. This financial protection may be obtained through a private insurance or through a self-insurance program."

Exhibits A and B will be made available to interested parties upon request. The risks for which indemnification is authorized are set forth in a standard form approved clause as follows:

For the purpose of this clause and to meet the requirement of Public Law 85–804 and Executive Over 10789, as amended, the risks for which indemnification is granted and provided herein are the risks, occurrence or series of incidents or occurences, causing personal injury or death, or loss of or damage to property, or loss of use of property, arising out of or resulting from the use, operation, malfunction, or failure of any hardware or software provided under this contract to the Government for its use in the FAA En Route Air Traffic Control Replacement System; *provided that*, payment shall be made under this clause only if total damage recoveries against the contractor arising out of the risks indemnified exceed $500,000,000 per accident or occurrence, and only for the amount or amounts by which such recoveries exceed $500,000,000.

As required by law, notice of this action has been provided to the Chairman, Committee on the Armed Services, United States Senate; and to the Chairman, Committee on the Armed Services, House of Representatives.

Dated: December 16, 1981.

J. E. Murdock III,

Chief Counsel.

BILLING CODE 4910–13–M

Radio Technical Commission for Aeronautics (RTCA), Executive Committee; Meeting

Pursuant to section 10(a(2) of the Federal Advisory Committee Act (Pub. L. 92–463; 5 U.S.C. App. I) notice is hereby given of a meeting of the RTCA Executive Committee to be held on January 22, 1982 in RTCA Conference Room 267, 1717 H Street, N.W., Washington D.C. commencing at 9:30 a.m.

The Agenda for this meeting is as follows: (1) Chairman's Introductory Remarks; (2) Approval of Minutes of Meeting Held on November 18, 1981; (3) Chairman's Report on RTCA Administration and Activities; (4) Special Committee Activities Report for November and December, 1981; (5) Consideration of Establishing New Special Committees; (6) Report of Fiscal and Management Sub-Committee; (7) Mid-Year Review of RTCA Budget; and (8) Other Business.

Attendance is open to the interested public but limited to space available. With the approval of the Chairman, members of the public may present oral statements at the meeting. Persons wishing to present statements or obtain information should contact the RTCA Secretariat, 1717 H Street, N.W., Washington, D.C. 20006; (202) 296–0484. Any member of the public may present a written statement to the committee at any time.

Issued in Washington, D.C., on December 16, 1981.

Karl F. Bierach,

Designated Officer.

BILLING CODE 4910–13–M

Radio Technical Commission for Aeronautics (RTCA), Special Committee 147—Traffic Alert and Collision Avoidance Systems; Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463; 5 U.S.C. App. I) notice is hereby given of a meeting of RTCA Special Committee 147 on Traffic Alert & Collision Avoidance Systems to be held on January 13–15, 1982 in Conference Rooms 9A–B–C, Federal Aviation Administration Building, 800 Independence Avenue, S.W., Washington, D.C. commencing at 9:30 a.m.

The Agenda for this meeting is as follows: (1) Chairman's Introductory Remarks; (2) Approval of Minutes of the Fourth Meeting Held on November 4–6, 1981; (3) Review and Discussion of Draft TCAS National Standard; (4) Working Groups meet in Separate Sessions; (5) Briefings and Discussions on Altimetry; (6) Briefing on Effects of Airplane Structure on TCAS II Type Antenna Patterns; (7) Review Draft Sections to Minimum Operational Performance

Standards Prepared by Working Groups; (8) Review Work Progress and Assignment of Tasks; and (9) Other Business.

Attendance is open to the interested public but limited to space available. With the approval of the Chairman, members of the public may present oral statements at the meeting. Persons wishing to present statements or obtain information should contact the RICA Secretariat, 1717 H Street, N.W., Washington, D.C. 20006; (202) 296–0484. Any member of the public may present a written statement to the committee at any time.

Issued in Washington, D.C., on December 16, 1981.

Karl F. Bierach,

Designated Officer.

BILLING CODE 4910–05–M

Rolls-Royce GEM Mk. 510 Model Turboshaft Engine Certification and Availability of Documents

Based on a review of the entire certification process, the Director of the Federal Aviation Administration (FAA) New England Region approved issuance of Type Certificate No. E14NE, as recommended by New England Region staff, under the terms of the Bilateral Airworthiness Agreement between the United States of America and the United Kingdom of Great Britain and Northern Ireland.

A copy of the "Decision Basis for Type Certification of Rolls-Royce, Ltd., GEM Mk. 510 Model Turboshaft Engine," is on file in the FAA Rules Docket. The bulk of the "Decision Basis" reviews the purpose, structure, conduct, and significant highlights of the certification program wherein Rolls-Royce, Ltd., demonstrated compliance with the requirements of the issue of a United States Type Certificate for an imported product.

The text and appendices of the "Decision Basis" include delineation of a specific legal compliance required by each rule and a summary of the method by which compliance was established for each requirement.

Detailed appendices and attachments include: (1) The Bilateral Airworthiness Agreement between United States and United Kingdom; (2) United Kingdom Civil Aviation Authority (CAA) Engine Type Certificate Data Sheet No. 3010; and (3) United States FAA Type Certificate No. E14NE and the Type Certificate Data Sheet. The report is available for examination and copying at the Rules Docket, Office of the Regional Counsel, New England Region, 12 New England Executive Park, Burlington, Massachusetts 01803. Copies of the report may be obtained from the Office of the Director, FAA New England Region, 12 New England Executive Park, Burlington, Massachusetts 01803.

Issued in Burlington, Mass., on November 23, 1981.

Robert E. Whittington,

Director, New England Region.

[FR Doc. 81–36630 Filed 12–23–81; 8:45 am]

BILLING CODE 4910–13–M

Federal Highway Administration

Environmental Impact Statement; Chautauqua County, N.Y.

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of Intent.

SUMMARY: The FHWA is issuing this notice to advise the public that an environmental impact statement will be prepared for a proposed highway project in Chautauqua County, New York.

FOR FURTHER INFORMATION CONTACT: Roger H. Edwards, Director, Facilities Design Division, New York State Department of Transportation, State Campus, 1220 Washington Avenue, Albany, New York 12232, Telephone: (518) 457–6452, or Victor E. Taylor, Division Administrator, Federal Highway Administration, New York Division, Leo W. O'Brien Federal Building, 9th Floor, Clinton Avenue and North Pearl Street, Albany, New York 12207, Telephone: (518) 472–3616.

SUPPLEMENTARY INFORMATION: The New York State Department of Transportation in cooperation with the Federal Highway Administration, will be preparing an Environmental Impact Statement on a proposal (Project Identification No. 5289.00, 5289.01 and 5289.02) to solve the transportation problems in a corridor bounded by the NY 394–NY 474 junction on the west, Prendergast Avenue on the east, Chautauqua Lake on the north and Baker Street on the south. The corridor traverses parts of the Town of Busti, Town of Ellicott and the City of Jamestown, all of the Village of Lakewood and Village of Celoron, in the County of Chautauqua.

All reasonable and feasible alternatives within the defined corridor for the proposed project will be considered, along with the no build alternative. The study will consist of capacity-related and demand-responsive solutions to include the location of, and variations in, horizontal and vertical alignment, typical roadway section, geometric design, implementation of ride-sharing programs, increasing bus ridership and bicycle/pedestrian facilities.

The original studies conducted under the requirements of the National Environmental Policy Act began in 1971. The scoping process for the proposed project has been going on since 1978, when public informational meetings were conducted to determine the public's response for the proposed project need and corridor transportation problems. This began the design phase of developing highway design alternatives with coordination of interested public and private agencies, organizations and individuals, and significant issues to the proposed project have been identified. Therefore, a formal scoping meeting is not planned.

Agencies, organization and individuals interested in submitting comments or questions should contact D. H. Ketchum, Regional Director, New York State Department of Transportation, Region #5, General William J. Donovan State Office Building, 125 Main Street, Buffalo, New York 14203.

To ensure that the full range of issues related to this proposed action are addressed and all significant issues identified, comments and suggestions are invited from all interested parties. Comments or questions concerning this proposed action and the EIS should be directed to the NYSDOT or FHWA at the address provided above.

Issued on December 9, 1981.

Victor E. Taylor,

Division Administrator, Albany, New York.

[FR Doc. 81–36415 Filed 12–23–81; 8:45 am]

BILLING CODE 4910–22–M

Environmental Impact Statement; Knox and Blount Counties, Tenn.

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of intent.

SUMMARY: The FHWA is issuing this notice to advise the public that an environmental impact statement will be prepared for a proposed project in Knox and Blount counties in Tennessee.

FOR FURTHER INFORMATION CONTACT: Mr. E. G. Oakley, Division Administrator, Federal Highway Administration, Federal Building-U.S. Courthouse, 801 Broadway, Suite A–926, Nashville, Tennessee 37203, telephone (615) 251–5394.

SUPPLEMENTARY INFORMATION: Beginning on Interstate 40/75 west of Knoxville, Tennessee, in Knox County,

the proposed project would extend Pellissippi Parkway through west Knox County across the Tennessee River (Fort Loudon Lake) to north Blount County. The proposed project would end at State Route 73 (U.S. 129-Alcoa Highway) north of Maryville in Blount County. This 6-to 20-mile extension is proposed to improve both local and through travel between west Knox County and north Blount County. Alternatives initially identified for study include the following: a "no-action" alternative; an upgrading of the existing road system; a mass transit alternative; and two alternatives requiring construction on a new location. During the scoping process, several other alternatives were suggested. All alternatives will be reviewed to identify the reasonable alternatives for consideration in the environmental impact statement.

On January 9, 1981, information on the proposed project was mailed to approximately two hundred public agencies, local governments, and neighborhood groups with a request for their comments. Two public meetings were held to receive additional comments: one in west Knox County on January 21, 1981, and one in north Blount County on January 22, 1981. Meetings were held with the staffs of the local planning agencies in both Knox and Blount Counties on October 27, 1981. A report summarizing all the comments received during the scoping process is being prepared for distribution.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Research, Planning and Construction. The provisions of OMB Circular No. A-95 regarding State and local clearinghouse review of Federal and federally-assisted programs and projects apply to this program)

Dated: December 11, 1981.

Edward G. Oakley,

Division Administrator, Tennessee Division, Nashville, Tenn.

BILLING CODE 4910-22-M

Urban Mass Transportation Administration

New Bus Equipment Introduction Program

AGENCY: Urban Mass Transportation Administration, DOT.

ACTION: Announcement of New Bus Equipment Introduction Program.

SUMMARY: On December 24, 1981, the Urban Mass Transportation Administrator, Arthur E. Teele, Jr. announced the selection of four transit operators to test and evaluate innovative bus design features on 30 articulated and small size buses under the Department of Transportation's New Bus Equipment Introduction (NBEI) program. Because of the high level of interest expressed in this program from across the country, the Urban Mass Transportation Administration (UMTA) is reannouncing the program to solicit additional expressions of interest in order to achieve a wider geographical distribution of projects. This program has been established by UMTA to test various bus design features in order to assess the extent to which they improve fuel efficiency, accessibility and reliability, and reduce maintenance cost. Consideration will be given to innovative features in standard, articulated, and small size buses. A limited number of projects will be selected to evaluate the most promising innovative features. Project selection will be based on the desirability of the proposed bus features, climate, user population, overall efficiency, labor productivity, and maintenance effectiveness of properties, as well as ability of grantees to provide local share for the program.

DATES: Transit operators interested in participating in the program should send a "letter of interest" to the UMTA Associate Administrator for Technology Development and Development by February 5, 1982. Those transit properties that formally submitted a "letter of interest" to UMTA expressing a desire to be included in this program may submit a new "letter of interest."

FOR FURTHER INFORMATION CONTACT: John Marino, Director, Office of Bus and Paratransit Technology, UTD-20, Urban Mass Transportation Administration, 400 7th Street, SW., Washington, D.C. 20590; Telephone (202) 426-4035.

SUPPLEMENTARY INFORMATION: The goals of the program are to provide:

- An introduction into public transportation service of innovative and improved products that emphasize fuel economy, accessibility and lower costs of operation and maintenance;
- An opportunity for transit operators and the general public to form a greater consensus on the features required to provide more useful, efficient and suitable buses;
- An opportunity for bus manufacturers, transit operators and the public to assess the marketability and acceptance of those design features selected for evaluation; and
- Actual cost data and operational experience as a basis for evaluation of various bus features, prior to the introduction of such features in widespread service.

The NBEI program is to be funded through local public agencies from a set-aside within UMTA's Capital Assistance program which will provide 80 percent of the capital costs required to implement the program. Buses procured under this program will be in addition to any other grants for bus purchase which might otherwise be made to the area. Therefore, Federal grants under this program will be supplementary to other capital assistance grants. Local participation for the remaining costs must be provided by or through the sponsoring public agency. The program is expected to be conducted over a period of up to two years. Additionally, UMTA will provide financial support for test plan preparation, data collection and analysis, evaluation, documentation and dissemination of information resulting from the program.

This program is designed to test and evaluate innovative features that are incorporated on existing production vehicles. It is anticipated that no fewer than five and no more than 20 buses of any one type will be purchased by any one public agency. It is UMTA's intent to ensure compliance with all Federal requirements (e.g., Buy America, EPA, NHTSA, etc.) in carrying out this program.

The "letters of interest" should provide the following information:

1. The design features of interest, expected benefit, number of each type of vehicle desired and willingness to buy with UMTA funding assistance existing production buses with innovative features not available at present (no brand names should be identified);

2. Adequacy of financial resources to fund the local share of the capital costs of the project and operating costs;

3. Willingness to operate these buses in passenger service and to collect or allow for the collection of operating and maintenance data for a period of 12 to 24 months;

4. Brief description of the existing local operating and maintenance record-keeping system and information on overall efficiency, labor productivity and maintenance effectiveness of the bus transit system;

5. Total number and types of buses presently used (including number and types of buses with lifts) in the service area and specifically on routes proposed for test equipment; and

6. Ability and willingness to participate in multiple awards and to enter into a consortium with other grantees. Information should be provided regarding local and/or state regulations that may restrict

procurement options as mentioned above.

The proposals should provide sufficient data to permit evaluation of the merits of the project. Based on its review of the information submitted, UMTA will select a number of additional projects depending on availability of FY 1982 and FY 1983 funds.

Issued: December 17, 1981.

Arthur E. Teele, Jr.,

Administrator, Urban Mass Transportation Administration.

DEPARTMENT OF THE TREASURY

Customs Service

Tubular Textile Braided Lead Lines; Change of Practice Considered; Extension of Time for Public Comment

AGENCY: Customs Service, Treasury.

ACTION: Proposed change of practice; notice of extension of time for comments.

SUMMARY: This notice extends the period of time within which interested members of the public may submit comments with respect to a proposed change of practice relating to tubular textile braided lead lines. A document inviting the public to comment on this proposal was published in the **Federal Register** on October 21, 1981 (46 FR 51698). Comments were to have been received on or before December 21, 1981. A request has been received to extend the period of time for the submission of comments. This notice extends the period of time to January 21, 1982.

DATE: Comments must be received on or before January 21, 1982.

ADDRESS: Written comments (preferably in triplicate) may be addressed to the Commissioner of Customs, Attention: Regulations Control Branch, U.S. Customs Service, 1301 Constitution Avenue, NW., Room 2426, Washington, D.C. 20229.

FOR FURTHER INFORMATION CONTACT: Phil Robins, Classification and Value Division, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20299 (202-556-8181).

Dated: December 18, 1981.

Donald W. Lewis,

Director, Office of Regulations and Rulings.

BILLING CODE 4820-02-M

Internal Revenue Service

Commissioner's Advisory Group; Open Meeting

There will be a meeting of the Commissioner's Advisory Group on January 11, 12 and 13, 1982, in Room 3313 of the Internal Revenue Service Building. The building is located at 1111 Constitution Ave., NW., Washington, D.C. The meeting will begin at 10:00 A.M. on January 11 and 12, and at 9:30 A.M. on January 13. The agenda will include the following topics:

Monday, January 11, 1982

Organization of the IRS.

Tuesday, January 12, 1982

Recent Changes in the Handling of Tax Shelter Cases.

Current Status of Partnership Audit Program.

Tax Protestors—Status of IRS Program to Identify and Deal with Tax Protestor Activities As Well As Dealing with False Withholding Certificates.

Reassessment of the Large Case Examination Program.

Wednesday, January 13, 1982

Tax Administration Consequences of the Economic Recovery Act.

Prospects for Annual or Semi-Annual Filing of Forms 941.

The Service's Approach to Dealing with the Accounts Receivable Inventory.

The meeting, which will be open to the public, will be in a room that accommodates approximately 50 people. After the Committee members finish discussing the items on the agenda, there may be time for statements by non-members. If you want to make a statement at the meeting, or if you would like the Committee to consider a written statement, please call or write to James Lantonio, Assistant to the Deputy Commissioner, 1111 Constitution Avenue, NW., Washington, DC 20224.

Roscoe L. Egger, Jr.,

Commissioner.

CONSUMER PRODUCT SAFETY COMMISSION

TIME AND DATE: Commission Meeting, 9:30 a.m., Thursday, November 12, 1981.

LOCATION: Third floor hearing room, 1111 18th Street, NW., Washington, D.C.

STATUS: Open to the public.

MATTERS TO BE CONSIDERED:

1. *Urea-Formaldehyde Foam Insulation: Request for Comments on Selected Issues*
   The Commission will consider a draft Federal Register document which will seek public comment on new data and analyses that have been prepared by the staff or others since CPSC published a proposed ban of urea-formaldehyde foam insulation in February, 1981. The studies concern technical, health risk and economic information.
2. *Briefing on Lead in Gift Wrap Paper: Status of Voluntary Activity*
   The staff will brief the Commission on the voluntary action program of the Gift Wrappings and Tyings Association to limit the use of lead products in gift wrap paper. Under the program, developed in consulation with CPSC staff, participating gift wrap manufacturers will ask their suppliers to certify lead content in pigments they purchase, and will have independent laboratories test inks and papers for lead content.

CONSUMER PRODUCT SAFETY COMMISSION

TIME AND DATE: Commission Meeting, 9:30 a.m., Wednesday, December 16, 1981.

LOCATION: Third floor hearing room, 1111 18th Street., NW., Washington, D.C.

STATUS: Open to public.

MATTERS TO BE CONSIDERED:

1. *Unvented Gas-Fired Space Heaters, Petition CP 82-1*
   The Commission will consider petition CP 82–1 from the Gas Appliance Manufacturers Association requesting revocation of a standard on unvented gas-fired space heaters. The briefing on this matter was held on December 10, 1981.
2. *Toy Chests*
   The staff will brief the Commission on issues related to the safety of toy chests.

STATUS: Closed to the public.

3. *Enforcement Matter (OS# 1069)*
   The Commission will consider issues related to enforcement matter OS# 1069.

CONTACT PERSON FOR ADDITIONAL INFORMATION: Sheldon D. Butts, Deputy Secretary, Office of the Secretary, Suite 300, 1111 18th Street., NW., Washington, D.C. 20207; telephone (301) 492–6800.

5

CONSUMER PRODUCT SAFETY COMMISSION

TIME AND DATE: Commission Meeting, 10 a.m., Thursday, December 17, 1981.

LOCATION: Room 456, Westwood Towers, Bethesda, Maryland.

STATUS: Open to the public.

MATTERS TO BE CONSIDERED:

1. *FY 82 Operating Plan Review*
   The staff will review with the Commissioners issues related to the Operating Plan for fiscal year 1981.
2. FY 82 Priorities
   The staff will review with the Commissioners issues related to the Commission's priorities for fiscal year 1982.
3. *Solid Fuel—Related Fire Hazards*
   The staff will brief the Commission on a final report addressing hazards associated with solid fuel devices and systems.

CONTACT PERSON FOR ADDITIONAL INFORMATION: Sheldon D. Butts, Deputy Secretary, Office of the Secretary, Suite 300, 1111 18th Street, NW., Washington, DC 20207; telephone (301) 492–6800.

FEDERAL DEPOSIT INSURANCE CORPORATION

Notice of Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 9:30 a.m. on Friday, December 18, 1981, the Board of Directors of the Federal Deposit Insurance Corporation met in closed session, by telephone conference call, to (1) approve the application of The Buffalo Savings Bank, Buffalo, New York, for consent to merge, under its charter and title, with Union Dime Savings Bank, New York (Manhattan), New York, and to establish the main office and eight branches of Union Dime Savings Bank as branches of the resultant bank, and (2) provide financial assistance to the resulting bank, pursuant to section 13(e) of the Federal Deposit Insurance Act, in order to prevent the probable failure of Union Dime Savings Bank.

In calling the meeting, the Board determined, on motion of Chairman William M. Isaac, seconded by Director Irvine H. Sprague (Appointive), concurred in by Mr. Paul M. Homan, acting in the place and stead of director C. T. Conover (Comptroller of the Currency), that Corporation business required its consideration of the matters on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did not require consideration of the matters in a meeting open to public observation; and that the matters could be considered in a closed meeting pursuant to subsections (c)(6), (c)(8), (c)(9)(A)(ii), and (c)(9)(B) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(6), (c)(8), (c)(9)(A)(ii), and (c)(9)(B)).

Dated: December 18, 1981.

Federal Deposit Insurance Corporation.

Alan J. Kaplan,

Assistant Executive Secretary.

FEDERAL DEPOSIT INSURANCE CORPORATION

Notice of Changes in Subject Matter of Agency Meeting

Pursuant to the provisions of subsection (e)(2) of the "Government in the Sunshine Act" (5 U.S.C. 552b(e)(2)), notice is hereby given that at its open meeting held at 2:00 p.m. on Monday, December 21, 1981, the Corporation's Board of Directors determined, on motion of Chairman William M. Isaac, seconded by Director Irvine H. Sprague (Appointive), concurred in by Director C. T. Conover (Comptroller of the Currency), that Corporation business required the withdrawal from the agenda for consideration at the meeting, on less than seven days' notice to the public, of the following matters:

Memorandum re: Budget of Liquidation Expenses for Budget Year 1982.

Memorandum and Resolution re: Accrual Accounting Requirements for Commercial and Mutual Savings Banks.

By the same majority vote, the Board further determined that Corporation business required the addition to the agenda for consideration at the meeting, on less than seven days' notice to the public, of the following matter:

Recommendation regarding the liquidation of a bank's assets acquired by the Corporation in its capacity as receiver, liquidator, or liquidating agent of those assets:

Case No. 45,032–NR—United States National Bank, San Diego, California

By the same majority vote, the Board further determined that no earlier notice of these changes in the subject matter of the meeting was practicable.

Dated: December 21, 1981.

Federal Deposit Insurance Corporation.

Alan J. Kaplan,

Assistant Executive Secretary.

Notice of Change in Subject Matter of Agency Meeting

Pursuant to the provisions of subsecton (e)(2) of the "Government in the Sunshine Act" (5 U.S.C. 552b(e)(2)), notice is hereby given that at its closed meeting held at 2:30 p.m. on Monday, December 21, 1981, the Corporation's Board of Directors determined, on motion of Chairman William M. Isaac, seconded by Director Irvine H. Sprague (Appointive), concurred in by Director C. T. Conover (Comptroller of the Curency), that Corporaton business required the addition to the agenda for consideration at the meeting, on less than seven days' notice to the public, of the following matter:

Memorandum and Resolution re: Metropolitan Savings Bank, New York (Brooklyn), New York, regarding the appointment of two directors of Ralph C. Sutro Company.

The Board further determined, by the same majority vote, that no earlier notice of the change in the subject matter of the meeting was practicable; that the public interest did not require consideration of the matter in a meeting open to public observation; and that the matter could be considered in a closed meeting by authority of subsection (c)(9)(B) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(9)(B)).

Dated: December 21, 1981.

Federal Deposit Insurance Corporation.

Alan J. Kaplan,

Assistant Executive Secretary.

NATIONAL MEDIATION BOARD

TIME AND DATE: 2 p.m., Monday, January 11, 1982.

PLACE: Board Hearing Room, eighth floor, 1425 K Street, N.W., Washington, D.C.

STATUS: Open.

MATTERS TO BE CONSIDERED:

1. Ratification of Board actions taken by notation voting during the month of December, 1981.

2. Other priority matters which may come before the Board for which notice will be given at earliest practicable time.

3. Staff report on proposed amendments to the NMB's Representation Manual, including analysis of public comments. Board consideration and/or action on staff recommendations.

SUPPLEMENTARY INFORMATION: Copies of the monthly report of the Board's notation voting actions will be available from the Executive Secretary's office following the meeting.

CONTACT PERSON FOR MORE INFORMATION: Mr. Rowland K. Quinn, Jr., Executive Secretary (202) 523–5920.

Dated: December 21, 1981.

Part II

Environmental Protection Agency

Averaging of Particulate Emissions From 1985 and Later Model Year Diesel-Fueled Light-Duty Vehicles and Light-Duty Trucks; Proposed Rulemaking

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Parts 85 and 86

[AMS-FRL 1941-5]

Averaging of Particulate Emissions from 1985 and Later Model Year Diesel-Fueled Light-Duty Vehicles and Light-Duty Trucks

AGENCY: Environmental Protection Agency.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: This notice proposes a program which would permit manufacturers of light-duty diesel vehicles (LDDVs) and light-duty diesel trucks (LDDTs) to average the particulate emissions of their diesel vehicles. This rulemaking comes as a part of the Agency's recently announced effort to ease the regulatory burden on the automotive industry. Implementation of the program proposed here should allow the makers of LDDVs and LDDTs to meet the 1985 particulate standards with less emission control hardware. EPA estimates that implementation of this proposal would save $188–$376 million over a five-year period. At the same time, the Agency does not expect this averaging program to cause any appreciable loss of air quality benefits. In addition, this notice proposes to delete light-duty truck high-altitude regulations which are unrelated to the averaging program and which had been erroneously added to Part 86 during a previous rulemaking. Please note that EPA specifically requests comment on a number of items near the end of this preamble. The Agency encourages all individuals and organizations which are interested in this rulemaking to participate in the public hearing and/or submit their comments to the docket.

DATES: EPA will hold a public hearing on this notice on February 2, 1982. The hearing will convene at 9:00 a.m. and adjourn at 5:00 p.m., or at a later time if necessary to complete the business of the hearing. Comments will be accepted to the docket for a period of 30 days following the close of the hearing, and should be submitted on or before March 4, 1982.

ADDRESSES: The hearing will take place in the conference room at the EPA Motor Vehicle Emissions Laboratory, 2565 Plymouth Road, Ann Arbor, MI 48105.

Written comments, other than those submitted directly at the hearing, should be submitted (preferably 4 copies) to: Central Docket Section (A–130), Environmental Protection Agency, Attn: Docket No. A–81–31, 401 M St. SW., Washington, D.C. 20460.

Docket No. A–81–31 is located in the U.S. EPA, Central Docket Section, West Tower Lobby, Gallery I, 401 M St. SW., Washington, D.C. The docket may be inspected between 8 a.m. and 4 p.m. on weekdays.

FOR FURTHER INFORMATION CONTACT: Jeff Alson, Emission Control Technology Division, U.S. Environmental Protection Agency, 2565 Plymouth Road, Ann Arbor, MI 48105, Telephone: (313) 668–4317.

SUPPLEMENTARY INFORMATION:

I. Background

The program proposed in this notice has its origins in the development of the light-duty diesel particulate standards, published on March 5, 1980 (45 FR 14496). During the comment period on those standards, General Motors and Volkswagen submitted proposals for particulate averaging schemes. GM's proposal was a "corporate" average particulate standard (CAPS) in which a manufacturer could balance diesel particulate emissions with gasoline-fueled vehicle particulate emissions. VW's proposal was a diesel only average standard, similar to the one proposed here.

EPA considered the GM and VW proposals, but chose not to adopt them in the final rule. GM's CAPS proposal, the Agency concluded, would be highly favorable to a manufacturer which produced many gasoline-fueled engines (which emit very low levels of particulate). It would be able to offset the emissions of many or all of its diesels with its gasoline-fueled vehicles, perhaps avoiding any diesel particulate control at all. Such a program, on the one hand, would be of little use to a manufacturer making mostly diesels since there would not be nearly as much opportunity for averaging. Further, when a manufacturer making a large number of gasoline-fueled vehicles is also a major producer of diesels—as GM itself is becoming—a CAPS program would work against the need for particulate control since a large segment of the new diesels in the country could be produced with little or no particulate control.

Although Volkswagen's diesel average particulate standard (DAPS) proposal was very sketchy, the Agency believes that a DAPS program might avoid many of the problems of CAPS and seriously considered the concept. The final decision to reject a DAPS approach as a part of the original light-duty diesel particulate rulemaking was based on a number of factors, including its uncertain benefits and its probable complexity (see 45 FR 14502). These factors will certainly remain issues in this rulemaking.

Today, however, there are other factors to consider as well. The industry is now facing a very different economic climate than it was during the original particulate rulemaking. It is likely now that even a limited amount of additional flexibility might be useful to the industry (although EPA actually expects the increased flexibility offered by the proposed program to be substantial). Likewise, the complexity of a DAPS type program may well be more acceptable now to both industry and the Agency if it indeed results in increased compliance flexibility. It is in light of these new considerations that the Agency has initiated this rulemaking.

EPA, in a separate action, is considering major revisions of its new vehicle compliance program (see 46 FR 33365, June 29, 1981), including averaging concepts broader than the program proposed here. This proposal, in contrast, is designed to address certain immediate aspects of compliance with the particulate standards and to be compatible with the Agency's existing compliance programs. At the same time, as the Agency considers major revisions of its compliance program, this averaging program could be incorporated into any revisions ultimately adopted. Thus, the program proposed here can fit into a general EPA move toward averaging, yet it does not in itself complete that move.

Why is the Agency not proposing an overall averaging program at this time? Time considerations, as well as a concern that elements in a broader averaging program may require supporting statutory changes, are the primary reasons. This program is designed to provide quick relief to light-duty diesel manufacturers as the 1985 compliance deadline approaches. Any broad revamping of the compliance program would take considerably more time for Agency preparation and adequate public participation. Thus EPA has limited the scope of this proposal to light-duty particulate averaging.

The Agency is taking this opportunity to propose corrections to the current regulations which are unrelated to the particulate averaging program. During a previous rulemaking (45 FR 63734, September 25, 1980) paragraphs affecting light-duty truck high-altitude regulations were erroneously added to Part 86. These regulations are proposed to be deleted below. Because these changes are being made to correct a previous error and are consistent with

actions already taken, no further analysis of the change is necessary.

II. Description of the Proposed Program

This section outlines a specific proposal for a light-duty vehicle and light-duty truck particulate averaging program. This program would allow manufacturers to meet the 1985 and later light-duty diesel vehicle (LDDV) and light-duty diesel truck (LDDT) particulate standards of 0.20 g/mi and 0.26 g/mi, respectively, by averaging the emissions of their diesel engine families. This proposal would allow averaging of LDDV or LDDT families separately and would also allow families from the two vehicle classes to be averaged together.

Under the proposed program the manufacturer would establish individual particulate emission limits for each engine family included in the particular averaging program. These limits would be set such that when they were weighted by their respective family production and averaged together, the manufacturer's resulting diesel average particulate level would be equal to or below the applicable level standard.

This is not the only way to construct an averaging program. In fact, during the original particulate rulemaking, Agency consideration of how an averaging program might work resulted in the suggestion that it might be more appropriate to focus on corporation-wide compliance (more along the lines of the Corporate Average Fuel Economy program) rather than engine family compliance. While such a program would probably give manufacturers even greater flexibilty, it would necessarily require changes in EPA's existing compliance program, a task which is outside the scope of this proposal, as discussed earlier.

Therefore, the proposed program really involves two independent levels of compliance. On one level, a manufacturer would establish for each of its LDDV and LDDT families an emission limit (as distinguished from an emission standard) against which the emissions of each member of the family could be compared. Secondly, the production-weighted average of the family levels would have to be equal to or less than the applicable particulate standard (0.20 g/mi for LDDVs, 0.26 g/mi for LDDTs, or some composite level if both LDDVs and LDDTs are averaged together). The following paragraphs discuss these two aspects of compliance.

A. Compliance with the Family Particulate Emission Limits

Under the proposed program, each manufacturer would set a particulate emission limit for each of its diesel families accurate to the nearest one hundredth gram-per-mile of particulate. The limits would have exactly the same relationship to their respective engine families as an emission *standard* currently has to *all* families. Certification, SEA, and recall, which today generally work on an engine family basis, would not need to change in any major way. The engine criteria which now distinguish one engine familiy from another would also stay the same. In this way the proposal avoids the need to design a new compliance scheme to make sure that cars and light trucks meet their assigned limits. At the same time, the proposal is compatible with the streamlined certification which EPA began implementing beginning with the 1980 model year.

It is important to note that just as in the case of current emission standards it would be the family emission limit that EPA could enforce, not the actual levels which a certification or SEA test vehicle attained. Therefore, it is the family limits and not engine test data (from certification or assembly-line audit testing) that would be used in the calculation of compliance with the applicable particulate standard (see Part B. below).

There is a problem that arises in an averaging program which results from allowing some families to certify above the promulgated standard. The problem is that these higher emitters might become concentrated in a certain geographic area, perhaps causing localized adverse air quality effects (for example, if the high emitters became a large portion of a city's taxi fleet). To the extent that this is a valid concern—and EPA requests specific comments in this area later in this preamble—some sort of limitation on how high an individual family emission limit can go seems prudent. Of course there is actually something of a limit built into averaging because no manufacturer will have an unlimited range of vehicle emission levels and production volumes with which to work. But these built-in limits nevertheless will vary widely among manufacturers, and it may be appropriate to establish general numerical limitations on the family emission limits.

In determining whether to establish a family limit ceiling, EPA needs to resolve two issues. First, at what point does the ceiling level begin to restrict the economic gains from averaging. Second, what localized concentration problems are likely to arise in the absence of a ceiling. Concerning the first item, a factor or two above the standard for the ceiling (0.4 g/mi) might not be restrictive because of the inherent limits facing a manufacturer in developing the necessary offsetting low emission credits. A possible exception, however, might arise if the ceiling were to be set at the level of the 1982 particulate standard of 0.6 g/mi, allowing some manufacturers which certified vehicles close to that standard in 1984 to carry over their certification to 1985 without altering the engines. However, EPA does not know whether this option would actually be exercised, and the Agency is concerned about what adverse local air quality effects a ceiling that high might create. On both of these points, EPA hopes to obtain detailed information during the comment period. At this time EPA believes it is reasonable to propose a ceiling on the family emission limits, and is considering alternative ceiling levels of 0.4 and 0.6 g/mi. Pending final resolution of these questions, we are proposing a 0.4 g/mi ceiling level.

EPA is also concerned about potential "localized" health effects which could arise from allowing manufacturers to average particulate emission levels of vehicles designed for marketing only in areas covered by Federal, low-altitude emission standards with vehicles designed for marketing only in areas covered by California emission standards or only in areas covered by Federal, high-altitude Standards. EPA is contemplating not permitting averaging of particulate emission levels between vehicles designed for marketing under a set of standards associated with only one of these different geographical regions with vehicles designed for marketing under a different set of "regional" standards on the basis of the following considerations:

—Emissions from vehicles marketed exclusively in one of these geographical regions do not generally mingle with emissions from cars marketed exclusively in other regions, and thus do not greatly influence the air quality in those other regions, and

—Averaging between vehicles designed for different regional standards could permit a manufacturer to "decontrol" all vehicles specially designed for marketing in one region (e.g., by omitting trap-oxidizers) if it can achieve "extra" control on other vehicles using different emission control system designs marketed in a different region under a different set of standards; thus, the adverse effects of the extra emissions from the decontrolled vehicles in the first region would not be offset by any vehicles in that region subject to extra control.

We are requesting specific comments on whether allowing averaging between vehicles designed for marketing under standards associated with different geographical regions is appropriate, and if not, how EPA should calculate separate averages for different regions.

The proposal would require the manufacturer to place a label on the engine (or make an addition to the existing label) recording what the applicable emission limit was for that family at the time the car or truck was produced. In this way EPA can assure that every individual engine can be easily associated with its proper emission limit throughout its life, even if the emission limit is changed part way through the production year (as is discussed below).

In summary, compliance with the family limits in this proposal would be measured and enforced in a manner very similar to the way compliance with any emission standard is judged today. Essentially the same compliance structure now in place would work. The ceiling levels and the labeling requirements, on the other hand, are new provisions which result from the special aspects of this type of averaging program.

B. Compliance with the 1985 Particulate Standards

There is a second, more general aspect to compliance under the proposed program. This is the means by which the manufacturer can demonstrate compliance, on average, with applicable particulate standards. Unlike compliance with the family limits, which can operate with today's compliance apparatus, compliance with the applicable particulate standard requires a new perspective. The key parameters become engine family production and family emission limits.

Under the averaging system proposed here, manufacturers would set their family emission limits such that when weighted by the respective production figures to compute a production-weighted average, the limits would average to a level which is less than or equal to the applicable particulate standard. If a manufacturer includes both LDDV and LDDT engine families, their emission limits could be averaged together in computing compliance with the applicable standard.

The calculation of a manufacturer's production-weighted average emission level would be fairly straightforward. If the averaging is to be done only among vehicles of the same class (*i.e.*, only among LDDVs or LDDTs), then each family's production would be multiplied by that family's emission limit. When the sum of these values was divided by the total diesels produced, the company's diesel average particulate level would result. This number could be directly compared to the applicable standard (LDDV or LDDT).

If the averaging is to be done among *both* LDDVs and LDDTs, the separate standards for the two classes must be synthesized into a single, composite standard. The following expression illustrates how a production-weighted standard would be computed for each manufacturer.

$$\frac{x(0.20)+y(0.26)}{(x+y)} = \text{Mfr. Composite Particulate Std.}$$

Where x represents total LDDV sales and y represents total LDDT sales.

This production-weighted composite standard would become the measure of compliance when both classes were to be averaged together. The calculation of the company's average particulate level would remain the same as is described above (*i.e.*, each family limit weighted by its production and averaged).

Under the proposed program, each manufacturer would have complete flexibility in deciding how to apply averaging to its light-duty diesel fleet, or whether to average at all. EPA would grant a certificate of conformity to each family that demonstrated compliance with its family emission limit. The certificate would contain the provision that its validity was conditional in whole or in part on the manufacturer meeting the applicable particulate standard at the end of the model year. During production, a manufacturer would have full responsibility for taking whatever action was necessary to ensure that its diesel production met the applicable standard at the end of the production year. This might involve recertifying some families to new emission family limits or adjusting production targets in response to new production patterns. In any event, it would only be after production was complete that EPA would enter the process in order to verify that the family limits, weighted by the year's production, showed compliance with the applicable particulate standard(s).

There are a number of ways in which a manufacturer could manipulate its diesel fleet to assure compliance with the applicable particulate standard by the end of the production year. The possibility will exist, as it does today, for a manufacturer to change the engine operating characteristics or hardware in such a way as to create a new engine family (and, under averaging, to establish a new family emission limit). Beyond that, EPA is introducing the additional flexibility of creating a new family limit without making any changes to the engine. (This option might become useful to a manufacturer which found that the production emission levels of a family were sufficiently below the family's emission limit that it could lower the limit without physically changing the vehicle.) To change a family limit the manufacturer would have to demonstrate compliance based upon its existing certification data and any existing Selective Enforcement Audit test data. If a family limit were changed, EPA would issue a new certificate covering subsequent production of the vehicle, and each vehicle produced thereafter would need a revised label recording its new family emission limit.

Revised certificates could not apply retroactively. First of all, this would create problems with the vehicle labeling requirements. A retroactive change in the family emission limit would mean that the labels which had been placed on the affected vehicles would no longer be correct. Accurate labeling is, of course, very important for the in-use aspects of EPA enforcement programs. In addition, retroactivity could create a "loophole" for abuse of the averaging program. Knowing that it could retroactively adjust the family emission limit for a family found out of compliance during the production year could lead a manufacturer to set a family emission limit which was artificially low. Since only a portion of a manufacturer's fleet would normally be audited by EPA, such a maneuver might well go undetected. If it were discovered, there would be no loss to the manufacturer other than the need to adjust the family limit upwards.

As far as the proposed regulations are concerned, there would be no limit on the number of times that a manufacturer could seek new certificates for its families. The only limit would be the practical one of EPA's ability to process the requests, which the Agency does not anticipate to be a major obstacle.

EPA would not verify the manufacturer's compliance with the standard until the end of the model year. Nevertheless, the sanctions provided by the Clean Air Act should insure that a company which chooses to average its diesel particulate emission levels and which produces each of its engine families in compliance with its respective limits also maintain family production volumes such that the production-weighted average of the manufacturer's family limits indeed

meets the standard at year's end. Section 205 of the Act establishes a penalty of up to $10,000 for selling a vehicle not covered by a certificate of conformity. Since failing to comply with the promulgated standard because of an incorrect production volume mix will mean that the diesel fleet (or some portion of it) failed to satisfy conditions in its certificate(s), this would place the manufacturer in violation of Section 205. As is the case today, the threat of paying up to $10,000 per vehicle not covered by a certificate should assure that each manufacturer which uses averaging will make every effort to comply with the average particulate standard at the end of the production year.

Under the conditions included in the certificate covering a manufacturer's diesel engine families, a manufacturer most likely will not be liable for introducing all of its diesel vehicles into commerce without their being covered by a certificate. Instead, the manufacturer only would be potentially liable for civil penalties for those vehicles which cause the manufacturer's production-weighted family limit average to exceed the particulate standard.

For example, suppose a manufacturer initially plans to produce 100,000 light-duty diesel vehicles subject to 0.18 g/mi engine family limit, 50,000 vehicles subject to 0.22 g/mi family limit, and 25,000 vehicles subject to a 0.24 g/mi family limit. This would place the manufacturer's production-weighted family limit average precisely at the 0.20 g/mi particulate standard. Then suppose that at the end of the production year, each engine family meets its limit, but the manufacturer produced 60,000 vehicles subject to the 0.22 g/mi limit instead of the 50,000 it orignially had projected. In that case the manufacturer's production-weighted family limit average would exceed the particulate standard. As a result, the manufacturer could be liable for introducing into commerce 5,000 vehicles not covered by a certificate, since if it had produced 5,000 fewer vehicles in its highest emitting family (subject to the 0.24 g/mi limit) its production-weighted family limit average would precisely meet the 0.20 g/mi standard.

Of course, in exercising its authority under Section 205, the Agency would have discretion in choosing which remedies and/or penalties to pursue. EPA could accomplish this by initiating a consent decree action under that section. In recommending penalties, if any, in a Court proceeding, the Agency could consider such factors as : (1) The degree of contravention of the standard; (2) the number of vehicles which cause the failure to achieve the particulate standard; and (3) the degree to which a recall would be successful, considering vehicle owner response rate, in lowering the particulate levels of the engine families involved to such a degree that the manufacturer's production-weighted average (adjusted for the results of the recall), would comply with the particulate standard.

EPA has devised the averaging program to provide a clear structure around which to build a meaningful and manageable particulate averaging program. The Agency expects and hopes that the industry and the general public will play a large role in helping to refine the details of the proposed program by suggesting additions and improvements.

III. Effects on Manufacturers' Flexibility

Unlike most EPA regulatory efforts, which result in improved air quality, the benefits of this rulemaking will be measured in terms of increased industry flexibility and hence reductions in compliance costs. The goal is a well-designed particulate averaging program which will result in real capital cost savings for light-duty diesel manufacturers without significantly reducing the air quality improvements which will be achieved by the 1985 particulate standards. For this goal to be realized, EPA has to make sure that the averaging program will open up new options in design and/or marketing which can lower costs.

EPA believes this proposed program will indeed introduce new flexibility—and the accompanying cost savings—into particulate emission control efforts. What follows is a brief analysis of the kinds of hardware reductions and subequent cost savings that EPA expects would result from this proposed averaging program. This analysis is not intended to be an extensive study of the issues but rather a "first pass" at a quantitative investigation of the benefits of the proposed program. EPA will rely heavily on industry and public input in making a final, detailed analysis of the issues.

A. Effect on Required Control Technology

In the original light-duty particulate rulemaking (referenced above), EPA projected that nearly all 1985 LDDVs and LDDTs would need to be equipped with trap-oxidizers in order to meet the 1985 particulate standards. (According to that original analysis, only VW Rabbits, which were estimated to make up six percent of all diesels, could avoid traps.) That assessment can be tempered somewhat today since more small and lower particulate emitting engines are emerging. Nevertheless, the use of traps will be so widespread that if the averaging program can make it possible for some manufacturers to reduce the number of traps that their diesel fleets require (or to use less expensive traps), real savings in hardware costs will be available.

At least four companies should benefit from particulate averaging—Volkswagen, General Motors, Ford, and Daimler-Benz. That is, there is strong evidence that these four will be marketing more than one engine family *and* will have at least one family capable of emitting below the promulgated standard (either with or without a trap). As diesel production becomes more widespread, other manufacturers will be able to take advantage of averaging. Before looking in more detail at the four manufacturers, it will be helpful to outline how EPA believes they could use averaging to limit the number of required traps.

The analysis assumes a hypothetical scenario where a manufacturer has one family of engines (call it "A") which emits particulate matter at around 0.5 g/mi, another family ("B") which emits around 0.35 g/mi, and two small engine families ("C" & "D") which emit at about 0.25 and 0.18 g/mi (all are engine-out emissions). To avoid unnecessary complications, the analysis assumes further that all four families are passenger cars. Whether or not the manufacturer chose to average the emissions from these families, family A would clearly need to be equipped with traps since these vehicles would otherwise exceed the 0.4 g/mi ceiling. Families B and C would definitely need traps in the absence of averaging. However, these families are close enough to the standard to benefit from an averaging program. Family D, while not requiring traps in any case, could play a role in helping to offset the higher emissions of families B and C in an averaging program.

Under an averaging program, the manufacturer could choose to put traps on the vehicles in family B, an approach which would result in emissions well below the 0.20 g/mi standard (even with traps no more efficient than today's prototypes). Depending on the sales distribution among the families, the low emissions of family B (with traps) along with those of family D might allow the vehicles from family C to be sold without traps. An alternative scenario might be to equip family C with traps (or conceivably even family D) in order to

have families with such low emissions that traps could be avoided on family B.

This simple example, of course, only touches on the range of options which a manufacturer might have. For example, the families could be subdivided into smaller families with and without traps. In addition, if one also considers that traps will surely vary in size and durability—and thus cost—still another level of options emerges. Thus in the example above, it might be possbile to put a cheaper trap on family A if there are enough vehicles in low particulate families to offset slightly higher emissions in family A. Finally, a manufacturer producing one or more light-duty diesel trucks would have the additional flexibility of averaging them in with its diesel passenger cars. The reader should bear in mind all of these potential degrees of freedom when the discussion below examines the way several manufacturers' 1985 diesel fleets are shaping up.

It should be clear that any analysis of how averaging would change the light-duty diesel industry's need for trap-oxidizers in 1985 and beyond cannot be precise at this time. First of all, the diesel passenger car and light truck market is expected to be a very volatile market in the 1980's, with many new and modified designs and various estimates of diesel market penetration. Second, even with some knowledge of each manufacturer's general plans, EPA is not in a position to project accurately individual family production or emission levels in 1985. Further, manufacturers would have several options in applying averaging to any given situation. The following examination, then, is in two parts. First, it establishes that at least four specific manufacturers will be able to make use of averaging in 1985. Then it will move to an industry-wide perspective to look at how the overall need for particulate traps is likely to be affected. The difficutly in making accurate assessments of this sort illustrates the importance of comprehensive input from the industry during the comment period.

1. *1985 Light-Duty Diesel Outlook—Four Companies.* Volkswagen is a prime candidate to make use of the proposed program. Its past experience and continued research with diesel technology make it certain that 1985 will see Volkswagen producing a subtantial number and variety of diesel cars and trucks. It already makes small diesels which emit particulate at very low levels. (VW's Rabbit is one current LDDV which is likely to meet 0.20 g/mi without using a particulate trap in 1985.) In addition, its diesel sales have been rapidly expanding.

Currently VW is producing three LDDV engine families and one LDDT family. EPA expects VW to continue making its small 1.6-liter engines and selling them in increasing numbers. At the same time, it is reasonable to expect that VW's aggressive diesel development program will result in its introducing one or more small new engines by 1985, such as a supercharged three-cylinder diesel which has been publicly discussed (Automotive News, June 29, 1981). VW's other engine families, the Audi and the VW light-duty truck, will probably continue to be the heavier emitters of particulate, with engine-out (non-trap) emissions in the 0.3–0.4 g/mi range. By 1985, the 1.6-liter engine as it is used in LDDVs may emit 0.15–0.20 g/mi, and if a still smaller engine is introduced, its particulate emissions may be even less. By any assessment, Volkswagen will be in an excellent position to make use of particulate averaging to avoid the use of particulate traps on some or all of the Audi vehicles and the 1.6-liter engine trucks.

General Motors (GM) has been marketing LDDVs since 1978 and LDDTs since 1979. Until recently, all of GM's diesels had been the relatively large and high particulate emitting 5.7-liter and 4.3-liter (now discontinued) engines. In 1981 GM certified the 1.8-liter Isuzu diesel engine which is available in its Chevette. This engine appears to be a relatively low particulate emitter and could thus provide GM with flexibility in an averaging program. By the late 1980's, however, GM's ambitious diesel program will likely be much farther along, with company estimates of diesel penetration ranging as high as 40 percent of total GM production by the end of the decade (WARD's Engine Update, June 15, 1981). By 1984 GM is expected to have a full line of additional diesel engines, with public discussion centering on a small 4-cylinder diesel engine, an approximately 2.5-liter V–5 diesel engine, a series of V–6 diesel engines (including, at minimum, 3.2-liter and 4.3-liter versions), and a 6.2-liter V–8 diesel engine designed specifically for light-duty trucks (WARD's Engine Update, August 15, 1980 and Automotive News, October 6, 1980). The smaller of these engines, along with the Isuzu engine, will likely be low particulate emitters and will put GM in an excellent position to take advantage of an averaging scheme because the many "clean" vehicles could perhaps offset a sizable number of non-trap vehicles. Since some of these new engines will probably be offered in light trucks as well as passenger cars GM would have additional flexibility. It seems clear that GM will become a primary beneficiary of the averaging program.

Ford does not today market any light-duty diesels, but is clearly moving in that direction. It plans to offer several imported diesel engines in the next few years. Ford's current plans call for having 2.4-liter, six-cylinder BMW-Steyr turbocharged diesel engines available for luxury cars by 1983 or 1984 followed by a more advanced four-cylinder turbocharged diesel engine from the same company for mid-size and full-size cars in 1985 or 1986. In addition, Toyo Kogyo will likely supply Ford with a small four-cylinder diesel for LDDTs by 1983 and a smaller four-cylinder diesel for LDDVs by 1984 (Automotive News, October 6, 1980 and May 18, 1981). Judging from their size, many or all of these engines ought to have particulate emissions well below the standard when equipped with traps, and the smallest of them might meet the standard without aftertreatment, even at a 1.0 g/mi NO_x level. (See the EPA Technical Report "Ford-EPA 1981 Light Duty Vehicle Diesel Correlation," No. EPA–AA–EOD–81–3, available in the docket, for the results of a Ford/EPA correlation test program using 2.0 and 2.2-liter Toyo Kogyo diesels.) Thus, even if it does not produce any diesels of its own, Ford should be able to make use of averaging.

Finally, Daimler-Benz should also be able to apply diesel averaging to its 1985 fleet. That company continues to expand US sales of its several diesel engine families. Although its sales are relatively small and any savings from averaging will not be a large fraction of total industry savings, Daimler-Benz should nonetheless find averaging a useful compliance tool.

It seems clear, then, that at least these four companies will be able to benefit from an averaging program. It is almost certain that several other manufacturers will benefit from an averaging program, though specific analysis of their post-1985 positions is now difficult because of uncertainty over marketing plans. Peugeot and Volvo presently sell LDDVs in this country but their U.S. diesel sales are such a small percentage of their worldwide diesel sales that their flexibility under averaging will be more a function of whether they attempt to expand U.S. diesel sales. Several large automobile manufacturers, such as Chrysler, Datsun, and Isuzu, presently sell no (or very few) diesel vehicles in the U.S. but may seriously enter the diesel market by 1985. Any manufacturer selling large numbers of

LDDVs or LDDTs would benefit from the averaging program, since even if the manufacturer had only one basic engine it could be divided into two (or more) engine families, with differing control hardware (for example, one family with a trap-oxidizer and one without). Therefore, it is apparent that particulate averaging would benefit almost every (and probably all) LDDV and LDDT manufacturers.

2. *Potential Industry-Wide Reductions in Trap Usage.* The following projection of how many less traps the light-duty diesel industry will use under an averaging program will rely on the sales projections developed in the final particulate rulemaking ("Regulatory Analysis of the Light-Duty Diesel Particulate Regulations for 1982 and Later Model Year Vehicles," February 20, 1980). The serious economic difficulties which the motor vehicle industry has encountered since EPA performed that analysis will certainly affect future light-duty diesel production. However, EPA believes the original projections of the general trends over the 1985 and later timeframe are still reasonably accurate. To the extent that EPA receives comprehensive data and projections from the manufacturers, the Agency will be able to update the analysis for the final rule.

In the original rulemaking EPA projected that 1.842 million light-duty diesels would be sold in 1985 ("Summary and Analysis of Comments on the Notice of Proposed Rulemaking for the Control of Light-Duty Diesel Particulate Emissions From 1981 and Later Model-Year Vehicles," Table V–5, p. 74). This figure did not include VW Rabbits, so the number should be adjusted upward to 1.931 million to add them (using the same basic data from the original analysis).

This projected 1985 fleet can be subdivided into four categories based on their non-trap particulate levels. EPA expects that some 70 percent of the light-duty diesels by that time will have engine-out emission levels very close to or below the 0.2 g/mi standard (and perhaps an even greater percentage if the NOx standard is greater than 1.0 g/mi). Of this 70 percent, it seems likely that more than half will be below the standard without traps. (This estimate differs from that in the original analysis which assumed only VW Rabbits would emit below 0.20 g/mi in 1985. The emergence of several other low particulate engines and prototypes, as discussed in the previous section, warrants today's more optimistic assessment.) This analysis will use a fraction of 40 precent below the standard and 30 percent slightly above (between 0.20 and 0.25 g/mi).

The remainder of the diesel fleet, including most light-duty trucks (which only have to meet a standard of 0.26 g/mi), will be made up of vehicles which have engine-out emissions above and below the ceiling of 0.4 g/mi. The vehicles which have engine-out emission levels around the ceiling will need traps. EPA estimates that these vehicles will make up 10 percent of the 1985 diesel fleet. This leaves 20 percent which would be in the 0.25 to 0.40 g/mi range, below the ceiling but needing traps in the absence of an averaging program.

According to this breakdown, 50 percent of the light-duty diesels in 1985 would have non-trap emissions between the standard and the ceiling and thus would require traps without averaging but might be able to be sold without traps if averaging is implemented. Applying this to the estimated total sales figure results in 966,000 vehicles which would be candidates to benefit from averaging.

The final step is to determine how many of these potential vehicles might be sold without traps under averaging. Here, estimating that averaging would allow the industry to avoid traps on between 25 and 50 percent of these vehicles, between 241,000 and 482,000 vehicles which otherwise would need traps could avoid them through averaging.

B. Resulting Cost Savings

It is possible to associate an average cost per trap with these figures and estimate a range of cost savings to the industry. In the cost analysis for the original particulate rulemaking, EPA used a range of costs for traps and their associated hardware which was based on engine size as well as production volume of the company. The analysis here is much more rudimentary because of its preliminary nature. In addition, EPA has assumed here a different fleet composition, one based on newer information about emerging low particulate engines. Hence, the cost estimates here should not be directly compared with the original cost numbers but rather should be taken as a rough but current projection of the economic benefits of the proposed averaging program.

In the original rulemaking, the sales-weighted cost for traps was given at $147–$174 in 1979 dollars. Based upon a midpoint estimate of $160 (1979 dollars) as a representative trap cost, this becomes $187 in 1981 dollars. For a range of 241,000 to 482,000 traps "saved" in 1985, there should be cost savings for that year of $45.1 million to $90.1 million (1981 dollars).

Now, in looking at total savings over the 1985–89 period, the analysis will assume that each year's cost savings will be the same (although as manufacturers gain experience with averaging and as they shift further toward smaller vehicles their savings might actually increase year by year). Expanding the 1985 savings to correspond to the full 5-year period, the total aggregate savings from this proposal should be $188 million to $376 million (1981 dollars, present value in 1985). This number may be taken as EPA's preliminary estimate of the benefits of the proposed averaging program.

It is important to note that there may be other costs or cost savings associated with particulate averaging (such as increased testing costs or savings in control technology other than traps). However, these effects should be small in comparison to the savings in particulate traps, and this analysis does not attempt to quantify them.

IV. Effect on Competition

The effect of averaging on competition between manufacturers has been a prime concern of EPA in evaluating various approaches to averaging. There are a number of ways in which the ability to make use of averaging's flexibilities varies from manufacturer to manufacturer. For example, a manufacturer producing only one basic engine line might certify that engine in two families, one with trap-oxidizers and one without (presuming that the basic engine could not meet the standard without control). This would reduce the number of traps which that manufacturer would need to use. However, that manufacturer would still have to sell some of its vehicles with trap-oxidizers. On the other hand, a manufacturer with several engine lines might be able to market a directly competing family with no trap-oxidizers at all. This could be done by equipping one of its other families with trap-oxidizers to meet the applicable standard. It could also be done if the second manufacturer had an engine family already below the standard available to use in averaging. Thus, through averaging the vehicles of the first manufacturer could be placed at a significant disadvantage compared to vehicles from the second manufacturer. Clearly then, the number of engine lines a manufacturer has will affect its ability to benefit from averaging.

There are other characteristics which affect a manufacturer's ability to use

averaging. Sales volume can be important. A manufacturer with high sales volume might be able to offset high particulate emissions from a relatively low sales family with lower emissions from a high sales family. Manufacturers with a wide range of engine sizes or vehicle weights could use their smaller, lighter (and presumably cleaner) vehicles to offset their larger, heavier vehicles. This would put them at an advantage compared to manufacturers producing only larger, heavier vehicles and therefore having nothing to average them with.

The nature of averaging, then, favors those manufacturers with broad product lines and high sales volumes. On the other hand, this particular averaging proposal is of limited scope, and thereby avoids some possible competitive impacts. The average together of gasoline-fueled and diesel engines, a possibility for gaseous emissions, does not enter into this program since gasoline-fueled engines are not subject to the particulate standards. The averaging together of light-duty vehicles and light-duty trucks is allowed in this program, but in such a way that the tendency for LDDVs to have lower emissions than LDDTs is compensated for in the determination of the composite particulate standard. Thus, there should be no competitive advantage for a manufacturer simply because it produces more or less of a certain class of vehicles.

Overall, EPA believes that the competitive impact of this averaging proposal will not place any manufacturer at a significant disadvantage. However, the potential for affecting the competitive environment does exist, and EPA invites comment on this important issue.

V. Effect on Air Quality

EPA specifically designed the proposed averaging program to increase compliance flexibility while retaining essentially all of the air quality benefits of the original particulate rulemaking. Thus there should not be any widespread air quality effects—positive or negative—if the program is implemented.

It might appear that with the reduced use of traps under averaging, air quality would surely be harmed. However, EPA believes that with or without averaging, the overall "average" emission level would be close to the standard. In a nonaveraging situation where trap-oxidizers were being applied, few vehicles would emit far below the standard because of the increased cost of traps designed to exceed the control requirements—most vehicles would be built to emit as close to the standard as possible. There would be a more varied mix of vehicles under averaging, with some emitting well below the standard and some above. However, these emissions would still average out to a level near the standard. Hence, the averaging approach should be able to lower the cost of control without significantly affecting the overall average level of emissions.

As was pointed out earlier, however, averaging could result in localized problems if vehicles with very little particulate control became a major portion of, say, a city's taxi fleet. This was the primary reason for including an upper limit for the emissions of any individual engine family. EPA remains concerned about this kind of effect even with a ceiling of 0.4 g/mi and invites commenters to address this issue.

VI. Authority

These regulations are proposed under sections 202, 203, 205, 206, and 301 of the Clean Air Act. This NPRM represents the Agency's first proposal of an averaging program for mobile sources. EPA believes that its broad authority to promulgate regulations covering how manufacturers must demonstrate compliance with Section 202 standards provides authority for these regulations.

Although it appears that Congress did not specifically contemplate an averaging program when it enacted the Clean Air Act, it gave the Agency wide discretion, within the certification framework, to design a compliance program. The proposed regulations are consistent with the certification scheme, and do not conflict with other mobile source statutory provisions. Finally, the program is consistent with Congress' goal to reduce total suspended particulate levels, since averaging should change neither the promulgated standards nor the total fleet emissions under those standards.

VII. Specific Requests for Comments

EPA hopes a wide range of parties will comment on this important rulemaking. Outlined below are a series of items which the Agency would like addressed in comments. While EPA would appreciate comments identified according to items in this request, the outline is not meant to limit comment in any way, and the Agency welcomes comments on other issues as well.

It is EPA's intention to assure all interested parties an opportunity to study all information which may become the basis for final action in this proceeding. Accordingly, EPA will not consider in this rulemaking any material which cannot be made available to the public. Parties who wish to submit information in response to this Notice of Proposed Rulemaking are cautioned that EPA will not consider, but will return to the commenter, any comments which are claimed to be confidential.

A. Comments on the Design of the Program

1. Please discuss each of the following issues, considering the rationale as stated earlier in the preamble. Please be as specific as you can in your comments and suggested remedies.

a. EPA has based the averaging proposal on engine family compliance, as well as company-wide compliance. Please evaluate these key aspects of the program.

b. EPA has proposed an upper limit on the emissions of any LDDV or LDDT family of 0.4 g/mi but EPA is also considering a ceiling of 0.6 g/mi as well as no ceiling at all.

i. Will the 0.4 g/mi limit allow sufficient flexibility in the application of averaging?

ii. If you support a higher upper limit or no limit at all, what would be the effect on the localized emissions of Question D.2?

iii. Would a high upper limit or no limit at all benefit companies with broad product lines or high sales volumes more so than smaller companies?

c. Please comment on the following points relating to averaging particulate emission levels of vehicles designed only for marketing under standards applicable in one geographical region with vehicles designed only for marketing under standards applicable in a different geographical region:

i. How significant a risk would allowing this kind of averaging present to air quality within a given region?

ii. If EPA prohibits this kind of averaging, would EPA create any difficulties for achieving compliance? If so, what are these difficulties?

iii. If EPA does not permit this kind of averaging, what vehicles should EPA include in determining separate averages for different regions? How should EPA treat vehicles which are designed to meet standards in more than one of these regions—should EPA include them in the averages associated with individual regions, or should EPA include them in a separate averaging determination? What are the advantages/disadvantages to the different types of treatment?

d. As discussed earlier in this preamble, an averaging program like the one proposed here could disproportionately benefit companies with broad product lines or higher sales

volumes, improving their competitive position. Do you believe that would be a problem? If so, can you suggest ways in which the averaging program could be improved to minimize the effects on the competitive environment?

e. Please comment on the proposal to allow manufacturers to combine LDDTs with LDDVs in determining compliance. Include an analysis of any anti-competitive effects you find in this option.

f. Please comment on the Agency's assessment of the statutory authority for the proposed program.

g. What other specific or general comments do you have about the proposed program? Where you find problems, it would be helpful to include clear suggestions for how you would remedy them.

B. Comments Relating to Technology

1. Light-duty diesel manufacturers: How many light-duty diesel engines families do you expect to market in 1985?

a. For each family, please list approximate engine sizes, particulate levels, and projected sales. Use best judgments when actual information is not available.

b. If you cannot project to 1985, please answer this question for an earlier model year.

C. Comments Relating to Costs

1. Please estimate the cost to the consumer of 1985 particulate traps, in 1981 dollars. If there is likely to be a range of costs due to size differences, etc., please estimate those costs as well, including your basis.

2. Other than allowing different patterns of trap usage in the fleets, will the proposed averaging program result in any other cost savings or additional costs, as compared with the existing compliance program for particulate emissions? Please quantify as much as you can any such costs or savings.

D. Comments Relating to Air Quality

1. Do you agree with the judgment that the proposed averaging program will result in little or no degradation in air quality, relative to the existing compliance program?

2. Please comment on the possibility of a localized ambient particulate problem resulting from an averaging program (*e.g.*, is it a likely problem; how great or small would the effect be; can you suggest a remedy; etc.).

Administrative Designation

Under Executive Order 12291 EPA must judge whether a regulation is "major" and therefore subject to the requirement of a Regulatory Impact Analysis. This regulation is not major because it involves no negative cost impacts and has no significant adverse effect on competition, productivity, investment, employment, or innovation.

This regulation was submitted to the Office of Management and Budget for review as required by Executive Order 12291. Any comments from OMB to EPA and any EPA response to those comments are available for public inspection in the docket cited at the beginning of this preamble.

Effect on Small Entities

Section 605 of the Regulatory Flexibility Act requires that the Administrator certify regulations that do not have a significant impact on a substantial number of small entities. I certify that this regulation indeed does not have any significant impact on small entities. Few, if any, small entities market diesel engines which are the subject of these regulations. Therefore, no small entities should see any significant impact.

Impacts of Reporting Requirements

The information collection requirements in this proposed rule will be submitted to the Office of Management and Budget (OMB) for clearance under the Paperwork Reduction Act of 1980. The information requirements or recordkeeping in this proposed rule will not take place until it has been cleared by OMB. If OMB approves, the information collection requirements will take effect as set forth in this proposal rule. If not, EPA will revise the information requirements (and this rule, if appropriate) to comply with OMB's determination.

Dated: November 20, 1981.

Anne M. Gorsuch,

Administrator.

PART 85—CONTROL OF AIR POLLUTION FROM MOTOR VEHICLE AND MOTOR VEHICLE ENGINES

For the reasons set forth in the preamble, Part 85 of Chapter I, Title 40 of the Code of Federal Regulations is proposed to be amended as follows:

§§ 85.1503, 85.1504, 85.1505, 85.1602, 85.1608, 85.1803 and 85.1805 [Amended]

By adding the words "(or family particulate emission limits, as defined in Part 86)" after the word "standard" or "standards" in:

a. Section 85.1503, introductory paragraph;

b. Section 85.1504, introductory paragraph;

c. Section 85.1504(a);

d. Section 85.1504(a)(1);

e. Section 85.1504(b);

f. Section 85.1505(a);

g. Section 85.1602(a)(1);

h. Section 85.1608(b), second sentence;

i. Section 85.1803(a), first sentence;

j. Section 85.1805(a)(1), first and second sentences.

§ 85.1602 [Amended]

2. By adding the words "(or family particulate emission limit, as defined in Part 86)" after the word "standard" in:

a. Section 85.1602(b).

Note.—As an aid for the reader in understanding the proposed rule changes for light-duty vehicle and truck particulate regulations below, the amendatory language for each section identifies those paragraphs which are proposed to be added or for which significant changes are being proposed. However, minor changes which do not affect the meaning of a section, such as the addition of the phrase "or family particulate emission limit(s)" when the word "standard(s)" is used, or an updating of a section reference, number, are not specifically identified in the section headings (though the affected paragraphs are rewritten). In addition, the amendatory language identifies paragraphs affecting light-duty truck high-altitude regulations which are proposed to be completely or partially deleted and which were erroneously added to Part 86 during a previous rulemaking.

PART 86—CONTROL OF AIR POLLUTION FROM NEW MOTOR VEHICLES AND NEW MOTOR VEHICLES ENGINES: CERTIFICATION AND TEST PROCEDURES

For the reasons set out in the preamble, Part 86 of Chapter I of Title 40 of the Code of Federal Regulations is proposed to be amended as follows:

1. Section 86.085–2 is proposed to be added to read as follows:

§ 86.085–2 Definitions.

The definitions in § 86.084–2 remain effective. The definitions listed in this section apply beginning with the 1985 model year.

"Composite particulate standard", for a manufacturer which elects to average Diesel light-duty vehicles and Diesel light-duty trucks together in the particulate averaging program, means that standard calculated according to the following equation and rounded to the nearest hundredth gram-per-mile:

$$\frac{(PROD_{LDV})\,(STD_{LDV}) + (PROD_{LDT})\,(STD_{LDT})}{(PROD_{LDV} + PROD_{LDT})} = \text{Manufacturer Composite Particulate Standard}$$

where:

$PROD_{LDV}$ represents the manufacturer's total Diesel light-duty vehicle production for a given model year.

STD_{LDV} represents the light-duty vehicle particulate standard.

$PROD_{LDT}$ represents the manufacturer's total Diesel light-duty truck production for a given model year.

STD_{LDT} represents the light-duty truck particulate standard.

"Family particulate emission limit" means the particulate emission level to which an engine family is certified in the particulate averaging program, expressed to an accuracy of one hundredth gram-per-mile.

"Production-weighted average" means the manufacturer's production-weighted average particulate emission level, for certification purposes, of all of its Diesel engine families included in the particulate averaging program. It is calculated at the end of the model year by multiplying each family particulate emission limit by its respective production, summing these terms, and dividing the sum by the total production of the affected families.

2. Section 86.085–8 is proposed to be amended by revising paragraph (a)(1)(iv) to read as follows:

§ 86.085–8 Emission standards for 1985 light-duty vehicles.

(a)(1) * * *

(iv) *Particulate emissions* (Diesels only). 0.20 gram per vehicle mile (0.124 gram per vehicle kilometer). A manufacturer may elect to include all or some of its Diesel light-duty vehicles in the particulate averaging program. If the manufacturer elects to average Diesel light-duty vehicles and Diesel light-duty trucks together in the particulate averaging program, its composite particulate standard applies to its entire Diesel light-duty vehicle and Diesel light-duty truck fleet and is calculated as defined in § 86.085–2. Under the particulate averaging program, the maximum allowable particulate emission level for Diesel light-duty vehicles is 0.40 gram per vehicle mile (0.248 gram per vehicle kilometer).

* * * * *

3. Section 86.085–9 is proposed to be amended by removing paragraphs (d) and (e) and by revising paragraph (a)(1)(iv) to read as follows:

§ 86.085–9 Emission standards for 1985 light-duty trucks.

(a)(1) * * *

(iv) *Particulate emissions.* (Diesels only). 0.26 gram per vehicle mile (0.162 gram per vehicle kilometer). A manufacturer may elect to include all or some of its Diesel light-trucks in the particulate averaging program. If the manufacturer elects to average both Diesel light-duty vehicles and Diesel light-duty trucks together in the particulate average program, its composite particulate standard applies to its entire Diesel light-duty vehicle and Diesel light-duty truck fleet and is calculated as defined in § 86.085–2. Under the particulate averaging program, the maximum allowable particulate emission level for Diesel light-duty trucks is 0.04 gram per vehicle mile (0.248 gram per vehicle kilometer).

* * * * *

4. Section 86.085–21, which differs from § 86.084–21 only in that paragraphs (a) and (c) are revised and paragraph (b)(7) is introduced, is proposed to be added to read as follows:

§ 86.085–21 Application for certification.

(a) A separate application for a certificate of conformity shall be made for each set of standards (or family particulate emission limit as appropriate) and each class of new motor vehicles or new motor vehicle engines. Such applicaton shall be made to the Administrator by the manufacturer and shall be updated and corrected by amendment.

(b) The application shall be in writing, signed by an authorized representative of the manufacturer, and shall include the following:

(1)(i) Identification and description of the vehicles (or engines) covered by the application and a description of their engine (vehicle only), emission control system and fuel system components. This shall include a detailed description of each auxiliary emission control device (AECD) to be installed in or on any certification test vehicle (or certification test engine).

(ii)(A) The manufacturer shall provide to the Administrator in the preliminary application for certification:

(*1*) A list of those parameters which are physically capable of being adjusted (including those adjustable parameters for which access is difficult) and that, if adjusted to settings other than the manufacturer's recommended setting, may affect emissions;

(*2*) A specification of the manufacturer's intended physically adjustable range of each such parameter, and the production tolerances of the limits or stops used to establish the physically adjustable range;

(*3*) A description of the limits or stops used to establish the manufacturer's intended physically adjustable range of each adjustable parameter, or any other means used to inhibit adjustment;

(*4*) The nominal or recommended setting, and the associated production tolerances, for each such parameter.

(B) The manufacturer may provide, in the preliminary application for certification, information relating to why certain parameters are not expected to be adjusted in actual use and to why the physical limits or stops used to establish the physically adjustable range of each parameter, or any other means used to inhibit adjustment, are expected to be effective in preventing adjustment of parameters on in-use vehicles to settings outside the manufacturer's intended physically adjustable ranges. This may include results of any tests to determine the difficulty of gaining access to an adjustment or exceeding a limit as intended or recommended by the manufacturer.

(C) The Administrator may require to be provided detailed drawings and descriptions of the various emission related components, and/or hardware samples of such components, for the purpose of making his determination of which vehicle or engine parameters will be subject to adjustment for new certification and Selective Enforcement Audit testing and of the physically adjustable range for each such vehicle or engine parameter.

(2) Projected U.S. sales data sufficient to enable the Administrator to select a test fleet representative of the vehicles (or engines) for which certification is requested.

(3) A description of the test equipment and fuel proposed to be used.

(4)(i) A description of the test procedures to be used to establish the evaporative emission deterioration factors required to be determined and supplied in § 86.084–23(b)(2).

(ii)(A) A description of the test procedures to be used to establish the durability data or the exhaust emission deterioration factors required to be determined and supplied in § 86.084–23(b)(1).

(B)(*1*) A statement of the useful life of use of each light-duty truck engine family and heavy-duty engine family up to engine retirement or rebuild (whichever occurs first) as determined by the manufacturer on the basis of the following:

(*i*) For existing engine families, survey information on in-service vehicles (or engines) or;

(*ii*) For new engine families, durability testing of prototype vehicles (or engines) or a combination of benchtype component life evaluations and survey information on similar previous vehicles (or engines).

(*2*) The manufacturer shall not determine an engine family's useful life to be less than the basic period of the mechanical warranty on the engine

assembly. This useful life shall be expressed as a period of engine or vehicle operation or as an equivalent vehicle mileage (or both) and shall be consistent with the rebuild criteria specified in paragraph (b)(4)(ii)(C) of this section. The manufacturer shall include in the application the data or information on which it based its determination of the useful life.

(C) For each light-duty truck engine family and heavy-duty engine family, a statement of the criteria which are to be used in determining the need for engine rebuild and their critical values, including the following:

(*1*) The minimum cylinder compression for any one cylinder and for any two cylinders, in pounds per square inch (or kilopascals). Compression shall be measured without the addition of oil or another fluid into the cylinder.

(*2*) The maximum rate of engine lubricant oil usage by the engine, in quarts per 1,000 miles (or quarts per 30 hours).

(*3*) The maximum mass of foreign metal in the crankcase, in grams per quart of crankcase oil.

(*4*) Any other measurable indicator(s) of engine condition approved by the Administrator and the critical value(s) which signal(s) the need for a rebuild.

(*5*) A statement of recommended maintenance and procedures necessary to assure that the vehicle (or engines) covered by a certificate of conformity in operation conform to the regulations, and a description of the program for training of personnel for such maintenance, and the equipment required.

(*6*) At the option of the manufacturer, the proposed composition of the emission-data test fleet or (where applicable) the durability-data test fleet.

(*7*) If the manufacturer elects to participate in the particulate averaging program for Diesel light-duty vehicles and/or Diesel light-duty trucks, the application must list the family particulate emission limit and the anticipated production volume of the family for the model year.

(i) The manufacturer chooses the level of the family particulate emission limits, accurate to one hundredth of a gram-per-mile. Under particulate averaging, family particulate emission limits may not exceed 0.40 gram per vehicle mile (0.248 gram per vehicle kilometer).

(ii) The manufacturer may at any time during production elect to change the level of any family particulate emission limit(s) by submitting the new limit(s) to the Administrator and by demonstrating compliance with the limit(s) as described in §§ 86.085–28(a)(5) and 86.085–28(b)(5).

(c) Complete copies of the application and of any amendments thereto, as well as any changes described in § 86.085–21(b)(7)(ii), and of all notifications under §§ 86.079–32, 86.079–33, and 86.079–34 shall be submitted in such multiple copies as the Administrator may require.

(d) Incomplete light-duty trucks shall have a maximum completed curb weight and maximum completed frontal area specified by the manufacturer.

5. Section 86.085–23, which differs from § 86.084–23 only in that paragraph (c) is revised and paragraph (f) is introduced, is proposed to be added to read as follows:

§ 86.085–23 Required data.

(a) The manufacturer shall perform the tests required by the applicable test procedures, and submit to the Administrator the following information: *Provided, however,* That:

(1) If requested by the manufacturer, the Administrator may waive any requirement of this section for testing of vehicles (or engines) for which emission data are available, or will be made available, under the provisions of § 86.085–29, or

(2) If requested by the manufacturer, the Administrator may waive any requirement of this section for testing of vehicles at zero kilometers of operation.

(b)(1)(i) Exhaust emission durability data on such light-duty vehicles tested in accordance with applicable test procedures and in such numbers as specified, which will show the performance of the systems installed on or incorporated in the vehicle for extended mileage, as well as a record of all pertinent maintenance performed on the test vehicles.

(ii) Exhaust emission deterioration factors for light-duty trucks and heavy-duty engines and all test data that are derived from the testing described under § 86.085–21(b)(4)(ii)(A) as well as a record of all pertinent maintenance. Such testing shall be designed and conducted in accordance with good engineering practice to assure that the engines covered by a certificate issued under § 86.085–30 will meet the emission standards (or family particulate emission limits as appropriate) in §§ 86.085–09, 86.084–10, or § 86.085–11 as appropriate, in actual use for the useful life of the engine.

(2) Evaporative emission deterioration factors for each evaporative emission family-evaporative emission control system combination and all test data that are derived from testing described under § 86.085–21(b)(4)(i) designed and conducted in accordance with good engineering practice to assure that the vehicles covered by a certificate issued under § 86.085–30 will meet the evaporative emission standards in §86.085–8 or § 86.085–9, as appropriate, for the useful life of the vehicle.

(3) [Reserved]

(4) [Reserved]

(c) Emission data.

(1) Certification engines. Emission data on such engines tested in accordance with applicable emission test procedures and in such numbers as specified, which will show their emissions after 125 hours of operation. A zero-hour test may be performed after the engine has been approved by the Administrator to begin service accumulation.

(d) A statement that the vehicles (or engines) for which certification is requested conform to the requirements in § 86.078–5(b), and that the descriptions of tests performed to ascertain compliance with the general standards in § 86.078–5(b), and the data derived from such tests, are available to the Administrator upon request.

(e)(1) A statement that the test vehicles (or test engines) with respect to which data are submitted to demonstrate compliance with the applicable standards (or family particulate emission limits) of this subpart are in all material respects as described in the manufacturer's application for certification, have been tested in accordance with the applicable test procedures utilizing the fuels and equipment described in the application for certification and that on the basis of such tests the vehicles (or engines) conform to the requirements of this part. If such statements cannot be made with respect to any vehicle (or engine) tested, the vehicle (or engine) shall be identified, and all pertinent data relating thereto shall be supplied to the Administrator. If, on the basis of the data supplied and any additional data as required by the Administrator, the Administrator determines that the test vehicle (or test engine) was not as described in the application for certification or was not tested in accordance with the applicable test procedures utilizing the fuels and equipment as described in the application for certification, the Administrator may make the determination that the vehicle (or engine) does not meet the applicable standards (or family particulate emission limits). The provisions of § 86.085–30(b) shall then be followed.

(2) For evaporative emission durability, or light-duty truck or heavy-duty engine exhaust emission durability,

a statement of compliance with paragraph (b)(2) or (b)(1)(ii) of this section, as applicable.

(f) Additionally, for manufacturers participating in the particulate averaging program:

(1) In the application for certification, a statement that the vehicles for which certification is requested will not, to the best of the manufacturer's belief, when included in the manufacturers' production-weighted average emission level, cause the applicable particulate standard(s) to be exceeded.

(2) No longer than 90 days after the end of a given model year of production, the number of vehicles produced in each engine family at each certified family particulate emission limit, along with the resulting production-weighted average particulate emission level.

6. Section 86.085–28 is proposed to be amended by revising paragraphs (a)(2), (a)(3), (a)(4)(iii), (a)(4)(iv), (b)(2), (b)(3), (b)(4)(i), (b)(4)(iv), and (b)(7) and by adding paragraphs (a)(5), (a)(6), and (b)(5) to read as follows:

§ 86.085–28 Compliance with emission standards.

(a) * * *

(2) The applicable exhaust and fuel evaporative emission standards (and family particulate emission limits, as appropriate) of this subpart apply to the emissions of vehicles for their useful life.

(3) Since it is expected that emission control efficiency will change with mileage accumulation on the vehicle, the emission level of a vehicle which has accumulated 50,000 miles will be used as the basis for determining compliance with the standards (or family particulate emission limits, as appropriate).

(4) The procedure for determining compliance of a new motor vehicle with exhaust emission standards (or family particulate emission limits, as appropriate) is as follows:

* * * * *

(iii) The emissions to compare with the standard (or family particulate emission limit, as appropriate) shall be the adjusted emissions of paragraphs (a)(4)(ii)(A) and (B) of this section for each emission-data vehicle. Before any emission value is compared with the standard (or family particulate emission limit, as appropriate), it shall be rounded, in accordance with ASTM E 29–67, to two significant figures. The rounded emission values may not exceed the standard (or family particulate emission limit, as appropriate).

(iv) Every test vehicle of an engine family must comply with the exhaust emission standards (or family particulate emission limits, as appropriate), as determined in paragraph (a)(4)(iii) of this section, before any vehicle in that family may be certified.

* * * * *

(5) If a manufacturer chooses to change the level of any family particulate emission limit(s) in the particulate averaging program, compliance with the new limit(s) must be shown using the existing certification data for that engine family, any Selective Enforcement Audit data, and any emissions data EPA has accumulated for purposes of determining compliance under § 207(c) of the Act.

(6) If a manufacturer chooses to participate in the particulate averaging program, the production-weighted average of the family particulate emission limits of all affected engine families must comply with the particulate standards in §§ 86.085–8(a)(1)(iv) and 86.085–9(a)(1)(iv), as appropriate, at the end of the production year.

(b) * * *

(2) The exhaust and fuel evaporative emission standards (and the family particulate emission limits, as appropriate) of § 86.085–9 apply to the emissions of vehicles for their useful life.

(3) Since emission control efficiency generally decreases with the accumulation of mileage on the vehicle, deterioration factors will be used in combination with emission-data vehicle test results as the basis for determining compliance with the standards (or family particulate emission limits, as appropriate).

(4)(i) Paragraph (b)(4) of this section describes the procedure for determining compliance of a new vehicle with exhaust emission standards (or family particulate emission limits, as appropriate), based on deterioration factors supplied by the manufacturer.

* * * * *

(iv) The emission values to compare with the standards (or family particulate emission limits, as appropriate) shall be the adjusted emission values of paragraph (b)(4)(iii) of this section rounded to two significant figures in accordance with ASTM E 29–67 for each emission-data engine.

(5)(i) Paragraph (b)(5) of this section applies only to manufacturers which elect to participate in the particulate averaging program.

(ii) If a manufacturer chooses to change the level of any family particulate emission limit(s), compliance with the new limit(s) must be shown using the existing certification data for that engine family, any Selective Enforcement Audit data, and any emissions data EPA has accumulated for purposes of determining compliance under section 207(c) of the Act.

(iii) The production-weighted average of the family particulate emission limits of all affected engine families must comply with the particulate standards in §§ 86.085–8(a)(1)(iv) and 86.085–9(a)(1)(iv), as appropriate, at the end of the production year.

* * * * *

(7) Every test vehicle of an engine family must comply with all applicable standards (and family particulate emission limits, as appropriate), as determined in paragraph (b)(4)(iv) and paragraph (b)(6) of this section, before any vehicle in that family will be certified.

* * * * *

7. Section 86.085–29, which differs from § 86.084–29 only in that paragraph (a)(3) is revised, is proposed to be added to read as follows:

§ 86.085–29 Testing by the Administrator.

(a)(1) Paragraph (a) of this section applies to light-duty vehicles and light-duty trucks.

(2) The Administrator may require that any one or more of the test vehicles be submitted to him, at such place or places as he may designate, for the purposes of conducting emissions tests. The Administrator may specify that he will conduct such testing at the manufacturer's facility, in which case instrumentation and equipment specified by the Administrator shall be made available by the manufacturer for test operations. Any testing conducted at a manufacturer's facility pursuant to this paragraph shall be scheduled by the manufacturer as promptly as possible.

(3)(i) Whenever the Administrator conducts a test on a test vehicle, the results of that test shall, unless subsequently invalidated by the Administrator, comprise the official data for the vehicle at the prescribed test point and the manufacturer's data for that prescribed test point shall not be used in determining compliance with emission standards (or family particulate emission limits as appropriate).

(ii) Whenever the Administrator does not conduct a test on a test vehicle at a test point, the manufacturer's test data will be accepted as the official data for that point: *Provided,* That if the Administrator makes a determination based on testing under paragraph (a)(2) of this section, that there is a lack of correlation between the manufacturer's test equipment and the test equipment used by the Administrator, no

manufacturer's test data will be accepted for purposes of certification until the reasons for the lack of correlation are determined and the validity of the data is established by the manufacturer: *And further provided,* That if the Administrator has reasonable basis to believe that any test data submitted by the manufacturer is not accurate or has been obtained in violation of any provisions of this part, the Administrator may refuse to accept that data as the official data pending retesting or submission or further information. If the manufacturer conducts more than one test on a vehicle, as authorized under § 86.084–26 (a)(3)(i) or (b)(4)(i), the data from the last test in that series of tests on that vehicle, will constitute the official data.

(iii)(A)(*1*) The Administrator may adjust or cause to be adjusted any adjustable parameter of an emission data vehicle or engine which the Administrator has determined to be subject to adjustment for certification and Selective Enforcement Audit testing in accordance with § 86.084–22(e)(1), to any setting within the physically adjustable range of that parameter, as determined by the Administrator in accordance with § 86.084–22(e)(3)(i), prior to the performance of any tests to determine whether such vehicle or engine conforms to applicable emission standards (or family particulate emission limits, as appropriate), including tests performed by the manufacturer under § 86.085–23(c)(1). However, if the idle speed parameter is one which the Administrator has determined to be subject to adjustment, the Administrator shall not adjust it to a setting which causes a higher engine idle speed than would have been possible within the physically adjustable range of the idle speed parameter on the vehicle before it accumulated any mileage, all other parameters being adjusted identically for the purpose of comparison. The Administrator, in making or specifying such adjustments, will consider the effect of the deviation from the manufacturer's recommended setting on emissions performance characteristics as well as the likelihood that similar settings will occur on in-use light-duty vehicles or light-duty trucks. In determining likelihood, the Administrator will consider factors such as, but not limited to, the effect of the adjustment on vehicle performance characteristics and surveillance information from similar in-use vehicles.

(*2*) For those vehicles or engine parameters which the Administrator has not determined to be subject to adjustment during certification and Selective Enforcement Audit testing in accordance with § 86.084–22(e)(1), the emission-data vehicle presented to the Administrator for testing shall be calibrated within the production tolerances applicable to the manufacturer's specifications to be shown on the vehicle label (see § 86.085–35 (a)(1)(iii)(D) or (a)(2)(iii)D)) as specified in the application for certification. If the Administrator determines that a vehicle is not within such tolerances, the vehicle will be adjusted, at the facility designated by the Administrator, prior to the test and an engineering report shall be submitted to the Administrator describing the corrective action taken. Based on the engineering report, the Administrator will determine if the vehicle will be used as an emission-data vehicle.

(B) If the Administrator determines that the test data developed on an emission-data vehicle under paragraph (a)(3)(i) of this section would cause that vehicle to fail due to excessive 4,000 mile emissions or by application of the appropriate deterioration factor, then the following procedure shall be observed:

(*1*) The manufacturer may request a retest. Before the retest, those vehicle or engine parameters which the Administrator has not determined to be subject to adjustment for certification and Selective Enforcement Audit testing in accordance with § 86.084–22(e)(1) may be readjusted to manufacturer's specification, if these adjustments were made incorrectly prior to the first test. The Administrator may adjust or cause to be adjusted any parameter which the Administrator has determined to be subject to adjustment to any setting within the physically adjustable range of that parameter, as determined by the Administrator in accordance with § 86.084–22(e)(3)(i). However, if the idle speed parameter is one which the Administrator has determined to be subject to adjustment, the Administrator shall not adjust it to a setting which causes a higher engine idle speed than would have been possible within the physically adjustable range of the idle speed parameter on the vehicle before it accumulated any mileage, all other parameters being adjusted identically for the purpose of comparison. Other maintenance or repairs may be performed in accordance with § 86.084–25. All work on the vehicle shall be done at such location and under such conditions as the Administrator may prescribe.

(*2*) The vehicle will be retested by the Administrator and the results of this test shall comprise the official data for the emission-data vehicle.

(iv) If sufficient durability data are not available at the time of any emission test conducted under paragraph (a)(2) of this section to enable the Administrator to determine whether an emission-data vehicle would fail, the manufacturer may request a retest in accordance with the provisions of paragraphs (a)(3)(iii)(A) and (B) of this section. If the manufacturer does not promptly make such request, she shall be deemed to have waived the right to a retest. A request for retest must be made before the manufacturer removes the vehicle from the test premises.

(b)(1) Paragraph (b) of this section applies to heavy-duty engines.

(2) The Administrator may require that any one or more of the test engines be submitted to her, at such place or places as she may designate, for the purposes of conducting emissions tests. The Administrator may specify that she will conduct such testing at the manufacturer's facility, in which case instrumentation and equipment specified by the Administrator shall be made available by the manufacturer for test operations. Any testing conducted at a manufacturer's facility pursuant to this paragraph shall be scheduled by the manufacturer as promptly as possible.

(3)(i) Whenever the Administrator conducts a test on a test engine the results of that test, unless subsequently invalidated by the Administrator, shall comprise the official data for the engine at that prescribed test point and the manufacturer's data for that prescribed test point shall not be used in determining compliance with emission standards.

(ii) Whenever the Administrator does not conduct a test on a test engine at a test point, the manufacturer's test data will be accepted as the official data for that test point: *Provided,* That if the Administrator makes a determination based on testing under paragraph (b)(2) of this section, that there is a lack of correlation between the manufacturer's test equipment and the test equipment used by the Administrator, no manufacturer's test data will be accepted for purposes of certification until the reasons for the lack of correlation are determined and the validity of the data is established by the manufacturer: *And further provided,* That if the Administrator has reasonable basis to believe that any test data submitted by the manufacturer is not accurate or has been obtained in violation of any provision of this part, the Administrator may refuse to accept that data as the official data pending

retesting or submission of further information.

(iii)(A)(*1*) The Administrator may adjust or cause to be adjusted any adjustable parameter of an emission-data engine which the Administrator has determined to be subject to adjustment for certification testing in accordance with § 86.084–22(e)(1), to any setting within the physically adjustable range of that parameter, as determined by the Administrator in accordance with § 86.084–22(e)(3)(i), prior to the performance of any tests to determine whether such engine conforms to applicable emission standards, including tests performed by the manufacturer under § 86.085–23(c)(2). However, if the idle speed parameter is one which the Administrator has determined to be subject to adjustment, the Administrator shall not adjust it to a setting which causes a higher engine idle speed than would have been possible within the physically adjustable range of the idle speed parameter on the engine before it accumulated any dynamometer service, all other parameters being identically adjusted for the purpose of the comparison. The Administrator, in making or specifying such adjustments, may consider the effect of the deviation from the manufacturer's recommended setting on emissions performance characteristics as well as the likelihood that similar settings will occure on in-use heavy-duty engines. In determining likelihood, the Administrator may consider factors such as, but not limited to, the effect of the adjustment on engine performance characteristics and surveillance information from similar in-use engines.

(*2*) For those engine parameters which the Administrator has not determined to be subject to adjustment for certification testing in accordance with § 86.084–22(e)(1), the emission-data engine presented to the Administrator for testing shall be calibrated within the production tolerances applicable to the manufacturer's specifications to be shown on the engine label (see § 86.085–35(a)(3)(iii)) as specified in the application for certification. If the Administrator determines that an engine is not within such tolerances, the engine shall be adjusted at the facility designated by the Administrator prior to the test and an engineering report shall be submitted to the Administrator describing the corrective action taken. Based on the engineering report, the Administrator will determine if the engine shall be used as an emission-data engine.

(B) If the Administrator determines that the test data developed under paragraph (b)(3)(iii)(A) of this section would cause the emission-data engine to fail due to excessive 125-hour emission values or by the application of the appropriate deterioration factor, then the following procedure shall be observed:

(*1*) The manufacturer may request a retest. Before the retest, those engine parameters which the Administrator has not determined to be subject to adjustment for certification testing in accordance with § 86.084–22(e)(1) may be readjusted to the manufacturer's specifications, if these adjustments were made incorrectly prior to the first test. The Administrator may adjust or cause to be adjusted any parameter which the Administrator has determined to be subject to adjustment in accordance with § 86.084–22(e)(3)(i). However, if the idle speed parameter is one which the Administrator has determined to be subject to adjustment, the Administrator shall not adjust it to a setting which causes a higher engine idle speed than would have been possible within the physically adjustable range of the idle speed parameter on the engine before it accumulated any dynamometer service, all other parameters being identically adjusted for the purpose of the comparison. Other maintenance or repairs may be performed in accordance with § 86.084–25. All work on the vehicle shall be done at such location and under such conditions as the Administrator may prescribe.

(*2*) The engine will be retested by the Administrator and the results of this test shall comprise the official data for the emission-data engine.

(iv) If sufficient durability data are not available at the time of any emission test conducted under paragraph (b)(2) of this section to enable the Administrator to determine whether an emission-data engine would fail, the manufacturer may request a retest in accordance with the provisions of paragraph (b)(3)(iii)(B) (*1*) and (*2*) of this section. If the manufacturer does not promptly make such request, he shall be deemed to have waived the right to a retest. A request for retest must be made before the manufacturer removes the engine from the test premises.

8. Section 86.085–30, which differs from § 86.084–30 only in that paragraphs (a)(1) and (a)(3) are revised, paragraphs (a)(4), (a)(5), and (a)(6) are removed and reserved, paragraph (a) is introduced, and paragraphs (b)(1)(i)(D), (b)(1)(i)(E), (b)(1)(ii)(D), and (b)(1)(ii)(E) are removed, is proposed to be added to read as follows:

§ 86.085–30 Certification.

(a)(1) If, after a review of the test reports and data submitted by the manufacturer, data derived from any inspection carried out under § 86.078–7(c), and any other pertinent data or information, the Administrator determines that a test vehicle(s) (or test engine(s) meet(s) the requirements of the Act and of this subpart, he will issue a certificate of conformity with respect to such vehicle(s) (or engine(s)) except in cases covered by paragraph (c) of this section.

(2) Such certificate will be issued for such period not to exceed one model year as the Administrator may determine and upon such terms as he may deem necessary to assure that any new motor vehicle (or new motor vehicle engine) covered by the certificate will meet the requirements of the Act and of this part. Each such certificate shall contain the following language:

This certificate covers only those new motor vehicles (or new motor vehicle engines) which conform, in all material respects, to the design specifications that applied to those vehicles (or engines) described in the application for certification and which are produced during the——model year production period of the said manufacturer, as defined in 40 CFR 86.085–2.

It is a term of this certificate that the manufacturer shall consent to all inspections described in 40 CFR 86.078–7(c), 86.606, and 86.1006 and authorized in a warrant or court order. Failure to comply with the requirements of such a warrant or court order may lead to revocation or suspension of this certificate as specified in 40 CFR 86.085–30 (c), (d), or (e). It is also a term of this certificate that this certificate may be revoked, suspended, or voided for the other reasons stated in § 86.085–30 (c), (d), or (e).

(3) Each such certificate will certify compliance with no more than one set of standards (or one family particulate emission limit, as appropriate). One certificate will be issued for each engine family except:

(i) For gasoline-fueled light-duty vehicles and light-duty trucks, one certificate will be issued for each engine family-evaporative emission family combination.

(ii) For Diesel light-duty vehicles and light-duty trucks included in the particulate averaging program, the manufacturer may at any time during production elect to change the level of any family particulate emission limit by demonstrating compliance with the new limit as described in §§ 86.085–28(a)(5) and 86.085–28(b)(5). New certificates issued under this paragraph will be applicable only for vehicles produced subsequent to the date of issuance.

(4) [Reserved]
(5) [Reserved]
(6) [Reserved]

(7) Certificates issued for light-duty vehicles or light-duty trucks certified with catalytic converters shall be subject to the following term in addition to the term in paragraph (a)(2) of this section: "Catalyst-equipped vehicles, otherwise covered by this certificate, which are driven outside the United States, Canada, and Mexico will be presumed to have been operated on leaded gasoline resulting in deactivation of the catalysts. If these vehicles are imported or offered for the importation without retrofit of the catalyst, they will be considered not to be within the coverage of this certificate unless included in a catalyst control program operated by a manufacturer or a United States Government Agency and approved by the Administrator."

(8) Certificates issued for incomplete light-duty trucks shall be subject to the following term in addition to the term in paragraph (a)(2) of this section: "For incomplete light-duty trucks, this certificate covers only those new motor vehicles which when completed by having the primary load-carrying device or container attached, conform to the maximum curb weight and frontal area limitations described in the application for certification as required in 40 CFR 86.085–21 (d)."

(9) Certificates issued for heavy-duty engines shall be subject to the following term in addition to the term in paragraph (a)(2) of this section: "For heavy-duty engines, this certificate covers only those new motor vehicle engines installed in heavy-duty vehicles which conform to the minimum gross vehicle weight rating, curb weight, or frontal area limitations for heavy-duty vehicles described in 40 CFR 86.085–2."

(10) Certificates issued for Diesel light-duty vehicles and Diesel light-duty trucks which are a part of the particulate averaging program will be subject to the following term in addition to the term of paragraph (a)(2) of this section: "It is an express condition of this certificate that the manufacturer's production-weighted average of the particulate emission limits of all participating engine families not exceed the applicable particulate standard(s) at the end of the model year, as determined in accordance with 40 CFR Part 86. The certificate is void *ab initio* for those vehicles causing any exceedance of the particulate standard(s)."

(b)(1) The Administrator will determine whether a vehicle (or engine) covered by the application complies with applicable standards (or family particulate emission limits, as appropriate) by observing the following relationships:

(i) *Light-duty vehicle.* (A) The durability-data vehicle(s) selected under § 86.084–24(c)(1)(i) shall represent all vehicles of the same engine-system combination.

(B) The emission-data vehicle(s) selected under § 86.084–24(b)(1) (ii) through (b)(1)(iv) shall represent all vehicles of the same engine-system combination as applicable.

(C) The emission-data vehicle(s) selected under § 86.084–24(b)(1) (vii)(A) and (b)(1)(vii)(B) shall represent all vehicles of the same evaporative control system within the evaporative family.

(ii) *Light-duty trucks.* (A) [Reserved]

(B) The emission-data vehicle(s) selected under § 86.084–24(b)(1) (ii), shall represent all vehicles of the same engine-system combination as applicable.

(C) The emission-data vehicle(s) selected under § 86.084–24(b)(1) (vii)(A) and (b)(1)(vii)(B) shall represent all vehicles of the same evaporative control system within the evaporative family.

(iii) *Heavy-duty engines.* (A) A gasoline-fueled emission-data test engine selected under § 86.084–24(b)(2)(ii) and (iv) shall represent all engines in the same family of the same engine displacement-exhaust emission control system combination.

(B) A gasoline-fueled emission-data test engine selected under § 86.084–24(b)(2)(iii) shall represent all engines in the same engine family of the same engine displacement-exhaust emission control system combination.

(C) A diesel emission-data test engine selected under § 86.084–24 (b)(3)(ii) shall represent all engines in the same engine-system combination.

(D) A diesel emission-data test engine selected under § 86.084–24 (b)(3)(iii) shall represent all engines of that emission control system at the rated fuel delivery of the test engine.

(E) [Reserved]

(2) The Administrator will proceed as in paragraph (a) of this section with respect to the vehicles (or engines) belonging to an engine family or engine family-evaporative emission family combination (as applicable), all of which comply with all applicable standards (or family particulate emission limits, as appropriate).

(3) If, after a review of the test reports and data submitted by the manufacturer, data derived from any additional testing conducted pursuant to § 86.085–29, data or information derived from any inspection carried out under § 86.078–7(c) or any other pertinent data or information, the Administrator determines that one or more test vehicles (or test engines) of the certification test fleet do not meet applicable standards (or family particulate emission limits, as appropriate), she will notify the manufacturer in writing, setting forth the basis for her determination. Within 30 days following receipt of the notification, the manufacturer may request a hearing on the Administrator's determination. The request shall be in writing, signed by an authorized representative of the manufacturer and shall include a statement specifying the manufacturer's objections to the Administrator's determination and data in support of such objections. If, after a review of the request and supporting data, the Administrator finds that the request raises a substantial factual issue, she shall provide the manufacturer a hearing in accordance with § 86.078–6 with respect to such issue.

(4) For light-duty vehicles and light-duty trucks the manufacturer may, at its option, proceed with any of the following alternatives with respect to an emission-data vehicle determined not in compliance with all applicable standards (and family particulate emission limits, as appropriate) for which it was tested:

(i) Request a hearing under § 86.078–6; or

(ii) Remove the vehicle configuration (or evaporative vehicle configuration, as applicable) which failed, from his application;

(A) If the failed vehicle was tested for compliance with exhaust emission standards (or a family particulate emission limit, as appropriate) only: The Administrator may select, in place of the failed vehicle, in accordance with the selection criteria employed in selecting the failed vehicle, a new emission-data vehicle to be tested for exhaust emission compliance only.

(B) If the failed vehicle was tested for compliance with both exhaust and evaporative emission standards: The Administrator may select, in place of the failed vehicle, in accordance with the selection criteria employed in selecting the failed vehicle, a new emission-data vehicle which will be tested for compliance with both exhaust and evaporative emission standards. If one vehicle cannot be selected in accordance with the selection criteria employed in selecting the failed vehicle, then two vehicles may be selected (i.e., one vehicle to satisfy the exhaust emission vehicle selection criteria and one vehicle to satisfy the evaporative emission vehicle selection criteria). The

vehicle selected to satisfy the exhaust emission vehicle selection criteria will be tested for compliance with exhaust emission standards only. The vehicle selected to satisfy the evaporative emission vehicle selection criteria will be tested for compliance with both exhaust and evaporative emission standards; or

(iii) Remove the vehicle configuration (or evaporative vehicle configuration, as applicable) which failed from the application and add a vehicle configuration(s) (or evaporative vehicle configuration(s), as applicable) not previously listed. The Administrator may require, if applicable, that the failed vehicle be modified to the new engine code (or evaporative emission code, as applicable) and demonstrate by testing that it meets applicable standards (or the family particulate emission limit, as appropriate) for which it was originally tested. In addition, the Administrator may select, in accordance with the vehicle selection criteria given in § 86.084–24(b), a new emission-data vehicle or vehicles. The vehicles selected to satisfy the exhaust emission vehicle selection criteria will be tested for compliance with exhaust emission standards (or family particulate emission limits, as appropriate) only. The vehicles selected to satisfy the evaporative emission vehicle selection criteria will be tested for compliance with both exhaust and evaporative emission standards; or

(iv) Correct a component or system malfunction and show that with a correctly functioning system or component the failed vehicle meets applicable standards (or the family particulate emission limit, as appropriate) for which it was originally tested. The Administrator may require a new emission-data vehicle, of identical vehicle configuration (or evaporative vehicle configuration, as applicable) to the failed vehicle, to be operated and tested for compliance with the applicable standards (or the family particulate emission limit, as appropriate) for which the failed vehicle was originally tested.

(5) For heavy-duty engines the manufacturer may, at his option, proceed with any of the following alternatives with respect to any engine family represented by a test engine(s) determined not in compliance with applicable standards:

(i) Request a hearing under § 86.078–6; or

(ii) Delete from the application for certification the engines represented by the failing test engine. (Engines so deleted may be included in a later request for certification under § 86.079–32.) The Administrator will then select in place of each failing engine an alternate engine chosen in accordance with selection criteria employed in selecting the engine that failed; or

(iii) Modify the test engine and demonstrate by testing that it meets applicable standards. Another engine which is in all material respects the same as the first engine, as modified, shall then be operated and tested in accordance with applicable test procedures.

(6) If the manufacturer does not request a hearing or present the required data under paragraphs (b)(4) or (b)(5) (as applicable) of this section, the Administrator will deny certification.

(c)(1) Notwithstanding the fact that any certification vehicle(s) (or certification engine(s)) may comply with other provisions of this subpart, the Administrator may withhold or deny the issuance of a certificate of conformity (or suspend or revoke any such certificate which has been issued) with respect to any such vehicle(s) (or engine(s)) if:

(i) The manufacturer submits false or incomplete information in his application for certification thereof;

(ii) The manufacturer renders inaccurate any test data which he submits pertaining thereto or otherwise circumvents the intent of the Act, or of this part with respect to such vehicle (or engine);

(iii) Any EPA Enforcement Officer is denied access on the terms specified in § 86.078–7(c) to any facility or portion thereof which contains any of the following:

(A) The vehicle (or engine);

(B) Any components used or considered for use in its modification or buildup into a certification vehicle (or certification engine);

(C) Any production vehicle (or production engine) which is or will be claimed by the manufacturer to be covered by the certificate;

(D) Any step in the construction of a vehicle (or engine) described in paragraph (c)(1)(iii) of this section;

(E) Any records, documents, reports, or histories required by this part to be kept concerning any of the above;

(iv) Any EPA Enforcement Officer is denied "reasonable assistance" (as defined in § 86.078–7(c)) in examining any of the items listed in paragraph (c)(1)(iii) of this section.

(2) The sanctions of withholding, denying, revoking, or suspending of a certificate may be imposed for the reasons in paragraphs (c)(1) (i), (ii), (iii), or (iv) of this section only when the infraction is substantial.

(3) In any case in which a manufacturer knowingly submits false or inaccurate information or knowingly renders inaccurate or invalid any test data or commits any other fraudulent acts and such acts contribute substantially to the Administator's decision to issue a certificate of conformity, the Administrator may deem such certificate void *ab initio*.

(4) In any case in which certification of a vehicle (or engine) is proposed to be withheld, denied, revoked, or suspended under paragraph (c)(1)(iii) or (c)(1)(iv) of this section, and in which the Administrator has presented to the manufacturer reasonable evidence that a violation of § 86.078–7(c) in fact occurred, the manufacturer, if he wishes to contend that, even though the violation occurred, the vehicle (or engine) in question was not involved in the violation to a degree that would warrant withholding denial, revocation, or suspension of certification under either paragraph (c)(1)(iii) or (c)(1)(iv) of this section, shall have the burden of establishing that contention to the satisfaction of the Administrator.

(5) Any revocation or suspension of certification under paragraph (c)(1) of this section shall:

(i) Be made only after the manufacturer concerned has been offered an opportunity for a hearing conducted in accordance with § 86.078–6 hereof.

(ii) Extend no further than to forbid the introduction into commerce of vehicles (or engines) previously covered by the certification which are still in the hands of the manufacturer, except in cases of such fraud or other misconduct as makes the certification invalid *ab initio*.

(6) The manufacturer may request in the form and manner specified in paragraph (b)(3) of this section that any determination made by the Administrator under paragraph (c)(1) of this section to withhold or deny certification be reviewed in a hearing conducted in accordance with § 86.078–6. If the Administrator finds, after a review of the request and supporting data, that the request raises a substantial factual issue, he will grant the request with respect to such issue.

(d)(1) *For light-duty vehicles.* Notwithstanding the fact that any vehicle configuration or engine family may be covered by a valid outstanding certificate of conformity, the Administrator may suspend such outstanding certificate of conformity in whole or in part with respect to such vehicle configuration or engine family if:

(i) The manufacturer refuses to comply with the provisions of a test order issued by the Administrator pursuant to § 86.603; or

(ii) The manufacturer refuses to comply with any of the requirements of § 86.603; or

(iii) The manufacturer submits false or incomplete information in any report or information provided pursuant to the requirements of § 86.609; or

(iv) The manufacturer renders inaccurate any test data which he submits pursuant to § 86.609; or

(v) Any EPA Enforcement Officer is denied access to a facility on the terms specified in § 86.606; or

(vi) Any EPA Enforcement Officer is denied the opportunity on the terms specified in § 86.606, to:

(A) Monitor vehicle selection pursuant to § 86.607, or

(B) Select vehicles for testing pursuant to § 86.607, or

(C) Monitor vehicle testing performed to satisfy any of the requirements of this part; or

(vii) Any EPA Enforcement Officer is denied "reasonable assistance" as defined in § 86.606 in examining any of the items listed in that section; or

(viii) The manufacturer refuses to comply with the requirements of §§ 86.604(a), 86.605, and 86.607, 86.608, 86.610, or 86.611.

(2) The sanction of suspending a certificate may not be imposed for the reasons in paragraphs (d)(1)(i), (ii), or (viii) of this section where such refusal is caused by conditions and circumstances outside the control of the manufacturer which renders it impossible to comply with those requirements. Such conditions and circumstances shall include, but not be limited to, any uncontrollable factors which results in the temporary unavailability of equipment and personnel needed to conduct the required tests, such as equipment breakdown or failure or illness of personnel, but shall not include failure of the manufacturer to adequately plan for and provide the equipment and personnel needed to conduct the tests. The manufacturer will bear the burden of establishing the presence of the conditions and circumstances required by this paragraph.

(3) The sanctions of suspending a certificate may be imposed for the reasons in paragraphs (d)(1)(iii), (iv), (v), (vi), or (vii) of this section only when the infraction is substantial.

(4) In any case in which a manufacturer knowingly submitted false or inaccurate information or knowingly rendered inaccurate any test data or committed any other fraudulent acts, and such acts contributed substantially to the Administrator's original decision not to suspend or revoke a certificate of conformity in whole or in part, the Administrator may deem such certificate void from the date of such fraudulent act.

(5) In any case in which certification of a vehicle is proposed to be suspended under paragraph (d)(1)(v), (d)(1)(vi), or (d)(1)(vii) of this section, and in which the Administrator has presented to the manufacturer involved reasonable evidence that a violation of § 86.606 in fact occurred, the manufacturer, if he wishes to contend that even though the violation occurred, the vehicle configuration or engine family in question was not involved in the violation to the degree that would warrant suspension of certification under either paragraph (d)(1)(v), (d)(1)(vi), or (d)(1)(vii) of this section, shall have the burden of establishing that contention to the satisfaction of the Administrator.

(6) Any suspension of certification under paragraph (d)(1) of this section shall:

(i) Be made only after the manufacturer concerned has been offered an opportunity for a hearing conducted in accordance with § 86.613 hereof, and

(ii) Not apply to vehicles no longer in the hands of the manufacturer.

(e) *For light-duty trucks and heavy-duty engines.* (1) Notwithstanding the fact that any vehicle configuration or engine family may be covered by a valid outstanding certificate of conformity, the Administrator may suspend such outstanding certificate of conformity in whole or in part with respect to such vehicle or engine configuration or engine family if:

(i) The manufacturer refuses to comply with the provisions of a test order issued by the Administrator pursuant to § 86.1003; or

(ii) The manufacturer refuses to comply with any of the requirements of § 86.1003; or

(iii) The manufacturer submits false or incomplete information in any report or information provided pursuant to the requirements of § 86.1009; or

(iv) The manufacturer renders inaccurate any test data submitted pursuant to § 86.1009; or

(v) Any EPA Enforcement Officer is denied the opportunity to conduct activities related to entry and access as authorized in § 86.1006 of this part and in a warrant or court order presented to the manufacturer or the party in charge of a facility in question; or

(vi) EPA Enforcement Officers are unable to conduct activities related to entry and access as authorized in § 86.1006 of this part because a manufacturer has located a facility in a foreign jurisdiction where local law prohibits those activities; or

(vii) The manufacturer refuses to or in fact does not comply with the requirements of §§ 86.1004(a), 86.1005, 86.1007, 86.1008, 86.1010, 86.1011, or 86.1013.

(2) The sanction of suspending a certificate may not be imposed for the reasons in paragraphs (e)(1)(i), (ii), or (vii) of this section where such refusal or denial is caused by conditions and circumstances outside the control of the manufacturer which renders it impossible to comply with those requirements. Such conditions and circumstances shall include, but are not limited to, any uncontrollable factors which result in the temporary unavailability of equipment and personnel needed to conduct the required tests, such as equipment breakdown or failure or illness of personnel, but shall not include failure of the manufacturers to adequately plan for and provide the equipment and personnel needed to conduct the tests. The manufacturer will bear the burden of establishing the presence of the conditions and circumstances required by this paragraph.

(3) The sanction of suspending a certificate may be imposed for the reasons outlined in paragraph (e)(1)(iii), (iv), or (v) of this section only when the infraction is substantial.

(4) In any case in which a manufacturer knowingly submitted false or inaccurate information or knowingly rendered inaccurate any test data or committed any other fraudulent acts, and such acts contributed substantially to the Administrator's original decision not to suspend or revoke a certificate of conformity in whole or in part, the Administrator may deem such certificate void from the date of such fraudulent act.

(5) In any case in which certification of a light-duty truck or heavy-duty engine is proposed to be suspended under paragraph (e)(1)(v) of this section and in which the Administrator has presented to the manufacturer involved reasonable evidence that a violation of § 86.1006 in fact occurred, if the manufacturer wishes to contend that, although the violation occurred, the vehicle or engine configuration or engine family in question was not involved in the violation to a degree that would warrant suspension of certification under paragraph (e)(1)(v) of this section, he shall have the burden of establishing

that contention to the satisfaction of the Administrator.

(6) Any suspension of certification under paragraph (e)(1) of this section shall:

(i) Be made only after the manufacturer concerned has been offered an opportunity for a hearing conducted in accordance with § 86.1014 and,

(ii) Not apply to vehicles or engines no longer in the hands of the manufacturer.

(7) Any voiding of a certificate of conformity under paragraph (e)(4) of this section shall be made only after the manufacturer concerned has been offered an opportunity for a hearing conducted in accordance with § 86.1014.

10. Section 86.085–35, which differs from § 86.084–35 only in that paragraphs (a)(1)(iii)(D), (a)(1)(iii)(F), (a)(2)(iii)(D), (a)(2)(iii)(g) are revised, is proposed to be added to read as follows:

§ 86.085–35 Labeling.

(a) The manufacturer of any motor vehicle (or motor vehicle engine) subject to the applicable emission standards (and family particulate emission limits, as appropriate) of this subpart, shall, at the time of manufacture, affix a permanent legible label, of the type and in the manner described below, containing the information hereinafter provided, to all production models of such vehicles (or engines) available for sale to the public and covered by a certificate of conformity under § 86.084–30(a).

(1) *Light-duty vehicles.* (i) A permanent, legible label shall be affixed in a readily visible position in the engine compartment.

(ii) The label shall be affixed by the vehicle manufacturer who has been issued the certificate of conformity for such vehicle, in such a manner that it cannot be removed without destroying or defacing the label. The label shall not be affixed to any equipment which is easily detached from such vehicle.

(iii) The label shall contain the following information lettered in the English language in block letters and numerals, which shall be of a color that contrasts with the background of the label:

(A) The label heading: Vehicle Emission Control Information;

(B) Full corporate name and trademark of manufacturer;

(C) Engine displacement (in cubic inches), engine, family identification and evaporative family identification;

(D) Engine tune-up specifications and adjustments, as recommended by the manufacturer in accordance with the applicable emission standards (or family particulate emission limit, as appropriate), including but not limited to idle speed(s), ignition timing, the idle air-fuel mixture setting procedure and value (e.g., idle CO, idle air-fuel ratio, idle speed drop), high idle speed, initial injection timing, and valve lash (as applicable), as well as other parameters deemed necessary by the manufacturer. These specifications should indicate the proper transmission position during tune-up and what accessories (e.g., air conditioner), if any, should be in operation.

(E) An unconditional statement of compliance with the appropriate model year U.S. Environmental Protection Agency regulations which apply to light-duty vehicles;

(F) For vehicles which are part of the particulate averaging program, the family particulate emission limit to which the vehicle is certified.

(2) *Light-duty trucks.* (i) A legible, permanent label shall be affixed in a readily visible position in the engine compartment.

(ii) The label shall be affixed by the vehicle manufacturer who has been issued the certificate of conformity for such vehicle, in such a manner that it cannot be removed without destroying or defacing the label. The label shall not be affixed to any equipment which is easily detached from such vehicle.

(iii) The label shall contain the following information lettered in the English language in block letters and numerals, which shall be of a color that contrasts with the background of the label.

(A) The label heading: Important Vehicle Information;

(B) Full corporate name and trademark of manufacturer;

(C) Engine displacement (in cubic inches), engine, family identification and evaporative family identification;

(D) Engine tune-up specifications and adjustments, as recommended by the manufacturer in accordance with the applicable emission standards (or family particulate emission limit, as appropriate), including but not limited to idle speed(s), ignition timing, the idle air-fuel mixture setting procedure and value (e.g., idle CO, idle air-fuel ratio, idle speed drop), high idle speed, initial injection timing, and valve lash (as applicable), as well as other parameters deemed necessary by the manufacturer. These specifications should indicate the proper transmission position during tune-up and what accessories (e.g., air conditioner), if any, should be in operation.

(E) The prominent statement: "(Manufacturer's corporate name) has determined this vehicle has an average useful life of ———— miles or —— hours of operation, whichever occurs first." The manufacturer may alter this statement only to express the useful life in terms other than miles or hours (e.g., years, or hours only).

(F) The subordinate addition to the statement in subparagraph (2)(iii)(E) of this paragraph: "This engine's actual life may vary depending on its service application. (For additional information see the owner's maintenance instructions.) This engine conforms to U.S. EPA regulations applicable to 19— Model Year New Heavy-Duty Engines for its useful life."

(G) For vehicles which are a part of the particulate averaging program, the family particulate emission limit to which the vehicle was certified.

(3) *Heavy-duty engines.* (i) A permanent legible label shall be affixed to the engine in a position in which it will be readily visible after installation in the vehicle.

(ii) The label shall be attached to an engine part necessary for normal engine operation and not normally requiring replacement during engine life.

(iii) The label shall contain the following information lettered in the English language in block letters and numerals which shall be of a color that contrasts with the background of the label:

(A) The label heading: IMPORTANT ENGINE INFORMATION;

(B) Full corporate name and trademark of manufacturer;

(C) Engine displacement (in cubic inches) and engine family and model designations;

(D) Date of engine manufacture (month and year);

(E) Engine specifications and adjustments as recommended by the manufacturer. These specifications should indicate the proper transmission position during tuneup and what accessories (e.g., air conditioner), if any, should be in operation;

(F) For gasoline-fueled engines the label should include the idle speed, ignition timing, and the idle air-fuel mixture setting procedure and value (e.g., idle CO, idle air-fuel ratio, idle speed drop), and valve lash.

(G) For diesel engines the label should include the advertised hp at rmp, fuel rate at advertised hp in mm3/stroke, valve lash, initial injection timing, and idle speed.

(H) The prominent statement: "(Manufacturer's corporate name) has determined that this engine has an average useful life of ———— miles or —— hours of operation, whichever occurs first." The manufacturer may alter this statement only to express the

useful life in terms other than miles or hours (e.g., years, or hours only).

(l) The subordinate addition to the statement in paragraph (a)(3)(iii)(H) of this section: "This engine's actual life may vary depending on its service application. (For additional information see the owner's maintenance instructions.) This engine conforms to U.S. EPA regulations applicable to 19— Model Year New Heavy-Duty Engines for its useful life."

(iv) The label may be made up of one or more pieces; *Provided,* That all pieces are permanently attached to the same engine or vehicle part as applicable.

(b) The provisions of this section shall not prevent a manufacturer from also reciting on the label that such vehicle (or engine) conforms to any applicable state emission standards for new motor vehicles (or new motor vehicle engines) or any other information that such manufacturer deems necessary for, or useful to, the proper operation and satisfactory maintenance of the vehicle (or engine).

(c)(1) The manufacturer of any light-duty vehicle or light-duty truck subject to the emission standards (or family particulate emission limits, as appropriate) of this subpart shall, in addition and subsequent to setting forth those statements on the label required by the Department of Transportation (DOT) pursuant to 49 CFR 567.4, set forth on the DOT label or on an additional label located in proximity to the DOT label and affixed as described in 40 CFR 567.4(b), the following information in the English language, lettered in block letters and numerals not less than three thirty-seconds of an inch high, of a color that contrasts with the background of the label:

(i) The Heading: "Vehicle Emission Control Information."

(ii)(A) *For light-duty vehicles,* the statement: "This Vehicle Conforms to U.S. EPA Regulations Applicable to 19— Model Year New Motor Vehicles."

(B) *For light-duty trucks,* the statement: "(Manufacturer's Corporate Name) Has Determined That This Vehicle Has An Average Useful Life Of ——— Miles Or —— Hours Of Operation, Whichever Occurs First. This Engine's Actual Life May Vary Depending On Its Service Application. (For additional information see the owner's maintenance instructions.) This Vehicle Conforms To U.S. EAP Regulations Applicable To 19—Model Year New Motor Vehicles, For Its Useful Life." The manufacturer may alter this statement only to express the useful life in terms other than miles or hours (e.g., years, or hours only).

(iii) One of the following statements, as applicable, in letters and numerals not less than six thirty-seconds of an inch high and of a color that contrasts with the background of the label:

(A) For all vehicles certified as non-catalyst-equipped: "NON-CATALYST"

(B) For all vehicles certified as catalyst-equipped which are included in a manufacturer's catalyst control program for which approval has been given by the Administrator: "CATALYST—APPROVED FOR IMPORT"

(C) For all vehicles certified as catalyst-equipped which are not included in a manufacturer's catalyst control program for which prior approval has been given by the Administrator: "CATALYST"

(2) In lieu of selecting either of the labeling options of paragraph (c)(1) of this section, the manufacturer may add the information required by paragraph (c)(1)(iii) of this section to the label required by paragraph (a) of this section. The required information will be set forth in the manner prescribed by paragraph (c)(1)(iii) of this section.

(d)(1) Incomplete light-duty trucks or incomplete heavy-duty vehicles optionally certified as light-duty trucks shall have the following prominent statement printed on the label required in paragraph (a)(2) of this section in lieu of the statement required by paragraph (a)(2)(iii)(E) of this section: "(Manufacturer's Corporate Name) has determined that this vehicle has an average useful life of ——— miles or hours of operation, whichever occurs first." The manufacturer may alter this statement only to express the useful life in terms other than miles or hours (e.g., years, or hours only).

(2) The subordinate addition to the statement in subparagraph (1) of this paragraph: "This vehicle's actual life may vary depending on its service application. (For additional information see the owner's maintenance instuctions.) This engine conforms to U.S. EPA regulations applicable to 19— Model Year New Heavy-Duty Engines when installed in a vehicle completed at a curb weight of more than 6,000 pounds or with a frontal area greater than 45 square feet for its useful life."

(e)(1) Incomplete heavy-duty vehicles having an 8,500-pound gross vehicle weight rating or less shall have the following prominent statement printed on the label required in paragraph (a)(3) of this section in lieu of the statement required by paragraph (a)(3)(iii)(H) of this section: "(Manufacturer's corporate name) has determined that this engine has an average useful life of ——— miles or —— hours of operation, whichever occurs first." The manufacturer may alter this statement only to express the useful life in terms other than miles or hours (e.g., years, or hours only).

(2) In addition, the label shall have the following subordinate statement in lieu of the statement required by paragraph (a)(3)(iii)(I) of this section: "This engine's actual life may vary depending on its service application. (For additional information see the owner's maintenance instructions.) This engine conforms to U.S. EPA regulations applicable to 19— Model Year New Heavy-Duty Engines when installed in a vehicle completed at a curb weight of more than 6,000 pounds or with a frontal area greater than 45 square feet for its useful life."

(f) The manufacturer of any incomplete vehicle shall notify the purchaser of such vehicle of any curb weight, frontal area, or gross vehicle weight rating limitations affecting the emission certificate applicable to that vehicle. This notification shall be transmitted in a manner consistent with National Highway Traffic Safety Administration safety notification requirements published in 49 CFR Part 56.

Department of the Interior

Bureau of Land Management

National Petroleum Reserve—Alaska; First Oil and Gas Sale No. 821; Notice of Sale

4310-84

U.S. DEPARTMENT OF THE INTERIOR
Bureau of Land Management

National Petroleum Reserve-Alaska--
First Oil and Gas Sale No. 821;
Notice of Sale

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Sale

SUMMARY: The purpose of this notice is to announce that the first oil and gas competitive lease sale in the National Petroleum Reserve-Alaska will be held on January 27, 1982, instead of December 16, 1981, as previously announced by notice published at 46 F.R. 55426 (November 9, 1981). This notice supersedes the November 9, 1981, notice of sale, as well as the notice relating to the Department of Justice requirements for anti-trust review published at 46 F.R. 58369 (December 1, 1981), and is being published in conformance with 43 CFR 3131.4-1 which requires that a notice of sale be published in the Federal Register at least 30 days prior to the date of the sale.

FOR FURTHER INFORMATION CONTACT:

Marcia Rohn, Washington, D.C.
(202) 343-7753

Jerry Wickstrom, Anchorage, AK
(907) 271-3632

SUPPLEMENTARY INFORMATION: Notice is hereby given that at 11:00 a.m., a.s.t. January 27, 1982, certain lands within the National Petroleum Reserve in Alaska will be offered for competitive oil and gas lease sale by sealed bid of $25 per acre or more to the qualified bidder submitting the highest bonus bid in accordance with the provisions of the Department of the Interior Appropriations Act, Fiscal Year 1981 (Pub. L. 96-514). However, no bid will be accepted for less than fair market value as determined by the authorized officer.

The sealed bids will be opened, beginning at 11:00 a.m., a.s.t., January 27, 1982, in the Gold Room of the Travelers Inn, 813 Noble, Fairbanks, Alaska.

A lease issued as a result of this offering will be for a primary term of 10 years and will require payment of an annual rental of $3 per acre or fraction thereof and a royalty of 16-2/3 percent (1/6) to be paid on production saved, removed or sold.

LANDS OFFERED: The 59 tracts offered, containing approximately 1,516,257 acres, are described as follows:

Tract No.	Township/Range (Umiat Meridian)	Acreage
821-01	T. 11 N., R 1 E., Secs. 4 to 9, inclusive, Secs. 16 to 18, inclusive; T. 12 N., R. 1 E., all.	28,332

WHERE AND WHEN TO SUBMIT BIDS: Sealed bids must be mailed to, and received in, the Alaska State Office or delivered in person to the Public Room, 1st floor of the Federal Building, 701 C Street, Anchorage, AK, by 1:00 p.m., a.s.t., January 25, 1982. Sealed bids may also be personally delivered between the hours 9:00 a.m., a.s.t., and 10:00 a.m., a.s.t., January 27, 1982, to the Rampart Room of the Travelers Inn.

Each bid must be accompanied by the following:

a. Bid deposit of one-fifth the amount of bid in U.S. currency, bank draft, certified or cashier's check, payable to the order of the Bureau of Land Management. This deposit will be forfeited if a bidder, after being awarded a lease, fails to execute the lease or otherwise comply with the applicable regulations (43 CFR 3132).

b. If the bidder is an individual, a statement of citizenship in accordance with 43 CFR 3132.4(a).

c. If the bidder is an association (including a partnership), a certified copy of its articles of association or a reference to the Bureau file containing such a copy as required by 43 CFR 3132.4(b).

d. If the bidder is a corporation, (1) a statement showing the State in which it is incorporated and that it is authorized to hold Federal oil and gas leases in NPR-A or a reference to the serial number and Bureau office where such statement is of record, and (2) evidence that the person who signed the bid has authority to bind the corporation. (See 43 CFR 3132.4(c))

e. A signed certificate to the effect that the bid was arrived at independently and was tendered without collusion with any other bidder. An Independent Price Determination Certificate is available for this certification.

f. Completed forms 1140-7 (Equal Opportunity Affirmative Action Program Representation) and 1140-8 (Equal Opportunity Compliance Report Certification).

ANTITRUST REVIEW INFORMATION REQUIRED BY THE DEPARTMENT OF JUSTICE

I. General Instructions

f. Completed forms 1140-7 (Equal Opportunity Affirmative Action Program Representation) and 1140-8 (Equal Opportunity Compliance Report Certification).

Bidders are warned against violation of Section 1860, Title 18, U.S. Code, prohibiting unlawful combination or intimidation of bidder. The government reserves the right to reject any and all bids.

The bid envelope must be plainly marked that it is NOT TO BE OPENED BEFORE THE DATE AND HOUR OF THE BID OPENING, SHOW THE TRACT NUMBER, NAME OF THE COMPANY WITH AN (1) FOR AN INDIVIDUAL BID OR (1) FOR JOINT BID.

No bids received after 10:00 a.m., a.s.t., January 27, 1982, will be considered. Bids may not be modified or withdrawn unless the modifications or withdrawals are received prior to the time herein stated. Deposits shall be refunded to unsuccessful bidders. PAYMENT AND ADDITIONAL REQUIREMENTS: If a bid is accepted, two (2) copies of the lease form will be sent to the successful bidder, who will be required, not later than the 15th day after receipt, to execute both copies and return them, together with the first year's rental and the balance of the bonus bid.

The successful bidder is responsible for filing either a $100,000 corporate surety bond for a single lease or provide a NPR-A-wide $300,000 bond prior to lease issuance. In accordance with 43 CFR 3134.1(a) the bonds required by this section are in addition to any other bonds the successful bidder may have filed or be required to file under subparts 3104 and 3318 of this title.

ANTITRUST REVIEW INFORMATION REQUIRED BY THE DEPARTMENT OF JUSTICE

I. General Instructions

1. Pursuant to 43 CFR 3130.1, successful bidders for petroleum leases to be issued by the Department of the Interior in the National Petroleum Reserve in Alaska ("NPR-A") are required to submit certain information to the Department of Justice before a lease can be awarded to a successful bidder. The information is to be submitted to the Department of Justice through the Department of the Interior, Bureau of Land Management. If the submitting company wishes all or part of the information to remain confidential it should submit such information in a sealed envelope stamped confidential, which will then be transmitted to the Department of Justice unopened by the Department of the Interior.

2. The required information must be submitted by the successful bidder on a given tract. If the successful bidder bids successfully on more than one tract, the required information need be submitted only once.

3. The thirty-day antitrust review period commences upon receipt of this information by the Department of Justice. To expedite such a review, a bidder may elect to submit all of the required information in advance of the opening of the bids.

4. Definitions: For purposes of this request, the following definitions apply:

"Affiliate" of the company means any person, association, or corporation which controls, is controlled by, or is under common control with the submitting company.

"Control" includes having or acquiring effective power or influence to determine the policies, business practices, or decision-making processes of another person, association or corporation, whether exercised directly or through ownership of stock or assets, representation on the board of directors or election of one or more officers. Control shall be presumed to exist whenever any person, association or corporation owns ten (10) percent or more of the outstanding voting securities of another person, association or corporation.

"Submitting company" means a successful bidder for a lease on a given tract. If the successful bidder is a partnership, association or joint venture of more than one company, the partnership, association or joint venture and each member thereof is considered a submitting company.

II. Information Required

The following information must be submitted:

1. The name of all companies which own or control the submitting company and a statement of the extent and manner of such ownership or control.

2. The submitting company's most recent estimate of its proven crude oil reserves in the Petroleum Administration for Defense District (PADD) V, and the date on which this estimate was made. If possible, the estimate should include recoveries based upon the use of secondary and tertiary techniques made possible by recent crude oil price increases and the decontrol of domestic oil. If such recovery techniques are factored into the estimate, this should be so indicated, and if not, explained why not. Estimates should include reserves owned or leased by the submitting company or any affiliate. In the case of joint ventures, reserves should be prorated according to the shares of the joint venture. If affiliate data are used, indicate the sources of that data.

3. For each submitting company whose response to requirement 2 is 500 million barrels or more, its estimate of annual production for each of the next ten years (1982-1991) from proven reserves within PADD V of the submitting company and any affiliates.

SPECIAL STIPULATIONS: The following special stipulations will be attached to, and made a part of, the leases issued as a result of this offering:

1. All Tracts

(a) Prior to entry upon the lands for purposes of conducting geophysical operations, the Lessee will be required to obtain a geophysical exploration permit approved by the Authorized Officer (BLM). Such geophysical exploration permit shall provide for such conditions, restrictions, and prohibitions as the Authorized Officer (BLM) deems necessary or appropriate to mitigate reasonably foreseable and significant adverse effects upon the surface resources. Upon promulgation of regulations governing the permitting of geophysical operations, those regulations shall apply to this lease and supersede the other provisions of this stipulation.

(b) In any Application for Permit to Drill submitted under 30 CFR 221, the Lessee shall include a proposed environmental training program for all personnel involved in exploration or development activities (including personnel of the Lessee's contractors and subcontractors) for review and approval by the Deputy Conservation

3. Tracts 1 through 6

(a) Exploration, drilling, and other development activities

training program for all personnel involved in exploration or development activities (including personnel of the Lessee's contractors and subcontractors) for review and approval by the Deputy Conservation Manager (DCM), Onshore Field Operations, Alaska Region, USGS in consultation with the Fairbanks District Manager, BLM. The program shall be designed to inform each project employee of the specific types of environmental, social, and cultural concerns which relate to that individual's job. The program shall be formulated and conducted by qualified instructors experienced in pertinent fields of study. They shall use methods to assure that personnel are instructed in recognition of and proper handling of archaeological, geological, and biological resources and the policy and techniques for non-harrassment of wildlife resources. The program shall be designed to increase the sensitivity and understanding of personnel to local community values, customs, and lifestyles. Information on local subsistence activities should be included in order to minimize potential conflicts. The Lessee also shall submit for review and approval a continuing technical environmental briefing program for supervisory and managerial personnel of the Lessee and its agents, contractors, and subcontractors.

2. Tracts 1, 2, 3

No activities, construction, or facilities will be authorized within 200 meters of Fish Creek unless the operator determines to the satisfaction of the DCM, Onshore Field Operations, USGS that such activities, construction or facilities will not interefere with continued subsistence use of Fish Creek.

3. Tracts 1 through 6

(a) Exploration, drilling, and other development activities may not be allowed during critical periods between May 20 and August 25 in order to protect important waterfowl nesting, molting, and staging habitat. The DCM, with the concurrence of the Fairbanks District Manager, BLM, is responsible for notifying the Lessee or Operator of the critical periods during which exceptions are required. The DCM with the concurrence of the Fairbanks District Manager, BLM, may grant exceptions when it can be shown that activities will be conducted in such a manner as to have negligible adverse effects on waterfowl, or are not being conducted in proximity to important waterfowl habitat. These limitations will not apply to maintenance and operation of producing wells. Exceptions in any year may be specifically authorized in writing by the DCM, Onshore Field Operations, Alaska, USGS, with the concurrence of the Fairbanks District Manager, BLM. Exceptions will be based upon an evaluation of location, timing, intensity, and density of proposed operations as well as the anticipated cumulative effects of multi-company activities.

(b) Exploration, drilling, and other development activities may not be allowed between May 15 and July 15 in an area used for caribou calving in order to protect important seasonal caribou calving habitat. The DCM, with the concurrence of the Fairbanks District Manager, BLM, is responsible for notifying the Lessee or operator of the critical periods during which exceptions are required. The DCM, with the concurrence of the Fairbanks District Manager, BLM, may grant exceptions when it can be shown that activities are

not likely to have an adverse effect on calving or migrating caribou. Exceptions will be based upon the location, timing, intensity, and density of the proposed operation as well as the anticipated cumulative impacts of multi-company activities. These limitations will not apply to maintenance and operations of producing wells. Exceptions in any year may be specifically authorized in writing by the DCM, Onshore Field Operations, Alaska Region, USGS, with the concurrence of the Fairbanks District Manager, BLM.

4. Tracts 22 through 59

Exploration, drilling, and other development activities may not be allowed within active caribou migration routes between August 15 and September 15 in order to protect important migration routes. The DCM, with the concurrence of the Fairbanks District Manager is responsible for notifying the Lessee or operator of the critical periods during which exceptions are required. No activities which would unduly hinder normal caribou movements will be permitted. The DCM, with the concurrence of Fairbanks District Manager, may grant exceptions when it can be shown that activities will not likely have an adverse effect upon caribou during post-calving migrations. Exceptions will be based upon an evaluation of the location, timing, intensity, and density of proposed operations as well as the anticipated cumulative impacts of multi-company activities.

These limitations will not apply to maintenance and operation of producing wells. Exceptions in any year may be specifically authorized in writing by the DCM, Onshore Field Operations, Alaska Region, USGS, with the concurrence of the Fairbanks District Manager, BLM.

5. Tracts 7 through 21 and 38 through 59

Exploration, drilling and other development activities will be limited as follows in order to protect important seasonal wildlife habitat (endangered raptor nesting sites):

* All construction and ground level activity will be prohibited within one mile of nesting sites from April 15 through August 31.

* Aircraft shall maintain 1500' altitude above the nest sites and one mile horizontal distance from nest sites from April 15 - August 31 unless doing so would endanger human life or safe flying practices.

* Proposed drill pads, permanent airstrips, camps, roads, or pipelines will not be permitted within one mile of any nesting site.

* Blasting or other significant construction noise within two miles of nest sites will be prohibited between April 15 and August 31 unless specifically authorized by BLM after consultation with the U.S. Fish and Wildlife Service (FWS).

* Material sites, disposal sites, water reservoirs, drill pads, or other land uses that would significantly alter ponds, lakes, wetlands or shrub riparian habitat would be prohibited within one mile of nest site. Such activity within fifteen miles of habitat identified as peregrine falcon nesting and/or hunting areas by BLM, in consultation with FWS must be specifically authorized by the DCM, Onshore Field Operations, Alaska Region, USGS with the concurrence of the Fairbanks District Manager, and the Regional Director, FWS and will be allowed only after a complete analysis of impacts to hunting habitat.

Exceptions to these limitations in endangered species (peregrine) habitat hunting areas may be specifically authorized in writing by the

If the site specific information shows that a special subsistence resource may be adversely affected by any lease operations, the Lessee

Exceptions to these limitations in endangered species (peregrine) habitat hunting areas may be specifically authorized in writing by the DCM, Onshore Field Operations, Alaska Region, USGS, with the concurrence of the Fairbanks District Manager, BLM, and the Regional Director, FWS.

6. Tracts 01-03, 31-34 and 54-59

If the DCM, Onshore Field Operations, Alaska Region, USGS find areas of special subsistence interest within the lease area containing harvestable resources of such essential value (even though unquantifiable) to the Inupiat or other North Slope residents who have customarily and traditionally had a subsistence lifestyle that no measureable damage, harm to the harvestable resources or restriction of access would be acceptable, then he shall notify the Lessee in writing that the Lessee shall comply with the following requirements: Prior to any drilling or construction or placement of any exploration or development structure on lease areas, including pipeline and facility placement, (hereafter referred to as "operation"), the Lessee shall gather site specific information using a research design approved by BLM's Authorized Officer (the DCM will transmit the research design to BLM's AO for his or her approval). The research shall identify:

* active subsistence hunting, fishing, trapping or gathering sites;

* routes of access to the subsistence sites traditionally used by subsistence hunters, trappers, fishermen and gatherers;

* areas of high densities of harvestable resources; and

* wildlife migration routes of the harvestable resources within, from, and onto the lease area.

If the site specific information shows that a special subsistence resource may be adversely affected by any lease operations, the Lessee shall either: (1) relocate the site of such operations to minimize adverse effects on the harvestable resource and/or relocate the site of such operations to avoid occupancy of any active subsistence site (including a 200 meter buffer area around such subsistence sites) and/or conduct such operations and design production, processing, and transportation facilities to assure continued access of the subsistence user to the subsistence sites and to areas where the harvestable resources are of known high density; or (2) establish to the satisfaction of the DCM that such operations will not have a significant adverse effect upon the harvestable resources, the subsistence sites, and/or subsistence users' access to the subsistence sites or harvestable resources.

7. Tracts 46 and 55

Exploration, construction, drilling and other development activities will not be allowed in the vicinity of Tukuto Lake and Larger Swayback Lake as determined by the DCM, with the concurrence of the Fairbanks District Manager, BLM to protect important archaeological resources.

Exceptions may be specifically authorized in writing by the DCM, Onshore Field Operations, Alaska Region, USGS with the concurrence of the Fairbanks District Manager, BLM.

ADDITIONAL SALE INFORMATION: A detailed statement of the terms and conditions of the lease offering, the forms discussed above and the bid format may be obtained from the Alaska State Office, Bureau of Land Management, 701 C Street, Box 70, Anchorage, AK. 99513, or from the Fairbanks District Office, Bureau of Land Management, P.O. Box 1150, Fairbanks, AK. 99707

Federal Aviation Administration

Cross-Country Experience Requirements for Pilot Certification

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Parts 61 and 141

[Docket No. 21371; Notice No. 81-16]

Cross-Country Experience Requirements for Pilot Certification

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes to amend the cross-country aeronautical experience requirements for private and commercial pilot applicants. The amendment would modify the minimum leg length and specify the minimum distance that must be traveled from the point of origin on the extended cross-country flight for private and commercial pilot certificate trainees. This proposal responds to recognized needs for greater flexibility in the flight training environment while maintaining the overall flight time requirements.

DATES: Comments must be received on or before February 22, 1982.

ADDRESS: Comments on the proposal may be mailed in duplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rules Docket (AGC-204), Docket No. 21371, 800 Independence Avenue, SW., Washington, D.C. 20591, or delivered in duplicate to: Room 916, 800 Independence Avenue, SW., Washington, D.C. 20591. Comments delivered must be marked: Docket No. 21371. Comments may be inspected at Room 916 weekdays, except Federal holidays, between 8:30 a.m. and 5 p.m.

FOR FURTHER INFORMATION CONTACT: Mr. Joseph A. Sirkis, Regulatory Projects Branch (AVS-24), Safety Regulations Staff, Associate Administrator for Aviation Standards, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591, Telephone (202) 755-8716.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of this proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket or notice number and be submitted in duplicate to the address above. All communications received on or before the closing date for comments will be considered by the Administrator before taking action on the proposed rule. Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 21371." The postcard will be dated, time stamped, and returned to the commenter. The proposals contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for the comments, in the Rules Docket for examination by interested persons. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Avenue, SW., Washington, D.C. 20591, or by calling (202) 426-8058. Communications must identify the notice number of this NPRM. Persons interested in being placed on the mailing list for future NPRM's should also request a copy of Advisory Circular No. 11-2, Notice of Proposed Rulemaking Distribution System, which describes the application procedure.

Background

This notice is in response to a petition for rulemaking from Southlake Aviation Inc. which requests relief from the extended cross-country experience requirements contained in § 61.109(b)(2) for private pilot applicants. A summary of the petition was published in the **Federal Register** on May 7, 1981 (46 FR 25466). No comments were received. The FAA has determined that the petition has merit. It has also determined that similar relief should be extended to private pilot applicants training under Part 141 and to commercial pilot applicants training under Parts 61 and 141.

Part 61 of the Federal Aviation Regulations, Certification: Pilots and Flight Instructors, was revised by Amendment 61-60 effective November 1, 1973. The purpose of the amendment, as is pertinent to this notice, was to upgrade pilot training requirements to reflect the increasing complexity of the modern aircraft and its operating environment. Likewise, Part 141 was revised by Amendment 141-13 effective November 1, 1974, to upgrade the training provided by FAA-certificated pilot schools to assure a level of training equivalent to that required by revised Part 61.

In revised Parts 61 and 141, the minimum cross-country experience requirements were significantly upgraded to ensure that applicants for private and commercial pilot certificates receive operational training and experience while under the supervision of a qualified instructor. By requiring the additional experience, the public is ensured a higher degree of safety because pilots with a low level of experience are required to complete extensive cross-country flights before their certification. The increased cross-country requirements represented an effort to increase basic pilot knowledge and experience, the lack of which was considered a frequent cause of en route accidents.

Revised Parts 61 and 141 require, as is pertinent to this notice, that applicants for private pilots certificates fly at least one extended solo cross-country flight during their training. The flight must include landings at three points, each of which is more than 100 nautical miles (nm) from each of the other two points. Similarly, commercial pilot applicants must fly an extended cross-country consisting of a flight with landings at three points, each of which is more than 200 nm (100 nm in Hawaii) from the other two points. The distances between the points must be straight-line distances.

The FAA has received a number of petitions for exemption in which the public has sought relief from the 100 and 200 nm leg requirements. The petitioners contend that the minimum leg lengths do not allow flight instructors and schools adequate flexibility in selecting routes for the extended cross-country flight. Students frequently overfly larger airports with air traffic control facilities and land at much smaller uncontrolled airports a few miles farther from their departure point to meet the requirement that a landing be accomplished at a point more than 100 or 200 nm from the last takeoff. This can result in students missing valuable exposure to larger terminal airport environments. Furthermore, in many areas of the country terrain features, such as mountains and large bodies of water, restrict in a practical sense where trainees can go on the extended cross-country. Instructors must also take into account a student's experience level, as well as the performance capability of the airplane to be used, in determining where the student should be authorized to go.

Discussion of the Proposed Rule

The FAA has determined that the concerns expressed by the public regarding the 100 and 200 nm leg segments have merit. Although the reasons for adopting the revised pilot certification requirements remain unchanged, the goal of upgrading the competency of newly certificated pilots and enhancing the safety of air commerce can be met in another manner as regards the extended cross-country requirements.

These proposed amendments would provide greater flexibility to instructors and pilot schools in determining where to send students on cross-country flights. So that students would not gain the required cross-country experience with repeated trips over the same routes of short length, the amendments would impose a minimum distance for the farthest landing on the extended cross-country (100 nm for private pilot applicants and 250 nm for commercial pilot applicants). They would reduce the minimum required distances between each of three points on extended cross-country flights so that instructors can dispatch students on practical cross-country flights after considering the terrain over which the student will be flying, availability of navigation facilities, complexity of terminal areas along the route, local weather characteristics, etc.

Safety would be maintained by reducing the minimum distances between landing points on the extended cross-country training flights. Instructors would be able to send students on flights which will offer as much or more exposure to the operational environment as is now gained under the current rule. Additionally, students will not feel as pressured to complete a particular nonstop leg to meet the minimum experience requirements for a pilot certificate when prudent practice would dictate landing short of the original destination. The proposed amendment requires a landing at a point which is a specified distance from the original departure point. This will ensure that students are exposed to realistic cross-country flying conditions over terrain with which they are not intimately familiar. The current requirement contained in §§ 61.109(b)(2). 61.129(b)(3)(ii), and Part 141, Appendix A, paragraph 4.(b)(1) that a landing must be made more than 50 nm from the point of departure for a cross-country flight to be credited towards meeting the aeronautical experience requirements for a pilot certificate or rating will remain unchanged. This requirement has been included in the proposed amendment to Part 141, Appendix D, paragraph 3.(c)(2) to make it consistent with the minimum cross-country experience requirements for commercial pilot certification as stated in § 61.129(b)(3)(ii). It also reflects the current practice as regards certificated pilot schools.

This proposal responds to an industry petition for rule change so that pilots will be better trained. The FAA has determined through a preliminary cost impact assessment that the proposed regulation involves no additional costs. Furthermore, its provision allowing a more flexible route for the extended cross-country flight requirement can provide economic relief to trainees in the form of fuel savings gained through the availability of more airports that can be efficiently utilized for cross-country training purposes. Because industry petitioned for this proposed rule change and because the total nautical miles presently required for the extended cross-country flight would not be increased for the private pilot applicant and would be reduced for the commercial pilot applicant, the benefits of granting the relief should outweigh any direct costs associated with changing the present regulation. The FAA invites further comment on this matter.

The Proposed Amendment

Accordingly, the Federal Aviation Administration proposes to amend Parts 61 and 141 of the Federal Aviation Regulations (14 CFR Parts 61 and 141) as follows:

PART 61—CERTIFICATION: PILOTS AND FLIGHT INSTRUCTORS

1. By amending § 61.109(b) by removing the dash after the introduction and substituting a colon; removing the semicolon after paragraph (b)(1) and substituting a period; and revising paragraph (b)(2) to read as follows:

§ 61.109 Airplane rating: Aeronautical experience.

* * * * *

(b) * * *

(2) Ten hours of cross-country flights, each flight with a landing at a point more than 50 nautical miles from the original departure point. One flight must be of at least 300 nautical miles with landings at a miminim of three points, one of which is at least 100 nautical miles from the original departure point.

* * * * *

2. By amending § 61.129 by removing the dash after the introduction to paragraph (b)(3) and substituting a colon; removing the semicolon after paragraph (b)(3)(i) and substituting a period; and revising paragraph (b)(3)(ii) to read as follows:

§ 61.129 Airplane rating: Aeronautical experience.

* * * * *

(b) * * *

(3) * * *

(ii) 50 hours of cross-country flights, each flight with a landing at a point more than 50 nautical miles from the original departure point. One flight must have landings at a minimum of three points, one of which is at least 150 nautical miles from the original departure point of the flight is conducted in Hawaii, or at least 250 nautical miles from the original departure point if it is conducted elsewhere.

* * * * *

PART 141—PILOT SCHOOLS

3. By amending paragraph 4 of Appendix A by removing the dash after the introduction to paragraph 4 and substituting a colon; by removing the semicolon and the word "and" at the end of paragraph 4.(a) and substituting a period, and by revising paragraph 4.(b)(1) to read as follows:

Appendix A—Private Pilot Certification Course (Airplanes)

* * * * *

4. * * *

(b) * * *

(1) Ten hours of cross-country flights, each flight with a landing at a point more than 50 nautical miles from the original departure point. One flight must be of at least 300 nautical miles with landings at a minimum of three points, one of which is at least 100 nautical miles from the original departure point.

* * * * *

4. By amending Appendix D, by revising paragraph 3(c)(2) to read as follows:

Appendix D—Commercial Pilot Certification Course (Airplanes)

* * * * *

3. * * *

(c) * * *

(2) At least 40 hours of solo cross-country flights, each flight with a landing at a point more than 50 nautical miles from the original departure point. One flight must have landings at a minimum of three points, one of which is at least 150 nautical miles from the original departure point if the flight is conducted in Hawaii, or at least 250 nautical miles from the original departure point if it is conducted elsewhere.

* * * * *

(Sections 313(a), 601, 602, and 607 of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, 1422, and 1427), and Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)))

Note.—Since this proposal reduces the burden on pilots obtaining required cross-country experience by providing more flexibility in the selection of landing points, the FAA has determined that this document involves a proposed regulation which is not major under Executive Order 12291 or significant under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). For the same reason, it is certified that under the criteria of the Regulatory Flexibility Act this proposed regulation will not have a significant economic impact on a substantial number of small entities. A copy of the draft regulatory evaluation for this action is contained in the regulatory docket. A copy of it may be obtained by contacting the person identified under the caption "FOR FURTHER INFORMATION CONTACT."

Issued in Washington, D.C., on December 1, 1981.

Kenneth S. Hunt,

Director of Flight Operations.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday). This is a voluntary program. (See OFR NOTICE 41 FR 32914, August 6, 1976.)

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/SECRETARY	USDA/ASCS		DOT/SECRETARY	USDA/ASCS
DOT/COAST GUARD	USDA/FNS		DOT/COAST GUARD	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
DOT/FHWA	USDA/SCS		DOT/FHWA	USDA/SCS
DOT/FRA	MSPB/OPM		DOT/FRA	MSPB/OPM
DOT/MA	LABOR		DOT/MA	LABOR
DOT/NHTSA	HHS/FDA		DOT/NHTSA	HHS/FDA
DOT/RSPA			DOT/RSPA	
DOT/SLSDC			DOT/SLSDC	
DOT/UMTA			DOT/UMTA	

Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday. Comments on this program are still invited.

Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

List of Public Laws

Last Listing December 22, 1981

This is a continuing list of public bills from the current session of Congress which have become Federal laws. The text of laws is not published in the **Federal Register** but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402 (telephone 202–275–3030).

S. 1096 / Pub. L. 97–96 National Aeronautics and Space Administration Authorization Act, 1982 (Dec. 21, 1981; 95 Stat. 1207) Price: $1.75.

H.R. 4845 / Pub. L. 97–97 To designate the building known as the Lincoln Federal Building and Courthouse in Lincoln, Nebraska, as the "Robert V. Denney Federal Building and Courthouse" (Dec. 21, 1981; 95 Stat. 1212) Price: $1.50.

S. 884 / Pub. L. 97–98 "Agriculture and Food Act of 1981" (Dec. 22, 1981; 95 Stat. 1213) Price: $4.75.

federal register

Monday
December 28, 1981

Highlights

62741, 62745 **Import fees on certain sugars, sirups and molasses** Proclamations (2 documents)

62647 **Credit Unions** NCUA amends rules on premature withdrawal penalties for certain IRA/Keogh accounts.

62663 NCUA proposes to deregulate share, share draft and share certificate accounts.

62693 **Banks, Banking** FDIC issues policy statement on bank capital adequacy.

62710 **Occupational Safety and Health** HHS/CDC requests information on occupational safety hazard exposures and protection of workers engaged in oil and gas well drilling.

62716 Interior/GS proposes to amend personel safety standard for oil and gas drilling in hydrogen sulfide-prone areas of the outer continental shelf.

62669 **Freight Forwarders** FMC proposes rules on licensing of independent ocean freight forwarders.

62651 **Air Pollution Control** EPA interprets rules on new source restrictions for nonattainment areas.

62664 **Highway Safety** DOT/FHWA withdraws advance notice of proposed rulemaking on traffic control devices for railroad-highway crossings.

CONTINUED INSIDE

Highlights

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $75.00 per year, or $45.00 for six months, payable in advance. The charge for individual copies is $1.00 for each issue, or $1.00 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

62689 **Hazardous Waste** EPA announces availablity of panel discussion summaries on hazardous waste land disposal.

62667 **Maritime Carriers** FMC proposes rule on publications and filing of tariffs by common carriers in foreign service of United States.

62674 **Census** Commerce/Census changes procedures for computing poverty statistics.

62703 **Business and Industry** FTC adopts final confidentiality procedures for certain line of business reports.

62708 FTC modifies quarterly financial reports program confidentiality procedures.

62670 **Procurement** OMB announces availability of draft Federal Acquisition Regulation.

62738 **Minimum Wages** Labor/ESA/W&H publishes minimum wages for Federal and federally assisted construction. (Part II of this issue)

Privacy Act Documents

62768 FHLBB
62768 Panama Canal Commission. (Part III of this issue)

62734 **Sunshine Act Meetings**

Separate Parts of This Issue

62738 **Part II, Labor/ESA**
62768 **Part III, Panama Canal Commission**

Title 3—

The President

Proclamation 4887 of December 23, 1981

Import Fees on Certain Sugars, Sirups and Molasses

By the President of the United States of America

A Proclamation

1. The Secretary of Agriculture has advised me that he has reason to believe that certain sugars, sirups and molasses derived from sugarcane or sugar beets, classified under items 155.20 and 155.30, of the Tariff Schedules of the United States (TSUS) (19 U.S.C. 1202), are being, or are practically certain to be, imported into the United States under such conditions and in such quantities as to render or tend to render ineffective, or to materially interfere with the price support operations being conducted by the Department of Agriculture for sugarcane and sugar beets.

2. I agree that there is reason for such belief by the Secretary of Agriculture, and, therefore, I am requesting the United States International Trade Commission to make an immediate investigation with respect to this matter pursuant to section 22 of the Agricultural Adjustment Act, as amended (7 U.S.C. 624), and to report its findings and recommendations to me as soon as possible.

3. The Secretary of Agriculture has also determined and reported to me with regard to such sugars, sirups and molasses that a condition exists which requires emergency treatment and that the import fees hereinafter proclaimed should be imposed without awaiting the report and recommendations of the United States International Trade Commission.

4. I find and declare that the imposition of import fees hereinafter proclaimed, without awaiting the recommendations of the United States International Trade Commission with respect to such action, is necessary in order that the entry, or withdrawal from warehouse, for consumption of certain sugars, sirups and molasses described below by value, use and physical description and classified under TSUS items 155.20 and 155.30 will not render or tend to render ineffective, or materially interfere with, the price support operations being conducted by the Department of Agriculture for sugarcane or sugar beets.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, by the authority vested in me by section 22 of the Agricultural Adjustment Act, as amended, and the Statutes of the United States including Section 301 of Title 3 of the United States Code, do hereby proclaim that Part 3 of the Appendix to the Tariff Schedules of the United States is amended as follows:

1. Headnote 4 is continued in effect and amended, effective 12:01 a.m. (Eastern Standard Time) December 24, 1981, by changing paragraph (c) to read as follows:

(c)(i) The quarterly adjusted fee provided for in items 956.05 and 957.15 shall be the amount of the fee for item 956.15 plus .15 times the amount by which the applicable market stabilization price exceeds the 20 day average of the daily spot (world) price quotations for raw sugar as calculated in paragraph (ii) hereof.

(ii) The quarterly adjusted fee provided for in item 956.15 shall be the amount by which the average of the daily spot (world) price quotations for raw sugar for the 20 consecutive market days immediately preceding the 20th day of the

month preceding the calendar quarter during which the fee shall be applicable (as reported by the New York Coffee, Sugar and Cocoa Exchange or, if such quotations are not being reported, by the International Sugar Organization), expressed in United States cents per pound, Caribbean ports, in bulk, adjusted to a United States delivered basis by adding applicable duty and attributed costs, is less than the applicable market stabilization price: *Provided,* That whenever the average of such daily spot price quotations for 10 consecutive market days within any calendar quarter, adjusted to a United States delivered basis as provided herein, plus the fee then in effect (1) exceeds the market stabilization price by more than one cent, the fee then in effect shall be decreased by one cent, or (2) is less than the market stabilization price by more than one cent, the fee then in effect shall be increased by one cent: *Provided further,* That the fee may not be greater than 50 per centum of the average of such daily spot price quotations for raw sugar.

(iii) The market stabilization price for the first, second, and third calendar quarters of 1982 shall be 19.0800 cents per pound. The market stabilization price that shall be applicable to each subsequent fiscal year shall be determined and announced by the Secretary of Agriculture (hereafter the "Secretary") in accordance with this headnote no later than 30 days prior to the beginning of the fiscal year for which such market stabilization price shall be applicable. The market stabilization price shall be equal to the sum of: (1) the price support level for the applicable fiscal year, expressed in cents per pound of raw cane sugar; (2) adjusted average transportation costs; (3) interest costs, if applicable; (4) an amount adequate to compensate for the estimated value of duty reductions to be granted under the Generalized System of Preferences on imported raw cane sugar, as determined by the Secretary and (5) 0.2 cents. The adjusted average transportation costs shall be the weighted average cost of handling and transporting domestically produced raw cane sugar from Florida to Atlantic Coast ports north of Cape Hatteras, as determined by the Secretary. Interest costs shall be the amount of interest that would be required to be paid by a recipient of a price support loan for raw cane sugar upon repayment of the loan at full maturity. Interest costs shall only be applicable if a price support loan recipient is not required to pay interest upon forfeiture of the loan collateral.

(iv) Attributed costs for the first, second, and third calendar quarters of 1982 shall be 1.5032 cents per pound of imported raw cane sugar. The attributed costs that shall be applicable to each subsequent fiscal year shall be determined and announced by the Secretary in accordance with this headnote no later than 30 days prior to the beginning of the fiscal year for which such attributed costs shall be applicable. Attributed costs shall be equal to the sum of the costs, as estimated by the Secretary, of freight, insurance, stevedoring, financing, weighing, sampling, and International Sugar Agreement fees which are attributable to the importation of raw cane sugar from Caribbean ports.

(v) The Secretary shall determine the amount of the quarterly fees in accordance with this headnote and shall announce such fees not later than the 25th day of the month preceding the calendar quarter during which the fees shall be applicable. The Secretary shall certify the amount of such fees to the Secretary of the Treasury and file notice thereof with the **Federal Register** prior to the beginning of the calendar quarter during which the fees shall be applicable. The Secretary shall determine and announce any adjustment in the fees made within a calendar quarter in accordance with the first proviso of paragraph (ii) hereof, shall certify such adjusted fees to the Secretary of the Treasury, and shall file notice thereof with the **Federal Register** within 3 market days of the fulfillment of that proviso.

(vi) If an adjustment is made in the fee in accordance with the first proviso of paragraph (ii) hereof, any subsequent adjustment made within that quarter shall only be made on the basis of the average adjusted spot price for any 10 consecutive market day period following the effective date of the immediately preceding fee adjustment. No adjustment shall be made in any fee in accord-

ance with the first proviso of paragraph (ii) hereof during the last fifteen market days of a calendar quarter.

(vii) Any adjustment made in a fee during a quarter in accordance with the first proviso of paragraph (ii) hereof shall be effective only with respect to sugar entered or withdrawn from warehouse for consumption after 12:01 a.m. (local time at point of entry) on the day following the filing of notice thereof with the **Federal Register**: *Provided,* That such adjusted fee shall not apply to sugar exported (as defined in section 152.1 of the Customs Regulations) on a through bill of lading to the United States from the country of origin before such time.

2. Items 956.05, 956.15 and 957.15 are continued in effect and amended to read as follows:

Item	Articles	Rates of Duty (Section 22 Fees)
	Sugars, sirups and molasses derived from sugarcane or sugar beets, except those entered pursuant to a license issued by the Secretary of Agriculture in accordance with headnote 4(a):	
	Principally of crystalline structure or in dry amorphous form, provided for in item 155.20, part 10A, schedule 1:	
956.05	Not to be further refined or improved in quality	3.1104 per lb. adjusted quarterly beginning January 1, 1982, in accordance with headnote 4(c), but not in excess of 50% ad val.
956.15	To be further refined or improved in quality	2.1418 per lb., adjusted quarterly beginning January 1, 1982, in accordance with headnote 4(c), but not in excess of 50% ad val.
957.15	Not principally of crystalline structure and not in dry amorphous form, containing soluble nonsugar solids (excluding any foreign substance that may have been added or developed in the product) equal to 6% or less by weight of the total soluble solids, provided for in item 155.30, part 10A, schedule 1	3.1104 per lb. of total sugars, adjusted quarterly beginning January 1, 1982, in accordance with headnote 4(c), but not in excess of 50% ad val.

3. The provisions of this proclamation shall terminate upon the filing of a notice in the **Federal Register** by the Secretary of Agriculture that the Department of Agriculture is no longer conducting a price support program for sugar beets and sugarcane.

4. The provisions of paragraph (c)(v) of Headnote 4 of Part 3 of the Appendix to the TSUS, as added herein, requiring the determination and announcement by the Secretary of Agriculture not later than the 25th day of the month preceding the calendar quarter during which the fees shall be applicable, shall not apply to the fees to become effective January 1, 1982.

5. The provisions of Proclamation 4631 of December 28, 1978 are hereby terminated, except with respect to those articles which are exempted from the provisions of this proclamation under paragraph 6 below.

6. This proclamation shall be effective as of 12:01 a.m. (Eastern Standard Time) on the day following its signing. However, the provisions of this proclamation shall not apply to articles entered, or withdrawn from warehouse, for consumption prior to January 1, 1982, which are imported to fulfill forward contracts that were entered into prior to June 1, 1981 between (a) an exporter and an end user of such articles; or (b) an importer, broker, or operator and an end user of such articles.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-third day of December, in the year of our Lord nineteen hundred and eighty-one, and of the Independence of the United States of America the two hundred and sixth.

Ronald Reagan

Proclamation 4888 of December 23, 1981

Modification of Tariffs on Certain Sugars, Sirups and Molasses

By the President of the United States of America

A Proclamation

1. Headnote 2 of Subpart A of Part 10 of Schedule 1 of the Tariff Schedules of the United States, hereinafter referred to as the "TSUS", provides, in relevant part, as follows:

"(i) . . . if the President finds that a particular rate not lower than such January 1, 1968, rate, limited by a particular quota, may be established for any articles provided for in item 155.20 or 155.30, which will give due consideration to the interests in the United States sugar market of domestic producers and materially affected contracting parties to the General Agreement on Tariffs and Trade, he shall proclaim such particular rate and such quota limitation, . . .

"(ii) . . . any rate and quota limitation so established shall be modified if the President finds and proclaims that such modification is required or appropriate to give effect to the above considerations; . . ."

2. Headnote 2 was added to the TSUS by Proclamation No. 3822 of December 16, 1967 (82 Stat. 1455) to carry out a provision in the Geneva (1967) Protocol of the General Agreement on Tariffs and Trade (Note 1 of Unit A, Chapter 10, Part I of Schedule XX; 19 U.S.T., Part II, 1282). The Geneva Protocol is a trade agreement that was entered into and proclaimed pursuant to section 201(a) of the Trade Expansion Act of 1962 (19 U.S.C. 1821(a)). Section 201(a) of the Trade Expansion Act authorizes the President to proclaim the modification or continuance of any existing duty or other import restriction or such additional import restrictions as he determines to be required or appropriate to carry out any trade agreement entered into under the authority of that Act.

3. I find that the modifications hereinafter proclaimed of the rates of duty applicable to items 155.20 and 155.30 of the TSUS are appropriate to carry out a trade agreement and give due consideration to the interests in the United States sugar market of domestic producers and materially affected contracting parties to the General Agreement on Tariffs and Trade.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, by the authority vested in me by the Constitution and statutes, including section 201 of the Trade Expansion Act of 1962, and pursuant to General Headnote 4 and Headnote 2 of Subpart A of Part 10 of Schedule 1 of the TSUS, do hereby proclaim until otherwise superseded by law:

A. The rates of duty in rate columns 1 and 2 for items 155.20 and 155.30 of Subpart A of Part 10 of Schedule 1 of the TSUS are modified and the following rates are established:

155.20	2.98125¢ per lb. less 0.0421875¢ per lb. for each degree under 100 degrees (and fractions of a degree in proportion) but not less than 1.9265625¢ per lb.
155.30	dutiable on total sugars at the rate per lb. applicable under Item 155.20 to sugar testing 100 degrees.

B. Those parts of Proclamation 4334 of November 16, 1974, Proclamation 4463 of September 21, 1976, Proclamation 4466 of October 4, 1976, Proclamation 4539 of November 11, 1977, and Proclamation 4720 of February 1, 1980, which are inconsistent with the provisions of paragraph (A) above are hereby terminated.

C. The provisions of this Proclamation shall apply to articles entered, or withdrawn from warehouse, for consumption after 12:01 a.m. (Eastern Standard Time) on the day following the date of this Proclamation. However, the provisions of this proclamation shall not apply to articles entered, or withdrawn from warehouse, for consumption prior to January 1, 1982 which are imported to fulfill forward contracts that were entered into prior to June 1, 1981 between: (a) an exporter and an end user of such articles; or (b) an importer, broker, or operator and an end user of such articles.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-third day of December, in the year of our Lord nineteen hundred and eighty-one and of the Independence of the United States of America the two hundred and sixth.

Rules and Regulations

Federal Register
Vol. 46, No. 248
Monday, December 28, 1981

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

DEPARTMENT OF JUSTICE

Immigration and Naturalization Service

8 CFR Part 238

Contracts With Transportation Lines; Addition of Air Canada, Canadian Pacific Airlines, Northwest Airlines, Inc., Pacific Western Airlines, Republic Airlines, Wardair Canada (1975) Ltd., and Western Air Lines, Inc.

AGENCY: Immigration and Naturalization Service, Justice.

ACTION: Final rule.

SUMMARY: This rule adds seven airlines to the listing of carriers which have entered into agreements with the Service for the preinspection of their passengers and crews at locations outside the United States.

DATES: Effective date of agreement with Wardair Canada (1975) Ltd. at Calgary: September 28, 1981. Effective date of agreements for preinspection at Edmonton: Air Canada— September 14, 1979, Canadian Pacific Airlines—November 18, 1981, Northwest Airlines, Inc.—November 18, 1981, Pacific Western Airlines—November 18, 1981, Republic Airlines—November 18, 1981, Wardair Canada (1975) Ltd.—September 28, 1981, Western Air Lines, Inc.—November 10, 1979.

FOR FURTHER INFORMATION CONTACT: Stanley J. Kieszkiel, Acting Instructions, Officer, Immigration and Naturalization Service, 425 I Street, NW., Washington, D.C. 20536, Telephone: (202) 633–3048.

SUPPLEMENTARY INFORMATION: This amendment to 8 CFR 238.4 is published pursuant to 5 U.S.C. 552. The Commissioner of Immigration and Naturalization entered into agreements with the following carriers to guarantee the preinspection of their passengers and crews as provided by section 238(b) of the Immigration and Nationality Act, as amended (8 U.S.C.1228(b):

Effective

At Calary, Alberta, Canada: Wardair Canada (1975) Ltd., September 28, 1981
At Edmonton, Alberta, Canada: Air Canada, September 14, 1979; Canadian Pacific Airlines, Inc., November 18, 1981; Northwest Airlines, November 18, 1981; Pacific Western Airlines, November 18, 1981; Republic Airlines, November 18, 1981; Wardair Canada (1975) Ltd., September 28, 1981; Western Air Lines, Inc., November 10, 1979.

Preinspection outside the United States facilitates processing passengers and crews upon arrival at a U.S. port of entry and is a convenience to the traveling public.

Compliance with 5 U.S.C. 553 as to notice of proposed rulemaking and delay effective date is unnecessary because the amendment merely adds air carriers to the listing and is editorial in nature.

In accordance with 5 U.S.C. 605(b), the Commissioner of Immigration and Naturalization certifies that the rule will not have a significant economic impact on a substantial number of small entities.

This order constitutes a notice to the public under 5 U.S.C. 552 and is not a rule within the definition of section 1(a) of E.O. 12291.

Accordingly, 8 CFR Part 238 is amended as follows:

PART 238—CONTRACTS WITH TRANSPORTATION LINES

§ 238.4 [Amended]

In § 238.4 Preinspection outside the United States, the listing of transportation lines is amended by:

1. Adding in alphabetical sequence, "Wardair Canada (1975) Ltd." under "AT CALGARY".

2. Adding a new heading, "AT EDMONTON" between "AT CALGARY" and "AT FREEPORT" as follows:

At Edmonton

Air Canada, Canadian Pacific Airlines, Northwest Airlines, Inc., Pacific Western Airlines, Republic Airlines, Wardair Canada (1975) Ltd., Western Air Lines, Inc.

BILLING CODE 4410-10-M

NATIONAL CREDIT UNION ADMINISTRATION

12 CFR Part 701

Share, Share Draft and Share Certificate Accounts

AGENCY: National Credit Union Administration.

ACTION: Final rule.

SUMMARY: This rule provides Federal credit unions the discretion to determine whether or not to permit an exception to premature withdrawal penalties for IRA/Keogh certificate holders who have attained the age of 59½ years or more. The current exception to the premature withdrawal penalty for these certificate holders is mandatory.

Recently, some Federal credit unions have reported problems with the mandatory exception to premature withdrawal penalties for IRA/Keogh certificate holders who have attained the age of 59½ years or more. On January 1, 1982, the eligibility requirements for IRA/Keogh accounts will be expanded to include most all credit union members. Since many credit unions will be offering IRA/Keogh programs to their members, the potential number of credit union members that could take advantage of the exception to the premature withdrawal penalty will increase. As a result, credit unions could experience significant increases in dividend and operating expense.

EFFECTIVE DATE: December 17, 1981.

FOR FURTHER INFORMATION CONTACT: Randall J. Miller, Acting Director, Office of Policy Analysis (202) 357–1090.

SUPPLEMENTARY INFORMATION: Part 701 of the NCUA Rules and Regulations specifies certain mandatory exceptions to the required penalties for premature withdrawal of funds from share certificate accounts. Premature withdrawal penalties may not be applied if:

(1) The withdrawal is made subsequent to the death of any owner of the share, share draft, or share

certificate account or is made pursuant to Article III, Section 5(e) of the Federal Credit Union Bylaws;

(2) The share or share certificate account is part of a pension plan which qualifies or qualified for specific tax treatment under Section 401(d) or 408 of the Internal Revenue Code and withdrawal is made following the participant's death or disability (as determined under 26 U.S.C. 72(m)(7)) or upon attaining not less than 59½ years of age; or

(3) Such withdrawal is made as a result of the voluntary or involuntary liquidation of the Federal credit union issuing the account.

Recently, some Federal credit unions have reported problems with the mandatory exception to premature withdrawal penalties for IRA/Keogh certificate holders who have attained the age of 59½ years or more. Many of these individuals are still employed. They are taking advantage of the mandatory exception to the withdrawal penalty and rolling over their money market certificates and share certificates every time the dividend rate payable on these certificates increases. This churning of certificates increases dividend expense and operating expense for credit unions.

On January 1, 1982, the eligibility requirements for IRA/Keogh accounts will be expanded to include most all credit union members. Since many credit unions will be offering IRA/Keogh programs to their members, the potential number of credit union members that could take advantage of the exception to the premature withdrawal penalty will increase. As a result, credit unions could experience significant increases in dividend and operating expense.

Federal credit unions have had no recourse against IRA/Keogh certificate holders who have attained the age of 59½ or more, since the exception to the premature withdrawal penalty that applies to these individuals is mandatory. The DIDC rule governing this exception to the premature withdrawal penalty is not mandatory. The NCUA Board has accordingly amended its rules in order to allow Federal credit unions to determine whether or not to permit an exception to premature withdrawal penalties for IRA/Keogh certificate holders who have attained the age of 59½ or more. This amendment is prospective only, i.e., it may be applied only with respect to certificates issued or renewed after its effective date. Further, Federal credit unions which choose to reserve the discretion authorized by this rule should revise their contracts and related forms as necessary and appropriate.

Regulatory Flexibility Analysis

The rule will not have a significant economic impact on a substantial number of small credit unions. The rule provides additional flexibility in determining whether or not to impose a premature withdrawal penalty. Therefore, a regulatory flexibility analysis is not required, 5 U.S.C. 605(b).

Rulemaking Procedures

The NCUA Board for good cause (as described below), finds that public comment on this amendment is impracticable and contrary to the public interest. Federal credit unions would be placed in a position of substantial competitive disadvantage if their planning operations (for their IRA/Keogh account programs) were delayed beyond January 1, 1981 due to any uncertainty created by the solicitation of public comments prior to the issuance of this amendment. With the increase in IRA/Keogh accounts projected after January 1, 1981, some Federal credit unions may find it necessary to protect themselves from increased expenses by imposing the penalty authorized by this amendment. These credit unions would (if public comment were solicited) delay their entry into the expanded market until a final rule authorizing the penalty provision was adopted. A significant delay may prevent these credit unions from successfully competing for the funds of the expanded number of persons who will become eligible for IRA/Keogh accounts after January 1, 1981. A Federal credit union is a cooperative financial institution democratically controlled by its members, including those persons holding IRA/Keogh accounts in that credit union. Therefore, those persons affected by this amendment will have the opportunity, through the election of the credit union's board of directors, to participate in the decision of their credit union to exercise the authority permitted by this amendment. For these reasons, this amendment is adopted without opportunity for public comment, 5 U.S.C. 553(b)(B). For the same reasons and because the amendments relieve a restriction, this amendment is made effective in less than 30 days, 5 U.S.C. 553(d) (1) and (3).

Dated: December 21, 1981.

(12 U.S.C. 1757(6) and 1766(a))

Rosemary Brady,

Secretary of the NCUA Board.

PART 701—ORGANIZATION AND OPERATION OF FEDERAL CREDIT UNIONS

1. Accordingly, 12 CFR 701.35(f) is revised to read as follows:

§ 701.35 Share, share draft and share certificate accounts.

* * * * *

(f) *Exceptions to the Penalties.* (1) Penalties shall not be applied if: (i) The withdrawal is made subsequent to the death of any owner of the share, share draft or share certificate account or is made pursuant to Article III, Section 5(e) of the Federal Credit Union Bylaws;

(ii) Such withdrawal is made as a result of the voluntary or involuntary liquidation of the Federal credit union issuing the account.

(2) Penalties need not be applied if the share or share certificate account is part of a pension plan which qualifies or qualified for specific tax treatment under section 401(d) or 408 of the Internal Revenue Code and withdrawal is made following the participant's disability (as determined under 26 U.S.C. 72(m)(7)) or upon attaining not less than 59½ years of age.

[FR Doc. 81-38064 Filed 12-24-81; 8:45 am]

BILLING CODE 7535-01-M

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

25 CFR Part 43e

Preparation Of A Roll Of Mohave Descendants Enrolled As Members Of The Colorado River Indian Tribes

AGENCY: Bureau of Indian Affairs.

ACTION: Final rule.

SUMMARY: The Bureau of Indian Affairs is adding a new part to its regulations to establish procedures to govern the preparation of a roll of Mohave descendants enrolled as members of the Colorado River Indian Tribes. The roll to be prepared will serve as a basis for the distribution of a portion of Mohave judgment funds awarded in Indian Claims Commission Dockets Nos. 283 and 295.

EFFECTIVE DATE: December 28, 1981.

FOR FURTHER INFORMATION CONTACT: Sharlot Johnson, Branch of Tribal Operations, Phoenix Area Office, Bureau of Indian Affairs, 3030 N. Central Avenue, Suite 705, Phoenix, Arizona

85011, telephone number (602) 241–2314, FTS: 261–2314.

SUPPLEMENTARY INFORMATION: Proposed regulations for the preparation of a roll of lineal descendants of the aboriginal Mohave Tribe, who are members of the Colorado River Indian Tribes, who did not share in the funds distributed by the Chemehuevi Distribution Act of September 25, 1970 (84 Stat. 868), were published for comment in the **Federal Register** on October 14, 1981 (46 FR 50565). The roll to be prepared will be used to distribute a portion of the funds derived from an award to the "Mohave Indians who are members of the Colorado River Indian Tribes," and the "Mohave Tribe of Indians of Arizona, California, and Nevada" by the Indian Claims Commission in Dockets Nos. 283 and 295. Funds to satisy the award were appropriated by Congress and a plan for the use and distribution of the funds was prepared pursuant to the Judgment Funds Distribution Act of October 19, 1973 (87 Stat. 466), and became effective on April 12, 1976.

In order to provide notice to all potentially eligible participants, the regulations provide for the Superintendent to mail a notice to each enrolled member of the Tribes at his/her last known address advising him/her of the preparation of the roll of Mohave descendants and the procedures to be followed. A listing of the names of persons who are included on the proposed roll will be placed on public display throughout the local community and the service area of the Phoenix Area Office and Sacramento Area Office to afford interested persons the opportunity to view the list and appeal the omission of any name from the proposed roll. In accordance with the provisions specified in the regulations, persons who believe they meet the qualifications for enrollment, but whose names are not included on the proposed roll, may appeal the omission of their names and submit information or evidence for consideration to support their claim to eligibility. Appeals must be in writing and must be received by the Superintendent no later than the close of business on the thirtieth (30th) day after the listing of the names of persons included on the proposed roll is placed on public display.

No comments or suggestions were received with regard to the actual text of the regulations and the only changes being made to the regulations are to correct certain typesetting errors: in § 43e.3(d) it should be the *"Chemehuevi* Distribution Act;" in § 43e.12 the text should read that the "Secretary shall *consider* the record;" and in § 43e.14 it should be that to *"facilitate* the work of the Superintendent." A written request was received, however, from the Chairman of the Tribal Council of the Colorado River Indian Tribes urging that the final rule become effective on the date of publication in the **Federal Register.** Persons who will be affected by this rule are enrolled members of the Colorado River Indian Tribes. The regulations provide for the Superintendent to mail notices to enrolled members at their last known address advising them of the preparation of the roll and the relevant procedures to be followed. Deferring the effective date would only delay direct notification to affected individuals. Consequently, we find good cause exists for dispensing with the 30-day deferred effective date under the exception provided in subsection (d)(3) of 5 U.S.C. 533.

The authority to issue these rules and regulations is vested in the Secretary of the Interior by 5 U.S.C. 301 and sections 463 and 465 of the Revised Statutes (25 U.S.C. 2 and 9); and 87 Stat. 466. This final rule is published in exercise of rulemaking authority delegated by the Secretary of the Interior to the Assistant Secretary—Indian Affairs by 209 DM8.

The primary authors of this document are: Mitchell L. Bush, Jr., Chief, Branch of Tribal Enrollment Services, and Kathleen L. Slover, Branch of Tribal Enrollment Services, Division of Tribal Government Services, Bureau of Indian Affairs, telephone number: (703) 235–8323.

The Department of the Interior has determined that this document is not a major rule under the criteria established by Executive Order 12291 and does not have a significant economic effect on a substantial number of small entities under the criteria established by the Regulatory Flexibility Act.

Subchapter F of Chapter I of Title 25 of the Code of Federal Regulations is amended by the addition of a new part 43e to read as set forth below.

Kenneth L. Payton,

Acting Deputy Assistant Secretary—Indian Affairs (Operations).

PART 43e—PREPARATION OF A ROLL OF MOHAVE DESCENDANTS ENROLLED AS MEMBERS OF THE COLORADO RIVER INDIAN TRIBES

Sec.

43e.1 Definitions.
43e.2 Purpose.
43e.3 Qualifications for enrollment.
43e.4 Notice.
43e.5 Preparation of a proposed roll and display of a listing of names included thereon.
43e.6 Appeals.
43e.7 Filing appeals and the deadline.
43e.8 Supporting evidence and burden of proof.
43e.9 Notification and action by the Tribes.
43e.10 Action by the Superintendent.
43e.11 Action by the Director.
43e.12 Decision of the Secretary on appeals.
43e.13 Preparation, certification, and approval of roll.
43e.14 Special instructions.

Authority: 5 U.S.C. sec. 1301, R. S. secs. 463 and 465; 25 U.S.C. secs 2 and 9, and 87 Stat. 466.

§ 43e.1 Definitions.

As used in these regulations:

(a) "Secretary" means the Secretary of the Interior or his/her authorized representative.

(b) "Assistant Secretary" means the Assistant Secretary for Indian Affairs or his/her authorized representative.

(c) "Director" means the Area Director, Phoenix Area Office, Bureau of Indian Affairs or the Area Director, Sacramento Area Office, Bureau of Indian Affairs or their authorized representatives.

(d) "Superintendent" means the Superintendent, Colorado River Agency, Bureau of Indian Affairs, or his/her authorized representative.

(e) "Staff Officer" means the Enrollment Officer or other person authorized to prepare the roll.

(f) "Plan" means the plan for the use and distribution of Mohave judgment funds awarded in Dockets Nos. 283 and 295 before the Indian Claims Commission, which was prepared pursuant to the Act of October 19, 1973 (87 Stat. 466), and became effective April 12, 1976.

(g) "Tribes" mean the Colorado River Indian Tribes of the Colorado River Indian Reservation, Arizona and California.

(h) "Tribal Council" means the governing body of the Colorado River Indian Tribes.

(i) "Living" means born on or prior to and living on the date specified.

(j) "Lineal Descendants" mean those persons who are related by direct descent from the ancestor through whom eligibility is claimed, namely the children, grandchildren, etc. It does not include collateral relatives such as brothers, sisters, nieces, nephews, cousins, etc.

(k) "Sponsor" means parents, recognized guardian, next friend, next of kin, spouse, executor or administrator of estate, the Superintendent, or other person who files an appeal on behalf of another person.

§ 43e.2 Purpose.

The regulations in this part are to govern the compilation of a roll of certain members of the Colorado River Indian Tribes who are lineal descendants of the aboriginal Mohave Tribe eligible to share in the distribution of judgment funds awarded the Mohave Indians by the Indian Claims Commission in Dockets Nos. 283 and 295.

§ 43e.3 Qualifications for enrollment.

The roll shall contain the names of persons who meet the following requirements:

(a) They were living on April 12, 1976;

(b) They are enrolled members of the Colorado River Indian Tribes and their name appears on the approved membership roll prepared by the Tribes as of April 12, 1976;

(c) They are lineal descendants of a Mohave Indian; and

(d) They did not share in the funds distributed by the Chemehuevi Distribution Act of September 25, 1970 (84 Stat. 686).

§ 43e.4 Notice.

The Superintendent shall mail a notice to each person whose name appears on the approved membership roll as of April 12, 1976, of the Colorado River Indian Tribes advising him/her of the preparation of the roll of Mohave descendants and the relevant procedures to be followed.

§ 43e.5 Preparation of a proposed roll and display of a listing of names included thereon.

The Superintendent shall prepare, with the assistance of the Tribes, a proposed roll of persons who meet the requirements specified in § 43e.3. The proposed roll shall contain for each person a roll number, name, sex, date of birth, date of death if applicable, and name and relationship to the Mohave ancestor through whom eligibility was established. A listing of only the names of the persons included on the proposed roll shall be placed on public display for 30 days at the Colorado River Agency, local community buildings, local post office, Phoenix Area Office, and other Agency offices under the jurisdiction of the Director and the Sacramento Area Office and other Agency offices under the jurisdiction of the Director. The listing shall indicate prominently the deadline for filing appeals contesting the omission of a name, as well as the name, address, and telephone number of a person who may be contacted for further information.

§ 43e.6 Appeals.

Persons who believe they meet the qualifications specified in the plan and the regulations in this Part and whose names are not included on the proposed roll may file or have filed by a sponsor an appeal with the Secretary contesting the omission of their names in accordance with the procedures provided in this Part.

§ 43e.7 Filing appeals and the deadline.

(a) The appeal shall be in writing and addressed to the Secretary but filed with the Superintendent, Colorado River Agency, Bureau of Indian Affairs, Parker, Arizona 85344.

(b) The appeal must be received by the Superintendent no later than the close of business on the thirtieth (30th) day after the listing of the names of persons included on the proposed roll is placed on public display as provided for in § 43e.4. If the appeal deadline falls on a Saturday, Sunday, legal holiday or other nonbusiness day, the deadline will be the next working day thereafter.

§ 43e.8 Supporting evidence and burden of proof.

(a) The appeal should be accompanied by any supporting evidence relied upon as a basis for the appeal, including copies of Bureau or tribal records having a direct bearing on the appellant's contentions. The appellant may furnish affidavits from persons having personal knowledge of the facts at issue. Criminal penalties are provided by statute for knowingly filing false information in such statements (18 U.S.C. 1001).

(b) The appellant may request additional time to submit supporting evidence. A time period considered reasonable for such submissions may be granted by the official receiving the appeal.

(c) The burden of proof for establishing the improper omission of any name from the proposed roll is on the appellant.

§ 43e.9 Notification and action by the Tribes.

(a) The Superintendent shall notify the Tribal Council of the receipt of an appeal and shall give the Tribal Council the opportunity to examine the appeal and to present such evidence as it may consider pertinent.

(b) The Tribal Council shall have not more than 15 days from receipt of notification of the appeal in which to present, in writing, such statements as it may deem pertinent supported by tribal records which have a bearing on the case, along with the complete enrollment file on the appellant, to the Superintendent.

§ 43e.10 Action by the Superintendent.

The Superintendent shall consider each appeal. If after review of the evidence the Superintendent determines that the omission of any name is improper and eligibility has been established, the appellant shall be so notified in writing and the name entered on the roll. If the Superintendent determines that the omission of any name is proper and eligibility has not been established, the appellant shall be so notified in writing and the appeal together with the complete record and the recommendation of the Superintendent shall be forwarded to the Director.

§ 43e.11 Action by the Director.

The Director shall consider each appeal. If after a review of the evidence the Director determines that the omission of any name is improper and eligibility has been established, the appellant shall be so notified in writing and the Superintendent directed to enter the name on the roll. If the Director determines that the omission of the name is proper and eligibility has not been established, the appellant shall be so notified in writing and the appeal together with the complete record and the recommendation of the Director shall be forwarded to the Secretary for final determination.

§ 43e.12 Decision of the Secretary on appeals.

The Secretary shall consider the record as presented, together with any additional information he/she may consider pertinent. Any such additional information shall be specifically identified in the decision. The decision of the Secretary on an appeal shall be final and conclusive and written notice of the decision shall be given the appellant. When so directed by the Secretary, the Assistant Secretary shall cause to be entered on the roll the name of any person whose appeal has been sustained.

§ 43e.13 Preparation, certification, and approval of the roll.

(a) The staff officer shall prepare a minimum of 5 copies of the roll of those persons determined to be eligible for enrollment, including those who established their eligibility by appeal. The completed roll shall contain, for each person, a roll number, name, sex, date of birth, date of death if applicable, and name and relationship to the Mohave ancestor through whom eligibility was established.

(b) A certificate shall be attached to the roll by the Superintendent certifying that to the best of his/her knowledge the roll contains only the names of those persons who were determined to meet the requirements for enrollment. The Director shall approve the roll.

§ 43e.14 Special Instructions.

To facilitate the work of the Superintendent, the Assistant Secretary may issue special instructions not inconsistent with the regulations in this Part.

BILLING CODE 4310-02-M

ENVIRONMENTAL PROTECTION AGENCY

[AD-FRL 1998-2]

40 CFR Part 52

Approval and Promulgation of Implementation Plans; Statutory Restriction on New Sources Under Certain Circumstances for Nonattainment Areas

AGENCY: Environmental Protection Agency.

ACTION: Interpretive rule.

SUMMARY: On August 7, 1980, EPA promulgated regulations for state new source review programs in areas which have not attained the National Ambient Air Quality Standards (nonattainment areas). At that time, EPA announced that if revisions to such a state program were not approved by EPA by November 7, 1981, the construction moratorium authorized by section 110(a)(2)(I) of the Clean Air Act would take effect in each nonattainment area in each such state. As discussed below, EPA has now concluded as a matter of law that the moratorium did not take effect on November 7, 1981 in any state lacking a new source review program approved as conforming to EPA's August 7, 1980 rulemaking.

DATES: This interpretive rule is effective retroactive to November 7, 1981 and will remain in effect until superseded by future action by EPA.

FOR FURTHER INFORMATION CONTACT: Kirt Cox, Standards Implementation Branch (MD-15), Office of Air Quality Planning and Standards, Research Triangle Park, N.C. 27711 (919) 541-5591.

SUPPLEMENTARY INFORMATION: The Clean Air Act was amended in 1977 to include Part D, which specifies special requirements for State Implementation Plans (SIPs) for nonattainment areas. At the same time, section 110 of the Act was amended to require a moratorium on construction of major new and modified sources if a SIP does not meet the requirements of part D after July 1, 1979. Section 110(a)(2)(I).

EPA first issued criteria for state new source review programs in nonattainment areas on April 4, 1979. *See* 44 FR 20372. However, in *Alabama Power Co.* v. *Costle*, 636 F.2d 323 (D.C. Cir. 1979), the United States Court of Appeals for the District of Columbia Circuit struck down several analogous provisions in the Agency's regulations for the Prevention of Significant Deterioration (PSD) program. On August 7, 1980, EPA promulgated conforming revisions to its PSD regulations, and complementary revisions to its nonattainment rules. 45 FR 52676. In the "implementation" part of the August 7 promulgation, EPA announced that "[i]f a state does not submit any necessary revisions to its plan within nine months after the date this notice appears in the **Federal Register**, the construction moratorium will go into effect 15 months after this date * * * (*i.e.*, by November 7, 1981) in all nonattainment areas in that state." 45 FR 52687.

EPA has concluded that it was incorrect on August 7, 1980, to the extent that it indicated that the moratorium would take effect automatically on November 7, 1981, if a state failed to submit SIP revisions in response to the August 7 promulgation, or submitted revisions which EPA had not yet approved. EPA has now concluded that it must conduct an evaluation of a state plan and determine that it is deficient before any moratorium related to the August 7 rulemaking could come into effect. EPA believes that the need to make such an evaluation arises because under section 110(a)(2)(I), all states with EPA-approved (or conditionally approved) Part D plans are states with respect to which the construction moratorium simply does not apply, unless there is some determination by EPA that the SIP no longer satisifies Part D.[1] However, in light of the August 7 promulgation, EPA believes that it had a duty to analyze each SIP, after May 7, 1980 (the date SIP revisions were due), in order to determine whether the SIP continued to meet the requirements of Part D of the Act.[2]

EPA has concluded, however, that no analysis is appropriate at this time. First, EPA has promulgated a final rule which substantially amends one of the central provisions of the August 7 regulations—the definition of "source" in nonattainment areas. 46 FR 50766 (October 14, 1981). That same rule also deletes the requirement that reconstructed facilities be treated as new sources for the purposes of nonattainment new source review. *Id.* Second, the August 7 regulations are now the subject of litigation in the United States Court of Appeals for the District of Columbia Circuit (*Chemical Manufacturers Association* v. *Gorsuch*, No. 79-1112 and consolidated cases). EPA is currently engaged in settlement negotiations with the petitioners in this case. EPA anticipates that these negotiations will result in substantial amendments to the August 7 rules. In view of these facts, EPA believes that it is inappropriate to analyze the SIPs at this time to determine whether they satisfy the August 7 promulgation.

It should be noted, however, that today's action is not intended to affect the status of any construction moratorium currently in effect in any nonattainment area.

EPA finds that it has good cause not to take notice and comment on this interpretive rule. The conclusions reached by the Agency are legal in nature, so that notice and comment are unnecessary.

EPA further finds that it has good cause to make this notice immediately effective, because it removes a restriction. *See* 5 U.S.C. 553(d)(1).

The Administrator has determined that this interpretive rule is a nationally-applicable final action and is based on determinations of nationwide scope and effect. Under section 307(b) of the Clean Air Act, petitions for review of this action must be filed in the United States Court of Appeals for the District of Columbia Circuit by February 26, 1982.

Under Executive Order 12291, EPA must judge whether a regulation is "Major" and therefore subject to the requirement of a Regulatory Impact Analysis. This regulation is not major because it imposes no new requirements. In fact, by lifting a restriction, it removes regulatory requirements.

This action was submitted to the Office of Management and Budget for

---

[1] The moratorium must also take effect if EPA or the State conclude that the State is not implementing its Part D plan. Section 173(4).

[2] In this regard, it should be pointed out that EPA acknowledged in the August 7 promulgation that some States might not need to revise their SIPs in response to the August 7 promulgation:

"States need not adopt verbatim the definitions in section 51.18(j)(1), but they must demonstrate that any different definitions they retain or adopt have the effect of being at least as stringent as those set out in § 51.18(j)(1). If a state plan currently includes definitions or regulatory provisions which are more stringent than the nonattainment definitions and other provisions contained in these rules, the state has the choice of retaining its current regulations or revising them so as to conform to EPA's rules." 45 FR 52687.

review as required by Executive Order 12291.

(Secs.) 110(a)(2)(I), 301(a) of the Clean Air Act, as amended, 42 U.S.C. 7410(a)(2)(I), 7601(a))

Dated: December 18, 1981.

Anne M. Gorsuch,

Administrator.

BILLING CODE 6560-29-M

FEDERAL MARITIME COMMISSION

46 CFR Parts 510, 522, 523, 524, 534, 536, 540, 542, 547 and 551

OMB Clearance Information

AGENCY: Federal Maritime Commission.

ACTION: Final rule.

SUMMARY: Rules are amended to reflect OMB clearance and to inform recipients of information collection requests whether compliance with such request is voluntary or mandatory, as well as the specific benefits they are intended to obtain. The amendment is necessary to comply with Paperwork Reduction Act of 1980 requirements.

EFFECTIVE DATE: December 28, 1981.

FOR FURTHER INFORMATION CONTACT: Francis C. Hurney, Secretary, Federal Maritime Commission, 1100 L Street, NW, Washington, D.C. 20573 (202) 523-5725.

SUPPLEMENTARY INFORMATION: 44 U.S.C. 3504 requires the Office of Management and Budget to review and approve information collection requests proposed by agencies and to insure that the requests display OMB control numbers. Such requests must also contain information informing recipients why the information is collected, how it is to be used and the compulsory nature of the requirement, i.e., whether it is voluntary, mandatory, or required to obtain a benefit. Therefore, the following CFR parts of Title 46 are amended to reflect OMB requirements. Corrections of erroneous and superfluous statutory authorities have also been made.

PART 510—LICENSING OF INDEPENDENT OCEAN FREIGHT FORWARDERS

1. The Authority citation for Part 510 is revised to read as follows:

Authority: Secs. 16, 18, 21, 43 and 44, Shipping Act, 1916; 46 U.S.C. 815, 817, 820, 841a and 841b.

2. Add the following paragraph immediately after the Authority citation:

Note.—Approved for use through August 31, 1984. OMB No. 3072-0018.

§ 510.1 [Amended]

3. Number the paragraph presently appearing under § 510.1 as (a). Add a new paragraph (b) to read as follows:

* * * * *

(b) Information obtained under this part is used to determine the qualifications of freight forwarders and their compliance with shipping statutes and regulations. Failure to follow the provisions of this part may result in denial, revocation or suspension of a license for freight forwarding. Persons operating without the proper license may be subject to civil penalties not to exceed $5,000 for each such violation; for other violations of the provisions of this part, the civil penalties range from $1,000 to $25,000 for each violation (46 U.S.C. 815, 831a).

PART 522—FILING OF AGREEMENTS BETWEEN COMMON CARRIERS OF FREIGHT BY WATER IN THE FOREIGN COMMERCE OF THE UNITED STATES

1. The Authority citation for Part 522 is revised to read as follows:

Authority: Secs. 15 and 43 of the Shipping Act, 1916; 46 U.S.C. 814 and 841a.

2. Add the following paragraph immediately after the Authority citation:

Note.—Approved for use through September 30, 1984. OMB No. 3072-0040.

§ 522.1 [Amended]

3. a. Number the paragraph presently appearing under § 522.1 as paragraph (a).

b. Add a new paragraph (b) to read as follows:

* * * * *

(b) Adherence with the statute and rules of the Commission is mandatory, and persons operating under agreements without prior Commission approval may be liable to penalties and damages for violations of the anti-trust laws of the United States and may be subject to civil penalties of up to $1,000 for each day of such default (46 U.S.C. 814) and/or disapproval of agreements.

PART 523—ADMISSION, WITHDRAWAL AND EXPULSION PROVISIONS OF STEAMSHIP CONFERENCE AGREEMENTS

1. The Authority citation for Part 523 is revised to read as follows:

Authority: Secs. 15 and 43, Shipping Act, 1916; 46 U.S.C. 814 and 817.

2. Add the following paragraph immediately after the Authority citation:

Note.—Approved for use through November 30, 1983. OMB No. 3072-0030.

3. Add a new paragraph (c) to § 523.1 to read as follows:

§ 523.1 Statement of policy.

* * * * *

(c) Conference agreements that do not comply with this part may be disapproved, canceled or modified (46 U.S.C 814). Violations of the provisions of this part may also subject the conference members to a civil penalty of up to $1,000 for each violation (46 U.S.C 831(c)).

PART 524—EXEMPTION OF CERTAIN AGREEMENTS FROM THE REQUIREMENTS OF SECTION 15, SHIPPING ACT, 1916

1. The Authority citation for Part 524 is revised to read as follows:

Authority: Secs. 15, 35 and 43, Shipping Act, 1916; 46 U.S.C. 814, 833a and 841a.

2. Add the following paragraph immediately after the Authority citation:

Note.—Approved for use through October 31, 1984. OMB No. 3072-0039.

§ 524.1 [Amended]

3. a. Number the paragraph presently appearing under § 524.1 as (a).

b. Add a new paragraph (b) to read as follows:

* * * * *

(b) Compliance is mandatory and failure to meet these filing requirements will result in the party desiring exemption remaining bound by the approval requirements of section 15 of the Shipping Act, 1916. (46 U.S.C. 833a)

PART 534—GREEN HIDE WEIGHING PRACTICES

1. Remove the Authority language appearing at the end of §§ 534.1 and 534.2, respectively, place it immediately after the section number listing and revise it to read as follows:

Authority: Secs. 16, 17, and 43; Shipping Act, 1916; 46 U.S.C. 815, 816 and 841a.

2. Add the following paragraph immediately after the Authority citation:

Note.—Approved for use through September 30, 1984. OMB No. 3072-0037.

3. Number the paragraph presently appearing under § 543.1 as (a). Add a new paragraph (b) to read as follows:

§ 534.1 General weighing provisions.

* * * * *

(b) Compliance is mandatory and tariffs containing commodity rates on green hides that do not comply with this part may be rejected. Continued use of a tariff not in compliance with the provisions of this part is unlawful and subject to a civil penalty of not more than $5,000 for each day the violation continues. (46 U.S.C. 817(b)(4), (b)(6).)

PART 536—PUBLISHING AND FILING TARIFFS BY COMMON CARRIERS IN THE FOREIGN COMMERCE OF THE UNITED STATES

1. The Authority citation for Part 536 reads as follows:

Authority: Secs. 14b, 15, 16, 17, 18(b), 18(c), 21 and 43 of the Shipping Act, 1916 (46 U.S.C 813a, 814, 815, 816, 817(b), 817(c), 820 and 841a).

2. Remove paragraph 2 of the Authority citation containing GAO clearance information and substitute the following language therefor:

Note.—Approved for use through October 31, 1984. OMB No. 3072–0009.

3. Add a new paragraph (c) to § 536.0 to read as follows:

§ 536.0 Scope.

* * * * *

(c) Compliance with this part is mandatory, and any tariff submitted for filing which fails to meet criteria specified in this part is subject to rejection. Upon rejection it shall be void, and its use unlawful. Operating without an effective tariff on file with the Commission or changing rates not in conformance with such a tariff is unlawful and subject to a civil penalty of not more than $5,000 for each day the violation continues (46 U.S.C. 817(b)(4), (b)(6)).

PART 540—SECURITY FOR THE PROTECTION OF THE PUBLIC

1. The Authority citations for Part 540 are revised to read as follows:

Subpart A—Proof of Financial Responsibility, Bonding and Certification of Financial Responsibility for Indemnification of Passengers for Nonperformance of Transportation

Authority: Sec. 3, Pub. L. 89–777, 80 Stat. 1357; (46 U.S.C. 817e).

Subpart B—Proof of Financial Responsibility, Bonding and Certification of Financial Responsibility To Meet Liability Incurred for Death or Injury to Passengers or Other Persons on Voyages

Authority: Sec. 2, Pub. L. 89–777, 80 Stat. 1356; (46 U.S.C. 817d).

Subpart C—Assessment, Remission, and Mitigation of Civil Penalties

Authority: Secs. 2 and 3, Pub. L. 89–777, 80 Stat. 1356–1358; (46 U.S.C. 817d and 817e).

2. Add the following paragraph immediately after the Authority citation in Subpart A and in Subpart B:

Note.—Approved for use through October 31, 1984. OMB No. 3072–0011.

3. Remove the Note paragraph regarding OMB approval that presently appears at the end of § 540.9(k) in Subpart A.

4. Number the paragraph presently appearing under § 540.1 as (a). Add a new paragraph (b) to read as follows:

§ 540.1 Scope

* * * * *

(b) Failure to comply with this part may result in denial of an application for a certificate. Vessels operating without the proper certificate may be denied clearance and their owners may also be subject to a civil penalty of not more than $5,000 in addition to a civil penalty of $200 for each passage sold, such penalties to be assessed by the Federal Martime Commission (46 U.S.C. 91, 817d and 817e).

5. Remove the Note paragraph regarding GAO approval that presently appears at the end of Subpart C, Appendix B.

PART 542—FINANCIAL RESPONSIBILITY FOR WATER POLLUTION

1. The Authority citation for Part 542 reads as follows:

Authority: Sec. 311(p) of the Federal Water Pollution Control Act (33 U.S.C. 1321(p), 86 Stat. 862), as amended by the Clean Water Act of 1977 (Pub. L. 95–217, 91 Stat. 1566), and section 3 of Executive Order 11735 (38 FR 21243, 1973).

2. Remove paragraph 2 of the Authority citation containing GAO clearance information and substitute the following language therefor:

Note.—Approved for use through July 31, 1984. OMB No. 3072–0019.

3. Add a new paragraph (d) to § 542.1 to read as follows:

§ 542.1 Scope.

* * * * *

(d) Failure to follow the provisions of this Part may result in denial of a certificate, and consequently, denial of clearance of a vessel, denial of entry to any port or place in the United States, or its navigable waters, and/or detention of a vessel, as specified in § 542.14. Failure to comply may also subject the vessel operator to a fine of not more than $10,000 for each failure to comply (33 U.S.C. 1321(p), 46 U.S.C. 91).

PART 547—PROCEDURES FOR ENVIRONMENTAL POLICY ANALYSIS

1. The Authority citation for Part 547 is revised to read as follows:

Authority: Sec. 43 of the Shipping Act, 1916 (46 U.S.C. 841a), sec. 102 of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(b)).

2. Add the following paragraph immediately after the Authority citation:

Note.—Approved for use through August 31, 1984. OMB No. 3072–0035.

3. Add a new paragraph (c) to § 547.1 to read as follows:

§ 547.1 Purpose and scope.

* * * * *

(c) Information obtained under this part is used by the Commission to assess potential environmental impacts of proposed Federal Maritime Commission actions. Compliance is voluntary but may be made mandatory by Commission order to produce the information under section 21 of the Shipping Act, 1916 (46 U.S.C. 820). Penalty for non-compliance with a section 21 order is $100 a day for each day of default; penalty for falsification of such a report is a fine up to $1,000 or imprisonment up to one year, or both.

PART 551—TRUCK DETENTION AT THE PORT OF NEW YORK

1. The Authority citation for Part 551 is revised to read as follows:

Authority: Secs. 17 and 43 Shipping Act, 1916; (46 U.S.C. 816 and 841a).

2. Remove paragraph 2 of the Authority citation containing GAO clearance information and substitute the following language therefor:

Note.—Approved for use through September 30, 1984. OMB No. 3072–0010.

3. Add a new paragraph (m) to § 551.1 to read as follows:

§ 551.1 General provisions.

* * * * *

(m) Compliance is mandatory and failure of terminal operators or motor carriers to follow the provisions of this part may result in the assessment of penalties as specified in § 551.7.

Effective Date

Notice, public procedure and delayed effective date are not necessary for the promulgation of this amendment because of its nonsubstantive nature. Accordingly, this amendment shall be effective December 28, 1981.

By the Commission.

Francis C. Hurney,

Secretary.

BILLING CODE 6735-01-M

INTERSTATE COMMERCE COMMISSION

49 CFR 1056

[Ex Parte MC-19 Sub No. 36]

Household Goods Carriers Operational Practices

AGENCY: Interstate Commerce Commission.

ACTION: Notice of Modification of Form OCP-100; Confirmation of Date by Which Compliance With Final Operational Rules Must Be Achieved.

SUMMARY: The Commission is making minor modifications to Form OCP-100, Your Rights and Responsibilities When You Move, to reflect changes in the way consumers of household goods transportation services may contact the Commission for advice and assistance. All motor common carriers of household goods are notified that compliance with the new operational rules, including furnishing Form OCP-100 as amended herein, is required as of the date shown below.

DATE: Effective Compliance Date: February 1, 1982.

FOR FURTHER INFORMATION CONTACT: Ray G. Atherton, Jr., (202) 275-7844; or Patricia M. Schulze, (202) 275-7841.

SUPPLEMENTARY INFORMATION: The Commission adopted final operational household goods rules on March 11, 1981, (46 FR 16200), to become effective on June 9, 1981. The effective date was stayed pending judicial review. On December 9, 1981, the U.S. Court of Appeals for the Seventh Circuit upheld the Commission's final operational rules decision and dissolved the stay. The Court noted that the Commission should allow household goods carriers a reasonable interval before instituting actions for noncompliance with the new rules, particularly those relating to printed documents required to be furnished shippers.

Form OCP-100, Your Rights and Responsibilities When You Move, is a document required by the new rules (§ 1056.2(a)(1)) to be furnished to individual prospective shippers. In the 10 month period between adoption of the rules and the court's decision upholding them, the method by which the Commission receives complaints and inquiries from the public has been altered. Form OCP-100, as adopted, contains Commission contact information which is no longer current. To update the contact information, For OCP-100 is amended and reproduced in its entirety as set forth in Appendix A below. These documents reflect only a change in Commission practice and, as such, do not encompass any substantive regulatory change.

An effective compliance date of February 1, 1982, is set in recognition of the Court's admonition that a reasonable time be allowed for carriers to achieve compliance.

By the Commission: J. Warren McFarland, Director, Office of Compliance and Consumer Assistance.

Agatha L. Mergenovich,

Secretary.

Introduction

The Interstate Commerce Commission (ICC) regulations protect consumers on interstate moves and define the rights and responsibilities of consumers and movers.

The mover gives you this pamphlet to provide information about your rights and responsibilities as a shipper of household goods. You should talk to your mover if you have further questions. The mover will also furnish you with a pamphlet describing its procedure for handling your questions and complaints. The pamphlet includes a telephone number you can call to obtain additional information about your move.

If, after discussing your move with the mover, you still need information or assistance, you may obtain help from an Interstate Commerce Commission office. Local offices are maintained in at least one major city in each state (except Delaware and Hawaii). Regional offices are located in the following cities: Boston, MA; Philadelphia, PA; Atlanta, GA; Chicago, IL; Ft. Worth, TX; and San Francisco, CA. Telephone numbers for these offices may be found in the telephone directory under the heading UNITED STATES GOVERNMENT. In the Washington, D.C. area call 275–0660.

Moving Service Questionnaire

Included with this pamphlet is a brief questionnaire which we ask you to complete and mail, postage free, to the Interstate Commerce Commission. The information which you provide will help the Commission to further assist consumers.

Please answer every question. The name and ICC number of the moving company is found at the top of the bill of lading. The shipment registration or identification number is found on the order for service and the bill of lading of your shipment.

The Service Questionnaire is not a complaint or inquiry form. If you have a complaint or inquiry concerning the mover's services contact the Interstate Commerce Commission offices referred to on page 1 of this publication.

OMB No. 3120-0057
Exp. 5/31/83

INTERSTATE COMMERCE COMMISSION MOVING SERVICE QUESTIONNAIRE
(Not a Complaint Form)

1. Name of the moving company _____
2. Mover's ICC number _____
3. Your shipment registration or identification number _____
4. Moved from _____ (State) Moved to _____ (State)
5. Date your shipment was picked up _____ (Date) delivered _____ (Date)
6. Did you receive an estimate ☐ Yes ☐ No
7. Was the estimate binding? ☐ Yes ☐ No
8. Were the final charges the estimated charges? (Check One) ☐ More ☐ Less ☐ The Same As
9. Was your shipment picked up the agreed pickup date? (Check One) ☐ Before ☐ On ☐ After
10. Was your shipment delivered the agreed delivery date? ☐ Before ☐ On ☐ After
11. Have you or do you intend to file a claim with the mover for property loss or damage in excess of $100? ☐ Yes ☐ No
12. Would you use the same mover again? ☐ Yes ☐ No
13. Was the *Your Rights and Responsibilities When you Move* booklet helpful to you in your move? ☐ Yes ☐ No

Please show return address in upper left corner of reverse side of this card.

NOTE: THIS QUESTIONNAIRE WILL BE PRINTED ON A PREPAID POST CARD ADDRESSED TO THE INTERSTATE COMMERCE COMMISSION, OFFICE OF COMPLIANCE AND CONSUMER ASSISTANCE, WASHINGTON, D.C. 20423. THIS CARD IS TO BE INSERTED IN THE BOOKLET AND SHOULD BE PERFORATED TO PERMIT EASY REMOVAL. THE CARRIER'S NAME AND ICC NO. MAY BE PRE-PRINTED ON THE QUESTIONNAIRE

Estimates

Although the ICC cannot require that moving companies give estimates most movers do provide estimates when requested. There are two types of estimates binding and non-binding.

Binding Estimates

The mover may charge you for providing a binding estimate.

Binding estimates must clearly describe the shipment and all services provided.

When you receive a binding estimate, you can not be required to pay any more than the amount of the estimate. To be effective, a binding estimate must be in writing and a copy given to you before you move. A copy of the binding estimate must also be attached to the bill of lading.

If you agree to a binding estimate, you are responsible for paying the charges by cash, certified check, or money order at time of delivery unless the mover agrees before you move to extend credit or to accept payment by charge card. If you are unable to pay the amount required at the time the shipment is delivered, the mover may place your shipment in storage at your expense until the charges are paid.

Non-Binding Estimates of Approximate Cost

The mover is not permitted to charge for giving a non-binding estimate.

A non-binding estimate does not bind the mover. When you receive a non-binding estimate there is no guarantee that the final cost will not be more than the estimate.

Non-binding estimates must be in writing and clearly describe the shipment and all services provided. Any time a mover provides such an estimate it is required that the amount of the charges estimated must be entered on the order for service and bill of lading relating to your shipment. If you are given a non-binding estimate, do not sign or accept the order for service or bill of lading unless the amount estimated is entered on each form when prepared by the mover.

If you are given a non-binding estimate, the mover cannot require you to pay more than the amount of the original estimate plus 10 percent, at time of delivery. You will then have at least 30 days after the date of delivery to pay any remaining charges.

If you request the mover to provide more services than those included in the estimate, the mover may demand full payment for those added services at time of delivery.

Order for Service

Moving companies are required to prepare an order for service on every shipment transported for an individual shipper. You are entitled to a copy of the order for service when it is prepared.

The order for service is not a contract. Should your move be cancelled or delayed or if you decide not to use the services of the mover, you should promptly cancel the move.

Should there be any change in the dates on which you and the mover agreed that your shipment will be picked up and delivered, or any change in the non-binding estimate, the mover may prepare a written change to the order for service. The written change should be attached to the order for service.

Bill of Lading Contract

The bill of lading is the *contract* between you and the mover. The mover is required by law to prepare a bill of lading for every shipment it transports. The information on a bill of lading is required to be the same information shown on the order for service. The driver who loads your shipment must give you a copy of the bill of lading before loading your furniture. You must also sign the bill of lading.

It is your responsibility to read the bill of lading before you sign it. If you do not agree with something on the bill of lading *do not sign* it until you are satisfied that the bill of lading shows what service you want.

The bill of lading requires the mover to provide the service you have requested, and you must pay the mover the charges for the service.

The bill of lading is an important document. Do not lose or misplace your copy. Have it available until your shipment is delivered, all charges are paid and all claims, if any, are settled.

Inventory

At the time the mover's driver loads your shipment he or she, although not required to do so, usually inventories your shipment listing any damage or unusual wear. The purpose of this is to make a record of the condition of each item. If the driver does not make an inventory you should make one yourself.

After completing the inventory, the driver will usually sign each page and ask you to sign each page. It is important before signing that you make sure that the inventory lists every item in your shipment and that the entries regarding the condition of each item are correct. You have the right to note any disagreement. When your shipment is delivered if an item is missing or damaged, your ability to recover from the mover for any loss or damage may depend on the notations made.

The driver will give you a copy of each page of the inventory. Attach the complete inventory to your copy of the bill of lading. It is your receipt for the goods.

At the time your shipment is delivered, it is your responsibility to check the items delivered against the items listed on your inventory. The driver usually places a small numbered tag on each item as the inventory is prepared. The numbers should correspond to the numbered items on the inventory form and facilitate checking off the items as they are brought into your new residence. Check each item for damage that did not exist when the shipment was loaded. If new damage is discovered, make a record of it in the space provided on the inventory form. Be sure to call the damage to the attention of the driver and request that a record of the damage be made on the driver's copy of the inventory.

After the complete shipment is unloaded, the driver will request that you sign the driver's copy of the inventory to show that you received the items listed. Do not sign the inventory until you have assured yourself that it is accurate and that proper notations have been entered on the form regarding any missing or damaged items. When you sign the inventory at the time of unloading, you are giving the driver a receipt for your goods.

Shipments Subject to Minimum Weight or Volume Charges

Movers usually have a minimum weight or volume charge for transporting a shipment. Usually the minimum is the charge for transporting a shipment of at least 500 pounds.

If your shipment appears to weigh less than the mover's minimum weight, the mover is required to advise you on the order for service of the minimum cost before agreeing to transport the shipment. Should the mover fail to advise you of the minimum charges and your shipment is less than the minimum weight, the final charges must be based on the actual weight instead of the minimum weight.

Determining the Weight of Your Shipment

If charges are to based upon weight of the shipment, the mover is required to weigh the shipment. Unless your shipment weighs less than 1,000 pounds and can be weighed on a warehouse platform scale, the mover is required to

determine the weight of your shipment by one of the following processes.

Origin Weighing—If your shipment is weighed in the city or area from which you are moving, the driver is required to weigh the truck on which the shipment is to be transported before coming to your residence. This is called the *tare weight.* At the time of this first weighing the truck may already be partially loaded with one or more other shipments. This will not affect the weight of your shipment. The truck should also contain pads, dollies, handtrucks, ramps, and other equipment normally used in the transportation of household goods shipments.

After loading, the truck will be weighed again to obtain the loaded weight, called the *gross weight.* The net weight of your shipment is then obtained by subtracting the tare weight from the gross weight.

Destination Weighing—The mover is also permitted to determine the weight of your shipment at the destination at the time of unloading. The fact that a shipment is weighed at the destination instead of at the origin will not affect the accuracy of the weight of your shipment. *The most important difference is that the mover will not be able to determine the exact charges on your shipment before it is unloaded.*

Destination weighing is done in reverse to origin weighing. After arriving in the city or area to which you are moving, the driver will weigh the truck, with your shipment loaded on it to obtain the gross weight before coming to your new residence to unload. After unloading your shipment, the driver will again weigh the truck to obtain the tare weight. The net weight of your shipment will then be obtained by subtracting the tare weight from the gross weight.

Each time a weighing is performed the driver is required to obtain a weight ticket showing the date and place of weighing and the weight obtained. The ticket must also have your name and shipment number entered on it along with the I.D. numbers of the truck. The ticket must be signed by the person who performed the weighing. If both the empty (tare) and loaded (gross) weighings are performed on the same scale, the record of both weighings may be entered on one weight ticket.

At the time the mover gives you the freight bill to collect the charges, a copy of every weight ticket relating to your shipment must accompany your copy of the freight bill.

You have the right to observe every weighing. The mover is required to inform you of the specific location of each scale that will be used and to allow you a reasonable opportunity to be present. If you desire to observe either or both of the weighings, you should tell the mover at the time the order for service is prepared or, in any event, before the day of your move. This will enable the mover to contact you before the weighing to advise you of the location of the scale.

Reweighing of Shipments

If your shipment is weighed at origin and you agree with the mover that you will pay the charges at time of delivery, the mover is required to give you written notice of the weight and charges on your shipment before commencing to unload at your destination residence. If you believe that the weight is not accurate, you have the right to request that the shipment be reweighed before unloading.

The mover is not permitted to charge for the reweighing. If the weight of your shipment at the time of the reweigh is different from the weight determined at origin, the mover must recompute the charges based on the reweigh weight.

Before requesting a reweigh, you may find it to your advantage to estimate the weight of your shipment using the following method:

(1) Count the number of items in your shipment. Usually there will be either 30 or 40 items listed on each page of the inventory. For example, if there are 30 items per page and your inventory consists of four complete pages and a fifth page with 15 items listed, the total number of items will be 135. *If an automobile is listed on the inventory do not include that item in the count of the total items.*

(2) Subtract the weight of any automobile included in your shipment from the total weight of the shipment. If the automobile was not weighed separately, its weight can be found on its title or license receipt.

(3) Divide the number of items in your shipment into the weight. If the average weight resulting from this exercise ranges between 35 and 45 pounds per article, it is unlikely that a reweigh will prove beneficial to you and could result in your payment of higher charges.

Experience has shown that the average shipment of household goods will weigh about 40 pounds per item. If a shipment contains a large number of heavy items, such as cartons of books, boxes of tools or heavier than average furniture, the average weight per item may be 45 pounds or more.

Picking Up and Delivering Shipments on the Agreed Dates

Agree with your mover on set times for pickup and delivery. You and your mover must reach an agreement as to when your shipment is to be picked up and delivered. It is your responsibility to determine on what date, or between what dates, you need to have the shipment picked up and on what date or between what dates, you require delivery. It is the mover's responsibility to tell you if the service can be provided on or between those dates or, if not, on what other dates the service can be provided.

In the process of reaching an agreement with a mover, it may be necessary for you to alter your moving and travel plans if no mover can provide service on the specific dates you desire.

Do not agree to have your shipment picked up or delivered "as soon as possible." The dates or periods of time you and the mover agree on should be definite.

Once an agreement is reached on the dates service is to be provided, the mover is required to enter those dates on the order for service. Do not sign or accept an order for service that does not have the agreed dates for service entered on the form. Do not sign or accept an order for service which has dates for the pickup or delivery entered on it which are different from those dates to which you have agreed. The dates you have agreed upon must also be entered on the bill of lading and become part of your contract with the mover.

Once your goods are loaded, the mover is contractually bound to provide the service described in the bill of lading. The only defense for not providing the service on the dates called for in the contract is the "defense of force majeure." This is a legal term which means that if circumstances which could not have been foreseen and which are beyond the control of the mover prevent the performance of the service as agreed to in the bill of lading, the mover is not responsible for damages resulting from the non-performance.

If, after an order for service is prepared, the mover is unable to make pickup or delivery on the agreed upon dates, the mover is required to notify you by telephone, telegram or in person about the delay. The mover must at that time tell you when your shipment can be picked up or delivered. If for any reason you are unable or unwilling to accept pickup or delivery on the dates named by the mover, you should attempt to reach agreement with the mover on alternate dates.

The establishment of a delayed pickup or delivery date does not relieve the mover from liability for damages resulting from the failure to provide

service as agreed. However, when you are notified of alternate delivery dates it is your responsibility to be available to accept delivery on the dates specified. If you are not available and willing to accept delivery, the mover has the right to place your shipment in storage at your expense or hold the shipment on its truck and assess additional charges.

If after the pickup of your shipment, *you* request the mover to change the delivery date, most movers will agree to do so providing your request will not result in unreasonable delay to their equipment or interfere with another customer's move. However, the mover is not required to consent to amended delivery dates and has the right to place your shipment in storage at your expense if you are unwilling or unable to accept delivery on the date agreed to in the bill of lading.

If the mover fails to pick up and deliver your shipment on the date entered on the bill of lading and you have expenses you otherwise would not have had, you may be able to recover those expenses from the mover. This is what is called an inconvenience or delay claim. Should a mover refuse to honor such a claim and you continue to believe that you are entitled to be paid damages, you may sue the mover. *The Interstate Commerce Commission has no authority to order the mover to pay such claims.*

While it is hoped that your shipment will not be delayed, you should consider this possibility and find out before you agree for a mover to transport your shipment what payment you can expect if the service is delayed through the fault of the mover.

Space Reservations, Expedited Service, Exclusive Use of a Vehicle and Guaranteed Pickup and Delivery

It is customary for movers to offer price and service options.

The total cost of your move may be increased if you want additional or special service. Before you agree to have your shipment moved under a bill of lading providing special service, you should have a clear understanding with the mover what the additional cost will be. You should always consider that you may find other movers who can provide the service you require without requiring that you pay the additional charges.

One service option is a *space reservation.* If you agree to have your shipment transported under a space reservation agreement, you are required to pay for a minimum number of cubic feet of space in the moving van regardless of how much space in the van is actually occupied by your shipment.

Another service option is *expedited service* to aid shippers who must have their shipments transported on or between specific dates which the mover could not ordinarily agree to do in its normal operations.

Another customary service option is *exclusive use of a vehicle.* If for any reason you desire or require that your shipment be moved by itself on the mover's truck or trailer, most movers will provide such service.

Still another service option is *guaranteed service on or between agreed dates.* If you take this service option you enter into an agreement with the mover that provides for your shipment to be picked up, transported to destination and delivered on specific guaranteed dates. If the mover fails to provide the service as agreed, you are entitled to be compensated at a predetermined amount or a daily rate (per diem) regardless of the expense you actually might have incurred as result of the mover's failure to perform.

Before requesting or agreeing to any of these price and service options, be sure to ask the mover's representatives about the final costs you will be required to pay and consider all possible alternatives if you feel that the charges will be more than you are willing to pay.

Notification of Charges

You must advise the mover at the time you make the arrangements for the move if you wish to be notified of the weight or volume and charges on your shipment. You are required to give the mover a telephone number or address at which the notification will be received.

The mover must notify you of the charges at least one 24-hour weekday prior to the delivery, unless the shipment is to be delivered the day after pickup. The 24-hour requirement does not apply when you obtain an estimate of the costs prior to the move or when the shipment is to be weighed at the destination.

Receipt for Delivery of the Shipment

At the time of delivery the mover expects you to sign a receipt for your shipment. This is usually accomplished by having you sign each page of the mover's copy of the inventory.

Movers are prohibited from having you to sign a receipt which relieves the mover from all liability for loss or damage to the shipment. Do not sign any receipt which does not provide that you are signing for your shipment *in apparent good condition except as noted on the shipping documents.*

The Mover's Liability for Loss or Damage

All moving companies are required to assume liability for the value of goods which they transport. However, there are different levels of liability, and consumers should be aware of the amount of protection provided and the charges for each plan.

First, unless you make specific arrangements otherwise, the mover is required to assume liability for the entire shipment at an amount equal to $1.25 per pound times the weight of your shipment. For example, if your shipment weighs 4000 pounds, the mover will be liable to you for loss or damage up to $5000. Though you have made no specific arrangements for this plan, the mover is entitled to charge you $5.00 for each $1000 of liability beyond the "released value" (which will be discussed below) of your shipment. Under this arrangement, if you shipped a 10 pound painting valued at $1000 in your 4000 pound shipment, you could collect for the full value of the painting if it was lost or damaged. Under this plan, your valuables are somewhat protected, but you pay for it.

Next, if the value of your shipment exceeds $1.25 per pound, you may obtain additional liability protection from the mover. You do this by declaring a specific dollar value for your shipment. The amount you declare must exceed $1.25 per pound times the weight of the shipment. If you declare that your 4000 pound shipment is worth $10,000, the mover will charge you $5.00 for each $1000 of declared value, which in this case would result in a charge of $50.00. If you ship articles that are usually expensive, such as art or antiques, be sure to declare its full value. You must do this in writing.

The least amount of liability a mover can assume when transporting your goods is the "released value" referred to above. Movers publish what are known as released value rates. Under such rates, the mover assumes liability for not more than 60 cents per pound, per article. Under this arrangement, if that 10 pound painting which was described in the previous example were lost or damaged, and you had agreed to a released value shipment, the mover would be liable for not more than $6.00. Obviously, the consumer should think carefully before agreeing to such an agreement. There is no extra charge for this minimal protection, but you must sign a specific statement on the bill of lading agreeing to it. Remember that unless you do sign such an agreement,

the mover is liable for $1.25 per pound, and can charge you for it.

The mover pays for loss or damage in each of the three forms of liability described above. These are not insurance agreements. An additional option for the consumer is to agree to the released value transportation and obtain insurance directly from the moving company or from an insurance company. Your regular insurance company should be able to quote you a rate for your move. Some consumers have found this to be an inexpensive and satisfying alternative.

Your mover can sell you or procure for you liability insurance in the amount you require if you release your shipment for transportation at a value of 60 cents per pound per article. In the event of loss or damage which is the responsibility of the mover, the mover would be liable only for an amount not exceeding 60 cents per pound per article and the balance of the loss would be recoverable from the insurance company up to the amount of insurance purchased. The mover's representative can advise you of the availability of such liability insurance and the cost per $1,000 of coverage.

If you purchase liability insurance from or through the mover, it is required that the mover issue a policy or other written record of the purchase and to provide you with a copy of the policy or other document at the time of purchase. If the mover fails to comply with this requirement, it becomes fully liable for any claim for loss or damage attributed to its negligence.

Complaints and Inquiries About the Mover's Service

All movers are expected to respond promptly to complaints or inquiries from their customers. Should you have a complaint or question about your move, you should first attempt to obtain a satisfactory response from the mover's local agent, the sales representative who handled the arrangements for your move, or the driver assigned to your shipment.

If for any reason you are unable to obtain a satisfactory response from one of these persons, you should then contact the mover's principal office. When you make such a call be sure to have available your copies of all the documents relating to the move. Particularly important is the number assigned to your shipment by the mover.

If you do not receive a satisfactory answer, you may contact the Interstate Commerce Commission's offices as discussed on page 1. Anytime you contact the Commission regarding your shipment, please have available the name of the mover and the number assigned to your shipment.

All interstate moving companies are required to maintain a complaint and inquiry procedure to assist their customers. At the time you make the arrangements for your move, you should ask the mover's representative for a description of the mover's procedure, the telephone number to be used to contact the carrier and whether the mover will pay for such telephone calls.

Payment of the Transportation Charges

At the time of payment of the transportation charges, the mover is required to give you a freight bill identifying the service provided and the charge for each service. It is customary for most movers to use a copy of the bill of lading as a freight bill; however, some movers use an entirely separate document for this purpose.

Except in those instances where a shipment is moving on a binding estimate, the freight bill must specifically identify each service performed, the rate per unit for each service, and the total charges for each service. *Do not accept or pay a freight bill which does not contain this information.*

If your shipment was transported on a collect on delivery basis (COD), you will be expected to pay the total charges appearing on the freight bill at the time of delivery unless the mover provided a non-binding estimate of approximate cost and the total charges *for the services included in the estimate* exceed 110 percent of the estimated charges.

It is customary for movers to provide in their tariffs that freight charges must be paid in cash, by certified check, or money order. When this requirement exists, the mover will not accept personal checks. At the time you make arrangements for your move, you should ask the mover about the form of payment that is acceptable.

Some movers permit payment of freight charges by use of a charge card. However, do not assume that because you have a nationally recognized charge or credit card that it will be acceptable for payment. Ask the mover at the time the arrangements are made.

If you do not pay the transportation charges at the time of delivery the mover has the right under the bill of lading to refuse to give you your goods. The mover may place them in storage at your expense until the charges are paid.

If, before payment of the transportation charges, you discover an error in the charges, you should attempt to correct the error with the driver, the mover's local agent, or by contacting the mover's main office. If an error is discovered after payment, you should write the mover (the address will be on the freight bill) explaining the error and request a refund.

Movers customarily check all shipment files and freight bills after a move has been completed to make sure the charges were accurate. If an overcharge is found you will be notified and a refund made. If an undercharge occurred you will be billed for the additional charges due.

Payment of the Transportation Charges on Shipments Transported on Two or More Vehicles

Although all movers try to move each shipment on one truck it becomes necessary at times to divide a shipment among two or more trucks. This frequently occurs when an automobile is included in the shipment and it is transported on a vehicle specially designed to transport automobiles. When this occurs your transportation charges are the same as if the entire shipment moved on one truck.

If your shipment is divided for transportation on two or more trucks you are not required to pay the *total* charges until all portions of the shipment have been delivered. However, as each portion of the shipment is delivered, the mover can require payment for that portion.

Movers are also permitted, but not required, to delay the collection of all the charges until the entire shipment is delivered. At the time you make the arrangements for your move, you should ask the mover about its policies in this respect.

Payment of Transportation Charges on Shipments Lost or Destroyed in Transit

Movers customarily make every effort to assure that while your shipment is in their possession for transportation, no items are lost, damaged or destroyed. However, despite the precautions taken, articles are sometimes lost or destroyed during the move.

In addition to any money you may recover from the mover to compensate for lost or destroyed articles, you are also entitled to recover the transportation charges represented by the portion of the shipment lost or destroyed.

Should your entire shipment be lost or destroyed while in the mover's possession, the mover cannot require you to pay any of the charges except the amount you have paid or agreed to pay for added liability protection. The fact that you do not pay any transportation charges does not affect any right you may have to recover reimbursement for

the lost or destroyed articles providing you pay the charges for added liability protection.

Filing of Claims for Loss and Damage or Delay

Dispute Resolution Programs

Should your move result in the loss or damage to any of your property you have the right to file a claim with the mover to recover money for such loss or damage.

You have nine months following either the date of delivery or the date on which the shipment should have been delivered to file a claim. However, you should file a claim as soon as possible. If you fail to file a claim within 120 days following delivery and later bring a legal action against the mover to recover the damages, you may not be able to recover your attorney fees even though you win the court action.

The Interstate Commerce Commission cannot resolve loss and damage claims. If you cannot settle a claim with the mover, you may file a civil action to recover in court. If the mover participates in a dispute resolution program, you may find submitting your claim to arbitration under such a program a less expensive and more convenient way to seek recovery. Movers which participate in a dispute resolution program are required to advise all shippers of the existence and details of the program before they accept a shipment to be transported. If the mover does not provide information about a dispute resolution program at the time an order for service is prepared, you should ask whether the mover participates in such a program.

In Conclusion

Should you have any questions about your move which are not answered in this pamphlet, do not hesitate to ask the mover's representative who handled the arrangements for your move, the driver who transports your shipment or the mover's main office for additional information.

For further advice or assistance, contact the Interstate Commerce Commission as discussed on page 1.

Points To Remember

- Movers may give binding estimates.
- Non-binding estimates may not be accurate; actual charges may often exceed the estimate.
- Specify pick up and delivery dates in the *order for service.*
- The *bill of lading* is your contract with the mover . . . read it carefully . . . if you have any questions ask your mover or call the I.C.C.
- Be sure that you understand the extent of your mover's liability for loss and damage.
- You have the right to be present each time your shipment is weighed.
- You may request a reweigh of your shipment.
- If your have moved on a non-binding estimate, you should have enough cash or a certified check to pay the estimated cost of your move plus 10 percent more at time of delivery.

Proposed Rules

Federal Register
Vol. 46, No. 248
Monday, December 28, 1981

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

NATIONAL CREDIT UNION ADMINISTRATION

12 CFR Part 701

Request for Comments on Proposal to Deregulate Share, Share Draft, and Share Certificate Accounts

AGENCY: National Credit Union Administration.

ACTION: Advance notice of proposed rulemaking.

SUMMARY: Subsequent to the passage of the Depository Institutions Deregulation and Monetary Control Act of 1980, there have been numerous amendments to § 701.35 of the NCUA Rules and Regulations. This Section governs generally the terms and conditions, including dividend rates payable, on share, share draft, and share certificate accounts. At the present time, the various amendments to § 701.35 provide Federal credit unions the opportunity to offer short- and long-term accounts paying dividends competitive with market rates of interest. Therefore, as a practical matter, Federal credit unions are deregulated under the present regulation. Consequently, the NCUA Board is soliciting comment on a proposal to deregulate § 701.35 by permitting Federal credit unions to offer accounts subject to terms and conditions determined by a credit union's Board of Directors.

DATES: Comments must be received on or before February 1, 1982.

ADDRESS: Send comments to Regulatory Development Coodinator, Robert Monheit, National Credit Union Administration, 1776 G St., NW, Washington, DC 20456.

FOR FURTHER INFORMATION CONTACT: Randall J. Miller, Acting Director, Office of Policy Analysis, Telephone (202) 357–1090, or Robert Fenner, Deputy General Counsel, Telephone (202) 357–1030.

SUPPLEMENTARY INFORMATION: In March 1980, the Depository Institutions Deregulation and Monetary Control Act (Pub. L. 96–221) was enacted. Title II, the Depository Institution Deregulation Act, directed the NCUA Board to provide for the removal of dividend rate ceiling restrictions on or before March, 1986. Subsequent to the passage of the Act, the NCUA Board approved several amendments to § 701.35 of the NCUA rules and regulations. This Section governs the terms and conditions, including maximum dividend rates payable, on credit union share accounts.

The Current Regulation

The current rule defines the various types of accounts that may be offered (§ 701.35(a)) and requires that certain procedures be followed in the issuance of such accounts (§ 701.35(b)). Section 701.35(c) establishes the requirements for share drafts, including requirements of written operational specifications, written account agreements, truncation of drafts, retention of drafts or photo copies, and surety bond coverage. Section 701.35(d) addresses general provisions relating to the qualifying period, renewal, and cancellation of share certificate accounts. Penalties for early withdrawal from share certificate and exceptions to such penalties are contained in § 701.35 (e) and (f). Variable dividends are authorized by § 701.35(g). The dividend structure and ceilings on different types of share, share certificate, and share draft accounts are provided in § 701.35(h). Advertising and disclosure requirements are contained in § 701.35 (k) and (l) respectively.

A Deregulation Proposal

The NCUA Board desires to solicit public comment on a proposal to deregulate § 701.35 of the NCUA Rules and Regulations. The deregulation proposal would place the responsibility for determining the terms and conditions governing accounts with a Federal credit union's board of directors. For example, a board of directors would be responsible for determining the classes of accounts to be offered, maturities, dividend rates, minimum denominations, premature withdrawal penalty provisions, and any other terms or conditions governing the account.

In addition, the NCUA Board would like to receive comments on whether the operational constraints and advertising and disclosure provisions in the current regulations should be amended.

Dated: December 18, 1981.

Rosemary Brady,

Secretary of the Board.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 11

[Docket No. 22471; Petition Notice No. 81–16]

Petition of United Air Lines, Inc. for Rulemaking; Rescind the High Density Traffic Airports Rule

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Publication of petition for rulemaking for change in certain FAA regulations.

SUMMARY: This notice publishes for public comment a summary of the petition of United Air Lines, Inc. The summary was provided by United Air Lines. The petitioner requests that a regulation be issued rescinding the High Density Traffic Airports Rule, Part 93, Subpart K of the Federal Aviation Regulations, insofar as it applies to Chicago's O'Hare International Airport. Comments are also invited on United's petition in connection with the applicability of the rule at Kennedy International and LaGuardia Airports. Although this notice sets forth a summary of the petition as received, its publication does not represent any agency position on the merits of the petition. This notice does not propose any amendment of current rules or any change in policy or procedures. After consideration of the available data and comments received in response to this notice, the FAA will determine whether it should proceed to rulemaking or other proceedings based on the United Air Lines petition. If rulemaking is appropriate, a notice of proposed rulemaking containing regulatory proposals will be issued.

DATES: Comments must be received on or before February 26, 1982.

ADDRESS: Send comments on this petition in duplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rules Docket (AGC–204),

Docket No. 22471, 800 Independence Avenue, SW., Washington, D.C. 20591.

FOR FURTHER INFORMATION CONTACT:
Edward P. Faberman, Acting Deputy Chief Counsel, Office of the Chief Counsel, Federal Aviation Administration, 800 Independence Avenue, SW, Room 900E, Washington, D.C. 20591, Telephone (202) 426–3775.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to submit such written data, views, or arguments on the petition as they may desire. Communications should identify the docket or petition notice number and be submitted in duplicate to the address indicated above. All communications received on or before the closing date will be considered before taking action on the petition. All comments submitted will be available for examination in the FAA docket. Persons wishing the FAA to acknowledge receipt of comments received in response to this notice should submit a self-addressed, stamped postcard which states "Comments to Docket No. 22471." The postcard will be date and time stamped and returned to the commenter.

Background

Since April 27, 1969, O'Hare Airport has been operated under a special air traffic rule known as the "High Density" rule (14 CFR 93.121 et seq.). The rule was adopted in response to serious airspace and airport congestion. It was intended to provide relief from excessive delays at certain major terminals including O'Hare, Kennedy International and LaGuardia Airports. The rule limits the hourly number of allocated IFR (instrument flight rules) operations (takeoffs and landings) that may be reserved for the specified classes of users for those airports as follows:

Class of user	John F. Kennedy Airport[1]	LaGuardia Airport	O'Hare[1] Airport
Air carriers except air taxis	70	48	115
Scheduled air taxis	5	5	10
Other	5	5	10

[1] The allocation of IFR reservation for air carrier except air taxis at the John F. Kennedy Airport is 60 IFR reservations per hour from 5:00 p.m. to 8:00 p.m. These limitations only apply to Kennedy and O'Hare Airports during the hours from 3:00 p.m. to 7:59 p.m., local time

Summary of the Petition

Accordingly, the Federal Aviation Administration publishes a summary of the petition for rulemaking of United Air Lines, Inc. dated December 7, 1981, and invites comments on the petition. This notice is published pursuant to paragraphs (b) and (f) of § 11.27 of Part 11 of the Federal Aviation Regulation (14 CFR Part 11).

Issued in Washington, D.C. on December 21, 1981.

Edward P. Faberman,

Acting Deputy Chief Counsel.

Summary of Petition for Rulemaking of United Air Lines, Inc.

Pursuant to § 11.25 of the Federal Aviation Regulations United Air Lines, Inc. hereby submits a summary of a petition for rulemaking which is being filed concurrently herewith:

United Air Lines, Inc. ("United") petitions the Administrator of the Federal Aviation Administration ("FAA") to promulgate a regulation which rescinds the High Density Traffic Airports Rule, Part 93, subpart K of the FAR's (14 CFR § 93.121, *et seq.*) insofar as it applies to Chicago's O'Hare International Airport. In support of its petition, United states as follows:

The High Density or slots limitations at O'Hare were implemented by the FAA in 1968 in order to combat terminal groundside congestion problems. 33 FR 17896. The FAA specifically indicated that the slot limits were temporary and were to be removed as soon as possible. 34 FR 2603. In spite of the fact that the congestion problem at O'Hare which formed the basis for the rule has long since been corrected, the slot limits have remained in effect.

Developments in the air traffic control system and at O'Hare airport have made the slot limits there obsolete. The FAA, since 1968, has substantially improved and expanded its procedures for air traffic control, particularly in the development and implementation of flow control procedures. Similarly, O'Hare is not physically the same airport as it was in 1968 when the quotas were implemented. Notably, a sixth air carrier runway was constructed in 1971, as well as new Instrument Landing Systems, high speed turnoffs and arrival holding areas which all have served to enhance the capacity of the airport.

Retention of the slot limits at O'Hare is inconsistent with the national air transportation policy of deregulation. The slot limits constitute serious barriers to competition at O'Hare and the three other slot-controlled U.S. airports. At all of the other 637 U.S. air carrier cities these barriers do not exist. Thus the slots rule has created a serious disadvantage for the City of Chicago, its passengers, shippers and air carriers in the highly competitive environment of deregulation.

Elimination of the slots rule will not have an adverse impact on the environment. There is very little relationship between slots and noise impact, since human noise response is a function of the cumulative amount of noise energy that an individual listener is exposed to, rather than to the number of occurrences which produce noise. Moreover, due to the high gate utilization rates at O'Hare, the elimination of the rule will result in only minimal increases in actual operations levels at the airport.

For these reasons, United petitions the FAA to rescind the High Density Rule at O'Hare insofar as it applies at that point.

BILLING CODE 4910-13-M

Federal Highway Administration

23 CFR Parts 625, 646, and 655

[FHWA Docket 80–11]

National Standards for Traffic Control Devices; Manual on Uniform Traffic Control Devices; Railroad-Highway Projects

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Withdrawal of advance notice of proposed rulemaking.

SUMMARY: The purpose of this notice is to announce that the Federal Highway Administration is closing Docket 80–11 without further action and does not intend to institute additional rulemaking proceedings at this time on the subjects of criteria for the selection of specific highway traffic control systems at railroad-highway crossings and the use of flashing light signals without the use of automatic gates. FHWA is taking this action on the basis of the negative response received to the proposals set forth in the advance notice of proposed rulemaking.

FOR FURTHER INFORMATION CONTACT:
Mr. Robert B. Helland, Office of Traffic Operations, (202) 426–0411, or Mr. Thomas P. Holian, Office of the Chief Counsel, (202) 426–0761, Federal Highway Administration, 400 Seventh Street, SW., Washington, D.C. 20590. Office hours are from 7:45 a.m. to 4:15 p.m. ET, Monday through Friday.

SUPPLEMENTARY INFORMATION: On June 6, 1980, the Federal Highway Administration issued an advance notice of proposed rulemaking (ANPRM) published in the **Federal Register** on June 12, 1980 (45 FR 40062), inviting interested persons to comment on revising Part VIII of the Manual on Uniform Traffic Control Devices (MUTCD) to (1) Include national criteria for the selection of specific highway traffic control systems at railroad-highway crossings and (2) to eliminate the use of flashing light signals without the use of automatic gates.

The advance notice of proposed rulemaking sets forth its subject matters as follows:

Item I. As a result of an advance notice of proposed rulemaking (ANPRM) published in the Federal Register on August 10, 1978 (FHWA Docket 78–13) the FHWA is

considering revising Part VIII of the Manual on Uniform Traffic Control Devices (MUTCD) to include national criteria for the selection of specific highway traffic control systems at railroad-highway crossings. Three alternative methods or options are presented for revising Part VIII as follows:

(a) The establishment of national criteria expressed as a baseline hazard index.

(b) The establishment of criteria for selecting specific traffic control systems at railroad-highway crossings based on a quantitative approach. This procedure would involve the computation of hazard index levels and their comparison to development threshold values.

(c) The establishment of criteria based on a descriptive approach. This method would include a listing of descriptive factors which would be utilized in the selection of highway traffic control systems for installation at railroad-highway crossings.

Item II. The FHWA is also considering the desirability of revising Part VIII of the MUTCD to eliminate the use of flashing light signals without the use of automatic gates.

A total of 85 written responses to this advance notice were received. Forty-one responses were received from State highway and transportation departments; 16 from local/county governments; six from State public utility/service commissions; four from railroads; three from other Federal agencies; and 15 from other organizations and individuals.

The overwhelming majority of responses received addressing Item I were negative. Commenters generally opposed the establishment of mandatory national criteria and responded negatively to each of the three alternatives offered in Item I. Commenters argued that any such national criteria, if established, should be identified as good practice and not made mandatory. Many commenters indicated that national criteria should be used to identify certain classes of crossings which should be evaluated by local diagnostic teams, with the final decision on improvements to be made at a specific crossing resting with the local diagnostic team.

Sixty of the 81 commenters responding to Item II opposed this proposed revision to the MUTCD. Ten other respondents provided "qualified no" responses. Generally the commenters argued that the practice of installing automatic gates where there are flashing light signals should be encouraged; however, they believe that there are a number of situations in which gate installation would be inappropriate or impractical. Consequently, these commenters urged that installation of gates not be mandated in all instances when flashing lights are used.

On the basis of the negative response received to the proposals set forth in the advance notice of proposed rulemaking, the FHWA is withdrawing FHWA Docket 80–11.

The FHWA has determined that this document contains neither a major rule under Executive Order 12291 nor a significant regulation under the regulatory policies and procedures of the Department of Transportation. Withdrawal of this advance notice of proposed rulemaking will not have a significant economic effect inasmuch as no costs will be associated with this action. Accordingly, a full regulatory evaluation is not required. Under the criteria of the Regulatory Flexibility Act, it is certified that this action will not have a significant economic impact on a substantial number of small entities.

In consideration of the foregoing, the advance notice of proposed rulemaking published in the **Federal Register** on June 12, 1980 (45 FR 40062), and circulated as advance notice 80–11, is hereby withdrawn.

This withdrawal is issued under the authority of 23 U.S.C. 109 (b) and (d), 315, and 402(a), and the delegation of authority in 49 CFR 1.48(b).

Issued on December 17, 1981.

R. A. Barnhart,

Federal Highway Administrator.

[FR Doc. 81–36063 Filed 12–24–81; 8:45 am]

BILLING CODE 4910–22–M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[A–5–FRL 2001–4]

Michigan; Approval and Promulgation of Implementation Plans

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of proposed rulemaking.

SUMMARY: On June 26, 1981 and on August 24, 1981, the State of Michigan submitted Consent Orders No. 12–1981 and APC 19–1981 for the Dow Chemical Company (DOW) as revisions to the Michigan State Implementation Plan (SIP). Consent Order APC No. 19–1981 provides for control of sulfur dioxide (SO_2) and total suspended particulates (TSP) emissions from the company's West Side and South Side power plants in Midland County, Michigan. All particulate emission sources at Dow must comply with various parts of Michigan's SIP between July 21, 1981 and December 31, 1985. Consent Order 12–1981 establishes a schedule for installation of TSP control devices and sets October 1, 1982 as the compliance date for TSP emissions from the liquid waste incinerator in Dow's Building 830. The purpose of today's action is to solicit public comment on the Consent Orders and on EPA's proposed approval of these orders as SIP revisions.

DATE: Comments on this SIP revision must be received by no later than January 27, 1982.

ADDRESSES: Copies of these SIP revisions are available for review at the following addresses:

Air Programs Branch, Region V, U.S. Environmental Protection Agency, 230 South Dearborn Street, Chicago, Illinois 60604

Michigan Department of Natural Resources, Air Quality Division, State Secondary Government Complex, General Office Building, 7150 Harris Drive, Lansing, Michigan 48917

Written comments should be sent to: Gary Gulezian, Chief, Regulatory Analysis Section, Air Programs Branch, Region V, U.S. Environmental Protection Agency, 230 South Dearborn Street, Chicago, Illinois 60604

FOR FURTHER INFORMATION CONTACT: Toni Lesser, Regulatory Analysis Section, Air Programs Branch, Region V, U.S. Environmental Protection Agency, 230 South Dearborn Street, Chicago, Illinois 60604, (312) 886–6037.

SUPPLEMENTARY INFORMATION: On April 25, 1979, the State of Michigan submitted a SIP revision to comply with the requirements of the 1977 amendments to the Clean Air Act (Act). The strategy developed by the State of Michigan to ensure attainment of both the primary and secondary national ambient air quality standards (NAAQS's) for TSP requires reasonably available contol technology on the traditional point and fugitive sources of TSP and, where necessary, additional controls on those traditional sources which have been identified as causing or contributing to the TSP problems in nonattainment areas. The additional control requirements are to be contained in enforceable abatement orders. Part of Michigan's submittal included a commitment to develop these abatement orders for the sources contributing to TSP problems in certain nonattainment areas. For Midland County, the State committed to the following schedule (Air Quality Implementation Plan, Table 2.14, p. 2–53) for identifying the sources contributing to the TSP problem and for developing abatement orders for these sources:

(a) Completion of additional studies in Midland County by October 30, 1980;

(b) Development of enforceable control orders or additional emission limits by October 30, 1981; and

(c) Final attainment of the secondary NAAQS for TSP by October 1984.

The Dow Chemical Company is located in an area of Midland County which was designed as nonattainment for the secondary TSP and for the primary SO_2 NAAQS's. The following is a synopsis of EPA's review of Consent Orders #12–1981 and APC #19–1981 for the Dow Chemical Company which were submitted as SIP revisions pursuant to Michigan's earlier commitment.

Consent Order No. 12–1981

On June 28, 1981, the State of Michigan submitted to EPA Consent Order #12–1981. The Consent Order provides a schedule for installation of air pollution control devices and/or other equipment to control particulate emissions from the liquid waste incinerator in Building 830 at Dow's Midland plant. The schedule establishes a final particulate emissions compliance date of October 1, 1982. By that time, particulate emissions from the incinerator must not exceed 0.1 pounds of particulate matter per every 1000 pounds of exhaust gases, corrected to 50% excess air. This emission limitation is the same as specified for liquid waste incinerators in Table 31 of Michigan R336.1331.

According to Michigan R336.1331, compliance with this emission limitation must be as expeditious as practicable, but not later than December 31, 1982. On May 6, 1980 (45 FR 29790), USEPA approved the compliance date of December 31, 1982 for the attainment of TSP NAAQS in all nonattainment areas.

USEPA has reviewed Consent Order #12–1981 and conluded that its provisions will not interfere with attainment and maintenance of the Primary TSP standards and will, in fact, contribute to the State's goal of attainment and maintenance of the secondary TSP standard as expeditiously as practicable and prior to Michigan's federally approved secondary attainment date of October 1, 1984.

Consent Order APC No. 19–1981

On August 24, 1981, the State of Michigan submitted Consent Order APC #19–1981 to EPA. The Order contains an alternative control strategy for particulate emissions from Dow's West Side and South Side power plants. On October 16, 1981, the State of Michigan submitted a letter to EPA clarifying that only paragraphs A(3), B,C,D, and E on pages 1 through 6 of the Consent Order for the specific sections summarized below are intended for EPA's proposed rulemaking action.

Control Program

The Dow Chemical Company in Midland operates Boilers 14, 15, 16, 17, and 18 at the South Side power plant and Boilers 9, 12,13, 19, and 20 at the West Side power plant. The TSP and SO_2 emission rates have been in excess of those allowed by the federally approved Michigan Rules 336.1301, 336.1331, and 336.1401. These regulations require Dow's coal/oil fired boilers to meet the following emission limitations:

(a) Visible emission limits (R336.1301);

(b) A boiler-specific TSP emission limitation between 0.20 and 0.27 lbs/1000 lbs of exhaust gases at 50% excess air depending on the capacity of the boiler; (R336.1331); and

(c) A plantwide 1% fuel sulfur content limitation.

To comply with Michigan's rules, Dow originally intended to purchase its steam and electrical power needs from the Midland Nuclear Power Plant to be built by the Consumers Power Company. By this strategy, Dow would have been able to discontinue operation of the West Side and South Side power plants, except during periods of service interruptions at the nuclear plant, and thereby almost totally eliminate TSP and SO_2 emissions from its plants. However, a series of delays in construction of the nearby nuclear plant and litigation with EPA and the State of Michigan have prompted Dow to develop an alternative control strategy. Dow's program now includes the following elements:

(a) Restricting the use of coal to Boilers 13–17 and 20 only;

(b) Switching to low sulfur, low ash coal at both plants;

(c) Constructing a common stack with a baghouse for particulate control at the South Side power plant; and

(d) Complying with Michigan TSP SIP at the West Side power plant by December 31, 1985.

Paragraph A(3) of Consent Order APC #19–1981 states that the Michigan Department of Natural Resources and Dow have agreed, that between September 1, 1981 and December 31, 1982, Dow shall not burn coal or oil in more than three boilers at the South Side power plant unless the sulfur content of the fuel is less than 0.9 percent by weight. This is more restrictive than the 1.0 percent sulfur content limitation contained in Michigan's October 16, 1981 letter states that emission limitations for particulate matter and continuous emission monitoring requirements submitted as revisions to the existing SIP are contained in paragraphs B,C,D, and E of the Consent Order. All particulate emission sources at Dow must comply with Michigan's revised SIP by December 31, 1985.

Order APC #19–1981 establishes the following provisions:

(1) A date of December 31, 1982 for compliance with the opacity and TSP rules at the South Side plant (R336.1301 and R336.1331, respectively). In the interim (September 1, 1981 to December 31, 1982), Dow shall install "air pollution control device(s) and/or other equipment" at the South Side plant and the plant must meet:

(a) A TSP emission limit of 0.62 lbs/1000 lbs of exhaust gases;

(b) A 24-hour and 30-day rolling average ash content of 7 percent and 5 percent respectively; and

(c) No specific visible emission limit (compliance determined by the ash content of th coal burned).

(2) A date of December 31, 1985 for compliance with the opacity and TSP rules at the West Side plant. In the interim (September 1, 1981 to December 31, 1985), the West Side plant must meet:

(a) A TSP limit of 0.47 lbs/1000 of exhaust gases at Boiler 13;

(b) A TSP limit of 0.55 lbs/1000 lbs of exhaust gases at Boiler 20;

(c) A 24-hour and 30-day rolling average ash content of 7 percent and 5 percent respectively; and

(d) No specific visible emission limits (compliance determined by the ash content of the coal burned).

The Consent Order also contains provisions which:

Specify the procedures to be followed for determining compliance with the sulfur and particulate limitations (contained in Appendices A and B of the Consent Order);

Prohibit coal from being burned in Boilers 9, 12, 18, and 19 after the effective date of the Consent Order; and

Require installation of continuous opacity monitors at the South Side plant's new stack by December 31, 1982 and at the West Side plant stacks serving Boilers 13 and 20 by December 31, 1985, if these boilers are to remain in operation.

On September 28, 1981, the United States District Court for the Eastern District of Michigan, in the case of the *United States of America* v. *Dow Chemical Company* (Civil Action No. 80–40423, E. D. Michigan, July 20, 1981), signed a consent decree which will impose an abatement program on Dow. The decree contemplates that Dow will petition for a modification to the decree to be consistent with the particulate emission limits contained in Consent

Order APC #19–1981. Other than this potential modification, EPA's approval of Michigan's Consent Order will not in any way alter Dow's requirement to comply with all terms of the final consent decree. In addition, the consent decree provides a schedule for completion of a good engineering practice stack and a baghouse for the coal boilers at the South Side plant. These specific measures are referred to only as "air pollution control device(s) and/or other equipment" in the consent order.

Attainment Demonstration

On July 6, 1981, Dow submitted to the State results from an air quality modeling analysis using the Industrial Source Complex rural, short-term model. The analysis demonstrates that the interim particulate emission limits at the South Side and West Side plants' coal-fired boilers will not cause or contribute to a violation of the primary TSP NAAQS. The Consent Order APC #19–1981 requires incremental TSP reductions. First, low ash coal is to replace high ash coal at all coal-fired boilers by September 1, 1981. Second, after December 31, 1982, a baghouse and a new common stack at the South Side plant will reduce plantwide TSP emissions to 36% of the interim (September 1, 1981 to December 31, 1982) levels. In addition, a new taller stack, combining the flues presently vented to the existing two stacks, will result in better dispersion and less ambient impact from the South Side plant. Accordingly, Dow will not cause or contribute to a violation of the secondary NAAQS for TSP by the October 1, 1984 attainment date.

Michigan's Consent Order and the judicial consent decree specify the visible emission limitations to be met by the South Side and West Side plants by December 31, 1982 and December 31, 1985, respectively. Appendix B of the judicial consent decree requires coal sampling which will be used to determine compliance with the interim particulate emission limits.

EPA has reviewed Consent Order APC #19–1981 and has concluded that the Order will provide for maintenance of the primary NAAQS for TSP and for the attainment and maintenance of the secondary standard for TSP as expeditiously as practicable and within the State's commitment of attainment by October 1, 1984. The Order will result in substantial enforceable reductions in particulate emissions over present actual emissions and is consistent with the provisions contained in the consent decree issued in the *United States of America* v. *Dow Chemical Company* [illegible].

EPA proposes to approve Consent Order #12–1981 and the parts of APC #19–1981 submitted as revisions to Michigan's SIP. Interested indivuduals are advised that a 30-day public comment period is being provided on this notice of proposed rulemaking. It is requested that, where possible, comments be submitted in triplicate. All comments received will be available for inspection during normal business hours at the Region V Office listed at the front of this notice.

Pursuant to the provisions of 5 U.S.C. 605(b), the Administrator certified on January 27, 1981, (46 FR 8709) that approvals of SIPs under sections 110 or 172 of the Clean Air Act would not have a significant economic impact on a substantial number of small entities. Today's action proposes to approve a State action for a site-specific source under Sections 110 and 172 of the Act. It imposes no requirements beyoud those which the State and the Federal district court have already imposed on Dow and affects only that company.

Under Executive Order 12291, EPA must judge whether a regulation is "major" and, therefore, subject to the requirements of a Regulatory Impact Analysis. Today's action does not constitute a major regulation since it approves provisions which the State adopted and submitted to EPA. EPA is not imposing any requirements which are different from those already required by the State.

(Secs. 110 and 172 of the Clean Air Act)

Dated: November 13, 1981.

Valdas V. Adamkus,

Regional Administrator.

BILLING CODE 6560–38–M

FEDERAL MARITIME COMMISSION

46 CFR 510

[General Order 4, Revised; Amdt. 1; Docket No. 81–76]

Licensing of Independent Ocean Freight Forwarders

AGENCY: Federal Maritime Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Omnibus Budget Reconciliation Act of 1981 (Pub. L. 97–35) amends sections 1 and 44 of the Shipping Act, 1916 to remove restrictions against affiliations between an independent ocean freight forwarder and a person who is a shipper or consignee or a seller or purchaser of shipments to foreign countries via oceangoing common carriers. This proposed rulemaking would amend the Commission's rules in General Order 4, Revised (46 CFR 510) to comport with the new statute.

DATES: Comments (original and 15 copies) on or before February 1, 1982.

ADDRESS: Send comments to Francis C. Hurney at the address listed below.

FOR FURTHER INFORMATION CONTACT: Francis C. Hurney, Secretary, Federal Maritime Commission, 1100 L Street, NW, Washington, D.C. 20573, (202) 523–5725.

SUPPLEMENTARY INFORMATION: The Federal Maritime Commission's rules governing the licensing and operation of independent ocean freight forwarders are contained at 46 CFR 510[1] and are commonly known as General Order 4, Revised. The definition of the term "independent ocean freight forwarder" ("forwarder") and the conditions under which forwarders are licensed to operate are based on and subject to sections 1 and 44 of the Shipping Act, 1916 ("the Act"). As a result of recent statutory amendments to sections 1 and 44 of the Act,[2] which remove the restrictions against affiliations between forwarders and persons such as export shippers who use oceangoing common carriers, the Commission now proposes revisions to General Order 4, Revised, for the purpose of bringing those rules into conformity with the amendments to the Act.

Section 1 of the Act has been amended to define a forwarder as follows:

> The term "independent ocean freight forwarder" means a person that is carrying on the business of forwarding for a consideration who is not a shipper, consignee, seller, or purchaser of shipments to foriegn countries.

Previously, the definition read:

> An "independent ocean freight forwarder" is a person carrying on the business of forwarding for a consideration who is not a shipper or consignee or a seller or purchaser of shipments to foreign countries, *nor has any beneficial interest therein, nor directly or indirectly controls or is controlled by such shipper or consignee or by any person having such a beneficial interest.* (emphasis added.)

Section 44 of the Act has been amended by adding new subsection (f):

> (f) A forwarder may not receive compensation from a common carrier with respect to any shipment in which the forwarder has a beneficial interest or with

[1] See 46 FR 24565, May 1, 1981.

[2] See section 1608 of Pub. L. 97–35, the Omnibus Budget Reconciliation Act of 1981.

respect to any shipment in which any holding company, subsidiary, affiliate, officer, director, agent, or executive of such forwarder has a beneficial interest.

The statutory amendments further provide that the above-quoted changes to sections 1 and 44 of the Act will remain in effect until December 31, 1983, after which time the definition of an "independent ocean freight forwarder" will revert back to that in effect prior to August 13, 1961, the date of the enactment of the amendments.

The following five revisions to General Order 4, Revised, are being proposed. Additions are enclosed in arrows (► ◄), and deletions are enclosed in brackets ([ ]):

(1) Section 510.2(j), which defines an independent ocean freight forwarder, would be amended by deleting the references to the no longer prohibited status of having beneficial interests in ocean shipments and/or having shipper or consignee affiliates. The Commission proposes to amend section 510.2(j) to read:

"Independent ocean freight forwarder" refers to a person performing freight forwarding services for a consideration, either monetary or otherwise, who is not a shipper or consignee or seller or purchaser of property in commerce from the United States [and who has no beneficial interest therein, nor directly or indirectly controls or is controlled by such shipper or consignee or by any person having such a beneficial interest].

(2) Section 510.12, which describes a class of persons not eligible for a forwarder's license, would be amended by deleting the references to the no longer disqualifying status of having beneficial interests in ocean shipments and/or having shipper or consignee affiliations. The Commission proposes to amend § 510.12 to read:

No person is eligible for a license who is a shipper, consignee, seller, or purchaser of shipments in commerce from the United States [, or who has any beneficial interest therein, or who directly or indirectly controls or is controlled by such shipper, consignee, seller, or purchaser of shipments or by any person having a beneficial interest in such shipment]

(3) Section 510.32(a), which bars a forwarder from having a no longer prohibited beneficial interest in ocean shipments, would be amended by deleting the reference to such beneficial interest. The amended § 510.32(a) would read:

[*Beneficial interest.*]
►*Prohibition.*◄ No licensee shall act in the capacity of a shipper, consignee, seller, or purchaser of any shipment in commerce from the United States [, nor have any beneficial interest in such a shipment].

(4) Section 510.33(c), which sets forth the certification required to be made by a forwarder in order to obtain compensation from an oceangoing common carrier under subsection 44(e) of the Act, would be broadened for the sole purpose of reflecting new subsection 44(f) of the Act. The amended § 510.33(c) would read.

Form of certificate. Prior to receipt of compensation, the licensee shall file with the carrier, in addition to the anti-rebate certification required by § 510.31(h) of this part, a signed certification as set forth below on one copy of the relevant ocean bill of lading which indicates performance of at least two of the listed services in addition to arranging for space:

The undersigned herby certifies ►that neither it nor any holding company, subsidiary, affiliate, officer, director, agent or executive of the undersigned has a beneficial interest in this shipment;◄ that it is the holder of valid FMC License No.——, issued by the Federal Maritime Commission and has, in addition to soliciting and securing the cargo specified herein or booking or otherwise arranging for space for such cargo, performed at least two (2) of the following services, as indicated:

(1) Coordinated the movement of the cargo to shipside.

(2) Prepared and processed the ocean bill of lading.

(3) Prepared and processed dock receipts or delivery orders.

(4) Prepared and processed consular documents or export declarations.

(5) Paid the ocean freight charges.

A copy of such certificate shall be retained by the licensee pursuant to § 510.34 of this part.

(5) New paragraph (h) would be added to § 510.33. That new paragraph would be the above-quoted new subsection 44(f) of the Act, with two technical modifications necessary to conform the statutory language to the definitions in Part 510. First, the word "freight" would be inserted before the words "forwarder may not receive", and, second, the word "oceangoing" would be inserted before the words "common carrier". Those two modifications clarify, but do not alter in any manner, the meaning of the statutory language.

Pursuant to the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), the Commission certifies that the revisions proposed herein would not, if promulgated, have a significant economic impact on a substantial number of small entities. The proposals do not require additional reports or records, and are based entirely on changes to the underlying law. Any economic impact which might occur would occur as a direct result of the changes to the law, regardless of whether the proposed revisions are adopted or not. Nor are there any rules which the Commission could promulgate that would prevent such occurrence.

PART 510—LICENSING OF INDEPENDENT OCEAN FREIGHT FORWARDERS

Therefore, pursuant to sections 18, 21, 43, and 44 of the Shipping Act, 1916 (46 U.S.C. 817, 820, 841a and 841b), and 5 U.S.C. 553, the following provisions of Title 46 of the Code of Federal Regulations are proposed to be amended to read as follows:

1. Section 510.2 is amended by revising paragraph (j) to read as follows:

§ 510.2 Definitions.

* * * * *

(j) "Independent ocean freight forwarder" refers to a person performing freight forwarding services for a consideration, either monetary or otherwise, who is not a shipper or consignee or seller or purchaser of property in commerce from the United States.

* * * * *

2. Section 510.12 is revised to read as follows:

§ 510.12 Persons not eligible.

No person is eligible for a license who is a shipper, consignee, seller, or purchaser of shipments in commerce from the United States.

3. Section 510.32(a) is revised to read as follows:

§ 510.32 Forwarder and principal; fees.

(a) *Prohibition.* No licensee shall act in the capacity of a shipper, consignee, seller, or purchaser of any shipment in commerce from the United States.

* * * * *

4. Section 510.33 is amended by revising paragraph (c) and by adding paragraph (h) to read as follows:

§ 510.33 Forwarder and carrier; compensation.

* * * * *

(c) *Form of certification.* Prior to receipt of compensation, the licensee shall file with the carrier, in addition to the anti-rebate certification required by § 510.31(h) of this part, a signed certification as set forth below on one copy of the relevant ocean bill of lading which indicates performance of at least two of the listed services in addition to arranging for space:

The undersigned hereby certifies that neither it nor any holding company, subsidiary, affiliate, officer, director, agent or executive of the undersigned has a beneficial interest in this shipment; that it is the holder of valid FMC License No. ——, issued by the Federal Maritime Commission and has, in addition to soliciting and securing the cargo specified herein or booking or otherwise arranging for space for such specified herein or booking or otherwise arranging for space for such cargo, performed at least two (2) of the following services, as indicated:

(1) Coordinated the movement of the cargo to shipside.

(2) Prepared and processed the ocean bill of lading.

(3) Prepared and processed dock receipts or delivery orders.

(4) Prepared and processed consular documents or export declarations.

(5) Paid the ocean freight charges.

A copy of such certificate shall be retained by the licensee pursuant to § 510.34 of this part.

* * * * *

(h) A freight forwarder may not receive compensation from an ocean-going common carrier with respect to any shipment in which the forwarder has a beneficial interest or with respect to any shipment in which any holding company, subsidiary, affiliate, officer, director, agent, or executive of such forwarder has a beneficial interest.

By the Commission

Francis C. Hurney,

Secretary.

46 CFR Part 536

[General Order 13, Admt. No. 10, Docket No. 80-56]

Publishing and Filing Tariffs by Common Carriers in the Foreign Commerce of the United States; Prohibition of Filing Temporary Amendments

AGENCY: Federal Maritime Commission.

ACTION: Proposed rule.

SUMMARY: The Commission herewith grants, in part, the petitions for reconsideration for the limited purposes of allowing public scrutiny on those issues which petitioners are of the opinion were not specific enough to allow for meaningful public comment.

Further, the Commission herewith proposes to amend its regulations to permit the receipt of permanent tariff amendments before and after the Commission's normal business hours, including weekends and holidays. It is proposed that tariffs would be receipted before and after its normal business by establishing a mail drop in the lobby of 1100 L Street, NW., with the utilization of a time clock stamp. This change in regulation will benefit the carriers and conferences of carriers enabling them to satisfy the commercial needs in filing any tariff amendment that might be deemed to be time sensitive.

DATE: Comments due on or before February 15, 1982.

ADDRESS: Send comments to Francis C. Hurney at the address below.

FOR FURTHER INFORMATION CONTACT: Francis C. Hurney, Secretary, Federal Maritime Commission, 1100 L Street, NW., Room 11101, Washington, D.C. 20573 (202) 523-5725.

SUPPLEMENTARY INFORMATION: The Commission published its final rule in this proceeding July 7, 1981 (46 FR 35092) with an effective date of September 8, 1981. The final rule removes from the Commission's tariff filing regulations the practice of allowing the filing of temporary amendments to tariffs published by carriers and conferences of carriers in the foreign commerce of the United States.

The effective date of the Commission's final rule in this proceeding was stayed September 3, 1981 (46 FR 44190) pending a staff analysis and recommendation on allegations made by petitioners [1] that the final rule of the Commission was based upon issues, conclusions and material assumed facts not set forth in the Notice of Proposed Rulemaking (45 FR 58385 Sept. 3, 1980). The petitioners allege that they were not permitted the opportunity to comment on the issues relied on by the Commission in reaching its decision in this proceeding as provided for under the Commission's rules of practice and procedure.

While the Commission's line of rationale set forth in the Notice of Proposed Rulemaking seems to support the conclusion reached in this proceeding, in order to ensure that the amendment of the Commission's tariff filing regulations receives public scrutiny, we have chosen to publish this notice. The purpose of this notice is to allow all interested parties the opportunity to comment on the issues raised by petitioners which might not have been set forth with the specificity to alert public comment thereon.

In our order of July 7, 1981, we stated that the Commission's regulations would be amended to the extent that it would prohibit the acceptance of any type of temporary tariff amendment. We reached the decision to remove the previous regulation, because, in our opinion, the convenience of such filings is outweighed by the benefits accruing from their discontinuance which will eliminate an unreasonable paperwork burden for the Commission and simplify the use of foreign commerce tariffs by shippers, carriers, and other interested persons.

Petitioners now allege that the basis upon which we reached our decision was not published for their comment in the Notice of Proposed Rulemaking. Stated in brief language our decision to abolish temporary amendments is based on the fact that temporary tariff filings result in an unreasonable administrative burden which occurs in processing temporary tariff filings into the Commission's tariff library.

A comprehensive explanation of our rationale used in arriving at our decision to abolish the privilege of accepting temporary amendments to tariffs begins with the reasons the Commission considered when it originally established its regulations in 1965 under its General Order 13.

Those reasons, summarized in the Commission's decision in this matter (46 FR 35094) were, that:

(1) temporary filings constituted a very small portion of all tariff filings; (2) temporary filings were almost always reductions and therefore, in the shipper's benefit; (3) temporary filings would not impose unmanageable burdens on the Commission's staff; and (4) the carrier industry was very desirous of the opportunity to fully utilize this method of amending tariffs.

It should not be difficult to understand that the reasons used for the promulgation of the temporary tariff filing regulations are no longer considered valid for their retention. Since the time when temporary filings were few in number and did not constitute a major labor intensive operation, they have now reached unmanageable proportions. The statistics to substantiate the increase in temporary amendments were previously published in 46 FR 35094 on July 7, 1981. As far as the needs of carriers to effectuate any quick changes for the public benefit are concerned, we are firmly convinced that the steamship industry will be able to satisfy such needs. However, in order to ease the problem of accommodating any

---

[1] North Europe-United States Pacific Freight Conference; Japan/Korea-Atlantic and Gulf Freight Conference, et al., except for United States Lines; Greece/U.S. Atlantic Rate Agreement, et al., The South Atlantic-North Europe Rate Agreement, North Atlantic Continental Freight Conference, North Atlantic Baltic Freight Conference, North Atlantic French Atlantic Freight Conference and the North Atlantic United Kingdom Freight Conference enjoin the petition for stay and reconsideration filed by Greece/U.S. Atlantic Rate Agreement, et al.

necessary rapid tariff changes, we are herewith proposing to permit the receipt of permanent tariff filings outside of the Commission's normal hours of business.

The present budget constraints of the U.S. Government are commonly understood by all of us. Such constraints translate into passing on, where possible, the expense of certain technically oriented functions to the beneficiaries of the system. In this issue, we are of the opinion that the discontinuance of temporary filings will diminish the cost to the taxpayer, while on the other hand, amending our regulations to allow for the receipt of permanent tariff filings at the Commission's facilities in Washington, D.C., before and after the Commission's normal business hours to permit immediate changes in tariff material will serve any industry needs that might exist.

Commentators have critized the Commission because in their opinion, we have not explained the need for the review of temporary tariff amendments, which as we have related, is a labor intensive operation. We are surprised at this comment since the industry is well aware of what is necessary to establish clear, concise and statutorily sound tariff amendments. Temporary tariff amendments do not meet this test in many instances.

On the one hand, commentators describe public interest as requiring immediate changes in rates while on the other hand they do not want the Commission's staff to "spend any time reviewing" the same amendment which was necessary to meet their responsibility under public interest standards; we disagree with the conclusion of the commentators.

Commentators have additionally requested that a joint industry/agency working committee be established to formulate and present further recommendations in this matter, while the committee approach might be of value in regard to certain matters, since this proceeding has provided a forum, extending over a long period of time, indeed, continues to do so, we view the approach as unnecessary and therefore deny the request.

While our decision to eliminate the acceptance of temporary filings may be inconvenient to some interests, it is apparent that there are means by which tariff changes considered time sensitive can be transmitted to the Commission for immediate effectiveness. Alternatively, where it appears impossible to accomplish a tariff change by a means other than a temporary filing method, then upon a demonstration of good cause, waiver of the regulation, through the special permission process, is an option which the carriers and conferences might wish to consider. Although we are convinced that our goal in this matter is proper, additional time for comment on the issues in this proceeding is granted. The grant of time will allow for any additional input necessary to conclude this proceeding.

Therefore, pursuant to section 4 of the Administrative Procedure Act (5 U.S.C. 533), and sections 18(b), 22 and 43 of the Shipping Act, 1916 (46 U.S.C. 817(b), 821 and 841(a)) the Commission proposes to eliminate its present regulations (46 CFR 536.10(c)) concerning temporary tariff filings; and further the Commission proposes to permit the filing of tariffs outside its normal business hours.

PART 536—PUBLISHING AND FILING TARIFFS BY COMMON CARRIERS IN THE FOREIGN COMMERCE OF THE UNITED STATES

Accordingly, the Commission proposes to amend its General Order 13, 46 CFR Part 536 as follows:

§ 536.10 [Amended]

Paragraph (c) of § 536.10 will be removed.

§ 536.3 [Amended]

Amend § 536.3 by redesignating paragraph (a) as paragraph (a)(1) and adding new paragraph (a)(2) to read as follows:

(a) * * *

(2) *Receipt of tariffs.* The Commission will provide for the receipt of tariffs filed under the requirements of 46 CFR Part 536 at all times, i.e., 24 hours a day, everyday of the year at its facilities located in Washington, D.C.

By the Commission.

Francis C. Hurney,

Secretary.

BILLING CODE 6730-01-M

OFFICE OF MANAGEMENT AND BUDGET

Office of Federal Procurement Policy

48 CFR Parts 15, 22, and 43

Price Negotiation, Labor Standards for Contracts Involving Construction, and Contract Modifications

AGENCY: Office of Federal Procurement Policy, OMB.

ACTION: Notice of availability and request for comment on draft Federal acquisition regulations.

SUMMARY: The Office of Federal Procurement Policy is making available for public and Government agency review and comment a segment of the draft Federal Acquisition Regulation (FAR).[1] Availability of additional segments for comment will be announced on later dates. The FAR is being developed to replace the current system of procurement regulations.

DATE: Comments must be received on or before February 17, 1982.

ADDRESS: Obtain copies of the draft regulation from and submit comments to William Maraist, Assistant Administrator for Regulations, Office of Federal Procurement Policy, 726 Jackson Place, NW., Room 9025, Washington, D.C. 20503. Federal agency requests must be directed to the FAR Agency Contact Point (see **Federal Register**, Vol. 46, No. 50, March 16, 1981, p. 16818 for list).

FOR FURTHER INFORMATION CONTACT: William Maraist, (202) 395-3300.

SUPPLEMENTARY INFORMATION: The fundamental purposes of the FAR are to reduce proliferation of regulations; to eliminate conflicts and redundancies; and to provide an acquisition regulation that is simple, clear and understandable. The intent is not to create new policy. However, because new policies may arise concurrently with the FAR project, the notice of availability of draft regulations will summarize the section or part available for review and describe any new policies therein.

The following parts of the draft Federal Acquisition Regulation are available upon request for public and Government agency review and comment.

Part 15—Contracting by Negotiation

Subpart 15.8—Price Negotiation

This subpart prescribes the cost and price negotiation policies and procedures applicable to negotiated contracts. It applies to pricing of (a) prime contracts, (b) subcontracts subject to Government consent, and (c) contract modifications, including modifications to contracts awarded by formal advertising procedures.

Pub. L. 87-653 contains the statutory requirement for submission of cost or pricing data and provides the basis for audit requirements. Because of the statutory requirement and because of the similarity of the FPR guidance, the thresholds and requirements for cost of pricing data have not been changed in the proposed FAR coverage. The thresholds for audit have, however, been

[1] Filed as a part of original document.

changed to conform to those published in DAC 76-26, dated December 15, 1980. Although civil agencies are encouraged to use field pricing support when it is available, the FAR retains the option permitting civil agency contracting officers to request audits directly from the cognizant audit agency.

OFPP Policy Letter 80-7 of December 9, 1980, established a profit policy for Government-wide use, with an effective date of January 9, 1981. This policy, modified to conform to FAR numbering, format, and organizational conventions, will be published as a separate subpart 15.9.

A requirement has been added that a prenegotiation objectives memorandum shall be prepared whenever a proposed contract or modification involves significant price negotiation. Although neither the DAR nor the FPR has a similar requirement, most agency implementing regulations have required some form of written prenegotiation objective in this situation. The proposed FAR coverage allows each agency to set specific thresholds for prenegotiation objectives memorandums on the basis of its own mission and available assets.

The proposed FAR defines forward pricing rate agreements and formally authorizes their use by civil agencies as well as by DOD.

The Department of Defense forms for offeror submission of cost or pricing data (DD 633) and for requesting exemption from submission of cost or pricing data (DD 633-7) have been standardized and are recommended for use by all Government agencies.

Part 22—Application of Labor Laws to Government Acquisitions

Subpart 22.4—Labor Standards for Contracts Involving Construction

This subpart provides the statutory basis for and sets forth labor standards requirements for contracts over $2,000 involving construction of public buildings and public works. It covers the Davis-Bacon Act, the Copeland Act, and the Contract Work Hours and Safety Standards Act.

Part 43—Contract Modifications

This part prescribes policies and procedures for preparing and processing contract modifications for all types of contracts including construction and architect-engineer contracts. It covers the various types of contract modifications, availability of funds, and change orders.

Dated: December 22, 1981.

M. F. Maraist,

Acting Associate Administrator for Regulatory Policies and Practices.

ADVISORY COUNCIL ON HISTORIC PRESERVATION

Meeting; Hickory Hill Public Housing Project, Virginia

Notice is hereby given in accordance with § 800.6(d)(3) of the regulations of the Advisory Council on Historic Preservation, "Protection of Historic and Cultural Properties" (36 CFR Part 800), that a panel of members of the Council will meet on January 8, 1982, to consider the proposed construction of the Hickory Hill Public Housing Project, Petersburg, Virginia. It has been determined that this undertaking, which is sponsored by the Department of Housing and Urban Development, will adversely affect the Petersburg National Battlefield Park, a property included in the National Register of Historic Places.

Pursuant to § 800.6(d)(2) of the Council's regulations, the Chairman of the Council decided on December 16, 1981, that a panel should consider this project in accordance with Section 106 of the National Historic Preservation Act of 1966 (16 U.S.C. Sec. 470f, as amended).

The Council was established by the National Historic Preservation Act to advise the President and Congress on matters relating to historic preservation and to comment upon, Federal, federally assisted, and federally licensed undertakings having an effect upon properties listed in or eligible for inclusion in the National Register of Historic Places. The Council members are the Secretary of the Interior, the Architect of the Capitol, the Secretary of Agriculture, and the heads of four other Federal agencies appointed by the President, one Governor and one Mayor appointed by the President, the President of the National Conference of State Historic Preservation Officers, the Chairman of the National Trust for Historic Preservation, and seven private citizens appointed by the President.

The Council's regulations require that the panel be composed of five members, three from the private sector (with one chairing) and two Federal members. This panel will be chaired by Mr. Alexander Aldrich of Saratoga Springs, New York. The panel will meet in Petersburg, Virginia. Place and time have yet to be set and may be obtained from the Executive Director.

The panel will consider written and oral statements from concerned parties. Written statements should be submitted to the Executive Director of the Council by December 31, 1981. Persons wishing to make oral statements should notify the Executive Director by January 4, 1982. Additional information concerning the meeting or the submission of statements is available from the Executive Director, Advisory Council on Historic Preservation, Suite 430, 1522 K Street NW., Washington, D.C. 20005 (202–254–3967).

Dated: December 16, 1981.

Robert R. Garvey, Jr.,
Executive Director.

DEPARTMENT OF AGRICULTURE

Rural Electrification Administration

Tri-State Generation and Transmission Association, Inc., and Colorado-Ute Electric Association, Inc.; Draft Environmental Impact Statement

The Rural Electrification Administration (REA) as lead Federal agency has prepared a Draft Environmental Impact Statement (DEIS) in accordance with the National Environmental Policy Act (NEPA) of 1969, in connection with potential financing assistance to Tri-State Generation and Transmission Association, Inc., (Tri-State), 12076 Grant Street, Thorton, Colorado 80241 and Colorado-Ute Electric Association, Inc., (Colorado-Ute) 845 South Townsend Avenue, Montrose, Colorado 81401. The Bureau of Land Management and the Forest Service have been cooperating agencies.

The construction of the proposed project consists of approximately 145 km (90 miles) of 345 kV transmission line between Hayden and Blue River in Colorado. Associated facilities include expansion of existing substation facilities at Hayden and construction of two new substations, one in Middle Park, near Kremmling and the other at Blue River, northwest of Dillon, Colorado.

Additional information on the proposed project may be obtained from Frank W. Bennett, Director, Power Supply Division, Rural Electrification Administration, U.S. Department of Agriculture, Washington, D.C. 20250, telephone (202) 382–1400.

Persons wishing to comment on the environmental aspects of the proposed project and the DEIS are invited to respoond in writing within 45 days of U.S. Environmental Protection Agency's notice of availability of the DEIS. Comments are invited from the public and from Federal, State and local agencies with respect of any environmental aspect of the project.

Copies of DEIS have been sent to various individuals and Federal, State and local agencies. Limited supplies of the DEIS are available upon request to Mr. Frank W. Bennett at the above address. The DEIS may be examined during regular business hours at the following locations and also at the public libraries of Northglenn (Adams County), Kremmling (Grand County), Steamboat Spring (Routt County) and Breckenridge (Summit County), Colorado.

Rural Electrification Administration, 14th & Independence Ave., SW., Washington, D.C. 20250.

, Tri-State Generation and Transmission Association, Inc., 12076 Grant Street, Thorton, Colorado 80241.

Colorado-Ute Electric Association, Inc., 845 South Townsend Avenue, Montrose, Colorado 81401.

All comments received within the 45-day period will be considered in the preparation of the Final Environmental Impact Statement. Final REA action will be taken only after REA has reached satisfactory conclusions with respect to the project's environmental effects and other procedural requirements.

This Federal assistance program is listed in the Catalog of Federal Domestic Assistance as 10.850—Rural Electrification Administration Loans and Loan Guarantees.

Dated at Washington, D.C., this 17th day of December, 1981.

Harold V. Hunter,

Administrator.

CIVIL AERONAUTICS BOARD

Applications for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits; Week Ended December 18, 1981

Subpart Q Applications

The due date for answers, conforming application, or motions to modify scope are set forth below for each application. Following the answer period the Board may process the application by expedited procedures. Such procedures may consist of the adoption of a show-cause order, a tentative order, or in appropriate cases a final order without further proceedings (see 14 CFR 302.1701 et seq.).

Date filed	Docket No.	Description
Dec. 16, 1981	40310	Best Airlines, Inc., c/o William L. Howard, Suite 843, 1511 K Street, N.W., Washington, D.C. 20005. Application of Best Airlines, Inc. pursuant to Section 401 of the Act and Subpart Q of the Board's Procedural Regulations requests issuance of a certificate of public convenience and necessity which would authorize it to engage in scheduled air transportation of passengers and property between: The terminal point: Chicago, Illinois; the intermediate points: Detroit, Michigan, Cincinnati, Ohio, Cleveland, Ohio, Dayton, Ohio, Columbus, Ohio, Akron/Canton, Ohio, Youngstown, Ohio, Toledo, Ohio, Birmingham, Alabama, Memphis, Tennessee, Nashville, Tennessee, Charleston, West Virginia, Atlanta, Georgia, New Orleans, Louisiana, Miami, Florida, Tampa, Florida, Orlando, Florida, Indianapolis, Indiana, Evansville, Indiana, Fort Wayne, Indiana, South Bend, Indiana, Pittsburgh, Pennsylvania, Philadelphia, Pennsylvania, Baltimore, Maryland, Washington, D.C., Newark, New Jersey, and the terminal point: New York, New York. Conforming Applications, motions to modify scope, and Answers may be filed by January 13, 1982.
Dec. 16, 1981	40311	Taino Tours, S.A., c/o Ramon Anibal Paez, Ave. 27 de Febrero esquina Bohechio—Santo Domingo, Dominican Republic. Application of Taino Tours, S.A., pursuant to Section 402 of the Act and Subpart Q of the Board's Procedural Regulations, requests a foreign air carrier permit authorizing the carriage of persons between: The Dominican Republic and the coterminal points New York, N.Y., San Juan, Puerto Rico; Miami, Fla. and Saint Thomas, V.I. Answers may be filed by January 13, 1982.
Dec. 17, 1981	40314	Aviacion Y Comercio, S.A., c/o Howard G. Feldman, O'Connor & Hannan, 1919 Pennsylvania Avenue, N.W., Washington, D.C. 20006. Application of Aviacion Y Comercio, S.A., pursuant to Section 402 of the Act and Subpart Q of the Board's Procedural Regulations, requests amendment and reissuance of its foreign air carrier permit to engage in charter air transportation of passengers and their accompanying baggage and property between points in the United States and points in Spain and elsewhere as set forth in Exhibit 9 attached to this application, also elimination of the conditions appearing in ordering paragraph 3 of Order 77-1-67 and certain conditions contained in applicant's present permit. Answers may be filed by January 14, 1982.
Dec. 17, 1981	[illegible]	Alaska Airlines, Inc., Seattle-Tacoma International Airport, Seattle, Washington 98188. Application of Alaska Airlines, Inc. pursuant to Section 401 of the Act and Subpart Q of the Board's Procedural Regulations requests the Board to renew to the extent necessary on a permanent basis Alaska's permissive mail-only certificate authority at 136 Alaskan bush points listed on segment 3 of Alaska's [illegible]. Conforming Applications, motions to modify scope, and Answers may be filed by January 14, 1982.
Dec. 17, 1981	40316	Ceskoslovenske Aerolinie, 545 Fifth Avenue, New York, New York 10017 Application of Ceskoslovenske Aerolinie pursuant to Section 402 of the Act and Subpart Q of the Board's Procedural Regulations requests the amendment and/or renewal of its Foreign Air Carrier Permit so as to permit it to continue on its Foreign Air Carrier Permit so as to permit it to continue its on-going operations in scheduled foreign air transportation between the United States of America and the Czechoslovak Socialist Republic. Answers may be filed by January 14, 1982.

Phyllis T. Kaylor,

Secretary.

[Order 81-12-104]

Fitness Determination of Sunbird, Inc., Order to Show Cause

AGENCY: Civil Aeronautics Board.

ACTION: Notice of Commuter Air Carrier Fitness Determination—Order 81-12-104, Order to Show Cause.

SUMMARY: The Board is proposing to find that Sunbird, Inc. is fit, willing, and able to provide commuter air carrier service under section 419(c)(2) of the Federal Aviation Act, as amended, and that the aircraft used in this service conform to applicable safety standards. The complete text of this order is available, as noted below.

DATES: Responses: All interested persons wishing to respond to the Board's tentative fitness determination shall serve their responses on all persons listed below no later than January 5, 1982, together with a summary of the testimony, statistical data, and other material relied upon to support the allegations.

ADDRESSES: Responses or additional data should be filed with Special Authorities Division, Room 915, Civil Aeronautics Board, Washington, D.C. 20428, and with all persons listed in Attachment A of Order 81-12-104.

FOR FURTHER INFORMATION CONTACT: Jim Lawyer, Bureau of Domestic Aviation, Civil Aeronautics Board, 1825 Connecticut Avenue, NW, Washington, D.C. 20428 (202) 673-5088.

SUPPLEMENTARY INFORMATION: The complete text of Order 81-12-104 is available from the Distribution Section, Room 100, 1825 Connecticut Avenue, NW, Washington, D.C. Persons outside the metropolitan area may send a postcard request for Order 81-12-104 to Distribution Section, Civil Aeronautics Board, Washington, D.C. 20428.

By the Civil Aeronautics Board: December 17, 1981.

Phyllis T. Kaylor,

Secretary.

BILLING CODE 6320-01-M

DEPARTMENT OF COMMERCE

Bureau of the Census

Change in Procedures for Computing Poverty Statistics

Notice is hereby given that the Bureau of the Census is implementing changes in the procedures used to compute poverty statistics. These technical changes in the official statistical definition of poverty were approved in June 1980 by the Statistical Policy Coordination Committee based on the recommendations of an interagency committee chaired by the Office of Federal Statistical Policy and Standards; this action was reviewed and approved in November 1981 by the Working Group on Economic Statistics of the Cabinet Council on Economic Affairs.

Poverty for statistical purposes is defined as the series of income cutoffs developed by the Social Security Administration in 1964 and revised by an interagency committee in 1969. (For detailed explanation of the current poverty definition, see *Current Population Reports*, Series P-60, No. 130.) The additional modifications being implemented are as follows:

1. The weighted average of the poverty thresholds for male- and female-headed nonfarm families by number of children will be employed for the tabulation of data for all nonfarm families of similar size and age composition, regardless of the sex of the family head.

2. Differences in the poverty thresholds for farm and nonfarm families will be eliminated through the use of nonfarm thresholds for all families and unrelated individuals.

3. The poverty matrix will be extended to families of nine or more persons from the current upper limit of seven or more persons.

The revised definition will be used in the poverty tabulations from the 1980 census and will be incorporated into the poverty statistics from the Current Population Survey beginning with estimates for 1981.

The revised poverty matrix for 1979 is presented below:

THRESHOLDS AT THE POVERTY LEVEL IN 1979 BY SIZE OF FAMILY AND NUMBER OF RELATED CHILDERN UNDER 18 YEARS OLD

Size of family unit	Related children under 18 years								
	None	1	2	3	4	5	6	7	8 or more
1 person (unrelated individual):									
Under 65 years	$3,774								
65 years and over	3,479								
2 persons:									
Head under 65 years	4,858	$5,000							
Head 65 years and over	4,385	4,981							
3 persons	5,674	5,839	$5,884						
4 persons	7,482	7,505	7,356	$7,362					
5 persons	9,023	9,154	8,971	8,857	$8,525				
6 persons	10,378	10,419	10,205	9,999	9,693	$9,512			
7 persons	11,941	12,016	11,759	11,580	11,246	10,857	$10,429		
8 persons	13,390	13,473	13,231	13,018	12,717	12,304	11,936	$11,835	
9 persons	16,065	16,144	15,929	15,749	15,453	15,046	14,677	14,566	$14,024

National Oceanic and Atmospheric Administration

Mid-Atlantic Fishery Management Council; Statement of Organization, Practices and Procedures

Pursuant to section 302(f)(6) of the Magnuson Fishery Conservation and Management Act (Pub. L. 94-265), each Regional Fishery Management Council is responsible for determining its organization and prescribing its practices and procedures for carrying out its functions under the Act in accordance with such uniform standards as are prescribed by the Secretary of Commerce. Further, each Council must publish and make available to the public a statement of its organization, practices and procedures. The Mid-Atlantic Fishery Management Council has revised its Statement of Operating Practices and Procedures as originally published in 42 FR 30578 on June 15, 1977. The revised document is published below.

Dated: December 17, 1981.

William G. Gordon,

Assistant Administrator for Fisheries National Marine Fisheries Service.

I. Name of Council. The name of the Council is the Mid-Atlantic Fishery Management Council (the Council).

II. Location of Offices. The Council's offices are presently located in the Federal Building, North and New Streets, Dover, Delaware 19901.

III. Legal Authority. The Mid-Atlantic Fishery Management Council was created by Section 302(a)(2) of the Fishery Conservation and Management Act of 1976 (the Act).

IV. Council Composition. The Mid-Atlantic Fishery Management Council has nineteen voting members and four non-voting members. Twelve voting members are appointed by the Secretary of Commerce and six of the voting members consist of the principle State officials (or the designee of the official) with marine fishery management responsibility and expertise in each of the member states as appointed by the Governor of the State. The one remaining voting member is the Regional Director of the National Marine Fisheries Service for the Northeast Region (or the designee of the Regional Director).

The non-voting members of the Council are:

A. The Regional Director of the United States Fish and Wildlife Service for the Northeast Region (or the designee of the Regional Director).

B. The Commander of the Coast Guard district for the Mid-Atlantic area (or the Commander's designee).

C. The Executive Director of the Atlantic States Marine Fisheries Commission (or the Executive Director's designee).

D. One representative of the Department of State designated for such purpose by the Secretary of State (or the representative's designee).

IV. Officers and Terms of Office.

A. General. A Chair and Vice Chair shall be elected annually by the voting members of the Council; each such officer shall serve for a period of one year and until a successor is elected and qualified. Officers may succeed themselves. A recording secretary may be appointed by the Chair for a term of one year. The Council may elect other officers as it deems necessary.

B. Authority of the Chair.

1. The Council Chair shall be the chief executive officer of the Council. Subject only to the authority of the Council, the Chair shall have general charge and supervision over, and responsibility for, the business and affairs of the Council. Unless otherwise directed by the Council, the Chair may enter into and execute in the name of the Council, contracts or other instruments in the regular course of business or contracts or other instruments not in the regular course of business which are authorized, either generally or specifically, by the Council. The Council Chair shall have the general powers and duties of management usually vested in the office of the Chair of the Board of a corporation.

2. The Council Chair shall have the authority to appoint and/or dissolve committees of Council members, name their officers and membership, and describe their functions, duties, and responsibilities consistent with the Charter of the Council, the Act, and other applicable law.

3. The Council Chair shall also have the full authority to call meetings as necessary for the conduct of the Council's business.

4. The Council Chair shall have the authority to authorize, approve, or disapprove reimbursement of travel expenses and/or compensation of any eligible members of the Council, its committees or subpanels except that proper notification, at the direction of the Chair, in the **Federal Register** of a regular meeting of the Council or one of its committees or subpanels shall constitute authorization for travel expenses and/or compensation to be paid to eligible members.

5. The Council Chair shall have the authority to authorize, approve, or disapprove all meetings of Council subpanels or committees.

6. Vice Chairman—In the event of the absence or inability of the Council Chair to serve or fulfill the Chair's obligations, the Council Vice Chair shall assume authority and duties of the Chair.

VI. Staff.

A. Composition. The voting members of the Council shall hire an Executive Director. The duties and functions of the Executive Director are:

1. Supervise, direct, and account for the administration and operation of the Council.

2. Retain, affix the salary of, and dismiss staff as necessary to accomplish the goals of the Council. The Executive Director shall prepare staff job descriptions, revise them as necessary, and review personnel duties to determine if they are consistent with job descriptions and Council guidelines.

3. Assign the duties of the staff as may be necessary to accomplish the goals of the Council.

4. Make and enter into any and all contracts, agreements, or stipulations, and retain, employ and contract for the services of private and public consultants, research and technical personnel, and procure by contract, consulting research, technical and other services and facilities, whenever the same shall be deemed necessary or desirable in the performance of the functions of the Council and whenever funds have been made available for such purposes. All legal procedures and applicable regulations shall be followed. The Council may establish a value above which the Council will approve contracts.

5. Maintain such facilities as may be required for the effective and efficient operation of the Council.

6. Prepare an annual budget for approval by the Council.

7. Prepare annual reports to the Council, and for the Council, to the Secretary of Commerce.

8. Coordinate efforts of the Council with other Councils and related Federal agencies.

9. The Executive Director may transfer funds between line items up to ten percent of the line except transfer between salary and non-salary items.

10. Prepare an Administrative, Operating, and Accounting Procedures Manual for the operation of the Council staff.

11. Prepare and submit a summary report of each Council meeting to the Secretary of Commerce.

12. Carry out other duties as may be assigned by the Council and/or the Council Chair.

B. Additional Staff (on a loan basis). The Council may request the head of any Federal agency to detail to the Council on a reimbursable basis, any personnel of such agency to assist the Council in the performance of its functions under the Act. The length of such details shall be mutually determined by the Council, the Federal employee and his or her agency. Federal employees so detailed retain all benefits, rights and status as they are entitled to in their regular employment. The Council may negotiate arrangements with State or local governments to utilize employees of those governments also.

C. Employment Practices.

1. Nondiscrimination. All activities of the Council must operate under a policy of equal employment opportunity. Council staff positions shall be filled solely on the basis of merit, fitness,

competence and qualifications. Employment actions shall be free from discrimination based on race, religion, color, national origin, sex, age, or physical handicap.

2. Salary and Wage Administration. In setting rates of pay for Council Staff, the principle of equal pay for equal work should be followed. Variations in basic rates of pay should be in proportion to substantial differences in the difficulty and responsibilities of the work performed.

3. The duties of any new position shall be contained in a brief description to be submitted to the NOAA Personnel Office servicing the NMFS Regional Office assigned to the Council prior to the submission of a budget in which the salary of that position is requested. The Council will be provided a salary range appropriate to the position. The Council may fill the position at any salary level within that range, except that, unless recruitment of exceptionally qualified employees is hampered, the policy of hiring at the beginning rate shall be recognized. The annual pay for any staff position may not exceed the equivalent of the top step of GS–15 of the Federal General Schedule at any time. After a position has been filled, the employee may be promoted annually and be recognized for superior performance within the specified salary ranges in accordance with the Council policies.

D. Relationship Between Council and Staff. Council members may submit requests for task performance by the Executive Director or the staff to the Council or the Chair for approval and transmittal. Only the Chair, or the Council acting at a duly constituted meeting, may direct task performance by, and exercise supervision over, the Executive Director. The members of the staff shall receive their direction and supervision solely from the Executive Director.

VII. Meetings and Hearings.

A. General. The Council will meet at the call of the Chair of the Council or upon request of a majority of the voting members.

B. Frequency and Duration. The Council will ordinarily meet in a plenary session once a month; but in consideration of the workload, the Chair will determine the actual frequency and duration of meetings.

C. Location. In addition to the requirement that Council meetings be held in the Mid-Atlantic area (unless it is a joint meeting with another Council), the meeting place will be of a capacity large enough to accommodate the anticipated public attendence and it should be reasonably accessible to those interested in attending. Statutory subgroups and subgroups consisting of Council members, as well as the full Council, will meet in particular areas of interest within the Council's area of authority, except Council subgroups may meet outside the Council's jurisdiction as necessary to conduct the business of the Council. Economy, time, and ease of travel should be considered in establishing locations for meetings but opportunity for concerned public attendance throughout the geographical area of authority shall be the prime consideration.

D. Agendas. Suggested agendas for all Council meetings will be drawn up by the Executive Director and approved by the Chair. The Chair will be assisted by the Vice Chair, the staff and the members of the Council who wish to contribute. A tentative agenda shall be distributed to Council members at least five calendar days before the subject meeting.

E. Minutes of Meetings. Detailed minutes of each meeting must be kept and their accuracy should be certified by the Chair after their adoption by the Council. Such minutes will include, to the extent possible, the following infomation:

1. The time and place of the meeting.
2. A list of Council or advisory panel members, staff and others present.
3. A complete and informative summary of matters discussed and conclusions reached
4. A listing with copies of all reports and papers received, or approved by the Council during the meeting.
5. Such accounting as is required by law of any portion of the meeting which was closed to the public.
6. The names and affiliation of members of the public who attend or the number or an estimate where a register is impractical, or the members of the public decline to be identified.
7. An explanation of the extent of public participation including a list of those presenting written or oral statements.
8. A copy of the agenda.
9. Copies of any written transcripts or any oral statements.
10. All meetings of the Council will be tape recorded. Actual tape recordings of such meetings, while not necessarily transcribed, will constitute an addendum to the official minutes. The original tape recordings shall be permanently preserved. They shall be kept in a place approved by the Council.

F. Conduct. General Rules of Procedure— Meetings shall be conducted in a manner to permit the greatest possible participation by all members of the Council. Notice of any meeting must appear in the **Federal Register**. Meetings may be closed to the public as necessary and in accordance with law and regulations.

Parlimentary procedures should be used as a guide, but need not be rigidly adhered to, at the Chair's prerogative. Decisions by consensus are premitted, except where the issue is Council approval of a Fishery Management Plan or amendment (including any proposed regulations) when a roll call vote is required.

Miscellaneous statutory requirements for meetings include:

1. A majority of the voting members of the Council shall constitute a quorum.
2. Where there is a vote, the majority of the voting members present and voting shall rule. The use of proxy is not permitted.
3. Voting members of the Council who dissent on any issue that is to be submitted to the Secretary are permitted to submit a statement of their reasons for dissent to the Secretary.

G. Hearings. The Chair will determine when hearings are appropriate and will designate one voting member of the Council to officiate at such hearings. A record of public attendance at hearings and of the comments made at hearings will be maintained at the Council office.

VIII. Advisory Panel and Scientific and Statistical Committee.

A. General. The Council will establish a Scientific and Statistical Committee and an Advisory Panel to assist the Council in carrying out the functions of the Act. The Council shall pay the actual expenses of the members of the Committee and Panel, in accordance with controlling law, except that expenses of Federal employees shall be paid at the discretion of the Council, while engaged in the performance of Council business. Persons shall be nominated for membership on the Committee and Panel by Council members and shall be appointed to the Committee and Panel by a majority vote of the Council.

B. Advisory Subpanels. By majority vote, the Council may create Advisory Subpanels and appoint members of the Advisory Panel to be members of such Subpanels. The name and function of each Subpanel will be determined by a majority vote of the Council. The Council Chair may designate a Chair for a Subpanel from among the members of the Subpanel.

The Subpanels shall meet in the area encompassed by the Council's constituent States as deemed necessary by the Council Chair except the subpanels may meet outside the Council's geographical area of jurisdiction on joint FMPs or when FMPs

affect persons outside the Council's geographical area of jurisdiction. No staff is assigned to Subpanels, but staff support may be requested from the Chair of the Council.

IX. Administrative Management System.

A. Administrative Control Procedures Regarding Conflict of Interest.

The Council is responsible for maintaining high standards of ethical conduct among themselves and its staff. Such standards will include but not be limited to the following:

1. No employee of the Council shall use his or her official authority or influence derived from his or her position with the Council for the purpose of interfering with or affecting the results of an election or nomination for any national, State, county or municipal elective office.

2. No employee of the Council will be deprived of employment position, work, compensation or benefit provided for or made possible by the Act on account of any political activity or lack of such activity in support of or in opposition to any candidate of any political party in any national, State, county or municipal election or on account of his or her political affiliation.

3. No Council member or employee shall pay, or offer, or promise, or solicit, or receive from any person, firm or corporation, either as a political contribution or a personal emolument, any money, or anything of value in consideration of either support, or the use of influence, or the promise of support, or influence in obtaining for any person any appointive office, or place of employment under the Council.

4. No Council member or employee of the Council shall use or allow the use of, for other than official purposes, any information obtained through or in connection with his or her Council employment which is not available to the general public.

5. No Council member or employee of the Council shall engage in conduct prejudicial to the interest of the Council.

6. No Council member or employee of the Council shall use Council property on other than official business. Such property shall be protected and preserved from improper or unauthorized operation or use.

B. Procurement Procedures. The procurement system of the Council will be the direct responsibility of the Executive Director. OMB Circular A-110 will be adhered to in procurement and a clear audit trail for all Council expenditures will be maintained.

C. Property Management System. It is the responsibility of the Executive Director to develop and implement property management procedures that ensure adequate control and protection of Council property at all times. Such procedures must include as a minimum:

1. A perpetual inventory system for all non-expendable items (office equipment, furniture, etc.).

2. Procedures for marking such items as Council property.

3. Provision or safeguarding sensitive items such as cameras, biological equipment, etc.

4. Procedures to be followed in disposing of surplus items.

5. A summary of all personnel authorized to have access to Council property (to include consultants, etc., if appropriate).

D. Accounting and Budgetary Control Procedures.

1. The Executive Director shall have the authority to adopt and install an accounting procedure consistent with and within Federal guidelines.

2. The Executive Director may contract with a Certified Public Accountant to assist in the establishment, operation, maintenance and control of such system.

3. The Council shall bond its employees in the amount of $50,000. The total funds, on deposit and cash on hand, shall not, at any time, exceed the amount of the bond unless specifically authorized by the Council.

4. Checks may be drawn on the sole signature of the Executive Director, the Deputy Executive Director or the Chair, except that the Council may set a level above which checks must be signed by the Executive Director of the Deputy Executive Director and also the Council Chair of the Vice Chair.

5. Year-end Expenditures and Carryovers. It shall be the policy of the Council not to expend funds at the end of a fiscal year in anticipation of needs which may arise in subsequent fiscal years.

E. Travel Reimbursement Procedures.

1. Council, Scientific and Statistical Committee, and Advisory Panel Members and Council staff shall be reimbursed for expenses in accordance with controlling law.

Official telephone calls, taxis, privately-owned vehicle mileage, parking, porters, etc., will be reimbursed in the amount of actual expenditure and are not included in meal and lodging limits.

All claims for reimbursement must be supported with receipts for all expenses other than meals except those expenses that individually amount to less than $15.

2. Permanent Change of Station Allowances. Allowances authorized and costs incurred because of a permanent change of station will be as authorized and approved by the Council Chair or his designee.

F. Standards for Compensation and Other Personnel Actions.

1. Compensation.

a. Pay Grades and Rates. Each position shall have assigned to it a pay grade for compensation purposes. The pay of employees shall be according to the published rates prescribed for the pay grades assigned by equivalent current GS ratings. A part-time employee working on a regular and continuous schedule of less than 37 and ½ hours per week shall be paid the hourly rate appropriate to the grade and step of the employee for the hours actually worked. Such schedule shall be established as the work situation requires, with the approval of the Executive Director.

Incremental Increases for Full Time Employees. All incremental increases shall be at the beginning of the new budget year. Those employees who have been employed six (6) months or longer shall be eligible for pay raise advancement. Those employees with less than six (6) months service shall not be eligible for pay raise advancement until the following budget year. A Council employee will normally have his pay rate advanced one increment in the pay grade upon completion of one year service, including six (6) consecutive months of satisfactory performance immediately prior to the effective date. These increments shall be made no more often than yearly until the employee has reached the maximum step for the grade of his position, except as provided in the following Section on "Pay for Exceptional Merit." An annual increment is not to be construed as an automatic "right", but rather as an adjunct to satisfactory service. A poor or unsatisfactory performance evaluation shall be the grounds for denial of the annual step increment.

Pay for Exceptional Merit. The most commendable and distinguished employees of the Council who have exhibited such competence and exemplary effort for a period of at least one year, may have their pay advanced two increments within the pay grade upon recommendation of the Executive Director and approval by the Council Chair. Such exceptional increment shall be recommended at the time a normal increment in pay is due and shall not be again recommended for at least one year.

b. Work Schedule and Overtime Pay. The standard work week for all full time employees shall be 37½ hours. The standard work day shall be 8:00 A.M. to

4:30 P.M. with a one hour lunch period. Deviation may be authorized by the Executive Director to meet operational needs. Cases of continuing or permanent schedule deviation shall be subject to the approval of the Executive Director or Council. Employees in supervisory, executive or professional positions shall not be eligible for overtime cash payments. However, they shall be eligible for compensatory leave at the rate of one hour leave for one hour's work. Compensatory leave must be taken within six (6) months of the date from which it was earned. Employees other than supervisory, administrators, executives or professionals shall be eligible for cash overtime payments at the rate of one hour's pay for each hour up to 40 hours per week or in excess of 7½ hours per day and one and one half hours worked in excess of 40 hours per week or in excess of 8 hours per day. Employees eligible for cash overtime may elect to receive compensatory time in lieu of cash overtime. Such requests must be in writing and approved by the Executive Director prior to the end of the pay period in which it is earned. Requests for compensatory time in lieu of cash overtime may not exceed 75 hours at any one time and must be taken within six (6) months of the time that it was earned.

2. Employee Benefits.

a. Paid Holidays. Paid holidays shall be official Federal holidays plus one holiday designated by the Executive Director.

b. Annual Leave. Employees of the Council shall be entitled to annual leave in accordance with the following schedule:

Up to 3 years of service: 13 days per year,

3 to 15 years of service: 20 days per year,

Over 15 years of service: 26 days per year.

Prior Federal, State or local government service will be credited for the purpose of determining leave accrual of individual employees.

Though accruing, employees shall not normally be granted paid annual leave until the completion of six (6) months of continuous service.

Employees may carry over up to 30 days unused annual leave from one year to the next. Amounts remaining above 30 days on the date that the employee began work for the Council will be forfeited.

Employees shall request annual leave as per the guidelines established by the Executive Director.

Lump sum reimbursements not to exceed 30 days (carryover plus current year earnings) of unused leave are authorized upon employee separation. In the case of the death of an employee, the employee's estate shall be paid in cash for any accumulated annual leave.

Employees working for the Council prior to the approval by the Council of this Statement of Operating Practices and Procedures will continue to be entitled to accrue annual leave at a rate of 20 days per year if they would accrue less than that under the policy set forth above; are entitled to carry over unused annual leave in excess of 30 days that they may have accrued as of the effective date of this Statement of Operating Practices and Procedures as published in the **Federal Register**, not to exceed 40 days, and are entitled to lump sum reimbursements not to exceed the sum of the carry over days they are entitled to plus any additional days they may have accrued during the current year.

c. Sick Leave. All employees except temporary, seasonal and emergency shall accrue paid sick leave credit at the rate of 13 days per year. Permanent part-time employees shall accrue on a pro rata basis. Sick leave credit may be accumulated without limit. Accrued sick leave shall be credited to the employees pension upon retirement or death. An employee eligible for sick leave with pay may use such sick leave for absence due to illness or death of a member of the employee's immediate family requiring the employee's personal presence. In addition, sick leave can be used for appointments with doctors, dentists, or other recognized medical practitioners, subject to prior approval of the Executive Director. An employee, at his option, may also use sick leave to provide full regular pay during periods when he is paid less than full pay under workmen's compensation provisions. Such leave shall be charged in proportion to the difference between workmen's compensation pay and full pay. Employees cannot take sick leave with pay in excess of the days actually accrued.

An employee needing sick leave shall inform his immediate supervisor of the fact and the reason in advance when possible, or otherwise as soon as practicable; failure to do so may be cause for denial of pay for the period of absence. Before approving pay for sick leave, the Executive Director may require either a medical practitioner's certificate or a written statement signed by the employee setting for the reason for the absence. In the case of an absence of more than three (3) consecutive days, a medical practitioner's certificate may be required as a condition of approval.

d. Administrative Leave. The Executive Director may grant any employee administrative leave for jury duty (no limit); inclement weather (at the discretion of the Executive Director); military duty (not to exceed 15 days each calendar year); military induction examination; and blood donation (up to 4 hours); and for such other reasons as the Executive Director may designate.

e. Personal Leave. Upon a permanent employee's written request the Executive Director may approve a leave without pay, not to exceed three (3) months. Such leave may be renewed for an additional period not to exceed three (3) months by formal action of the Executive Director and written approval by the Chair of the Council.

f. Maternity Leave. Maternity leave may be charged against any accumulated leave credits. After all leave credits are exhausted the employee may continue on maternity leave without pay for a period not to exceed 14 weeks after parturition.

Fringe Benefits. The conditions and benefits outlined in this section are not to be considered as part of any contract of employment but are those benefits which the Council considers to be consistent with the requirements of the Secretary of Commerce. Total benefits obtainable shall not exceed twenty (20) percent (exclusive of FICA) of employees gross salary.

a. Health Insurance. The Council will pay the basic rate for the employee and his family under the plan chosen, including the blood bank. Council members, retirees and surviving spouses of employees will be considered eligible to participate in group health benefits at their own expense and at no cost to the Council.

b. Retirement. The Council will pay ten (10) percent of an employee's salary into a deferred compensation plan. Said plan vesting 20 percent per annum so at the end of five (5) years of service vesting will be 100 percent. Vesting for any year's benefits will not occur until the completion of that year's employment. In the case of the death or disability of an employee, the employee or the employee's estate or beneficiary shall be paid in cash for 100% of the employee's deferred compensation plan.

c. Life Insurance. The Council will pay for coverage up to two times the employee's salary, non-contributory.

d. Long Term Disability Insurance. The staff is eligible for coverage by a disability plan similar to that provided by the Federal Government to its employees.

4. Staff Training. Costs of on the job training and part-time education, at an

undergraduate or postgraduate college level, related to the job requirements of bona fide employees, identified in a through e below are available.

a. Training materials;

b. Textbooks;

c. Fees charged by the educational institution;

d. Tuition charged by the educational institution, or in lieu of tuition, instructors' salaries and the related share of indirect cost of the educational institution to the extent that the sum thereof is not in excess of the tuition which would have been paid to the participating educational institution; and

e. Straight-time compensation of each employee for time spent attending classes during working hours not in excess of 156 hours per year where circumstances do not permit the operation of classes or attendance at classes after regular working hours.

Employees desiring Council support for training assignment or tuition aid shall submit a written request to the Executive Director outlining the details and justification of the proposed educational opportunity. Training must be authorized in advance in order to be reimbursed. The Chair approves requests for training which meet the criteria of the Council's training policy and is in the best interests of the Council. Reimbursement is made upon satisfactory completion of the course.

5. Personnel Policies.

a. Probation. All appointments shall be for a probationary period of six (6) months during which the individual's fitness for permanent appointment shall be evaluated. If the Executive Director deems it necessary, the probationary period may be extended for not more than two additional six month periods. In no case shall any probationary period be extended beyond eighteen (18) consecutive months. At any time during the probationary period, the Director may dismiss the employee for reasons of unsatisfactory service or conduct. The Executive Director shall notify the employee in writing of the action, giving the reasons.

b. Unauthorized Absences. Any absence from duty that is not in compliance with the various authorized leaves shall be considered an absence without leave and is cause for disciplinary action. No employee shall be absent from duty without authorization by a supervisor except in case of emergency illness, accident, or serious unforeseen circumstances. Such emergency conditions shall be brought to the attention of the supervisor as soon as practicable. Any employee who is absent from work without a valid leave of absence for three (3) consecutive working days, may be deemed to have abandoned the position and to have resigned from the staff unless proven to the satisfaction of the Executive Director that such absence was excusable. Nothing herein contained shall be construed as preventing the Director from taking disciplinary action against an employee under paragraph e of this section because of unauthorized absence.

c. Employee Inquiries, Requests, Suggestions and Grievances. Employees and their immediate supervisors should discuss and resolve all employee inquiries, requests and suggestions informally. It is the responsibility of each supervisor to conduct such discussions objectively and to initiate action to resolve problems. If, after such informal action, the problen is not resolved, a formal written grievance may be taken to the Executive Director. Should the employee not be satisfied with the Executive Director's resolution of the grievance, an appeal may be taken to the council.

d. Disability. Action may be initiated by the employee, the employee's legal representative or the supervisor, but in all cases, must be supported by medical evidence acceptable to the Executive Director and the Council.

e. Reprimand or Suspension Without Pay. In situations where a verbal warning has not resulted in the expected improvement, or where more severe action is warranted, the employee may be reprimanded in writing and a copy shall be placed in the employee's personnel folder. An employee may be suspended without pay by the Executive Director for reasons of misconduct, negligence, inefficiency, insubordination, disloyalty, unauthorized absence, or other justifiable reasons when alternate personnel action would not be appropriate. Suspensions without pay shall not exceed thirty (30) calendar days unless approved by the Council. In no case shall suspension with pay be utilized, but retroacative pay may be granted should the suspension subsequently prove unfounded.

f. Reasons for Disciplinary Action. Disciplinary action may be taken for any conduct not in keeping with reasonable standards, as determined by the Executive Director and/or Council.

g. Personnel Records. The Executive Director shall establish an appropriate system for filing personnel records. A master personnel record for each employee shall be established and maintained in the office of the Executive Director which shall include a copy of the application or resume of said Council employee and a copy of each personnel transaction. Supplementary records, verification of education and employment and any other pertinent information shall also be maintained by the Executive Director's office. Those records are of a confidential nature and shall be kept separately and inspected only with the approval of the Executive Director. Unauthorized disclosure of any portion of an employee's personnel record will be grounds for dismissal.

Employees shall have controlled access to their personnel records. After obtaining permission of the Executive Director, the employee shall be scheduled to examine his records under the supervision of those charged with maintaining such records.

h. Security Investigations. When it is anticipated that security classified information will be kept or handled in Council offices, certain employees shall be designated by the Executive Director to be permitted access to the information in accordance with Federal standards and must first receive appropriate security clearance from the Office of Investigations and Security of the Department of Commerce.

X. Amendments to Statement of Operating Practices and Procedures. This Statement of Operating Practices and Procedures may be amended from time to time by majority vote of the voting members present and voting provided notice of the specific proposed change has been sent in writing to all members of the Council at least ten (10) days in advance of the meeting in which the matter shall be presented. However, notice provisions of this section may be waived by Council if the proposed change is contained in a report of the Rules Committee which has been approved by a majority of the Rules Committee and adopted by the Council.

BILLING CODE 3510-22-M

Pacific Fishery Management Council; Statement of Organization, Practices and Procedures

Pursuant to Section 302(f)(6) of the Magnuson Fishery Conservation and Management Act (Public Law 94-265), each Regional Fishery Management Council is responsible for determining its organization and prescribing its practices and procedures for carrying out its functions under the Act in accordance with such uniform standards as are prescribed by the Secretary of Commerce. Further, each Council must publish and make available to the public a statement of its organization, practices and procedures. The Pacific Fishery

Management Council has revised its Statement of Operating Practices and Procedures as originally published in 42 FR 22672 on May 4, 1977. The revised document is published below.

Dated: December 17, 1981.

William G. Gordon,

Assistant Administrator for Fisheries, National Marine Fisheries Service.

Department of Commerce

National Oceanic and Atmospheric Administration, Pacific Fishery Management Council

Statement of Operating Practices and Procedures

The Pacific Fishery Management Council, created by section 302(a)(6) of the Magnuson Fishery Conservation and Management Act, hereby publishes a revised Statement of Operating Practices and Procedures (SOPP), as required by section 302(f)(6) of the Act. This revised SOPP for carrying out the Council's functions under the Act, was adopted by the Council during its public meeting held on March 18–19, 1981 in Renton, Washington. Copies may be obtained by writing the Executive Director, Pacific Fishery Management Council, 526 S.W. Mill Street, Portland, OR 97201.

Purpose

The Council shall:

A. Prepare and submit to the Secretary of Commerce a fishery management plan with respect to each fishery in need of management within its geographical area of authority and, from time to time, such amendments to each such plan as are necessary;

B. Prepare comments on any application for foreign fishing transmitted to it by the Secretary of State, and any fishery management plan or amendment transmitted to it by the Secretary of Commerce;

C. Conduct public hearings, at approrpriate times and in appropriate locations in the geographic area concerned, so as to allow all interested persons an opportunity to be heard in the development of fishery management plans and amendments to such plans, and with respect to the administration and implementation of the provisions of this Act;

D. Submit to the Secretary of Commerce:

1. A report, before February 1 of each year, on the Council's activities during the immediately preceding calendar year.

2. A report, before December 1 of each year, providing information about the activities, status, and changes in the composition of advisory committees in existence during the preceding calendar year.

3. A report, before December 31 of each year, summarizing closed and partially closed meetings held during the preceding calendar year.

4. A report on financial status and a report on cash transactions, within 30 days after the completion of each quarter, beginning February 1 of each fiscal year.

5. Semi-Annual Performance Progress Reports, outlining the progress on fishery management plan development during the preceding six months, before April 30 and October 31 each year.

6. Any other relevant report which may be requested by the Secretary of Commerce.

E. Review on a continuing basis, and revise as appropriate, the assessments and specifications made with respect to the optimum yield from, and the total allowable level of foreign fishing in, each fishery under a PMP or FMP within its geographic area of authority.

F. Participate in the activities of the Salmon and Steelhead Advisory Commission as mandated by Public Law 96–561 of December 22, 1980 (Title I—Conservation and Enhancement of Salmon and Steelhead Resources); and

G. Conduct any other activities which are necessary and appropriate to the foregoing functions.

Council Composition

The Pacific Fishery Management Council shall consist of representatives of the States of California, Oregon, Washington, and Idaho, and shall have authority over the fisheries in the Pacific Ocean seaward of such coastal states. The Pacific Council shall have 13 voting members, including 8 appointed by the Secretary, at least one of whom shall be appointed from each state.

Voting Members

The voting members of the Council shall be:

A. The state officials with principal fishery management responsibility in the States of Washington, Oregon, Idaho, and California, or the designee of such officials;

B. The Regional Director of the Northwest Region of the National Marine Fisheries Service, or his designee, and

C. Eight appointed members from the states of Idaho, Washington, Oregon and California (at least one of whom shall be appointed from each state).

Non-Voting Members

The non-voting members of the Council shall be:

A. The Regional Director of the U.S. Fish and Wildlife Service, Northwest Region, or his designee;

B. The Commander, Pacific Area of the U.S. Coast Guard, or his designee;

C. The Executive Director of the Pacific Marine Fisheries Commission, or his designee;

D. A representative of the U.S. Department of State, or his designee;

E. A representative of the State of Alaska, or his designee.

Officers and Terms of Office

The Council officers shall be a Chairman and a Vice-Chairman, with a term of office of one year each.

Staff

Composition. The staff of the Council shall comprise an Executive Director, Administrative Officer, Operations Officer, Staff Officers, Executive Secretary, and such other staff as are necessary to carry out Council activities.

Function. The staff is responsible for administration and execution of Council operations. Functions include coordination of fishery management plan development; preparation of Council reports, statements, and correspondence; financial management, budget preparation, and procurement; record keeping; meeting logistics; and other administrative activities.

Employment Practices. The Council is an equal opportunity employer in full compliance with federal requirements for non-discrimination. Council staff positions are filled solely on the basis of merit, fitness, competence, and qualifications.

1. *Classification.* The duties of full-time and other-than-full-time personnel shall be contained in position descriptions to be submitted to NOAA. As a minimum, position descriptions will cover the specific technical and supervisory duties of the position, any special skills (e.g., word processor operator), and specific education and experience requirements. The Council will then be provided a salary range (usually equivalent to a GS grade) appropriate to the position and a determination of the applicability of the Fair Labor Standards Act. Each employee will be provided with a copy of his or her position description. Any significant change in the scope of duties will necessitate the reclassification of the position.

2. *Recruitment.* All personnel vacancies should be filled on a competitive basis, unless unusual circumstances clearly dictate otherwise. For this purpose, the Council may avail itself of the vacancy advertising system operated by NOAA or any other recruitment tool, including newspapers and local employment agencies.

3. *Leave.* Employees of the Council shall be granted paid leave for holidays, vacations or exigencies, sickness, and civic duties (jury, military reserve obligations) as determined by the Council. Accrued annual leave shall not exceed 26 days per year, accrued sick leave shall not exceed 13 days per year and paid holidays shall not exceed 10 days per year.

4. *Fringe Benefits.* The Council shall provide its employees the opportunity to participate in group health insurance, life insurance, and a retirement plan, and shall pay for a proportion of such plans. The total benefits, exclusive of social security, shall not exceed 20% of salary.

Standards of Conduct

The Council and its staff shall maintain high standards of ethical conduct. These standards include the following principles:

A. No employee of the Council shall use his or her official authority or act in the name of the Council for the purpose of influencing or affecting the result of an election to or a nomination for any national, state, county, or municipal elective office.

B. No employee of the Council shall be deprived of employment, position, work, compensation, or benefit provided for or made possible by the Act on account of any political activity or lack of such activity in support of or in opposition to any candidate or any political party in any national, state, county, or municipal election or on account of his or her political affiliation.

C. No Council member or employee shall pay, or offer, or promise, or solicit, or receive from any person, firm, or corporation, either as a political contribution or a personal emolument any money, or anything of value in consideration of either support, or the use of influence, or the promise of support, or influence in obtaining a Council decision or for any person, any appointive office, place or employment under the Council.

D. No employee of the Council or member of the Council, Scientific and Statistical Committee, and Plan Development or Management Teams shall have a direct or indirect financial interest that conflicts with the fair and impartial conduct of his or her Council duties.

E. No Council member or employee of the Council shall use or allow the use of, for other than official purposes, information obtained through or in connection with his or her Council employment which has not been made available to the general public.

F. No Council member or employee of the Council shall use Council property on other than official business. Such property shall be protected and preserved from improper or deleterious operation or use.

Standing Committees of Council Members

The Pacific Council has established three standing committees of Council members. The names and functions of the standing committees are outlined below.

Budget Committee

The Budget Committee, comprised of five members, shall be appointed by the Council Chairman and shall meet at least once a year to review the Council's budget proposal. Other meetings of the Budget Committee will be scheduled at the request of the Council Chairman or the majority of voting Council members and may be to discuss such subjects as personnel matters, programmatic contracts, etc. The terms of Committee members shall expire on October 1 of each year. Members of the Committee may be reappointed by the Council Chairman.

Foreign Fishing Committee. The Foreign Fishing Committee, comprised of five members, shall be appointed by the Council Chairman and shall meet as required to review foreign fishing permit applications. Meetings of the Foreign Fishing Committee will be scheduled at the request of the Council Chairman or the majority of voting Council members and may be to discuss such ancillary subjects as conditions for joint venture or foreign fishing permits, criteria for recommending rejection of such applications, etc. The terms of Committee members shall expire on October 1 of each year. Members of the Committee may be reappointed by the Council Chairman.

Inter-Council Salmon Coordinating Committee. The Inter-Council Salmon Coordinating Committee has been established to coordinate salmon plan development in the North Pacific and Pacific Council areas of jurisdiction. There shall be three representatives from each Council on the Committee. The Committee shall meet as required at the request of either Council Chairman. The terms of Pacific Council representatives on the Inter-Council Salmon Coordinating Committee shall expire on October 1 of each year. Members of the Committee may be reappointed by the Council Chairman.

In the event that additional standing committees are required, they will be submitted to the Assistant Administrator for Fisheries, NMFS, for approval in accordance with existing regulations.

Meetings

Frequency. The Council shall meet as often as is necessary to discharge its duties, but shall meet at least once in each quarter of the fiscal year.

Duration. Council meetings shall vary in duration according to workload.

Location. Council meetings shall occur throughout the area of jurisdiction of the Council. Criteria for selection of meeting locations shall include ease of transportation for both Council members and the public and the cost of holding such meetings. The Council shall endeavor to meet in the area in which persons reside who might be immediately affected by actions taken by the Council at that particular meeting.

Agenda or Order of Business. Notice of Council meetings with agenda will be published in the **Federal Register** at least 20 days prior to the meeting. The Council will also issue press releases to announce time, location and agenda for each meeting.

Minutes. Each Council meeting shall be recorded. Summary minutes shall be prepared for all open portions of Council meetings and will be made available to the public. In addition to the summary minutes, the Council shall widely distribute a newsletter summarizing Council action taken during each Council meeting.

General Rules of Procedure. The Council shall meet at the call of the Chairman or upon request of a majority of the voting members. Meetings shall be conducted according to *Robert's Rules of Order* and in a manner to permit the greates possible participation by all members of the Council and the public. Decisions by consensus are permitted except where the issue is Council approval or amendment of a Fishery Management Plan (including any proposed regulations), comments for the Secretary on foreign fishing applications, or management plans prepared by the Secretary. In these cases, a vote is required.

A. A majority of the voting members of the Council shall constitute a quorum for Council meetings, but one or more such members designated by the Council Chairman may hold hearings.

B. When there is a vote, the majority of the voting members present and voting shall rule. The use of proxy is not permitted.

C. The Council shall conduct all meetings and hearings within its geographic area of authority, except when interregional resources are concerned.

D. Voting members of the Council who dissent on any issue to be submitted to the Secretary are permitted to submit a statement of their reasons for dissent to the Secretary.

Authority of the Chair. The Chairman, or in his absence the Vice-Chairman, shall convene and preside over Council meetings. The Chairman may designate Council members to serve on such committees of Council members as are established. The Chairman may also designate Council members to officiate at public hearings. The Chairman will retain voting rights.

Hearings

The Council shall hold public hearings in order to provide the opportunity for all interested persons to be heard with respect to the development of fishery management plans or plan amendments, and with respect to the administration and implementation of the Act. The Council may use its judgment regarding when and where such hearings should be held, provided they are held in the particular geographic area concerned.

Conduct. When it is determined that a hearing is appropriate, the Chairman of the Council will designate at least one voting member of the Council to officiate. Conduct of the hearing, beyond the stipulation that all persons be afforded an opportunity to present their views and be given a chance for expression, is within the discretion of the hearing official under whatever instructions the Council may wish to provide.

Notice. Notice of each hearing will be published in the **Federal Register** at least 20 days prior to the hearing. Advance notice also should be given in the local media where the hearing is to take place. Publicity should be sufficient to assure that all interested parties are aware of the opportunity to make their views known.

Record. An accurate record of the participants and their views, obtained by use of a tape recording, typewritten transcript, or detailed minutes, shall be available to the Council and maintained as part of the Council's administrative record.

Scientific and Statistical Committee

The Pacific Council shall have a Scientific and Statistical Committee composed of scientists of national reputation from state and federal agencies, academic institutions, and other sources. Members shall represent a wide range of disciplines required for preparation and review of management plans. The Committee shall meet at the call of the Council Chairman, a majority of the voting members of the Council or the Executive Director. The Committee shall:

A. Identify scienific resources required for the development of management plans and amendments and recommend resources for Plan Development and Management Teams.

B. Provide a multidisciplinary review of management plans or amendments and advise the Council on their scientific content.

C. Assist the Council in the evaluation of such statistical, biological, economic, social, and other scientific information as is relevant to the Council's activities, and recommend methods and means for the development and collection of such information.

D. Recommend to the Council the composition of Plan Development and Management Teams and persons to serve on them.

Advisory Panel

The Pacific Council shall establish an Advisory Panel. The Advisory Panel shall consist of advisory subpanels, one for each fishery management plan being developed or monitored. Members of the subpanels shall be selected by the majority of voting Council members and shall serve for two-year terms. The Council Chairman shall appoint a Chairman for each advisory subpanel as well as a Chairman of the overall Advisory Panel. Advisory subpanels are accountable to and report to the Council, and shall meet with the approval of the Council Chairman or Executive Director.

Advisory subpanels shall have representation from user groups and interests concerned with management of the fishery for which a plan is being prepared or reviewed. The functions of the subpanels shall be to advise the Council as to fishery management problems, to provide input into fishery management planning efforts, and to advise the Council on the content and effects of managment plans and amendments.

Plan Development Teams (PDT)*Organization.* A planning team shall be established by the council for each management unit which will be the subject of a planning effort. Plan Development Teams shall be working teams of state, federal, and nongovernment specialists. The Plan Development Teams will report to the Council through the Executive Director.

Practices and Procedures. 1. *Work Plans/Scoping.* The Council staff shall be responsible for work plans and the scoping process, with assistance from the Teams, if it is determined that these activities are necesary.

2. *Teams' Responsibility in Drafing of Plans (FMPs).* The Teams are responsible for drafting the management plans and, in that capacity, make the decision with regard to what is included in the successive drafts to be presented to the Council. The SSC and Advisory Subpanels shall advise the Teams and the Council, but their advice is not binding on the Teams. The Council shall decide if the plan is to be modified and Teams shall comply with Council directives.

Plan Development Team members shall remain objective in the drafting of management plans. They should not be subject to pressure from their employers, rather they should be able to develop management plans independently without regard to agency policy. The Council should be assured that the product received from the Team represents the best objective, scientific appraisal of the fishery and the resource. Policy considerations are in the exclusive purview of the Council.

Plan Development Teams shall conduct their planning and evaluation effort in such a way as to satisfy the Magnuson Fishery Conservation and Management Act.

The Council shall seek strong commitments to plan development activities. Plan development should be high priority for all Team members. This time commitment may be formalized in a contract between the agency and the Council. Compensation for agency personnel should be arranged on a case-by-case basis.

Council staff members may be assigned to assist Plan Development Teams.

Plan Objectives. The Council shall adopt objectives as early as possible in the plan development process. The objectives shall be operational and as specific as possible.

4. *Alternative Management Measures.* The Teams shall develop and present all viable alternative management measures which would attain the objectives. It shall not be the Team's responsibility to recommend preferred options to the Council, unless such preferences can be made on technical grounds without regard to policy considerations or unless the Council solicits the Team's opinion. It is the duty of only the Council to narrow the list of options.

5. *Plan Drafts.* When Teams present successive drafts of management plans to the Council, they shall submit in writing to the Council a list of problems and alternative solutions which require resolution by the Council. The Council shall respond to each item, at that time if possible, and the Executive Director shall submit to the respective team(s) a written response from the Council as soon after the meeting as possible.

Upon completion of each draft of a plan, it shall be transmitted to the Council through the Executive Director. Copies will be transmitted to the Scientific and Statistical Committee and the appropriate Advisory Subpanel for review and comment to the Council. The Council shall evaluate these comments and, if necessary, refer the plan back to the Plan Development Team for further work.

6. *Attendant Documents.* The Teams shall have responsibility for drafting the plan, while the National Marine Fisheries Service and Council staff shall take the lead in preparing the Environmental Impact Statement (EIS), Regulatory Analysis (RA), and proposed regulations. The Teams, however, must assist in the preparation of these related documents to ensure that correct interpretations of the plan have been made. In some cases, individual team members may be assigned to these activities. Insofar as possible, preparation of the EIS, RA, and proposed regulations shall occur concurrently with plan development.

7. *Notice of Availability.* When the Council is satisfied with the plan, it together with a draft Environmental Impact Statement (DEIS), Draft Regulatory Analysis, and draft proposed regulations, will be transmitted to the Department of Commerce through the Regional Director of the National Marine Fisheries Service. A notice of availability will be published according to NEPA requirements.

8. *Hearings.* Following publication of the notice of availability of the DEIS, the Council shall sponsor public hearings to solicit input and comments from those groups or individuals who might be affected by future regulatory action. Prior to holding public hearings on the DEIS/FMP, the Council shall distribute copies widely so that all interests have an opportunity to review and consider the proposed action.

After consideration of public comments, the Plan Development Team shall make such revision of the FMP as the Council deems necessary and assist in revision of the DEIS, DRA and proposed regulations as appropriate.

9. *Transmittal to the Secretary.* Upon final adoption of the fishery management plan, the Council shall transmit the final EIS/FMP, final Regulatory Analysis and proposed regulations, through the NMFS Regional Director to the Secretary of Commerce for final approval and promulgation of implementing regulations.

Management Teams

When necessary, the Council shall appoint a Management Team (MT) to conduct a continuing review of the status of the fishery and resources once a FMP is implemented. One member of the MT will be designated as Chairman. The MT will report to the Council through the Executive Director. The MT will accept responsibility for coordinating the fishery monitoring and plan maintenance process. This Team shall consist of state, federal, and nongovernmental specialists in the area of concern.

The activities of the MT may include: fishery and resource status updates; in-season management activities as defined by respective FMP's; review of management objectives; appraisal of the management regime's effectiveness in achieving the objectives; impact of management measures; FMP amendments; fine-tuning FMPs (without amendment); special analyses and other duties.

The MT cannot be expected to actually perform all of the tasks associated with FMP maintenance. The MT will be dependent on agencies' commitments of resources to accomplishing their tasks.

Administrative Management System

Office of Management and Budget Circular No. A110 provides uniform administrative requirements applicable to the Pacific Fishery Management Council, including standards for financial management, financial reporting property management, and procurement. The Council will operate in full compliance with these standards.

Conflict of interest. Appointed public Council members and administrative employees are subject to Federal laws and regulations concerning bribery and conflicts of interest. Council members drawn from the fishing industry will *not* be precluded from voting on fishery management plans which might directly affect their income.

Procurement Procedures. The Council will contract for services to be provided by other government agencies, educational institutions, profit and non-profit organizations. Detailed procurement procedures have been approved by the Council and are available for review at the Council's office. These procurement procedures provide for agreements and orders for procurement of supplies and services. It includes awards and notices of award: fixed price, cost, cost-plus-a-fixed-fee, negotiated, or incentive type contracts; letter contracts and purchase orders.

Topics covered are formal advertising; sole source procurements; award; contract types; contract administrations; protests, contract disputes, and appeals; and code of conduct.

Property Management System. A perpetual inventory system will be maintained of all Council non-expendable tangible personal property having a useful life of more than one year and an acquisition cost of $300 or more. All such items will be marked "PFMC" with an assigned property control number. All personal property acquired by the Council shall be safeguarded under conditions which a prudent person would follow. Only Council staff or individuals or entities under contract shall have access to Council property. Procedures for disposal of any surplus property shall be submitted to and approved by the Northwest Regional office of NMFS. A listing of federally-owned property will be submitted to the Chief of Administrative Operations Division for the NOAA Northwest Administrative Service Office within 60 days after the close of each fiscal year.

Accounting and Budgetary Control Procedures. The accounting and budgetary control system will be maintained in compliance with the U.S. Department of Commerce/NOAA General Provisions and Special Conditions which are included in the cooperative agreements for funding the Council's administrative and programmatic needs. A summary of the financial system ingredients follows:

1. *Formal Books of Accounts.* A cash receipts and disbursements journal, a payroll register journal, a general journal and a general ledger will be maintained to record financial transactions.

2. *Chart of Accounts.* The following general account number structure will be followed in recording financial transactions of the Council:

Assets (1000); Liabilities (2000); Fund Balances (3000); Revenues (4000); Expenses (5000–9000)

The detailed chart of accounts which provides line-item fiscal control over expenditures for monthly reporting to the Council and quarterly reporting to NOAA is available for inspection at the Council's office.

3. *Obligations.* The following guidelines are followed in charging obligations against the proper fiscal year:

Compensation and Benefits: Month in which pay period ends.

Purchase of Supplies and Equipment: Date purchase order is signed.

Transportation: Fiscal period when travel is begun.

Travel Expense: Fiscal period when expense occurred.

Communications, Utilities and Rent: On 1st day of billing period.

Contracts—operational: Fiscal period when expense occurred.

Contracts—programmatic: Fiscal period when item is budgeted.

Travel Reimbursement Procedures. Detailed procedures covering the processing of travel claims are available for inspection at the Council's Office. The guidelines for reimbursing individuals are as follows:

A. All non-federal members of the Council, Scientific and Statistical Committee, Advisory Panels, Plan Development Teams, Management Teams or Task Forces, staff and special consultants performing authorized services for the Council shall normally be entitled to reimbursement for actual meals and lodging expenses up to a limit set by the Council. However, the total amount claimed for meals and lodging shall not exceed the established federal rate except when authorized in extenuating circumstances.

B. Claims for reimbursement must be supported with receipts for all expenses other than meals except those expenses that individually amount to less than $15.

C. Official telephone calls, taxis, privately-owned vehicle mileage, common carrier fares, parking, baggage handling, etc. will be reimbursed in the amount of actual expenditure and are not included in meal and lodging limits set by the Council.

Standards for Compensation and Other Personnel Actions. Salary and wage administration, fringe benefits, hours of work, etc., for the Council staff are detailed in the Personnel Rules approved by the Council which are available at the Council's office.

1. *Council Member Pay.* Council members whose eligibility for compesnation has been established in accordance with NOAA guidelines will be paid on a contract basis without deductions being made for Social Security, or federal and state income taxes. A report of compensation will be furnished each year as required by the Internal Revenue Service. Such compensation is paid on a full day's basis whether in excess of eight hours a day or less than eight hours a day. The time is compensable where the individual member is required to expend a significant private effort which substantially disrupts the employee's daily routine to the extent that a work day is lost to the member. "Homework" time in preparation for formal Council meetings *is not* compensable.

Non-government Council members receive compensation for:

a. Days spent in actual attendance at a meeting of the Council or jointly with another Council.

b. Travel on the day preceding or following a scheduled meeting that precluded the member from conducting his normal business on the day in question if travel time for additional days is necessary.

c. Meetings of standing committees of the Council if approved in advance by the Chairman.

d. Individual member meeting with scientific and technical advisors where approved in advance by the Chairman and a substantial portion of any day is needed.

e. Conducting or attending hearings when authorized in advance by the Chairman.

f. Other meetings involving Council business when approved in advance by the Chairman.

Relationship to Magnuson Fishery Conservation and Management Act (MFCMA) Operations Handbook

This Statement of Operating Practices and Procedures is intended to be in general conformance with the guidelines set forth in the FCMA Operations Handbook distributed by the National Marine Fisheries Service in November, 1980. In the event of any change in the future, the Council shall file an amendment to this statement with the required information.

BILLING CODE 3510-22-M

California Department of Fish and Game; Modification of Permit

Notice is hereby given that pursuant to the provisions of Sections 216.33 (d) and (e) of the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR Part 216), Permit No. 351 issued to the California Department of Fish and Game, 1416 Ninth Street, Sacramento, California 95814 on August 16, 1981 (46 FR 43732) is modified as follows:

Section A–1 is changed to read:

marking 480 harbor seals (*Phoca vitulina richardii*) with epoxy streamer tags.

This modification is effective December 17, 1981.

The Permit as modified and documentation pertaining to the modification are available for review in the following offices;

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300

Whitehaven Street, N.W., Washington, D.C.; and

Regional Director, National Marine Fisheries Service, Southwest Region, 300 South Ferry Street, Terminal Island, California 90731.

Dated: December 17, 1981.

Richard B. Roe,

Acting Director, Office of Marine Mammals & Endangered Species, National Marine Fisheries Service.

BILLING CODE 3510-22-M

Dr. Louis M. Herman; Modification of Permit

Notice is hereby given that pursuant to the provisions of Section 216.33(d) and (e) of the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR Part 216), Scientific Research Permit No. 214 issued to Dr. Louis M. Herman, University of Hawaii, Honolulu, Hawaii 96822 on November 25, 1977 (42 FR 61296) and as modified on January 3, 1980 (45 FR 822), is further modified as follows:

1. Section B-3 is deleted and replaced by:

3. This permit is valid with respect to the taking authorized herein until December 31, 1983.

2. A new Section B-5 is added as follows:

5. The date, specific location of the taking and the desirability of National Marine Fisheries Service observers shall be determined by the Regional Director, National Marine Fisheries Service, Southeast Region, 9450 Koger Boulevard, St. Petersburg, Florida 33702. The Holder or his collecting agent shall therefore notify the Regional director sufficiently in advance of each collecting trip to allow for such a determination.

This modification is effective December 28, 1981.

The modification and related documents are available for review in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3000 Whitehaven Street, N.W., Washington, D.C.;

Regional Director, National Marine Fisheries Service, Southwest Region, 300 South Ferry Street, Terminal Island, California 90731; and

Regional Director, National Marine Fisheries Service, Southeast Region, 9450 Koger Boulevard, Duval Building, St. Petersburg, Florida 33702.

Dated: December 17, 1981.

Richard B. Roe,

Acting Director, Office of Marine Mammals & Endangered Species National Marine Fisheries Service.

BILLING CODE 3510-22-M

John M. Reinke; Modification of Permit

Notice is hereby given that pursuant to the provisions of §§ 216.33(d) and (e) of the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR Part 216) and § 220.24 of the regulations governing endangered species permits (50 CFR Parts 217-227), the Scientific Research Permit No. 291 issued to John M. Reinke, 4461 Woodland Park Avenue North, Seattle, Washington 98103, on April 25, 1980 (45 FR 29382), is hereby modified as follows:

Section B-8 is deleted and replaced by:

8. This Permit is valid with respect to the activities authorized herein until December 31, 1983.

The modification is effective upon publication in the **Federal Register.**

The Permit as modified and documentation pertaining to the modification are available for review in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street, NW, Washington, D.C.;

Regional Director, Northwest Region, National Marine Fisheries Service, 7600 Sand Point Way, NE, BIN C15700, Seattle, Washington 98115; and

Regional Director, Alaska Region, National Marine Fisheries Service, P.O. Box 1668, Juneau, Alaska 99802.

Dated: December 17, 1981.

Richard B. Roe,

Acting Director, Office of Marine Mammals and Endangered Species, National Marine Fisheries Service.

BILLING CODE 3510-22-M

Quinlan Marine Attractions; Issuance of Permit

On May 13, 1980, Notice was published in the **Federal Register** (45 FR 31459), that an application had been filed with the National Marine Fisheries Service by Quinlan Marine Attractions, Route 3, Box 540, Lincolnton, North Carolina 28092, for a permit to take four (4) Atlantic bottlenose dolphins (*Tursiops truncatus*) for the purpose of public display.

Notice is hereby given that on December 17, 1981, and as authorized by the provisions of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361-1407), the National Marine Fisheries Service issued a Public Display Permit for the above taking to Quinlan Marine Attractions subject to certain conditions set forth therein.

The Permit and related documents are available for review in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street NW., Washington, D.C.;

Regional Director, National Marine Fisheries Service, Southeast Region, Duval Building, 9450 Koger Boulevard, St. Petersburg, Florida 33702;

Regional Director, National Marine Fisheries Service, Northeast Region, 14 Elm Street, Federal Building, Gloucester, Massachusetts 01930; and

Regional Director, National Marine Fisheries Service, Southwest Region, 300 South Ferry Street, Terminal Island, California 90731.

Dated: December 17, 1981.

Richard B. Roe,

Acting Director, Office of Marine Mammals & Endangered Species, National Marine Fisheries Service.

BILLING CODE 3510-22-M

Office of the Secretary

Public Advisory Committee for Trademark Affairs

AGENCY: Patent and Trademark Office, Commerce.

ACTION: Notice of renewal.

SUMMARY: In accordance with the provisions of the Federal Advisory Committee Act, 5 U.S.C. App. (1976) and the Office of Management and Budget Circular A-63 of March 1974, and after consultation with GSA it has been determined that the renewal of the Public Advisory Committee for Trademark Affairs is in the public interest in connection with the performance of duties imposed on the Department by law.

SUPPLEMENTARY INFORMATION: The Committee was first established in September, 1970, and its present charter expired on October 12, 1981. The Committee's purpose is to advise the Patent and Trademark Office concerning steps which can be taken to increase the efficiency and effectiveness of administration of the Trademark Act and to provide a continuing flow of knowledge from the private sector to the government in the field of trademarks.

As it was initially established, the Committee will continue to comprise the members of the Advisory Committee for Trademark Affairs of the United States Trademark Association. The membership is balanced and is selected by the President of said association. The Committee will function solely as an advisory body, and in compliance with the provisions of the Federal Advisory Committee Act.

FOR FURTHER INFORMATION CONTACT: Inquiries or comments regarding this notice may be addressed to Patricia M. Davis, Committee Control Officer, Deputy Director, Trademark Examining Operations, U.S. Patent and Trademark Office, Washington, D.C. 20231, telephone: (703) 557–3881, or Yvonne Barnes, Committee Management Analyst, U.S. Department of Commerce, Washington, D.C. 20230, telephone: (202) 377–4217.

Dated: November 9, 1981.

Dennis C. Boyd,

Executive Director, Information Resource Management.

BILLING CODE 3510-CW-M

Public Availability of Report on Closed Meetings

AGENCY: Department of Commerce.

ACTION: Announcing public availability of report on closed meetings of advisory committees.

SUMMARY: As required by the Federal Advisory Committee Act and Office of Management and Budget Circular A–63 of March 1974, the Department of Commerce has prepared its report on the activities of closed or partially-closed meetings of advisory committees. Copies of the reports have been filed and are available for public inspection at two locations:

Library of Congress, Newspaper and Current Periodicals Reading Room, Room 1026, John Adams Building, 2nd and Independence Avenue, SE, Washington, D.C. 20540.

Department of Commerce, Central Reference and Records Inspection Facility, Room 5317, Main Commerce Building, 14th and Constitution Avenue, NW, Washington, D.C. 20230, telephone (202) 377–4217.

The reports cover the closed and partially-closed meetings of 32 of the Department's 84 committees and several subcommittees, the names of which are listed below.

Committee (Subcommittee)

Advisory Committee on East-West Trade
Computer Peripherals, Components, and Related Test Equipment Technical Advisory Committee
Computer Systems Technical Advisory Committee
—Foreign Availability Subcommittee
—Hardware Subcommitee
Electronic Instrumentation Technical Advisory Committee
Industry Functional Advisory Committee on Customs Valuations for Trade Policy Matters
Industry Functional Advisory Committee on Standards for Trade Policy Matters TPM
Industry Sector Advisory Committee (ISAC) on Aerospace Equipment for Multilateral Trade Negotiations [1]
ISAC on Aerospace Equipment for TPM
ISAC on Capital Goods for TPM
ISAC on Chemicals and Allied Products for TPM
ISAC on Consumer Goods for TPM
ISAC on Electronics and Instrumentation for TPM
ISAC on Ferrous Ores and Metals for TPM
ISAC on Footwear, Leather, and Leather Products for TPM
ISAC on Industrial and Construction Material and Supplies for TPM
ISAC on Lumber and Wood Products for TPM
ISAC on Nonferrous Ores and Metals for TPM
ISAC on Paper and Paper Products for TPM
ISAC on Services for TPM
ISAC on Small and Minority Business for TPM
ISAC on Textiles and Apparel for TPM
ISAC on Transportation, Construction, and Agricultural Equipment for TPM
ISAC on Wholesaling and Retailing for TPM
National Advisory Committee on Oceans and Atmosphere
Numerically Controlled Machine Tool Technical Advisory Committee
Pacific Fishery Management Council
President's Export Council Subcommittee on Export Administration
Sea Grand Review Panel
Semiconductor Technical Advisory Committee
—Discrete Semiconductor Device Subcommittee
—Microcircuit Subcommittee
—Semiconductor Manufacturing Materials and Equipment Subcommittee
South Atlantic Fishery Management Council
Telecommunications Equipment Technical Advisory Committee
Western Pacific Fishery Management Council

BILLING CODE 3510-CW-M

[1] Committee was terminated in 1980.

DEPARTMENT OF DEFENSE

Defense Science Board Task Force On Command Support; Advisory Committee Meetings

The Defense Science Board Task Force on Command Support will meet in closed session on 25 January 1982 at the Pentagon, Washington D.C., 20301.

The mission of the defense Science Board Task Force is to advise the Secretary of Defense and the Under Secretary of Defense for Research and Engineering on overall research, engineering and acquisition issues and to provide long-range guidance in these areas to the Department of Defense.

The Task Force will provide an evaluation of the current technological applications currently employed in the area of command support and will advise upon improvements which appear possible and practical. They will also consider training emphasis and possibilities for improvement in the internal management process.

In accordance with 5 U.S.C. App. I 10(d)(1976), it has been determined that the Defense Science Board Task Force meeting concerns matters listed in 5 U.S.C. 552b(c)(4)(1976), and that accordingly these meetings will be closed to the public.

M.S. Healy,

OSD Federal Register Liaison Officer, Washington Headquarters Services, Department of Defense.

BILLING CODE 3810-01-M

DEPARTMENT OF EDUCATION

National Board of the Fund for the Improvement of Postsecondary Education; Meeting

AGENCY: National Board of the Fund for the Improvement of Postsecondary Education.

ACTION: Notice of Meeting.

SUMMARY: This notice sets forth the proposed agenda of a forthcoming meeting of the National Board of the Fund for the Improvement of Postsecondary Education. This notice also describes the functions of the Board. Notice of this meeting is required under the Federal Advisory Committee Act (Pub. L. 92–463, section 10(a)(2)).

DATE: January 10, 1982 at 7:30 p.m. through January 11, 1982 at 9:00 p.m.

ADDRESS: Shoreham Hotel, 2500 Calvert Street, NW., Washington, D.C..

FOR FURTHER INFORMATION CONTACT:

Sven Groennings, Director, Fund for the Improvement of Postsecondary Education, 7th & D Streets, SW., Washington, D.C. 20202 (202) 245–9091.

SUPPLEMENTARY INFORMATION: The National Board of the Fund for the Improvement of Postsecondary Education is established under section 1003 of the Higher Education Amendments of 1980, Title X (20 U.S.C. 1135a-1). The National Board of the Fund is established to "advise the Secretary and the Director of the Fund for the Improvement of Postsecondary Education . . . on the selection of projects under consideration for support by the Fund in its competitions."

The meeting of the National Board will be open to the public. The proposed agenda includes:

—Orientation for new Board members
—Discussion of the Mina Shaughnessy Scholars Program
—Discussion of Policy Issues Relevant to the Fund and the Minority Institutions Science Improvement Program

Records shall be kept of all Board proceedings, and shall be available for public inspection at the Fund for the Improvement of Postsecondary Education, 7th & D Streets, SW., Room 3100, Washington, D.C. 20202, between the hours of 8:00—4:30 weekdays, except Federal Holidays.

Dated: December 16, 1981.

Thomas P. Melady,

Assistant Secretary for Postsecondary Education.

[PH-FRL-2015-4; OPP-50547A]

American Hoechst Corp.; Amendment of Experimental Use Permit

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has amended an experimental use permit, No. 8340–EUP–6, issued to American Hoechst Corporation for use of the insecticide tralomethrin (1R(1(S*)3(RS*)))-2,2-dimethyl-3-(1,2,2,2-tetrabromoethyl) cyclopropanecarboxylic acid alpha-cyano-3(3-phenoxphenyl)methlester on cotton to evaluate control of various insects. The amendment adds four States, California, Georgia, Louisiana, and Mississippi.

FOR FURTHER INFORMATION CONTACT: Franklin D.R. Gee, Product Manager (PM) 17, Registration Division (TS–767C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 207 CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703–557–2690).

SUPPLEMENTARY INFORMATION: EPA issued a notice that was published in the **Federal Register** of September 4, 1981 (46 FR 44498) pertaining to the issuance of an experimental use permit, No. 8340–EUP–6, to American Hoechst Corporation. This experimental use permit allows the use of 60 pounds of the insecticide (1R(1(S*)3(RS*)))-2,2-dimethyl-3-(1,2,2,2-tetrabromoethyl)-cyclopropanecarboxylic acid alpha-cyano-3(3-phenoxyphenyl)methylester on cotton to evaluate control of various insects. A total of 200 acres are involved. At the request of the company the permit has been amended. The program is now authorized only in the States of Alabama, Arizona, Arkansas, California, Georgia, Louisiana, Mississippi, North Carolina, Tennessee, and Texas. A temporary tolerance for residues of the active ingredient in or on cottonseed has been established. Crops treated with the product no longer have to be destroyed or used for research purposes only.

(Sec. 5, 92 Stat. 819, as amended (7 U.S.C. 136))

Dated: December 10, 1981.

Robert V. Brown,

Acting Director, Registration Division, Office of Pesticide Programs.

[TSH-FRL-2015-1; OPTS-51371]

Certain Chemicals; Premanufacture Notices

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5(a)(1) of the Toxic Substances Control Act (TSCA) requires any person who intends to manufacture or import a new chemical substance to submit a premanufacture notice (PMN) to EPA at least 90 days before manufacture or import commences. Statutory requirements for section 59(a)(1) premanufacture notices are discussed in EPA statements of interim policy published in the **Federal Register** of May 15, 1979 (44 FR 28558) and November 7, 1980 (45 FR 74378). This notice announces receipt of two PMNs and provides a summary of each.

DATES: Written comments by: PMN 81–638 and 81–639, February 13, 1982.

ADDRESS: Written comments, identified by the document control number "[OPTS–51371]" and the specific PMN number should be sent to: Document Control Officer (TS–793), Office of Pesticides and Toxic Substances, Environmental Protection Agency, Rm. E–409, 401 M Street SW., Washington, D.C. 20460 (202–382–3532).

FOR FURTHER INFORMATION CONTACT: David Dull, Acting Chief, Notice Review Branch, Chemical Control Division (TS–794), Office of Toxic Substances, Environmental Protection Agency, Rm. E–216, 401 M Street SW., Washington, D.C. 20460 (202–426–2601).

SUPPLEMENTARY INFORMATION: The following are summaries of information provided by the manufacturer on the PMNs received by EPA:

PMN 81–638

Close of Review Period. March 15, 1982.

Manufacturer's Identity. Claimed confidential business information.

Organization information provided:

Annual sales—Over $500 million.
Manufacturing site—South Atlantic region.
Standard Industrial Classification Code—2821.

Specific Chemical Identity. Claimed confidential business information.

Generic name provided: Polyether reaction product with toluene diisocyanate-methacrylate terminated.

Use. The manufacturer states that the PMN substance will be used as an industrial polymer for plastic printing plates.

Production Estimates. Claimed confidential business information.

Physical/Chemical Properties. Claimed confidential business information.

Toxicity Data. Claimed confidential business information.

Exposure. The manufacturer states that during manufacturer 2 workers may experience dermal exposure 1 hr/day, 150 days/yr during discharge.

Environmental Release/Disposal. The manufacturer states that there will be no release to the environment.

PMN 81-639

Close of Review Period. March 15, 1982.

Importer's Identity. Henley and Company, Inc., 750 Third Avenue, New York, N.Y. 10017.

Specific Chemical Identity. Claimed confidential business information. Generic name provided: Aliphatic acid ester.

Use. Claimed confidential business information. Generic use information provided: The Importer states that the PMN substance will be used in a destructive, contained use.

Import Estimates. Claimed confidential business information.

Physical/Chemical Properties

Appearance, Clear liquid, pleasant odor
pH 0.3% w/w solution, 4.1
Boiling point @ 20° C, 207–211° C
Flash point, 84–85° C
Melting point, 5° C
Solubility @ 20° C, 0.3%
Density @ 20° C, 1.04 g/ml
Vapor pressure @ 20° C, 1 mbar

Toxicity Data. No data were submitted.

Exposure. Claimed confidential business information.

Environmental Release/Disposal. The importer states that less than 10kg/yr will be released to air, land and water.

Dated: December 16, 1981.

Issuance of Experimental Use Permits

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has granted experimental use permits to the following applicants. These permits are in accordance with, and subject to, the provisions of 40 CFR Part 172, which defines EPA procedures with respect to the use of pesticides for experimental purposes.

FOR FURTHER INFORMATION CONTACT: The product manager cited in the experimental use permit at the address below: Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, 1921 Jefferson Davis Highway, Arlington, VA 22202.

SUPPLEMENTARY INFORMATION: EPA has issued the following experimental use permits:

464-EUP-64. The Dow Chemical Company, P.O. Box 1706, Midland, MI 48640. This experimental use permit allows the use of 900 pounds of the insecticide chlorpyrifos on wheat to evaluate control of aphids, armyworms, brown wheat mites, cutworms, and grasshoppers. A total of 600 acres are involved. The program is authorized only in the States of Kansas, Minnesota, and South Dakota. The experimental use permit is effective from October 27, 1981 to October 27, 1982. Temporary tolerances for residues of the active ingredient in or on wheat, wheat straw, fat, meat, and meat byproducts of poultry and turkey have been established. A food additive regulation for residues of the active ingredient in or on milling fractions (except flour) of wheat has been established. (Jay S. Ellenberger, PM 12, Rm. 202, CM#2, (703-557-2386))

352-EUP-108. E. I. duPont de Nemours and Company, Wilmington, DE 19898. This experimental use permit allows the use of nine pounds of the herbicide methyl 2-[[[[(4,6-dimethyl-2-pyrimidinyl)-amino]carbonyl]amino]sulfonyl] benzoate on fallow land to be replanted to wheat or barley to evaluate control of weeds. A total of 1,200 acres are involved. The program is authorized only in the States of Colorado, Idaho, Kansas, Montana, Nebraska, North Dakota, Oklahoma, Oregon, South Dakota, Utah, Washington, and Wyoming. The experimental use permit is effective from February 1, 1982 to February 1, 1984. (Robert Taylor PM 25, Rm. 251, CM#2, (703-557-1800))

201-EUP-72. The Shell Oil Company, 1025 Connecticut Ave., NW., Suite 200, Washington, DC 20036. This experimental use permit allows the use of 39,600 pounds of the insecticide methomyl on pineapples to evaluate control of rootknot and reniform nematodes. A total of 600 acres are involved. The program is authorized only in the State of Hawaii. The experimental use permit is effective from October 27, 1981 to October 27, 1983. (Jay S. Ellenberger, PM 12, Rm. 202, CM#2, (703-557-2386))

Persons wishing to review these experimental use permits are referred to the designated product managers. Inquiries concerning these permits should be directed to the persons cited above. It is suggested that interested persons call before visiting the EPA Headquarters Office, so that the appropriate file may be made available for inspection purposes from 8:00 a.m. to 4:00 p.m., Monday through Friday, excluding legal holidays.

(Sec. 5, 92 Stat. 819, as amended, (7 U.S.C. 136))

Dated: December 10, 1981.

Robert V. Brown,

Acting Director, Registration Division, Office of Pesticide Programs.

NOR-AM Agricultural Products, Inc.; Amendment of Experimental Use Permit

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has amended an experimental use permit, No. 2139-EUP-23, issued to NOR-AM Agricultural Products, Inc. for use of the herbicide thidiazuron on cotton to evaluate its use as a defoliant. The amendment extends the experimental use period to July 1, 1983.

FOR FURTHER INFORMATION CONTACT: Richard F. Mountfort, Product Manager (PM) 23, Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 237, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703-557-1830).

SUPPLEMENTARY INFORMATION: EPA issued a notice that was publish in the **Federal Register** of September 25, 1981 (46 FR 47297) pertaining to the extension of an experimental use permit, No. 2139-EUP-23, to NOR-AM Agricultural Products, Inc. This experimental use permit allows the use of 1,530 pounds of the herbicide thidiazuron on cotton to evaluate its use as a defoliant. A total of 7,650 acres are involved. The program is authorized only in the States of

Alabama, Arizona, Arkansas, California, Georgia, Louisiana, Mississippi, South Carolina, Tennessee, and Texas. At the request of the company the permit has been amended. The experimental use period has been extended and the permit is now effective until July 1, 1983.

(Sec. 5, 92 Stat. 819, as amended (7 U.S.C. 136))

Dated: December 10, 1981.

Douglas D. Campt,

Director, Registration Division, Office of Pesticide Programs.

[SWH-FRL-1995-5]

Summary of Panel Discussions Regarding the Land Disposal of Hazardous Waste

AGENCY: Environmental Protection Agency.

ACTION: Notice of availability.

SUMMARY: During the week of May 18–22, 1981, the Office of Solid Waste held a set of panel discussions to address the major technical issues relating to the land disposal of hazardous waste. Panels were composed of individuals from industry, academia, public interest groups, and EPA. The views and opinions expressed were those of the individuals and not necessarily those of the Agency. Today's notice announces the availability of the summary of these panel discussions for public use and review.

DATES: Persons wishing to provide comment on any errors, omission or needed clarification of this summary should do so in writing on or before February 26, 1981.

ADDRESSES: Copies of the panel discussions summary are available for viewing at the Subtitle C Docket Room (Room 2636), located at 401 M Street, SW., Washington, D.C. and at all Regional Office Libraries during the hours of 9:00 a.m. to 4:30 p.m. In addition, a limited number of copies are available on a 10-day maximum loan basis by contacting the RCRA Hotline, Office of Solid Waste (WH-565), U.S. EPA, 401 M Street, SW., Washington, D.C. 20460 (phone: 800-424-9346, or in Washington, D.C. 544-1409). Comments should be addressed to Kenneth Shuster, Land Disposal Division, (WH-564), Office of Solid Waste, U.S. Environmental Protection Agency, Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT: Kenneth Shuster, Land Disposal Division (WH-564), Office of Solid Waste, U.S. Environmental Protection Agency, Washington, D.C. 20460, (202) 755-9125.

SUPPLEMENTARY INFORMATION: On May 18–22 EPA sponsored a symposium on hazardous waste land disposal. Several national experts on the subject participated to express their views on the current state of the art for predicting the environmental impact of hazardous waste land disposal facilities to EPA and the public.

The views and opinions of the experts were expressed via a series of panel discussion divided into four major subject areas:

1. Leachate predicting quantity and quality; attenuation in liners and the unsaturated zone; and management approaches to control leachate quantity and quality.

2. Predicting leachate plume migration in groundwater; modeling and monitoring.

3. Gas generation and migration: rates of emissions; monitoring and dispersion modeling; and control practices.

4. Health effects resulting from exposures to hazardous waste disposed on or in the land.

The first topic was discussed for two full days and each of the other topics was the focus of a full day's panel discussion. During each session, a number of specific technical points were addressed.

The panel discussion summary is titled "Land Disposal of Hazardous Waste—Summary of Panel Discussions." Readers are encouraged to provide comments on the summary where it is felt that panel opinions are either in error or in need of further amplification or clarification. A compendium of relevant comments will be appended to the summary at a later date.

Dated: November 3, 1981.

Christopher J. Capper,

Acting Assistant Administrator, Solid Waste and Emergency Response.

[FR Doc. 81-36873 Filed 12-24-81; 8:45 am]

BILLING CODE 6560-26-M

FEDERAL COMMUNICATIONS COMMISSION

Advisory Committee on Radio Broadcasting; Meeting

The Advisory Committee on Radio Broadcasting will meet to provide information to interested members of the broadcasting industry and the public concerning the Region 2 Administrative Radio Conference held in Rio de Janeiro from November 9, 1981 through December 18, 1981. Members of the U.S. Delegation to the Conference, including representatives from industry, the FCC and the Department of State, will be on hand to answer questions.

The Rio Conference involved countries throughout the Western Hemisphere and was held under the auspices of the International Telecommunication Union. The purpose of the Conference was to develop an agreement governing the assignment of AM broadcast stations in Region 2—North, Central and South America, the Caribbean and Greenland.

Date: Thursday, January 7, 1982, at 10:30 a.m.

Address: Federal Communications Commission, 1919 "M" Street, N.W., Room 856, Washington, D.C. 20554.

Supplementary information: The meeting will be chaired by Mr. Kalmann Schaefer, Chairman of the U.S. Delegation to the Conference.

For further information: Contact Louis C. Stephens, Federal Communications Commission, Washington, D.C. 20554, (202) 632-7792.

William J. Tricarico,

Secretary, Federal Communications Commission.

[FR Doc. 81-36856 Filed 12-24-81; 8:45 am]

BILLING CODE 6712-01-M

[BC Docket Nos. 81-844, 81-845, 81-846; File Nos. BPCT-810227KI, BPCT 810615KI, BPCT 810615KS]

Fox Media, Inc., et al.; Hearing Designation Order Designating Applications for Consolidated Hearing on Stated Issues

Adopted: December 1, 1981.

Released: December 16, 1981.

In re Applications of Fox Media, Inc., High Point, North Carolina, BC Docket No. 81-844, File No. BPCT-810227KI; Triad Family Television, Inc., High Point, North Carolina, BC Docket No. 81-845, File No. BPCT-810615KI; and High Point Community Television, Inc., High Point, North Carolina, BC Docket No. 81-846, File No. BPCT-810615KS. For construction permit.

1. The Commission, by the Chief, Broadcast Bureau, acting pursuant to delegated authority, has before it the above-captioned mutually exclusive applications of Fox Media, Inc. (Fox), Triad Family Television, Inc. (Triad) and High Point Community Television, Inc. (High Point) for a new commercial television station to operate on Channel 67, High Point, North Carolina.

2. Applicants for new broadcast stations are required by § 73.3580(f) of the Commission's Rules to give local notice of the filing of their applications.

They must then file with the Commission the statement described in § 73.3580(h) of the Rules. We have no evidence that Fox and High Point published the required notice. To remedy this deficiency, Fox and High Point will be required to publish local notice and to file a statement of publication with the presiding Administrative Law Judge within 40 days after this Order appears in the **Federal Register.**

Fox Media, Inc.

3. No determination has been reached that the tower height and location proposed by Fox would not constitute a hazard to air navigation. Accordingly, an issue regarding this matter will be specified.

4. The proposed tower for Fox is to be located 1.99 miles from the non-directional tower of AM radio station WOKX High Point, North Carolina. Because of the proximity of the proposed tower to WOKX, any grant of a construction permit to Fox will be conditioned to ensure that WOKX's radiation pattern is not adversely affected by the construction of the proposed station.

5. Applicant estimates that it will require $2,320,588 to construct its proposed facility and operate for three months, itemized as follows:

Equipment	$2,109,104
Land and building	16,700
Legal costs	5,000
Engineering costs	4,000
Installation costs	14,080
Miscellaneous costs	20,404
Operating costs (3 months)	151,300
Total	2,320,588

6. Applicant estimates its legal costs at $5,000. This amount seems unreasonably low since this application must be prosecuted in a comparative hearing. Accordingly, an issue will be specified inquiring into whether Fox's estimate of its legal fees is reasonable.

7. Applicant has not submitted its financial plan. Fox indicated that it would be forthcoming; however, our records do not reflect receipt of such an amendment. Applicant's balance sheet shows that it does have $3,000 cash on which it may rely. Accordingly, a financial issue will be specified to determine whether applicant has available an additional $2,317,588 over and above the $3,000 mentioned, as well as funds for additional legal fees if required.

Triad Family Television, Inc.

8. The Federal Aviation Administration's approval of applicant's tower height and location has expired. Consequently, grant of Triad's application shall be conditioned upon revalidation of the FAA clearance.

Conclusion and Order

9. Except as indicated by the issues specified below, the applicants are qualified to construct and operate as proposed. However, since the proposals are mutually exclusive, they must be designated for hearing in a consolidated proceeding on the issues specified below.

10. Accordingly, it is ordered, That, pursuant to Section 309(e) of the Communications Act of 1934, as amended, the applications are designated for hearing in a consolidated proceeding, before an Administrative Law Judge at a time and a place to be specified in a subsequent Order upon the following issues:

1. To determine with respect to Fox Media, Inc.:

(a) Whether there is a reasonable possibility that the tower height and location proposed would constitute a hazard to air navigation;

(b) Whether, in light of the evidence adduced pursuant to the foregoing issue, applicant is technically qualified.

(c) Whether applicant's estimates of its legal costs is reasonable;

(d) Whether applicant has available an additional $2,317,588, plus additional funds for legal fees if required;

(e) Whether, in light of the evidence adduced pursuant to issues (c) and (d), applicant is financially qualified.

2. To determine which of the proposals would, on a comparative basis, best serve the public interest.

3. To determine, in light of the evidence adduced pursuant to the foregoing issues, which of the applications should be granted.

11. It is further ordered, That, Fox and High Point shall each file with the presiding Administrative Law Judge proof of publication of local notice of the filing of their applications within 40 days after this Order is published in the **Federal Register.**

12. It is further ordered, That, in the event of a grant of Fox's application, the construction permit shall contain the following condition:

Prior to construction of the TV tower authorized herein, permittee shall notify AM station WOKX, High Point, North Carolina, so that the AM station may determine operating power by the indirect method. Permittee shall be responsible for the installation and continued maintenance of detuning apparatus necessary to prevent adverse effects upon the pattern of the AM station. Subsequent to construction of the TV tower and installation of all appurtenances thereon, antenna impedance measurements of the AM antenna shall be made, and sufficient field strength measurements shall be made, at a minimum of eight equally spaced radials, to establish that the AM radiation pattern of the AM station is essentially omnidirectional. The results shall be submitted to the Commission in application for the AM station to return to the direct method of power determination. Thereafter, the TV station may commence *Limited Program Tests.*

13. It is further ordered, That in the event of a grant of the application of Triad Family Television, Inc. the grant shall be subject to the condition that construction shall not be commenced until FAA approval of the tower height and location has been revalidated.

14. It is further ordered, That the Federal Aviation Administration IS MADE A PARTY RESPONDENT to this proceeding with respect to issue 1(a).

15. It is further ordered, That, to avail themselves of the opportunity to be heard, the applicants and the party respondent herein shall, pursuant to § 1.221(c) of the Commission's Rules, in person or by attorney, within 20 days of the mailing of this Order, file with the Commission in triplicate a written appearance stating an intention to appear on the date fixed for the hearing and to present evidence on the issues specified in this Order.

16. It is further ordered, That, the applicants herein shall, pursuant to Section 311(a)(2) of the Communications Act of 1934, as amended, and § 73.3594 of the Commission's rules, give notice of the hearing within the time and in the manner prescribed in such Rule, and shall advise the Commission of the publication of such notice as required by § 73.3594(g) of the Rules.

Federal Communications Commission.

Larry D. Eads,

Chief, Broadcast Facilities Division, Broadcast Bureau.

[FR Doc. 81-36943 Filed 12-24-81; 8:45 am]

BILLING CODE 6712-01-M

[BC Docket Nos. 81-842, 81-843; File Nos. BP-810309AP, BP 810618AD]

Good News Media, Inc., and Paragon Radio Network, Inc.; Hearing Designation Order Designating Applications for Consolidated Hearing on Stated Issues

In re Applications of Good News

Media, Inc., Elmwood Township, Michigan, Req: 1400 kHz, 250 W, 1 kW–LS, U, BC Docket No. 81–842, File No. BP–810309AP; Paragon Radio Network, Inc., Elmwood Township, Michigan, Req: 1400 kHz, 250 W, 1 kW–LS, U, BC Docket No. 81–843, File No. BP–810618AD. For construction permit.

Adopted: November 24, 1981.
Released: December 15, 1981.

1. The Commission, by the Chief, Broadcast Bureau, acting pursuant to delegated authority, has under consideration the above-captioned mutually exclusive applications for a new AM broadcast station.

2. *Good News Media, Inc.* Applicant failed to list the date and place of birth of officer Mr. Dale Perlin, required in Table I, Section II, of Form 301. An amendment will be required.

3. Analysis of the financial data Good News submitted reveals that $58,020 will be required to construct and operate for three months, itemized as follows:

Equipment	$10,410
Building	13,550
Construction-period lease	1,000
Other construction costs	5,500
Operating costs	27,650
Total	$58,020

The applicant proposes to finance the station with donations, but has not documented their availability. Further, it has not submitted a balance sheet. Therefore no funds have been shown to be available, and a limited financial issue must be specified.

4. *Other Matters.* Neither applicant has shown where Elmwood Township's business district is located. Further, primarily because both applicants propose a transmitter site at the southern edge of Elmwood Township, their proposed nighttime interference-free (16.5 mV/m) contours would cover only about 73 percent of the area and 76 percent of the population of that community. Both applicants requests waiver of § 73.24(j) of our Rules,[1] but their statements are not sufficient to establish that waiver is warranted. An appropriate issue will be specified.

5. Except as indicated by the issues specified below, the applicants are qualified to construct and operate as proposed. However, since the proposals are mutually exclusive, they must be designated for hearing in a consolidated proceeding.

6. Accordingly, it is ordered, That pursuant to section 309(e) of the Communications Act of 1934, as amended, the applications are designated for hearing in a consolidated proceeding, at a time and place to be specified in a subsequent order, upon the following issues:

1. To determine with respect to Good News Media, Inc.:

a. The source and availability of sufficient funds to meet anticipated costs; and

b. Whether, in light of the evidence adduced pursuant to (a) above, the applicant is financially qualified.

2. To determine with respect to each proposal whether it would provide coverage of Elmwood Township, Michigan, as required by § 73.24(j) of the Commission's Rules, and if not, whether circumstances exist which warrant waiver of that rule.

3. To determine which of the proposals would, on a comparative basis, better serve the public interest.

4. To determine in light of the evidence adduced pursuant to the foregoing issues, which of the applications, if either, should be granted.

7. It is further ordered, That Good News Media, Inc. shall file the amendment specified in paragraph 2 above within 30 days after this order is published in the **Federal Register.**

8. It is further ordered, That to avail themselves of the opportunity to be heard and pursuant to § 1.221(c) of the Commission's Rules, the applicants shall within 20 days of the mailing of this order, in person or by attorney, file with the Commission in triplicate a written appearance stating an intention to appear on the date fixed for the hearing and to present evidence on the issues specified in this order.

9. It is further ordered, That pursuant to Section 311(a)(2) of the Communications Act of 1934, as amended, and § 73.3594 of the Commission's Rules, the applicants shall give notice of the hearing as prescribed in the rule, and shall advise the Commission of publication of the notice as required by Section 73.3594(g) of the Rules.

Federal Communication Commission.

Larry D. Eads,

Acting Chief, Broadcast Facilities Division.

[FR Doc. 81–36944 Filed 12–24–81; 8:45 am]
BILLING CODE 6712–01–M

[1] Section 73.24(j) requires in pertinent part that AM proposals provide (a) 25 mV/m service day and night to the business district of the community of license and (b) interference-free service to all residential areas of the community.

[BC Docket No. 81–849; File No. BPH–810507AE]

Robert L. Griffis d/b/a/ Griffis Broadcasting Co.; Tye, Texas, Req: 99.3 MHZ, Channel No. 257A 0.54 kW (H&V), 714.5 feet; Hearing Designation Order Designating Application for Hearing on Stated Issues

Adopted: December 3, 1981.
Released: December 21, 1981.

1. The Commission, by the Chief, Broadcast Bureau, acting pursuant to delegated authority, has under consideration (i) the above-captioned application of Robert L. Griffis, d/b/a/ Griffis Broadcasting Company (Griffis), for a construction permit for a FM station at Tye, Texas, (ii) a petition to deny filed by Craft Communications, Inc. (Craft) against Griffis (iii) an Opposition filed by Griffis and (iv) other related pleadings.[1]

2. Prior to Griffis becoming an applicant, there were four applications, which had been designated for hearing, three applications for Abilene and one for Tye.[2] Under the "Joint Petitions For Approval of Agreement," the Administrative Law Judge (ALJ) approved agreements which allowed Burke to withdraw its application in exchange for Craft and TX–IN reimbursing him for expenses reasonably incurred in the preparation, filing and prosecution of his application; TX–IN would also withdraw in exchange for a portion of its expenses reasonably incurred in the preparation, filing and prosecution of its application. On August 4, 1980 Abilene Broadcasting Company, Inc. filed with the Commission a "Statement of Dismissal of Application" which was subsequently approved by the ALJ. All three applications were dismissed with prejudice. Since Abilene, Texas has seven broadcasting services licensed to it and Tye, Texas has none, the ALJ found that the withdrawal of the TX–IN application would unduly impede achievement of a fair, efficient distribution of radio services. Craft,

[1] Pursuant to the Commission's *Report and Order in re Revised Procedures for the Processing of Part 1 of the Commission's Rules*, 77 FCC 2d 202, 45 RR 2d 1220 (1970), which directed the deletion of all issue pleadings, those matters sought to be raised by the parties, irrespective of the nomenclature of the pleadings (e.g., Petition to Specify Issues, Petition to Deny, etc.) have been considered only to the extent specifically discussed, and/or issue(s) specified, herein. Accordingly, the opportunity to raise issues that have not been considered herein will be afforded the parties post-designation pursuant to § 1.229 of the Rules.

[2] The three applicants for Abilene were Abilene Broadcasting Company, Inc., Craft Communications, Inc., and W. L. Burke, Jr., (Burke). For Tye, Texas there was TX–IN Transmissions Inc., (TX–IN).

therefore, was then required by the ALJ to publish a notice inviting new parties to apply for the facilities specified in TX–IN's, Tye, Texas application pursuant to Section 307(b) of the Act and § 73.3525(c) of the Commission's Rules.[3]

3. On May 7, 1981, the Commission accepted for filing the mutually exclusive application of Griffis for Tye, Texas together with its request that its application be consolidated for hearing with Craft Communications, which was designated for hearing on June 9, 1980.[4]

4. Originally Craft had a financial issue designated against it in *Hearing Designation Order*, 45 FR 47914. However, it rectified the financial deficiency and its "Motion for Partial Summary Decision," eliminating any issues as to material facts which required resolution at hearing, was granted, *Memorandum Opinion and Order*, FCC 80M–1808, released September 25, 1980.

5. The Griffis proposal, although for a different community from that of Craft, would serve substantial areas in common. Consequently, in addition to determining, pursuant to section 307(b) of the Communications Act of 1934, as amended, which of the proposals would best provide a fair, efficient and equitable distribution of radio service, a contingent comparative issue will also be specified.

6. The applicant is qualified to construct and operate as proposed. However, since the proposal is mutually exclusive with Craft, the applicant must be designated for hearing in a consolidated proceeding with Craft.

7. Accordingly, it is ordered, That, pursuant to section 309(e) of the Communications Act of 1934, as amended, the application of Robert L. Griffis is consolidated into the proceeding, in BC Docket No. 80–295, with the application of Craft Communication Inc., at a time and place to be specified in a subsequent Order, upon the following issues:

1. To determine the areas and populations which receive primary aural service (1.0 mV/m or greater in the case of FM) from the proposed operations and the availability of other primary service to such areas and populations.

2. To determine, in the light of Section 307(b) of the Communications Act of 1934, as amended, which of the proposals would better provide a fair, efficient and equitable distribution of radio service.

3. To determine, in the event it is concluded that a choice between the applications should not be based solely on considerations relating to Section 307(b), which of the proposals would, on a comparative basis, better serve the public interest.

4. To determine, in the light of the evidence adduced pursuant to the foregoing issues, which, if any, of the applications should be granted.

8. It is further ordered, That, the engineering amendment filed by Griffis is accepted.

9. It is further ordered, That the issues specified in BC Docket No. 80–295 are superseded by the issues specified in this Order.

10. It is further ordered, That, to avail itself of the opportunity to be heard, the applicant herein shall, pursuant to § 1.221(c) of the Commission's rules, in person or by attorney, within 20 days of the mailing of this Order, file with the Commission in triplicate a written appearance stating an intention to appear on the date fixed for the hearing and to present evidence on the issues specified in this Order.

11. It is further ordered, That the applicant herein shall, pursuant to Section 311(a)(2) of the Communications Act of 1934, as amended, and § 73.3594 of the Commission's Rules, give notice of the hearing within the time and in the manner prescribed in such Rule, and shall advise the Commission of the publication of such notice as required by § 73.3594(g) of the rules.

Federal Communications Commission.

Larry D. Eads,

Chief, Broadcast Facilities Division, Broadcast Bureau.

[FR Doc. 81–36940 Filed 12–24–81; 8:45 am]

BILLING CODE 6712–01–M

[BC Docket Nos. 81–835, etc.; File No. BPCT–810513KF, etc.]

Media South Broadcasting Corp. et al.; Hearing Designation Order Designating Applications for Consolidated Hearing on Stated Issues

Adopted: November 27, 1981.

Released: December 16, 1981.

In re Applications of Media South Broadcasting Corp., Jackson, Mississippi, BC Docket No. 81–835, File No. BPCT–810513KF; Jackson Family Television, Inc., Jackson, Mississippi, BC Docket No. 81–836, File No. BPCT–810805KE; Big River Broadcasting Co., Jackson, Mississippi, BC Docket No. 81–837, File No. BPCT–810806KI; Television Corporation of Mississippi, Jackson, Mississippi, BC Docket No. 81–838, File No. BPCT–810806KJ; For construction permit.

1. The Commission, by the Chief, Broadcast Bureau, acting pursuant to delegated authority, has before it the above-captioned mutually exclusive applications for authority to construct a new commercial television broadcast station on Channel 40, Jackson, Mississippi.

2. Since no determination has been reached that the tower heights and locations proposed by Jackson Family Television, Inc. and Television Corporation of Mississippi would not constitute a hazard to air navigation, an issue regarding this matter is required.

Media South Broadcasting Corp.

3. Applicant has apparently failed to make provision for lease of land or buildings. It will require at least $2,801,224 to construct and operate as proposed. The applicant has shown that $3,575,335 is available to finance the proposal, providing a $774,111 cushion. Since a $774,111 cushion is available, no financial issue will be specified.

Jackson Family Television, Inc.

4. Applicant estimates that $489,737 will be required to construct and operate as proposed. To finance the proposal, applicant relies upon $12,500 in existing capital and a $500,000 loan from First Citizens Bank. The bank letter requires the personal guarantees of the principals of applicant corporation, but no undertaking to guarantee these loans has been submitted. Therefore, a financial issue will be specified to determine the source and availability of an additional $477,237.

Big River Broadcasting Co.

5. The applicant estimates that $3,797,267 will be required to construct and operate as proposed. No financial statements have been submitted to document the ability of Big River to finance the proposal. However, an installment sales agreement from Harris Corporation has been submitted. The agreement requires an initial 25% down payment of $784,250 and four months payments ($243,118), totalling $1,027,368. Total equipment costs as per the Harris letter is given as $3,137,000. Therefore, $2,109,632 is available as deferred credit. When we subtract this figure from the $3,797,267 total costs, we find that an additional $1,687,635 will be required and an appropriate issue will be specified.

Television Corporation of Mississippi

6. The applicant indicates that $1,804,500 will be required to construct

[3] *Memorandum Opinion and Order*, FCC 81M–700, released March 19, 1981.

[4] 45 FR 47914, BC Docket No. 80–295, File No. BPH–790S2AB (1980).

and operate as proposed. To finance the proposal, applicant relies upon a $2,200,000 loan from The Television Corporation of Virginia. But, no financial statements were submitted by applicant to evidence The Television Corporation of Virginia's ability to extend the loan. Therefore, the loan cannot be considered as a source of financing and an appropriate financial issue will be specified.

Conclusion and Order

7. Except as indicated by the issues specified below, the applicants are qualified to construct and operate as proposed. However, since the proposals are mutually exclusive, they must be designated for hearing in a consolidated proceeding on the issues specified below.

8. Accordingly, it is ordered, That, pursuant to Section 309(e) of the Communications Act of 1934, as amended, the applications are designated for hearing in a consolidated proceeding to be held before an Administrative Law Judge at a time and place to be specified in a subsequent Order, upon the following issues:

1. To determine with respect to Jackson Family Television, Inc. and Television Corporation of Mississippi whether there is a reasonable possibility that the tower heights and locations proposed would constitute a hazard to air navigation.

2. To determine with respect to Jackson Family Television, Inc.:

(a) the source and availability of an additional $477,237;

(b) whether, in light of the evidence adduced pursuant to the foregoing issue, applicant is financially qualified.

3. To determine with respect to Big River Broadcasting Co.:

(a) the source and availability of an additional $1,687,635 to construct and operate as proposed;

(b) whether, in light of the evidence adduced pursuant to the foregoing issue, applicant is financially qualified.

4. To determine with respect to Television Corporation of Mississippi:

(a) the source and availability of $1,804,500 to construct and operate as proposed;

(b) whether, in light of the evidence adduced pursuant to the foregoing issue, applicant is financially qualified.

5. To determine which of the proposals would, on a comparative basis, best serve the public interest.

6. To determine, in light of the evidence adduced pursuant to the foregoing issues, which of the applications should be granted.

9. It is further ordered, That the Federal Aviation Administration is made a party to the proceeding with respect to issue 1.

10. It is further ordered, That to avail themselves of the opportunity to be heard, the applicants and party respondent herein, pursuant to § 1.221(c) of the Commission's Rules, in person or by attorney, shall, within 20 days of the mailing of this Order, file with the Commission, in triplicate, a written appearance stating an intention to appear on the date fixed for the hearing and present evidence on the issues specified in this Order.

11. It is further ordered, That the applicants herein, pursuant to section 311(a)(2) of the Communications Act of 1934, as amended, and § 73.3594 of the Commission's Rules, shall give notice of the hearing within the time and in the manner prescribed in such Rule, and shall advise the Commission of the publication of such notice as required by § 73.3594(g) of the rules.

Federal Communications Commission.

Larry D. Eads,

Chief, Broadcast Facilities Division, Broadcast Bureau.

BILLING CODE 6712-01-M

FEDERAL DEPOSIT INSURANCE CORPORATION

Statement of Policy on Capital Adequacy

AGENCY: Federal Deposit Insurance Corporation.

ACTION: Statement of policy.

SUMMARY: This Statement of Policy is intended to formalize internal guidelines concerning capital adequacy which were previously established by the FDIC's Board of Directors. The Statement of Policy is being published in order to promote greater uniformity among the various FDIC regions and to provide guidance to affected institutions on the FDIC's attitude toward capital adequacy.

EFFECTIVE DATE: December 17, 1981.

FOR FURTHER INFORMATION CONTACT: James L. Sexton, Associate Director, Division of Bank Supervision, Federal Deposit Insurance Corporation, 550 17th Street, NW, Washington, D.C. 20429, (202) 389-4297.

SUPPLEMENTARY INFORMATION: This Statement serves to reemphasize the FDIC's firmly held belief that equity capital is the critical element in determining the adequacy of capital in an operating bank. This policy statement is intended to clearly set forth qualitative criteria to be considered in determining adequacy of bank capital, to inject more objectivity and consistency into the process of determining capital adequacy, to provide nonmember banks with clearly defined goals for use in capital and strategic planning, and to address the issue of disparity in capital levels among banks in different size categories by adopting uniform standards regardless of the size of the institution.

The Regulatory Flexibility Act of 1980 (Pub. L. No. 96-354) does not apply to general statements of policy; therefore,

no regulatory-flexibility analysis is required. The Policy Statement does not entail any specified reporting or recordkeeping requirements within the ambit of the Paperwork Reduction Act of 1980 (Pub. L. No. 96–511). Because this is a Statement of Policy, it is not subject to sections 553 (b) through (d) of the Administrative Procedure Act and may be issued in final form without having been issued as a proposal.

FDIC Statement of Policy on Capital Adequacy

The capital composite to be used in assessing the adequacy of bank capital will be equity capital (minus assets classified loss and one-half of assets classified doubtful) expressed as a percentage of total assets (minus assets classified loss and one-half of assets classified doubtful). Equity capital is defined to include common stock, perpetual preferred stock, capital surplus, undivided profits, contingency reserves, other capital reserves, mandatory convertible instruments, and reserves for loan losses.

Other instruments such as limited-life preferred stock or subordinated notes and debentures will not be considered in evaluating capital adequacy since they lack permanence, are not available to absorb losses in a going concern, and impose mandatory servicing requirements. The Corporation neither encourages nor discourages banks from issuing these obligations for funding or other corporate purposes; rather, it wishes to state its view that these obligations are not a substitute for equity capital. To the extent that such instruments are used to increase lending and other legal limits, they may increase the level of risk in an institution by decreasing asset diversification and may, thus, trigger a requirement for a greater proportion of equity capital.

The process of determining the adequacy of a bank's capital will begin with a qualitative evaluation of critical variables that directly bear on the institution's overall financial condition. These variables include the quality, type and diversification of assets; current and historical earnings; provision for liquidity with particular emphasis on asset/liability mismatches and market depreciation in the portfolio of assets; the quality of management; and the existence of other activities which may expose the bank to risk including, in the case of holding company-affiliated banks, the degree of leverage and risk undertaken by the parent company or its affiliates.

To foster objectivity in the analytical process and provide a benchmark for evaluating capital adequacy, the Corporation has established a *threshold* level for adjusted equity capital for all insured nonmember commercial banks at 6 percent of adjusted total assets. When the adjusted equity capital ratio falls below this level, the Corporation's staff, in cooperation with the State banking department, will contact bank management and/or directors and require submission of a comprehensive capital plan acceptable to the Corporation and the State banking department.

The Corporation has established a *minimum acceptable* level of adjusted equity capital at 5 percent of adjusted total assets for any insured nonmember commercial bank. When the adjusted equity capital ratio falls below this level, the Corporation will insist on a specific program for remedying the equity capital deficiency promptly. The Corporation, in order to bring about increases in capital once the minimum acceptable level is reached (whether that level is 5% or some higher limit as determined through an analysis of the overall condition of the institution), fully intends to utilize its authority to withhold approval of applications of various types and, in cooperation with the State banking department, to initiate administrative actions.

It should be emphasized that the above percentage guidelines are for financially *sound, well-managed, diversified* institutions with established records of adequate capital formation relative to asset growth. They apply regardless of size or holding company affiliation. It should also be recognized that the various State banking departments may impose more stringent capital requirements than those set forth in this policy statement.

To provide protection against unforeseen adversity, the Corporation. encourages even the highest-quality institutions to maintain equity capital above these levels. For institutions that are exposed to greater degrees of risk based on the aforementioned critical variables, higher equity capital levels must be maintained. It should be emphasized, with respect to institutions that currently have ratios in excess of the levels set forth above, that the Corporation will not countenance a diminution in capital ratios through payment of excessive dividends or speculative asset growth.

The Corporation intends to review this policy position on an ongoing basis to ensure that the overall level of risk to the insurance fund is acceptable. The standards set forth herein will be reassessed periodically in light of changing conditions in the banking industry and particularly as the process of deregulation of interest rates and granting of additional banking powers proceeds.

By Order of the Board of Directors dated December 17, 1981.

Federal Deposit Insurance Corporation,

Hoyle L. Robinson,

Executive Secretary.

BILLING CODE 6714-01-M

FEDERAL HOME LOAN BANK BOARD

[No. 81-777]

Privacy Act of 1974; Systems of Records; Annual Republication

Dated December 16, 1981.

AGENCY: Federal Home Loan Bank Board.

ACTION: Final Action Systems of Records—Republication.

SUMMARY: The Bank Board is required by the Privacy Act of 1974 to republish annually its system of records. The most recent full publication of said systems was made on October 16, 1980 at 45 FR 68840–68856.

The Board herewith republishes the following systems: FHLBB–1, FHLBB–4, FHLBB–5, FHLBB–6, FHLBB–8, FHLBB–10, FHLBB–12, FHLBB–14, FHLBB–15, FHLBB–19, and FHLBB–22. All other systems published as of October 16, 1980 remain unchanged and are incorporated herein by reference. The republished systems are amended to show address changes or changes in agency designations, e.g. substitution of "Office of Personnel Management" for "Civil Service Commission." The System numbered as FHLBB–5 is a new system of records published on August 26, 1981 at 46 FR 43082–83. FHLBB–29 has been eliminated.

EFFECTIVE DATE: December 28, 1981.

FOR FURTHER INFORMATION CONTACT: William Van Lenten (202) 377–6463.

AUTHORITY: 5 U.S.C. 552a.

The full texts of the amended Federal Home Loan Bank Board systems of records are as follows:

FHLBB–1

SYSTEM NAME:

Internal Office Personnel Files.

SYSTEM LOCATION:

See "System Manager."

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Federal Home Loan Bank Board employees, consultants, and employees

of the Federal Savings and Loan Insurance Corporation, and Federal Savings and Loan Insurance Corporation receiverships.

CATEGORIES OF RECORDS IN THE SYSTEM:

This system consists of a variety of records relating to personnel actions and determinations regarding individuals while employed by the Federal Home Loan Bank Board, as consultants to the Board, or as employees of a Federal Savings and Loan Insurance Corporation receivership. The records may contain information about an individual relating to: Date of birth; social security number; veterans preference; tenure; physical handicap; past and present salaries, grades, and position titles; and may include letters of commendations, reprimands, charges, and decision on charges; notices of reduction-in-force; accident reports; upward-mobility information; locator files; loans with Savings and Loans; personnel actions, including but not limited to appointment, promotion, reassignment, demotion, work detail, transfer, and separation; probationary period; training; minority group; indicator; life insurance, health benefits, and designation of beneficiary; application for employment; letters of reference; performance.ratings (MBO/KOI or other as applicable); documentation of personnel actions or decisions made about the individual; awards; records of equipment and materials issued to the individual; leave and time-and-attendance records; travel records; duplicate employee identification cards; and other information regarding the individual.

AUTHORITY FOR MAINTENANCE OF THE SYSTEMS:

5 U.S.C. 1302, 2951, 4118, 4308, 4506, and Executive Order 10561, dated September 13, 1954.

ROUTINE USES OF RECORDS MAINTAINED IN SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Information in these records is used or may be used:

(1) By Board and receivership officials for review in connection with training, appointments, transfers, promotions, reassignments, adverse actions (including disciplinary actions), determinations of qualifications of an individual, determinations of conflicts of interest, equipment assigned to an individual, entitled benefits, leave authorized and used, travel undertaken, and reimbursements;

(2) By the Office of Personnel Management for when a current or former Federal employee questions the validity of a specific document in his record;

(3) By the Courts to render a decision when an agency has refused to release to a current or former Federal employee a record under the Freedom of Information Act;

(4) To provide information to a prospective employer of a current or former Federal employee;

(5) To provide data for the automated Central Personnel Data File (CPDF);

(6) To provide data to update Federal Automated Career Systems (FACS), the Executive Inventory File, Security Investigations, the Index on New Hires, and materials concerning adverse actions and termination;

(7) To provide information to a Federal agency, in response to its request, in connection with hiring or retention of an employee, letting of a contract, or issuance of a license, grant, or other benefit by the requesting agency, to the extent that the information is relevant and necessary to the requesting agency's decision on the matter;

(8) In connection with requests for information from a Federal, State, or local agency maintaining civil, criminal, or other relevant enforcement or other pertinent information, such as licenses, if the obtaining of such information is necessary to an agency decision concerning hiring or retention of an employee, issuance of a security clearance, letting of a contract, or issuance of a license, grant, or other benefit;

(9) To refer, where there is indication of a violation or potential violation of law (whether civil, criminal, or regulatory), to the appropriate Federal, State, or local agency charged with responsibility for investigating or prosecuting such violation, of enforcing or implementing the statute, or rule, regulation, or order issued pursuant thereto;

(10) As a data source for management information for production of summary descriptive statistics and analytical studies in support of the functions for which the records are collected and maintained, or for related personnel management functions or manpower studies, and for utilization in response to general requests for statistical information without personnel identification of individuals under the Freedom of Information Act or to locate specific individuals for personnel research or other personnel management functions;

(11) Verification of employment for credit purposes; and

(12) Disclosure of information may be made to a congressional office from the record of an individual, in response to an inquiry from that office made at the request of an individual, if such information would be available directly to the individual upon request.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are maintained in file folder or on Kardex cards in the lockable containers or in secured rooms.

RETRIEVABILITY:

Records are filed by name of individual.

SAFEGUARDS:

Access is limited to personnel whose official duties require such access and who have a need to know the information in a record for a particular job-related purpose.

RETENTION AND DISPOSAL:

Cut-off upon termination of employment. Destroy 60 days after cut-off.

SYSTEM MANAGER(S) AND ADDRESS:

The business address of each system manager listed below, unless otherwise indicated, is: Federal Home Loan Bank Board, 1700 G Street, NW., Washington, D.C. 20552.

NOTIFICATION PROCEDURE:

Inquiries concerning records shall be made by notifying the appropriate system manager. Such notification must include the individual's name, social security number or employee identification number, date of birth, office of employment (including location), period of employment and the name of the record system.

RECORD ACCESS PROCEDURES:

Persons wishing to have access to their records or to have such records changed (including modification, addition, and deletion) shall notify the appropriate system manager. Such notification shall include the same information required to be furnished under "Notification", plus a statement setting forth the desired access or changes and the reasons for such changes.

CONTESTING RECORD PROCEDURES:

See "Access Procedures".

RECORD SOURCE CATEGORIES:

Information in this system of records may have been obtained from the individual, his immediate supervisor, or persons at other supervisory levels, the personnel office, the payroll office, Savings and Loan Associations, U.S. Civil Service Commission, or other sources.

FHLBB—4

SYSTEM NAME:

Consumer Inquiry Records and Data.

SYSTEM LOCATION:

Consumer Affairs and Civil Rights Division, Office of Examinations and Supervision, Federal Home Loan Bank Board, 1700 G Street, NW., Washington, D.C. 20552.

SUBSIDIARY:

Related information may be maintained in FHLBB and FHLBB Regional Offices' files.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Persons who submit inquiries or complaints concerning regulated financial institutions, the deposits of which are insured by the FSLIC and other related corporations e.g.: Holding companies and service corporation.

CATEGORIES OF RECORDS IN THE SYSTEM:

Inquiries and complaints, the nature of such inquiries or complaints, and information on the investigation and resolution of inquiries and complaints.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301.

ROUTINE USE OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Information may be disclosed to officials of savings and loan associations in connection with investigation of inquiries and complaints. Relevant referrals may be made to appropriate law enforcement agencies or authorities in connection with investigation and/or prosecution of alleged civil, criminal and administrative violations. Disclosures may be made to a Congressional Office from the record of an individual in response to an inquiry from the Congressional Office made at the request of that individual. Disclosures may also be made to the Federal Reserve Board, other Federal financial regulatory agencies, and the Congress or any of its authorized committees in fulfilling reporting requirements or assessing implementation of applicable laws and requirements. (Such disclosure will be made in a nonidentifiable manner when feasible and appropriate.) Referrals may also be made to other Federal and nonfederal governmental supervisory or regulatory authorities when the subject matter of a complaint or inquiry is more properly within such other agency's jurisdiction. Other disclosures are intra-agency only, including offices of Supervisory Agent.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper, computer tape.

RETRIEVABILITY:

By individual name, complaint number or system identifier, or by savings and loan association name, district, complaint code, source code, disposition code; or by some combination thereof.

SAFEGUARDS:

Maintained in secured offices.

RETENTION AND DISPOSAL:

Active Cases: Cut off at end of calendar year in which case is closed. Transfer to FRC 3 years after cut off.

Closed Cases: Cut off at end of 5th calendar year. Destroy 10 years after cut off.

SYSTEM MANAGER(S) AND ADDRESS:

Director, as above.

NOTIFICATION PROCEDURE:

Director, as above.

RECORD ACCESS PROCEDURES:

Director, as above.

CONTESTING RECORD PROCEDURES:

Director, as above.

RECORD SOURCE CATEGORIES:

Inquirer or complainant (or his or her representative, which may include, e.g., a member of Congress or an attorney); savings and loan association officials, employees and members; examiners and central files on savings and loan associations.

FHLBB—5

SYSTEM NAME:

Investigation files.

SYSTEM LOCATION:

Federal Home Loan Bank Board, 1700 G Street, NW., Washington, D.C. 20552.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Employees of the Bank Board under investigation and such other persons involved in Bank System and FSLIC operations.

CATEGORIES OF RECORDS IN THE SYSTEM:

Files contain information concerning investigation of alleged irregularities in the operations of the Federal Home Loan Bank Board, the FSLIC, and FHLBs.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301, 44 U.S.C. 3101.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

1. In the event that a system of records maintained by this agency to carry out its functions indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute, or by regulation, rule or other issued pursuant thereto, the relevent records may be referred, as a routine use, to the appropriate agency, whether federal, state, local or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, rule, regulation or order issued pursuant thereto.

2. A record from a system of records maintained by this agency may be disclosed as a routine use to a Federal, state, or local agency maintaining civil, criminal or other relevant enforcement information or other pertinent information, such as current licenses, if necessary to obtain information concerning the hiring or retention of an employee, the issuance of a security clearance, the letting of a contract, or the issuance of a license, grant or other benefit.

3. A record from a system of records maintained by this agency may be disclosed to a federal agency, in response to its request, in connection with the hiring or retention of an employee, the issuance of a security clearance, the reporting of an investigation of an employee, the letting of a contract, or the issuance of a license, grant, or other benefit by the requesting agency to the extent that the information is relevant and necessary to the requesting agency's decision.

4. Disclosures may be made to a Congressional office from the record of an individual in response to an inquiry from the Congressional office made at the request of that individual.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper documents in file folders.

RETRIEVABILITY:

Filed by name of person under investigation and by case number.

SAFEGUARDS:

Records are maintained in locked file cabinets in secured rooms with access limited to those persons whose duties, as approved by the Director, require access.

RETENTION AND DISPOSAL:

Retained in office for 1 year after administrative closing of file. Retained by Record Center for 14 additional years.

SYSTEM MANAGER(S) AND ADDRESS:

Director, Office of Internal Evaluation and Compliance, 1700 G Street, NW., Washington, D.C. 20552.

NOTIFICATION PROCEDURE:

Inquiries concerning the records shall be made to the system manager.

RECORD ACCESS PROCEDURE:

Persons wishing to have access to their records or to have such records changed or updated (including modification, addition, and deletion) shall notify the system manager. Such notification shall include the information required to be furnished under "Notification", plus a brief resume or descrition of the information thought to be included in the record, a statement setting forth the desired access or changes, and the reasons for such changes.

CONTESTING RECORD PROCEDURES:

See access procedures.

RECORD SOURCE CATEGORIES:

Subject individuals, employees and officers of the Board and the FHLB's, employees and officers of insured S&LA's, and borrowers and other persons having transactions with insured S&LAs.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

Pursuant to 5 U.SC. 552a(k)(2) and (k)(5), all investigatory material in the record which meets the criteria of these sub-sections is exempt from the notice, access, and contest requirements (under 5 U.S.C. 552a (c)(3), (d), (e)(1), (e)(4)(G), (H), and (I), and section 505a.12 of the agency regulations in order for the Board's staff to perform its functions properly.

FHLBB—6

SYSTEM NAME:

District Bank Officers' Biography File.

SYSTEM LOCATION:

Federal Home Loan Bank Board, 1700 G Street, NW., Washington, D.C. 20552

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All Federal Home Loan Bank Officers.

CATEGORIES OF RECORDS IN THE SYSTEM:

Resumes and Appointment Histories, including salary information.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301, 44 U.S.C. 3101.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

(1) To provide general background information on Bank officers for use by the Director, Office of the District Banks and the Board. Information other than salary data is furnished to the public upon request.

(2) Disclosure of information may be made to a congressional office from the record of an individual, in response to an inquiry from that office made at the request of the individual, if such information would be available directly to the individual upon request.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are maintained in filing cabinets in file folders.

RETRIEVABILITY:

Records are filed by name of individual.

SAFEGUARDS:

Access to salary data is limited to personnel who have a need to know the information for a job-related purpose.

RETENTION AND DISPOSAL:

Permanent. Cut-off upon retirement or separation of individual, and transfer to the Federal Records Center Offer to National Archives 5 years from date of cut-off.

SYSTEM MANAGER(S) AND ADDRESS:

Administrative Assistant (Elections), Office of the Federal Home Loan Banks. See "Location" for address.

NOTIFICATION PROCEDURE:

Inquiries concerning the records shall be made to the system manager.

RECORD ACCESS PROCEDURES:

Persons wishing to have access to the records shall notify the system manager. Salary information is only available to the individual whose record is kept, and a request for such information must include the individual's name, date of birth, social security number, and period of employment. Inquirers wishing to contest records may do so through the system manager.

CONTESTING RECORD PROCEDURES:

See "Access Procedures".

RECORD SOURCE CATEGORIES:

The individuals whose records are kept, and the Federal Home Loan Banks.

FHLBB—8

SYSTEM NAME:

Candidates for Employment

SYSTEM LOCATION:

See "System Manager".

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Candidates for employment by the Federal Home Loan Bank Board.

CATEGORIES OF RECORDS IN THE SYSTEM:

Resumes, letters of referral, transcripts and internal agency memoranda.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301, 44 U.S.C. 3101.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

(1) These materials are used by agency officials to evaluate qualifications of candidates for employment.

(2) A record from this system of records may be disclosed as a "Routine Use" to a Federal, State or local agency maintaining civil, criminal or other relevant enforcement information or other pertinent information such as current licenses, if necessary to obtain information relevant to an agency decision concerning the hiring or retention of an employee, the issuance of a security clearance, the letting of a contract, or the issuance of a license, grant or other benefit.

(3) Disclosure of information may be made to a congressional office from the record of an individual, in response to an inquiry from that office made at the request of the individual, if such information would be available directly to the individual upon request.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are maintained in file folders. An index card summarizing each application is also prepared and filed.

RETRIEVABILITY:

Records are filed by name of candidate.

SAFEGUARDS:

Access is limited to supervisors and Personnel Management Office employees whose official duties require such access and who have a need to know the information in a record for a particular job-related purpose.

RETENTION AND DISPOSAL:

Transfer application to Official Personnel Folder for candidates selected and destroy index card. Destroy files for other candidates after position has been filled.

SYSTEM MANAGER(S) AND ADDRESS:

The business address of each System Manager listed below, unless otherwise indicated is:

Federal Home Loan Bank Board
1700 G Street, NW.
Washington, D.C. 20552.
Deputy Director
Office of the District Banks
General Counsel, Office of the General Counsel
Chief, Personnel Operations Branch
Personnel Management Office.
Assistant District Director—Personnel Development
Office of Examinations and Supervision
Federal Home Loan Bank Board
260 Peachtree Street, NW.
Atlanta, Georgia 30303.

NOTIFICATION PROCEDURE:

Inquiries concerning records shall be made by notifying the appropriate system manager. Such notification must include name, date of birth, social security number, and name of record system.

RECORD ACCESS PROCEDURES:

Persons desiring access to their records or to have such records changed (including modification, addition, and deletion) shall notify the appropriate system manager, furnishing him the information required under "Notification", plus a statement of the desired access or changes and the reasons for such changes.

CONTESTING RECORD PROCEDURES:

See "Access Procedures".

RECORD SOURCE CATEGORIES:

Individuals whose records are kept, individuals recommending an applicant, agency personnel office. Office of Personnel Management, college placement officers.

FHLBB—10

SYSTEM NAME:

Depositors/Account Holders in Defaulted Associations

SYSTEM LOCATION:

See "System Manager".

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Every individual with an account in a defaulted association.

CATEGORIES OF RECORDS IN THE SYSTEM:

Information pertaining to the account of an individual, including the type of account, account balance, rate of return and interest earned, insurance payment, and other information relating to savings accounts.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

402, 405 of the National Housing Act.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Information contained in this record system may be disclosed:

(1) In connection with settlement of insurance claims against defaulted institutions insured by the Federal Savings and Loan Insurance Corporation, to representatives of the Corporation (including a private contractor assisting in insurance settlement activities by providing needed data processing or other services);

(2) For credit checks (consistent with the Fair Credit Reporting Act) by individuals, firms, or agencies wishing to verify an individual's financial standing;

(3) In the event that a system of records maintained by the Federal Savings and Loan Insurance Corporation to carry out its functions indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute or particular program statute, or by regulation, rule, or order issued pursuant thereto, the relevant records in the system of records may be referred, as a routine use, to the appropriate agency, whether Federal, State, Local or Foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, or rule, regulation or order issued pursuant thereto; and

(4) To Federal, State and Local authorities, if necessary for assessment, computation, and collection of Federal, State, and Local taxes in accordance with established procedures.

(5) Disclosure of information may be made to a congressional office from the record of an individual, in response to an inquiry from that office made at the request of the individual, if such information would be available directly to the individual upon request.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are maintained in lockable containers and on magnetic tape or other retrieval devices for use in computer systems.

RETRIEVABILITY:

Records are filed by a combination of name and account number.

SAFEGUARDS:

Access is limited to personnel whose official duties require such access and who have a need to know the information in a record for a particular job-related purpose.

RETENTION AND DISPOSAL:

Retain in office 10 years after payment of last claimed account, then destroy.

SYSTEM MANAGER(S) AND ADDRESS:

Director
Federal Savings and Loan Insurance Corporation
Federal Home Loan Bank Board
1700 G Street, NW.
Washington, D.C. 20552
Receivership
Economy Savings & Loan
2650 W. 51st St.
Chicago, Ill. 60632

NOTIFICATION PROCEDURE:

Inquiries concerning records shall be made to the applicable system manager, furnishing name of the individual, name of institution where account was held, account number, and the name of the record system.

RECORD ACCESS PROCEDURES:

Persons wishing to have access to their records or to have such records changed (including modification, addition, and deletion) shall notify the appropriate system manager. Such notification shall include the information required under "Notification", plus a statement setting forth the desired access or changes and the reasons for such changes.

CONTESTING RECORD PROCEDURES:

See "Access Procedures".

FHLBB—12

SYSTEM NAME:

Payroll/Personnel.

SYSTEM LOCATION:

Federal Home Loan Bank Board, 1700 G Street, NW., Washington, D.C. 20552.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All current employees and all former employees whose employment terminated within the current calendar year.

CATEGORIES OF RECORDS IN THE SYSTEM:

Information pertaining to (1) employee status, grade, salary, pay plan, hours worked, hours of leave taken and earned, hourly rate, gross pay, taxes, deductions, net pay, location, and payroll history; and (2) employee residence, office, social security number, and address.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301, 44 U.S.C. 3101.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

(1) Information contained in these records is available for intra-Agency use in determining current employment status of employees, history of Payroll/Personnel actions, bi-weekly gross pay, taxes, deductions, and net pay, total wages paid to date and deductions paid. (2) In the event that a system of records maintained by the Board to carry out its functions indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute or particular program statute, or by regulation, rule or order issued pursuant thereto, the relevant records in the system of records may be referred, as a routine use, to the appropriate agency, whether Federal, State, Local or Foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, or rule, regulation or order issued pursuant thereto. (3) A record from this system may be disclosed as a routine use to other Federal agencies and the Office of Personnel Management if necessary for or incident to the payment of salaries and expenses incident to employment at the Federal Home Loan Bank Board or other Federal employment, or the vesting, computation, and payment of retirement or disability benefits. (4) A record from this system may be disclosed to Federal, State, and Local authorities for reasons necessary and incident to the assessment, computation, and collection of Federal, State, and Local taxes, in accordance with established procedures. (5) Disclosure of information may be made to a congressional office from the record of an individual, in response to an inquiry from that office made at the request of the individual, if such information would be available directly to the individual upon request.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are maintained in computer banks, on magnetic tape, and in file folders.

RETRIEVABILITY:

Records are filed by name or social security number.

SAFEGUARDS:

Access is limited to personnel whose official duties require such access and who have a need to know the information in a record for a particular job-related purpose.

RETENTION AND DISPOSAL:

Computer records are retained until the end of the calendar year in which employment is terminated; Magnetic tapes are retained for one additional calendar year. Records in file folders are retained for 6 years.

SYSTEM MANAGER(S) AND ADDRESS:

Director, Information Systems Division. See "Location" for address.

NOTIFICATION PROCEDURE:

Inquiries concerning the records shall be made to the system manager. Inquiries must include name, date of birth, social security number, period of employment, and name of record system.

RECORD ACCESS PROCEDURES:

Persons wishing to have access to the records or to have such records changed (including modification, addition, and deletion) shall notify the system manager. Such notification shall include the information required to be furnished under "Notification", plus a statement of the desired access or changes and the reasons for such changes.

CONTESTING RECORD PROCEDURES:

See "Access Procedures".

RECORD SOURCE CATEGORIES:

Personnel and financial records maintained by the agency.

FHLBB—14

SYSTEM NAME:

Asset Management System.

SYSTEM LOCATION:

See "System Manager".

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals having loans with defaulted Associations, employees of such Associations, agents who manage property owned by or under the control of the Federal Savings and Loan Insurance Corporation, and persons who rent such property.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records of loans including applications, title insurance policies, financial statements, credit checks, income tax returns, notes, deeds of trust, insurance policies, appraisals, loan settlement statements, disclosures under Fair Credit Reporting Act and Regulation Z of the Board of Governors of the Federal Reserve, collection letters, correspondence and memoranda relating to the loan or property in question; records of rentals of FSLIC-owned or managed property, including tenants lists, rental schedules, security deposit information, amounts in arrears, evictions, rental judgments and other related information.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Section 406 of the National Housing Act, as amended.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

(1) Records maintained in this system are used by Federal Savings and Loan Insurance Corporation personnel and its representatives in connection with management of assets of defaulted Associations and are made available in conformance with the Fair Credit Reporting Act to management agents for the Federal Savings and Loan Insurance Corporation, credit inquirers, and attorneys. (2) In the event that a system of records maintained by the Federal Savings and Loan Insurance Corporation to carry out its functions indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute or particular program statute, or by regulation, rule or order issued pursuant thereto, the relevant records in the system of records may be referred, as a routine use to the appropriate agency, whether Federal, State, Local, or Foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, or rule, regulation, or order issued pursuant thereto. (3) A record from this system may be disclosed as a routine use to Federal, State, and Local authorities if necessary and incident to the assessment, computation, and collection of Federal, State, and Local taxes in accordance with established procedures, or to the verification of an applicant's need for welfare benefits. (4) Disclosure of information may be made

to a congressional office from the record of an individual, in response to an inquiry from that office made at the request of the individual, if such information would be available directly to the individual upon request.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Files are maintained in locked file cabinets, secured rooms, and computer secondary storage (off-line).

RETRIEVABILITY:

Records are filed by defaulting institution's account number.

SAFEGUARDS:

Access is limited to persons whose duties required such access and who have a need to know the information in a record for a particular job-related purpose.

RETENTION AND DISPOSAL:

Records relating to loans are maintained for 10 years after repayment of the loan. Records relating to rental property are retained for 5 years. Records pertaining to sales of real estate are retained for 5 years after cash sale or 10 years after sale of properties financed by the Federal Savings and Loan Insurance Corporation. Magnetic tapes: (a) Receivership, Asset Management, and Property Management tapes are retained for 30 days, then blanked; (b) Bank tapes are retained for 90 days, then blanked; (c) Quarterly and year-to-date tapes are retained for 1 calendar year, then blanked.

SYSTEM MANAGER(S) AND ADDRESS:

The business address of each system manager, unless other wise indicated, is:

Federal Home Loan Bank Board, 1700 G Street, NW., Washington, D.C. 20552,
Director, Information Systems Division, Western Office Manager, Federal Savings and Loan Insurance Corporation
Receivership
Economy Savings & Loan
2650 W. 51st St.
Chicago, Ill. 60632

NOTIFICATION PROCEDURE:

Inquires concerning records shall be made to the appropriate system manager. Notification must include name of individual, name of defaulted Association, and, where appropriate, account of loan number, property rented and period rented, Association where employed, period of employment, and employment capacity.

RECORD ACCESS PROCEDURES:

Persons wishing to have access to the records or to have such records changed (including modification, addition, and deletion) shall notify the system manager. Such notification shall include the information required to be furnished under "Notification", plus a statement of the desired access or changes and the reasons for such changes.

CONTESTING RECORD PROCEDURES:

See "Access Procedures".

RECORD SOURCE CATEGORIES:

Defaulted Savings and Loan Associations; individuals whose records are maintained; credit bureaus; Federal Savings and Loan Insurance Corporation reports; Internal Revenue Service and other taxing authorities; title insurance companies; county officials, such as recorders; and individuals' employers, banks, and Savings and Loan Associations.

FHLBB-15

SYSTEM NAME:

Discrimination Complaint System.

SYSTEM LOCATION:

Federal Home Loan Bank Board, 1700 G Street, NW., Washington, D.C. 20552

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Any current or former agency employee of applicant who files a formal complaint of discrimination based on race, color, religious, sex, national origin, or age.

CATEGORIES OF RECORDS IN THE SYSTEM:

Formal complaints, Equal Employment Opportunity counselors' reports, investigative files, official proposals for resolution, hearing examiners files, Office of Personnel Management appeal files, civil actions (with attendant documentation).

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301, 44 U.S.C. 3101; E.O. 11246.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES.

(1) Records maintained in this system are used to provide documentation of complaint procedures for both administrative and legal purposes, they are made available to the Equal Employment Opportunity officer and Equal Employment Opportunity staff, the parties involved in the complaint procedure and the Office of Personnel Management.

(2) In the event that a system of records maintained by this agency to carry out its functions indicates a violation or potential violation of law, whether civil, criminal, or regulatory in nature, and whether arising by general statute or particular program statute, or by regulation, rule or order issued pursuant thereto the relevant records in the system of records may be referred, as a routine use, to the appropriate agency, whether Federal, State, Local or Foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, or rule, regulation, or order issued pursuant thereto.

(3) A record from this system may be disclosed to other Federal agencies for uses incident to employment of an individual by the Federal Government.

(4) Disclosure of information may be made to a congressional office from the record of an individual, in response to an inquiry from that office made at the request of the individual, if such information would be available directly to the individual upon request.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are maintained in file folders.

RETRIEVABILITY:

Records are filed by name of individual.

SAFEGUARDS:

Access is limited to personnel who have a need to know the information in the record for a job-related purpose, and may be gained only through the Director of Equal Employment Opportunity or the Equal Employment Opportunity officer.

RETENTION AND DISPOSAL:

Destroy 4 years after final adjustment for cases resolved within the agency. Transfer other cases to the Office of Personnel Management. Cases resolved by the Commission of a U.S. Court are controlled by the Commission's records schedule. Duplicate copies: Destroy 1 year after resolution of a case.

SYSTEM MANAGER(S) AND ADDRESS:

Equal Employment Opportunity officer. See "Location" for address.

NOTIFICATION PROCEDURE:

Inquiries concerning the records shall be made to the system manager. Inquiries must include name, social security number, date of birth, period of employment and office of employment

(including location), and name of record system.

RECORD ACCESS PROCEDURES:

Persons wishing to have access to the records or to have such records changed (including modification, addition, and deletion) shall notify the system manager. Such notification shall include the information required to be furnished under "Notification", plus a statement of the desired access or changes and the reasons for such changes.

CONTESTING RECORD PROCEDURES:

See "Access Procedures".

RECORD SOURCE CATEGORIES:

Equal Employment Opportunity officer, personnel investigations, the complaint.

FHLBB—19

SYSTEM NAME:

Employee Relations File.

SYSTEM LOCATION:

Federal Home Loan Bank Board, 1700 G Street, NW., Washington, D.C. 20552.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individual employees against whom allegations have been made.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records of supporting materials that document adverse actions, complaints, other actions and appeals.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301, 44 U.S.C. 3101.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

(1) Records maintained in the system are used to review status and history of each action; users are the employee relations specialist and, where appropriate, the Office of Personnel Management.

(2) In the event that a system of records maintained by this agency to carry out its functions indicates a violation of potential violation of law, whether civil, criminal, or regulatory in nature, and whether arising by general statute or particular program statute, or by regulation, rule, or order issued pursuant thereto, the relevant records in the system of records may be referred, as a routine use, to the appropriate agency, whether Federal, State, local or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, or rule, regulation, or order issued pursuant thereto.

(3) A record from this system may also be disclosed as a routine use to other Federal agencies for reasons necessary and incident to employment by the Federal Government.

(4) Disclosure of information may be made to a congressional office from the record of an individual, in response to an inquiry from that office made at the request of the individual, if such information would be available directly to the individual upon request.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are maintained in locked filing cabinets in file folders.

RETRIEVABILITY:

Records are filed by name of individual.

SAFEGUARDS:

Access is limited to personnel whose official duties require such access and who have a need to know the information in a record for a particular job-related purpose; access may be gained only through the employee relations officer.

RETENTION AND DISPOSAL:

Destroy 4 years after final adjustment for cases resolved within the agency. Transfer other cases to Office of Personnel Management.

SYSTEM MANAGER(S) AND ADDRESS:

Employee Relations Officer, Personnel Management Office. See "Location" for address.

NOTIFICATION PROCEDURE:

Inquiries concerning the records shall be made to the system manager. Inquiries must include name, social security number, date of birth, office of employment of the person making the inquiry, and name of the record system.

RECORD ACCESS PROCEDURES:

Persons within to have access to the records or to have such records changed (including modification, addition, and deletion) shall notify the system manager. Such notification shall include the information required to be furnished under "Notification", the desired access or changes, and the reasons for such changes.

CONTESTING RECORD PROCEDURES:

See "Access Procedures".

RECORD SOURCE CATEGORIES:

The individual whose record is maintained, the Personnel Management Office Liaison, the individual's supervisor, complainants and any officials involved in settlement of the complaint.

FHLBB—22

SYSTEM NAME:

Training Request, Authorization, Notice of Completion of Training

SYSTEM LOCATION:

Federal Home Loan Bank Board, 1700 G Street, NW., Washington, D.C. 20552

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Employees requesting and completing training.

CATEGORIES OF RECORDS IN THE SYSTEM:

Employee's name, social security number, date of birth, title, grade, office and division; course dates, course sponsor and address, course location, actual hours in class, on or off duty hours, course title; principal purpose of training, type of training, cost of training, budget source, budget type; signatures of employee supervisor, office director, director of Personnel.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301, 44 U.S.C. 3101.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

(1) To notify Personnel Management Office of completion of training;

(2) To keep a record of all training in the employee's Official Personnel File;

(3) To authorize payment for training by Procurement Management Branch and Controller's Division;

(4) User is Personnel Management Office;

(5) Information from this file is also provided to the Office of Personnel Management for use with the Central Personnel Data File;

(6) Disclosure of information may be made to a congressional office from the record of an individual, in response to an inquiry from that office made at the request of the individual, if such information would be available directly to the individual upon request.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are maintained in file folders in filing cabinets.

RETRIEVABILITY:

Records are filed by name of individual.

SAFEGUARDS:

Access is limited to personnel whose official duties require such access and who have a need to know information contained in a record for a particular job-related purpose, as determined by the Personnel Management Office prior to permitting review of such records.

RETENTION AND DISPOSAL:

Cut-off at end of fiscal year. Destroy 2 years after cut-off.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Career Development Branch, Personnel Management Office. See "Location" for address.

NOTIFICATION PROCEDURE:

Inquiries concerning the records shall be made to the system manager. Inquiries must include name, social security number, date of birth, office of employment and name of record system.

RECORD ACCESS PROCEDURES:

Persons wishing to have access to their records or to have such records changed (including modification, addition, and deletion) shall notify the system manager. Such notification shall include the information required to be furnished under "Notification" plus a statement of the desired access or changes and the reasons for such changes.

CONTESTING RECORD PROCEDURES:

See "Access Procedures".

RECORD SOURCE CATEGORIES:

The employee whose file is maintained, the employee's supervisor, and the Personnel Management.

By the Federal Home Loan Bank Board.

BILLING CODE 6720-01-M

FEDERAL MARITIME COMMISSION

Agreements Filed

The Federal Maritime Commission hereby gives notice that the following agreements have been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of each of the agreements and the justifications offered therefor at the Washington Office of the Federal Maritime Commission, 1100 L Street, N.W., Room 10327; or may inspect the agreements at the Field Offices located at New York, N.Y.; New Orleans, Louisiana; San Francisco, California; Chicago, Illinois; and San Juan, Puerto Rico. Interested parties may submit comments on each agreement, including requests for hearing, to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, on or before January 18, 1982. Comments should include facts and arguments concerning the approval, modification, or disapproval of the proposed agreement. Comments shall discuss with particularity allegations that the agreement is unjustly discriminatory or unfair as between carriers, shippers, exporters, importers, or ports, or between exporters from the United States and their foreign competitors, or operates to the detriment of the commerce of the United States, or is contrary to the public interest, or is in violation of the Act.

A copy of any comments should also be forwarded to the party filing the agreements and the statement should indicate that this has been done.

Agreement No. T-4006.

Filing party: Thomas D. Clark, Esquire, Deputy Port Attorney, Port of Oakland, P.O. Box 2064, 66 Jack London Square, Oakland, California 94604.

Summary: Agreement No. T-4006, between the Port of Oakland (Port) and Canal Industrial Park (Canal), provides for the nonexclusive preferential assignment by Port to Canal of certain marine terminal facilities situated at Berths 10, 11 and 12 at the Port's Outer Harbor Terminal. As compensation, Canal agrees to pay Port a minimum annual sum of $322,500 for the first year of the assignment and $310,000 per year thereafter, payment of which may be offset by dockage, wharfage, wharf demurrage, wharf storage and all other charges which accrue under Port's terminal tariff. Any such tariff charges in excess of $412,500 for the first year, and $400,000 per year thereafter, will be shared at the rate of 65 percent (Port) and 35 percent (Canal). Tariff charges arising out of operations and cargo of full container vessels will not be shared, however, they will be applied to the minimum annual compensation and breakpoint sums. The term of the agreement is from the date of Commission approval until September 30, 1983.

Agreement No. 134-42.

Filing party: C. J. Smith, Chairman, Gulf/Mediterranean Ports Conference, Suite 927, Whitney Building, New Orleans, Louisiana 70130.

Summary: Agreement No. 134-42 modifies the basic agreement of the Gulf/Mediterranean Ports Conference to comply with the self-policing requirements of General Order 7.

Agreement No. 5660-34.

Filing party: Jeffrey F. Lawrence, Esquire, Billig, Sher & Jones, P.C., 2033 K Street, N.W., Suite 300, Washington, D.C. 20006.

Summary: Agreement No. 5660-34 amends the basic agreement of the Marseilles North Atlantic U.S.A. Freight Conference to change voting procedures with respect to rates on intermodal shipments.

Agreement No. 9836-11.

Filing party: Edward D. Ransom, Esquire, Lillick Mchose & Charles, Two Embarcadero Center, San Francisco, California 94111.

Summary: Agreement No. 9836-11 modifies the Malaysia-Pacific Rate Agreement to extend the Agreement's existing ratemaking authority to include through transportation destined for inland and coastal points throughout the United States and Canada.

Dated: December 22, 1981.

By Order of the Federal Maritime Commission.

Francis C. Hurney,

Secretary.

[FR Doc. 81-38820 Filed 12-24-81; 8:45 am]

BILLING CODE 6730-01-M

Trailer Marine Transport Corporation and Remolcadores y Chalanes, S.A.; Cancellation

Filing party: Mr. William F. Roush, Crowley Maritime Corporation, One Market Plaza, San Francisco, California 94105.

Agreement No. 10406-1.

Summary: Agreement No. 10406-1, between Trailer Marine Transport Corporation and Remolcadores y Chalanes, S.A. provides for the cancellation of the agreement by mutual agreement of the parties.

Dated: December 22, 1981.

By Order of the Federal Maritime Commission.

Francis C. Hurney,

Secretary.

Line of Business Reports Program; Confidentiality Procedures—Adoption of Final Procedures as to LB Reports for 1973, 1974-76, 1977, and Future Years

AGENCY: Federal Trade Commission.

ACTION: Adoption of Final Procedures for LB Reports for 1973, 1974–1976, 1977, and Future Years.

SUMMARY: On August 27, 1980, the Federal Trade Commission published a notice (45 FR 57230) adopting final confidentiality procedures for 1977 Line of Business (LB) reports, and proposing to adopt the same rules for 1973–1976 LB reports, and for future years.

On December 16, 1980 (45 FR 82718), the Commission adopted a supplemental interim confidentiality procedure applicable to 1973–1976 LB reports which gave the General Counsel and his or her staff and Commissioners and their assistants access to LB information for certain limited purposes.

The Commission hereby adopts the proposed confidentiality procedures, as modified by the December 16 notice and by additional modifications noted below, for all previously filed LB reports (1973–1977) and for any reports to be filed in the future. With one exception, these procedures are effective on publication. Names of companies filing 1973 LB reports, which were confidential under the 1973 LB rules and procedures (39 FR 30970 (1974)), will be treated as confidential under ¶ 2 of the rules below until January 27, 1981.

ADDRESS: Although most of these procedures become effective immediately, the Commission will receive comments on them. Comments should be addressed to the Secretary, Federal Trade Commission, 6th Street and Pennsylvania Avenue, NW, Washington, D.C. 20580. Comments will be entered on the public record in Room 130 at the above address during normal business hours.

FOR FURTHER INFORMATION ABOUT THESE PROCEDURES CONTACT: Joanne L. Levine (202–523–3800), Office of General Counsel, Federal Trade Commission, Washington, D.C. 20580. For information about LB reporting requirements, call 202–254–8179.

SUPPLEMENTARY INFORMATION: As explained in the Commission's notice of August 27, 1980 (45 FR 57230), after enactment of statutory protection for LB reports in Section 4 of the FTC Improvements Act of 1980, 94 Stat. 374, 375 (1980), the Commission adopted final confidentiality rules and procedures (hereinafter "rules") for 1977 LB reports. Those rules attempted to update, clarify, and improve the interim 1977 LB confidentiality rules (45 FR 18946 (1980)), which in turn were almost identical to confidentiality rules for previous LB reporting years (compare, *e.g.*, 41 FR 28041 (1976)). The notice described how the final 1977 rules differed from the interim 1977 rules, and explained the reasons for each change. See 45 FR at 57232–33.

In the same notice, the Commission proposed to adopt the final 1977 rules for LB reports filed in previous years (1973–1976) and for future years as well. While all aspects of the rules were open to comment, the Commission particularly invited comment on two issues: whether persons objected generally to retroactive modification of confidentiality rules for the 1973–1976 reporting years, and whether any retroactive modification of the rules for the 1973 reporting year should leave intact the prohibition against disclosing the names of 1973 LB reporting companies. Under the rules for all other years, company names already are public. In addition to publishing the notice, the Commission mailed the proposed rules to all reporting companies.

The Commission received six letters, one of which also incorporated comments previously raised in a motion to quash orders to file 1977 LB reports. The Commission also received two letters commenting on the interim supplemental confidentiality procedure.

Some commenters criticized the manner in which the Commission adopted these confidentiality rules and procedures. Contending that these procedures are substantive in nature, they asserted that, in accordance with 5 U.S.C. 553(d), the procedures' effective date should have been postponed for 30 days after publication. As the Commission has noted twice before, these are not substantive provisions affecting reporting companies' rights or obligations; rather, they govern the Commission's internal procedures. Accordingly, the 30-day waiting period is not required by law. See, *e.g.*, *Reynolds Metals Co.* v. *Rumsfeld*, 417 F. Supp. 365, 371–72 (E.D. Va. 1976), *aff'd in relevant part*, 564 F.2d 663, 667, 669–70 (4th Cir. 1977), *cert. denied*, 435 U.S. 995 (1978); *Shell Oil Co.* v. *Department of Energy*, 477 F. Supp. 413, 437 (D. Del. 1979), *aff'd*, 631 F.2d 231 (3rd Cir.), *cert. denied*, 101 S. Ct. 1730 (1981).

Commenters have also suggested that prior to their adoption in final form, the Commission should have republished for comment its proposed 1977 confidentiality procedures after enactment of the Federal Trade Commission Improvements Act of 1980, 94 Stat. 374 (1980). Commenters have not explained why such a republication is necessary. Because Section 4 makes permanent the same protections that were previously provided in riders to the Commission's appropriations (see S. Rep. No. 96–500, 96th Cong., 1st Sess. 12 (1979), reprinted at (1980) *U.S. Code Cong. & Ad. News* 1114), there was no need to reevaluate or republish the rules, which were substantially the same as confidentiality rules based on the earlier appropriations riders (see 45 FR 57230–33).

The fact that only two letters opposed retroactive modification of the confidentiality rules for past years to create a uniform set of procedures for all reporting years indicates that this is not a major concern for most reporting companies. Because all modifications must be consistent with the requirement of Section 4 of the FTC Improvements Act that individual company data may not be disclosed outside the Commission and may not be used for law enforcement purposes, retroactive modifications will not diminish the substantial protections afforded to reporting companies' confidential data. Moreover, as the Commission has explained (45 FR 57232–33), most changes adopted here either are clarifications rather than substantive revisions, or are designed to augment existing protective measures.

Because these rules govern internal Commission procedures, the Commission should be able to modify them when experience proves that a new procedure is necessary or an old one impracticable. Moreover, changes in the rules may be necessitated by changes in the Commission's organization (for example, rules for years prior to 1977 still refer to Commission offices that no longer exist). A uniform set of rules simplifies administration within the Commission and eliminates a source of confusion to reporting companies and other persons outside the Commission. Accordingly, the Commission has determined to adopt, with the further changes described below, the rules proposed on August 27, 1980 (45 FR 57230), for all past, present, and future reporting years. Except for good cause in particular instances, the Commission will endeavor to maintain a uniform set of confidentiality rules for the LB program hereafter.

Included in this determination is a decision to disclose the identities of (but not any data reported by) companies that filed 1973 LB reports. The names of reporting companies for all other years are public, and no company has claimed that it has suffered any harm through such identification. Moreover, no company that filed a 1973 LB report has objected to this rules change, even though some of them had earlier objected to release of names under the Freedom of Information Act, 5 U.S.C.

552. The Commission concludes that disclosing the names of 1973 LB reporting companies will not cause them competitive injury or otherwise deprive them of significant protection promised to them under the LB rules and the FTC Act.

In many respects, this change in the rules simply makes officially available information that has been or may become public. The list of companies that received orders to file 1973 LB reports is public, and the identity of companies that did in fact file 1973 LB reports can largely be deduced from public records (*i.e.*, by subtracting from the total the companies that filed motions to quash orders to file 1973 LB reports and companies the Commission had sued in order to obtain compliance with those orders before the orders were later withdrawn). Also, there is a claim pending that the Commission should be ordered to disclose those names in a pending suit filed under the Freedom of Information Act, *Milliken & Co.* v. *FTC*, No. 79–1991 (D.D.C.). Because of the lack of harm to reporting companies and because of the desirability of having a uniform set of rules, the rules being adopted today will apply in every respect to 1973 LB report forms. However, because the Commission considers it inappropriate to disclose the names without advance notice, the identity of 1973 LB reporting companies will be treated as confidential LB Report information under ¶ 2 of the rules below, until January 27, 1981.

The Commission's previous notice describes how the proposed rules differ from the rules for the 1973–1976 reporting years (45 FR 57232–33). The following discusses how the final rules differ from those published in that notice, and responds to comments made on the proposed rules. Paragraphs in the rules have been numbered for convenient reference.

Definitions. One letter suggested that a reporting company should have access to any marginal notations written by Commission staff on its report form before such notations may be disclosed to persons other than designated officers and employees of the Commission. This is unnecessary because the rules require that before such disclosures may occur, there must be an appropriate certification that no LB report information is disclosed. This adequately protects the reporting company. Furthermore, these notations may not necessarily have any bearing on the particular company, and may include information to which the company is not entitled (*e.g.*, comments about an LB program employee's work, or privileged deliberative materials).

Paragraph 4. One comment objected to use of LB data in economic studies, arging that LB data could be used only for non-analytic "statistical" compilations. The comment also contended that economic studies containing *aggregated* data could not be used for law enforcement purposes. These objections lack merit. Paragraph 4 is not new; the Commission's confidentiality rules and public statements have consistently declared that LB data may be used in economic studies, and that aggregated data in those studies may be used in connection with the Commission's law enforcement responsibilities. See 39 FR 30970 (1974); 40 FR 21542 (1975); 41 FR 28041 (1976); 120 Cong. Rec. 24356, 37227 (1974); *Supporting Statement: FTC Form LB, 1974 Survey Version* (July 1, 1974), at 2–3, 5–6. Such uses are not prohibited by Section 4 of the FTC Improvements Act (which limits use of individual company LB data to "statistical" purposes) because "statistics" may include analysis of data, and because Section 4 does not limit the uses to which aggregates may be put. Moreover, the same limitation existed in each of the past appropriations riders, yet Congress has never indicated that the use of LB data to conduct economic studies or use of aggregates in enforcement proceedings would contravene either those riders or Section 4.

Paragraph 5. In this and subsequent paragraphs, references to the "Division of Financial Statistics" and to its "Assistant Director" have been changed to the "Line of Business" or "LB" "Program" and to its "Program Manager." This change reflects the restructuring of the Division of Financial Statistics and of the position of Assistant Director for that Division. The LB program and the Quarterly Financial Reports ("QFR") program, which had both been operated within the Division, will be operated as two separate units, each under the direction of its own Program Manager.

This reorganization is intended to simplify administration of the Bureau of Economics. The Division of Financial Statistics has recently had little organizational rule apart from housing the LB and QFR programs, each of which has a separate management, purpose, and location from the other. By dissolving the Division into its two separate components, one level of administration will be removed.

The LB Program Manager will report to the Director of the Bureau of Economics. However, the Director may not have access to individual company LB data; thus, the change in organizational titles does not affect the prohibitions on access to and use of individual company LB data by the Director. When they were part of the Division of Financial Statistics, members of the QFR staff were "designated" for purpose of Section 4 to have access to individual company LB data. Like the LB program, the QFR program has no law enforcement role, and operates under strict confidentiality procedures (see notice published today and 38 FR 18720, 26162 (1973)). Because staff members' access will continue after the reorganization, it is necessary now expressly to designate staff members of the QFR program as employees authorized to have access to individual company LB data.

Several commenters objected to the provision making "special employees" of the LB program "designated officers and employees" for purposes of access to LB report information, asserting that special employees do not qualify for access under Section 4 of the FTC Improvements Act. As the Commission has already noted, the reference to special employees simply made explicit its existing practice, which had been in effect before the Improvements Act (see 45 FR 57232). While they are assigned to the LB program, special employees are subject to the same restrictions on use and disclosure of data and are subject to the same statutory penalties for unauthorized disclosure as are full-time employees of the LB program. Accordingly, there is no valid legal basis for distinguishing between full-time and special employees.

Significantly, the Bureau of the Census—which operates under a confidentiality statute almost identical to that of the Commission (13 U.S.C. 9)—hires special employees and gives them access to confidential data reported to the Census Bureau. Although a recent statutory amendment specifically authorizes such access (13 U.S.C. 23(c)), the legislative history of this amendment states that it was intended to make clear that the Census Bureau's existing practice of using special employees was lawful. See S. Rep. No. 94–1256, 94th Cong., 2d Sess. 7 (1976) reprinted at (1976) *U.S. Code Cong. & Ad. News* 5463, 5469; H. Conf. Rep. No. 94–1719, 94th Cong., 2d Sess. 14 (1976), reprinted at (1976) *U.S. Code Cong. & Ad. News* 5482. Thus, explicit statutory authority is not necessary in order for special employees to qualify as "employees" for purposes of Section 4. See also H.R. Rep. No. 96–872, 96th Cong., 2d Sess. 3, 8 (1980), reprinted at (1980) *U.S. Code Cong. & Ad. News* 2744, 2750, which shows that Congress and the Justice Department regard a statute limiting access to

investigative documents to "duly authorized officials and employees" of the Justice Department (15 U.S.C. 1313) as unquestionably authorizing special employees of the Justice Department to have access to such documents.

Paragraphs 5, 12. Specified persons in the Commission's Office of the Secretary are designated to have access to some LB report information to the extent necessary for official recordkeeping purposes within the Commission. The need for such a provision became clear during the Commission's consideration of requests by some companies that their LB report information not be included in published aggregates. In evaluating these requests, limited information regarding the companies' LB data, as well as information on LB disclosure avoidance procedures, necessarily was included in memoranda to the Commission. Because the current rules did not permit members of the Secretary's Office to have access to LB information, these memoranda could not be stored with other official Commission memoranda, nor could members of the Secretary's Office be present to transcribe minutes of any Commission meetings in which LB data might be discussed. This change corrects that situation. It is contemplated that the example above represents one of the very few situations where such access will be necessary; and where necessary, only limited amounts of LB report information will be involved. The Secretary's office has no enforcement duties, and will be subject to the confidentiality strictures described in the rules. The Office is accustomed to handling and maintaining the confidentiality of sensitive, nonpublic information, and this limited access should not adversely affect the confidentiality of reporting companies' data.

Paragraphs 8, 13. Some commenters suggested that persons with access to LB data should be forever barred from participating in regulatory activities afterwards. Such automatic disqualification—which takes no account of the amount of information examined or remembered, nor of its relevance to particular proceedings—is overly broad. In the event that persons who have seen a reporting company's LB data are involved in a law enforcement proceeding relating to that company, the appropriate procedure is case-by-case consideration of whether disqualification or recusal of such persons is necessary, or whether other measures would suffice to ensure compliance with Section 4. The rules already require that, on termination of their LB assignment, officers and employees must certify that they have not retained any individual company LB data. As an added reminder, the rules will also require them to certify that they understand that LB data ordinarily may not be used or disclosed outside the LB program.

Paragraph 11. On December 16, 1980, the Commission adopted an interim procedure for 1973–1976 LB reporting years, which gives the General Counsel's Office and Commissioners and their assistants access to LB reports for purposes of litigation involving the LB program and for administration of the confidentiality rules and procedures (45 FR 82718). For the reasons stated in that notice, the Commission adopts this as a permanent provision for all reporting years. (This is a change from the procedures proposed in August 1980 in that those procedures did not give the Commissioners and their assistants access for these purposes.)

Some comments objected on grounds that access by the General Counsel and Commissioners would be used for law enforcement purposes. Section 4 forbids such use, and there is no basis for assuming that these officers and employees will disregard their statutory obligations. Moreover, it must be stressed that the occasions for which access is permitted, and the amount of LB report information that might be disclosed, are strictly limited; the procedure does not contemplate that these persons will have wholesale access to LB data.

15(e). A few comments objected to this exception to the Commission's confidentiality procedures, arguing that it could permit the Commission to subpoena a copy of an LB report that a company has retained in its files. This provision does not reflect a change from rules for past years. Rather, it simply repeats in the "limitations" section language that has appeared elsewhere in the rules and procedures. See 40 FR 21542 (1975); 41 FR 28041 (1976). Furthermore, Congress has been aware that the Commission might, for law enforcement purposes, obtain directly from a reporting company financial information classified by product line, and Congress apparently did not consider that to be inconsistent with the restrictions it imposed on LB reports. See 120 Cong. Rec. 37225, 37227 (1974). This exception is consistent with Section 4 of the Improvements Act, which states that "information for carrying out specific law enforcement responsibilities of the Commission shall be obtained under practices and procedures in effect on the date of the enactment of the Federal Trade Commission Improvements Act of 1980, or as changed by law." It is not presently the Commission's policy to authorize its staff to use compulsory process to obtain a company's retained file copy of an LB report, as distinguished from authorizing compulsory process to obtain financial information classified by industry category. Cf. *Appeal of FTC Line of Business Report Litigation;* 595 F. 2d 685, 697–701 (D.C. Cir.), *cert. denied,* 439 U.S. 958 (1978).

Lastly, some comments have suggested that the Commission defer collecting LB data for 1977 until various events have occurred, such as the holding of hearings, issuance of reports from the General Accounting Office, and the like. These comments are irrelevant to the confidentiality rules and procedures. To the extent that they are appropriate at all, they should have been raised in a timely motion to quash orders to file the 1977 LB reports. In any event, the Commission has given careful consideration to the value of the LB program and will continue to do so as the products of research using LB data become available.

FEDERAL TRADE COMMISSION

Line of Business Reporting Program

Confidentiality Procedures for the 1973–1977 and Future Reporting Years

Notice is hereby given that the Federal Trade Commission has approved and adopted certain procedures prescribing the confidential handling and use of reports filed by companies pursuant to an Order to File Special Report under the Line of Business ("LB") Program. The rules and procedures shall apply to reports previously filed for the 1973, 1974, 1975, 1976, and 1977 reporting years, and to reports that may be filed for future years. The Commission intends, to the extent feasible, to maintain a uniform set of confidentiality rules and procedures for all LB reporting years.

Definitions

For purposes of these procedures, the following definitions apply:

"LB Report" means a report filed by a company pursuant to an Order to File Special Report under the LB Program. For the purposes of these rules, it also includes identifiable individual company data contained in or taken from an LB Report form. It does not include information written on a report form if that information was not obtained from a Reporting Company and

does not disclose nonpublic information about a Reporting Company.

Confidentiality of LB Reports with Respect to Persons Outside the Commission

(1) These rules and procedures are authorized by the undesignated final paragraph of Section 6 of the Federal Trade Commission Act, as amended by Pub. L. No. 96–252, 94 Stat. 374, 375 (1980), 15 U.S.C.A. 46 (Sept. 1980 Supp.). That paragraph states:

> No officer or employee of the Commission or any Commissioner may publish or disclose information to the public, or to any Federal agency, whereby any line-of-business data furnished by a particular establishment or individual can be identified. No one other than designated sworn officers and employees of the Commission may examine the line-of-business reports from individual firms, and information provided in the line-of-business program administered by the Commission shall be used only for statistical purposes. Information for carrying out specific law enforcement responsibilities of the Commission shall be obtained under practices and procedures in effect on the date of the enactment of the Federal Trade Commission Improvements Act of 1980, or as changed by law.

(2) Under these rules and procedures, the Commission will not disclose LB Reports to any person outside the Commission, including Congress, parties in court proceedings, governmental agencies, and members of the public, except pursuant to a superseding act of Congress; or pursuant to an order of a court, but only after all avenues for judicial relief have been exhausted. In the event that the Commission receives a subpoena for an LB Report, it will promptly notify the Reporting Company.

(3) Under Section 10 of the Federal Trade Commission Act, 15 U.S.C. 50, any officer or employee of the Commission who shall make public any information obtained by the Commission, without its authority, unless directed by a court, shall be deemed guilty of a misdemeanor. Upon conviction, the employee may be punished by a fine not exceeding five thousand dollars ($5,000) or by imprisonment not exceeding one year, or by fine and imprisonment, in the discretion of the court. The Commission considers unauthorized disclosures of LB Reports to be punishable under 18 U.S.C. 1905. The Commission also considers the stealing, conversion, or unauthorized conveyance of LB Reports to be punishable under 18 U.S.C. 641.

Confidentiality of LB Reports Within the Commission

(4) Access to and use of LB Reports within the Commission shall be restricted, and persons authorized to have access to and use of LB Reports shall not release any LB Report, or in any way provide access to them, to anyone not authorized to have access. LB Reports may be used for aggregated statistical and other economic reports authorized by the Commission. The latter reports may be utilized in connection with any Commission investigation or proceeding for carrying out specific law enforcement responsibilities of the Commission. However, they shall not be compiled in such a way that LB data furnished by a particular Reporting Company can be identified. LB Reports shall not be made available to any person within the Commission for use in connection with any Commission investigation or proceeding for carrying out specific law enforcement responsibilities of the Commission. However, this restriction shall not limit the authority of the Commission to require by subpoena or other compulsory process the production of any information or data from any source outside the Commission for use in connection with an investigation or proceeding for carrying out specific law enforcement responsibilities of the Commission.

(5) Access to and use of LB Reports within the Commission shall be restricted to the following offices and divisions: (a) the Line of Business Program, Bureau of Economics; (b) the Quarterly Financial Reports Program, Bureau of Economics, whose staff members will be considered LB Program employees for purposes of these rules in connection with their access to LB Reports; (c) the Data Processing and Information Systems Division of the Office of the Executive Director, under the conditions described below. Sworn officers and employees of these units (including special employees of the LB Program) are designated to have access for purposes of Section 6 of the FTC Act. Additionally, the General Counsel and his or her staff, Commissioners and their assistants, and the Secretary of the Commission and his or her staff may have access to LB Reports under the conditions described below. The Commission members, officers, and employees described above also are designated officers and employees for purposes of Section 6 of the FTC Act.

(6) The LB Program plans, develops and prepares for public dissemination statistical and economic reports, such as the Annual Line of Business Report and staff working papers. The Program's employees shall have access to and use of LB Reports for planning, developing and preparing such statistical and economic reports. Procedures sufficient to assure that LB data furnished by a particular Reporting Company cannot be identified shall be developed and implemented by the LB Program in connection with each statistical or other economic report to be disseminated which is derived from LB data.

(7) With respect to each such report, the Program Manager of the LB Program shall certify to the Director, Bureau of Economics, that he or she has reviewed and approved the procedures applied thereto. Also, if marginal notations that are not defined as "LB Reports" are to be disclosed to persons other than sworn designated officers and employees of the Commission, the Program Manager shall first certify that no LB Report information is disclosed.

(8) Employees of the LB Program shall not participate in any Commission investigation or proceeding for carrying out specific law enforcement responsibilities of the Commission. Any employee who transfers into or out of the Division shall be formally notified in writing that he or she is subject to these rules, to Section 10 of the FTC Act, and to 18 U.S.C. 641 and 1905. No employee (including a special employee) shall be assigned to or remain in this Program unless he or she certifies that, during such assignment and after its termination for any reason, he or she will abide by the limitations in these rules and amendments to them; will not use or disclose LB Reports except in conformity with these rules; and that after any such assignment's termination he or she will not retain possession of any documents or materials which contain data furnished by a Reporting Company that have not been or may not be disclosed pursuant to these rules. Upon leaving the Program each employee shall certify that he or she does not possess any such documents or materials, and understands that LB Report information may not be used or disclosed outside the LB Program, except as authorized by these rules.

(9) The Director of the Bureau of Economics shall not have access to LB Reports. He or she shall, however, have supervisory responsibility and authority with respect to the LB Program. Such responsibility and authority shall include approving any reports prepared by the Program, making recommendations with respect to the preparation of such reports, and excercising any other supervisory control not requiring access to individual LB Reports.

(10) The Data Processing and Information Systems Division may have access to LB Reports, but only during and for the purpose of electronic processing of information and data

contained in LB Reports. The Division may employ the services of an outside computer facility for purposes of computer processing of LB data, subject to the restriction that no one other than designated sworn employees of the Federal Trade Commission may examine the LB Reports from individual Reporting Companies. Any such outside computer facility shall sign an agreement assuring that the facility and its employees abide by this restriction and other applicable restrictions in these rules and the FTC Act.

(11) Upon notification to the General Counsel by the LB Program Manager that a Reporting Company has failed adequately to comply with an order to File Special Report under the LB Program, the General Counsel and his or her staff and the Commissioners and their assistants may have access to parts of that company's LB Report which are required to evaluate the noncompliance and to advise and represent the Commission with respect to, and to make decisions concerning, any proceeding initiated because of a refusal or failure of the reporting company to file an adequate LB Report. Also, the General Counsel and his or her staff and the Commissioners and their assistants may have access to LB Reports in connection with matters directly related to pending or anticipated litigation concerning the LB Program, and to administration of these rules and procedures. Such access shall not be inconsistent with these confidentiality rules and procedures or with Section 6 of the FTC Act.

(12) For official recordkeeping purposes, the following persons in the Office of the Secretary may have access to documents containing, or to Commission meetings discussing, nonpublic information derived from or relating to LB Reports: the Secretary, Deputy Secretary, Attorney-Advisor to the Secretary, Chief of the Records Division, and their assistants; and employees of the Minutes Branch of the Records Division. Their access will be limited to that required for official recordkeeping purposes related to the LB Program, including attendance at and transcription of Commission meetings, preparation of Commission minutes, and filing of Commission records. Documents which contain information from an LB Report shall be kept, when not in use, in a locked drawer, cabinet, or safe. However, memoranda, minutes, transcripts, and other such records from which LB Report information has first been deleted may be stored and used without being subject to restrictions applicable to LB Reports.

(13) Any Commission member, officer, or employee who has access to an LB Report shall first be required to certify that, during the assignment and after its termination for any reason, he or she will abide by the limitations in these rules and amendments to them; will not use or disclose LB Reports except in conformity with these rules; and that after termination of the assignment requiring access to LB Reports, he or she will not retain possession of any documents or materials that contain data furnished by a Reporting Company that have not been or may not be disclosed pursuant to these rules. At the end of the assignment the employee shall then certify that he or she does not possess any such documents or materials, and understands that LB Report information may not be used or disclosed outside the LB Program, except as authorized by these rules.

Security of LB Reports

(14) All Commission members, officers, and employees authorized to have access to and use of LB Reports shall, while in possession of any such material, be personally responsible for ensuring that unauthorized personnel do not obtain access to such material, and for observing the following procedures:

(a) All LB Reports and reproductions of LB data from individual Reporting Companies (such as tabulations, punch cards, tapes or printouts, etc.) shall be conspicuously marked "confidential" or marked with words conveying a similar meaning.

(b) The offices containing LB Reports and reproductions of LB data from individual Reporting Companies shall be locked except during periods of occupancy.

(c) All LB Reports and reproductions of LB data from individual Reporting Companies shall be stored in locked drawers, files, or cabinets except when being used.

(d) All LB Reports and reproductions of LB data from individual Reporting Companies shall be returned to the LB Program immediately after any authorized use of such material is no longer required, except for information in official Commission records, as described in ¶12.

Limitations

(15) The rules and procedures set forth above shall not apply to:

(a) Disclosure to a court of an LB Report of a Reporting Company in connection with a proceeding initiated because of a refusal or failure of that company to file an adequate LB Report; however, any such LB Report will either be filed in a manner which protects its confidentiality (such as filing under seal), or the Reporting Company will be given an opportunity to seek such protection from the court;

(b) The identity of a Reporting Company;

(c) Information furnished by a Reporting Company in a document other than an LB Report (*e.g.*, a motion to quash or other motion challenging an Order to File Special Report under the LB Program); such information shall be treated as confidential or publicly accessible pursuant to §§ 4.9, 4.10, and 4.11 of the Commission's procedures and rules of practice, depending on the nature of the document and the information it contains. Pursuant to § 4.10(e) of the Commission's rules, information in such documents should be marked or otherwise identified as confidential in order to receive confidential treatment.

(d) Information or data which are supplied to the Commission in response to a compulsory process order other than an Order to File Special Report under the LB Program, or which the Commission has obtained through means other than an Order to File Special Report under the LB Program. Such information shall be disclosed or treated as confidential in accordance with other laws, including Sections 6(f) and 21 of the FTC Act, as amended by 94 Stat. 374, 385–388, 15 U.S.C.A. 46(f), 57b–2.

(e) The authority of the Commission to require by subpoena or other compulsory process the production of any information or data from any source outside the Commission for use in connection with an investigation or proceeding for carrying out specific law enforcement responsibilities of the Commission.

By direction of the Commission, dated November 27, 1981.

Carol M. Thomas,

Secretary.

BILLING CODE 6750-01-M

Quarterly Financial Reports Program; Confidentiality Procedures

AGENCY: Federal Trade Commission.

ACTION: Technical modifications of confidentiality procedures for quarterly financial reports to reflect organizational changes.

SUMMARY: Confidentiality procedures for the Commission's Quarterly Financial Reports Program have been modified slightly to reflect organizational changes in the

Commission's Bureau of Economics and Office of the Executive Director.

ADDRESS: Although these provisions will be immediately effective, the Commission will receive comments and may take whatever action it deems appropriate in light of the comments.[1] Any comments should be addressed to the Secretary, Federal Trade Commission, 6th Street and Pennsylvania Avenue, NW., Washington, D.C. 20580. Comments will be entered on the public record in Room 130 at the above address during normal business hours.

FOR FURTHER INFORMATION ABOUT THESE PROCEDURES CONTACT: Joanne L. Levine, Office of the General Counsel, Federal Trade Commission, (202) 523–3800. For information about the Quarterly Financial Reports Program, contact Paul Zarrett, Program Manager, (202) 376–3152.

SUPPLEMENTARY INFORMATION: The modified confidentiality procedures for the Quarterly Financial Reports ("QFR") Program replace those published at 38 FR 18720, 26162 (1973). The modifications are not substantive in nature, and reflect the following changes in the Commission's organization:

1. Data processing for the QFR Program is now performed by the Data Processing and Information Systems Division in the Office of the Executive Director instead of by the Division of Management.

2. The Statistical Reports Unit of the Bureau of Economics has been abolished. The reports and studies using aggregated QFR data which had been prepared by that unit are now prepared by staff of the QFR Program.

3. The Division of Financial Statistics within the Bureau of Economics, and the position of Assistant Director of the Bureau of Financial Statistics, are being restructured. The QFR Program and Line of Business ("LB") Program, which both had been operated within the Division, will be operated as two separate units, each under the direction of its own Program Manager. The Program Manager will report directly to the Director of the Bureau of Economics, who shall not have access to individual company QFR data. Apart from substituting the "QFR Program" and its "Program Manager" for the "Division of Financial Statistics" and its "Assistant Director," respectively, there is no change in the strictures on access to and use of the individual company QFR data. It should be noted that staff members of the LB Program will continue to have access to QFR data for statistical purposes. When the LB Program was part of the Division of Financial Statistics, its staff had access to QFR data, and the change in organization is not intended to eliminate that access. Like the QFR Program, the LB Program has no law enforcement role, and operates under strict confidentiality procedures (see separate notice published today and 41 FR 28041 (1976)).

This reorganization is being undertaken to simplify administration of the Bureau of Economics. The Division of Financial Statistics recently has had little organizational role apart from housing the LB and QFR Programs, each of which has a separate management, purpose, and location from the other. By dissolving the Division into its two principal components, one level of administration has been removed.

The rules also specify that staff of the General Counsel's Office and the Commissioners and their assistants may have access to QFR data in connection with legal actions arising from failure of a reporting company to file an adequate, timely report. Although the QFR rules had previously provided that use in such proceedings was an exception to the confidentiality strictures, they had not explicitly identified who could have access under those circumstances. This clarification corrects that ommission.

Procedures for the Use of Confidential Individual Company Data Collected Under the FTC'S Quarterly Financial Reports Program

Data collected under the Quarterly Financial Reports Program are gathered for the purpose of preparing statistical compilations, consistent with the confidentiality strictures contained herein. Under no conditions, except as noted in the footnotes below, are the individual company reports to be inspected or otherwise used for "taxation, regulation or investigation" or in any Commission adjudication or in connection with any investigation for the purpose of initiating adjudicative proceedings.[2] While the Commission intends to utilize tabulations of Quarterly Financial Reports ("QFR") data in FTC merger statistical reports, the FTC series on aggregate concentrations, and such other statistical and economic reports as are authorized by the Commission, no individual company data contained in the individual QFR schedules will be revealed in these reports of aggregated data prepared by the FTC. However, these FTC aggregated reports may be utilized in connection with any Commission adjudication or any investigation for the purpose of initiating adjudicative proceedings.

The names of companies, financial data and all other information which are obtained from respondent companies in connection with the Federal Trade Commission's Quarterly Financial Reports Program are confidential, as pledged in the Commission's Resolution of June 23, 1973, requiring Quarterly Financial Statistics and Related Information from Corporations (published at 38 FR 18720 (1973)). Persons authorized to have access to this information may not release, discuss or in any way provide access to such information to anyone not authorized to have access. Further, all such QFR data are considered to be exempt from the disclosure provisions of the Freedom of Information Act. Penalties under Section 10 of the Federal Trade Commission Act provide for fines up to five thousand dollars ($5,000), or imprisonment not exceeding one year for unauthorized release of such information.

Authorized access and use. Access to and use of individual company data within the FTC is restricted to members of the Quarterly Financial Reports Program, which has no involvement in any investigative or regulatory functions of the Federal Trade Commission, and to members of the Line of Business Program.[3] For the purposes of these confidentiality rules and procedures, the latter will also be considered to be members of the QFR Program, and their access to individual company QFR data shall be governed by these rules. Access by members of the Data Processing and Information Systems Division within the Office of the Executive Director ("Data Processing Division") is authorized only during and for the purpose of electronic processing of such data. Access to these data by other government agencies may be granted by specific approval of the Commission, with the understanding that the same confidentiality strictures

[1] Because these confidentiality procedures are not substantive in nature, the 30-day waiting period specified in 5 U.S.C. 553(d) does not apply. See, *e.g.*, *Reynolds Metal Co.* v. *Rumsfeld*, 417 F. Supp. 365, 371–72 (E.D. Va. 1976), *aff'd in relevant part*, 564 F.2d 663, 667, 669–70 (4th Cir. 1977), *cert. denied*, 435 U.S. 995 (1978); *Shell Oil Co.* v. *Department of Energy*, 477 F. Supp. 413, 437 (D. Del. 1979), *aff'd*, 631 F.2d 231 (3d Cir. 1981), *cert. denied*, 101 S. Ct. 1730 (1981).

[2] Individual company submissions may be used in legal actions arising from the refusal of a respondent company to file a timely and acceptable QFR Form.

[3] Access to individual company submissions may also be granted to attorneys in the Office of the General Counsel, the Commissioners and their attorney advisors, and their respective support personnel, but only for the purposes described in n. 1.

apply with respect to the individual company data. Any agency which is granted access will be responsible for disclosure analysis consistent with these guidelines.

The Quarterly Financial Reports Program is a statistics-gathering unit which prepares for publication the aggregated Quarterly Financial Report, which presents selected balance sheet and income statement data aggregates for industrial corporations, classified by industry groups and by asset size classes. All mailing of reporting forms and correspondence relating to individual QFR companies (except for correspondence involving legal action for failure to submit reports) will be under the supervision of the Program Manager of the Quarterly Financial Reports Program. The Program is responsible for reviewing, editing and coding all individual company reports and for requesting such tabulations and listings of individual company data from the Data Processing Division as needed to prepare the Quarterly Financial Report. The QFR Program is responsible for the selection and maintenance of the QFR sample panel, in accordance with accepted scientific sampling methodology and federal statistical standards. It requests such other tabulations as may be needed to ensure the statistical reliability and consistency of the QFR published data series. It prepares preliminary estimates and such other special tabulations relating to QFR data as may be requested by the Department of Commerce and the Federal Reserve Board, or as may be directed by the Office of Management and Budget. The Program also is responsible for the preparation of FTC merger statistical reports, the annual FTC statistics on aggregate concentration, and other statistical and economic reports authorized by the Commission.

The QFR Program Manager is responsible for the development and implementation of disclosure analysis procedures applied to all QFR data. He or she shall certify to the Director of the Bureau of Economics that he or she has reviewed and approved all disclosure analysis procedures used in the QFR publication tables and all other tabulations involving QFR source data and that such procedures are adequate to protect against direct or residual disclosure that could result from such tabulations of QFR data.

The Director of the Bureau of Economics will not have access to the individual QFR schedules nor the derived data listings for individual companies utilized by the QFR Program. He or she shall, however, have supervisory responsibility and authority with respect to the QFR Program. Such responsibility and authority shall include approving any reports prepared by the Program, making recommendations with respect to the preparation of such reports, and exercising any other supervisory control not requiring access to the individual QFR data.

Because, except as noted above (nn. 1 & 2, *supra*), individual company data reported on the QFR schedule may not be used for, or in the course of, any law enforcement action or law enforcement investigation, persons not on the staff of the QFR Program, unless from another governmental agency under conditions described above, shall be denied access to individual company information in the QFR files or data records. Personnel from the QFR Program shall not engage in any activity of the Commission which involves regulation or investigation, nor prepare any reports utilizing QFR data for such purposes while assigned to that Program. Any employee who transfers into or out of the Program will be formally notified in writing that he or she is subject to section 10 of the Federal Trade Commission Act, the above-cited Commission Resolution, and these Rules, which prohibit disclosure, discussion, or release of these data to any unauthorized person.

Security of individual company QFR data. All individual company QFR schedules and data records at the Federal Trade Commission must at all times be under the security and supervision of the staff of the QFR Program except during electronic data processing, when the Director of the Data Processing Division shall be responsible for their security, and except when the Commission has approved their use by another government agency under conditions described above.

All rooms containing individual company QFR data will be locked except when occupied. The individual company data will be stored in secured drawers, files, etc., except when being used.

The Director of the Data Processing Division shall be responsible for the security of the original QFR schedules and all derived punched cards and computer records being processed. All punched cards, tapes, printouts, and containers for same, will be conspicuously marked "confidential." The Director of the Data Processing Division will be responsible for the security of data in his or her possession and will personally approve all storage locations and security procedures, subject to concurrence of the QFR Program Manager. He or she will not permit any special tabulations or listings of QFR data except those specifically approved by the Director of the Bureau of Economics, and for which disclosure analysis procedures have been reviewed and concurred in by the QFR Program Manager for consistency with existing QFR disclosure analysis procedures. Except for magnetic storage media used in processing, all cards, tapes, and printouts containing individual company QFR data will be sent to the QFR Program for secure storage, along with the original QFR schedules.

All persons having use or possession of individual company data will be personally responsible for securing the confidentiality of those data and for following the rules set forth above. Any violation of these rules, either through neglect or otherwise, will result in prosecution to the full extent of the law or any other legal action decided on by the Chairman of the Commission.

By direction of the Commission, dated November 27, 1981.

Carol M. Thomas,

Secretary.

BILLING CODE 6750-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Public Health Service

National Institute for Occupational Safety and Health; Oil and Gas Well Drilling; Request for Information

AGENCY: National Institute for Occupational Safety and Health (NIOSH), Centers for Disease Control, Public Health Service, HHS.

ACTION: Notice of request for information.

SUMMARY: NIOSH is requesting information concerning occupational safety hazard exposures and procedures for the protection of workers within establishments primarily engaged in drilling wells for oil and gas field operations for others on a contract, fee, or similar basis (SIC 1381). Also included are casing operations. Excluded are salvage and offshore drilling operations.

The information being requested will be used by NIOSH to develop comprehensive safety recommendations.

DATE: Comments concerning this notice should be submitted by February 26, 1981.

ADDRESS: Comments should be submitted in writing to Mr. Murray L. Cohen, Chief, Standards and Consultation Branch, Division of Safety Research, S–109, NIOSH, 944 Chestnut Ridge Rd., Morgantown, WV 26505.

FOR FURTHER INFORMATION CONTACT: Mr. Peter M. Bochnak, Criteria Manager, or Mr. Ted Pettit, Project Officer, Standards and Consultation Branch, Division of Safety Research, NIOSH, (304) 599–7574 or FTS 923–7574.

SUPPLEMENTARY INFORMATION: Under the Occupational Safety and Health Act of 1970 (29 U.S.C. 651, et seq.), NIOSH conducts research and experimental programs to develop recommendations for new and improved occupational safety procedures. NIOSH is currently collecting information and data pertaining to oil and gas well drilling. Interested persons are invited to submit information, suggestions, and comments they believe to be relevant to the development of comprehensive safety recommendations. At this time NIOSH is particularly interested in obtaining information in the following areas:

(1) What are the major safety and health problems in oil and gas well drilling? What statistical data has been collected on accident causal factors, including near-misses, related to the problems? Identify sources and availability of data.

(2) Are there case studies and investigation reports available on accidents, injuries, and near-misses? Appropriate copies without personal identifiers would be useful.

(3) What employee work tasks account for the majority of the accidents, injuries, and near-misses? What are considered to be the most hazardous work tasks?

(4) What procedures have been developed as countermeasures to these problems and have proved to be effective? Please describe in full detail.

(5) What has been accomplished, or is being planned, in equipment design and engineering controls to alleviate these problems?

(6) What training and motivation methods have been developed to increase employee awareness of the problems and appropriate countermeasures?

(7) Information addressing the following safety program management questions would be most useful: (a) Is there a documented safety policy? (b) Who is responsible for implementing the safety program? (c) What are the various elements of the safety program? (d) How is the safety program evaluated? (e) How are safety problems identified? (f) Who is responsible for correcting safety problems? (g) Are there successful program elements, i.e., safety problem identified, program element developed and implemented, and the results?

(8) What other safety and health research projects are being conducted in these areas? Identify sponsoring and/or conducting organizations.

(9) Of all the present applicable standards (consensus, regulatory, etc.), which ones are the most difficult to understand and implement? Be specific by identifying the standard and source. Briefly describe the problems involved.

(10) What is the estimated total worker population for well drilling (drilling activity only)?

(11) What information is available on the number of blowout and hydrogen sulfide incidents that are occurring and the associated injury and death statistics?

All information received in response to this notice, except that designated as trade secret and protected by section 15 of the Occupational Safety and Health Act, will be available for public examination and copying at the above address.

Dated: December 18, 1981.

J. Donald Millar, M.D.,

Director, National Institute for Occupational Safety and Health.

BILLING CODE 4110–19–M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

Arizona; Safford District Grazing Advisory Board; Meeting

Notice is hereby given in accordance with Pub. L. 92–463 that a meeting of the Safford District Grazing Advisory Board will be held on Friday, January 29, 1982.

The meeting will begin at 9:00 a.m. in the conference room of the Bureau of Land Management, 425 East 4th Street, Safford, Arizona 85546–2092.

The Agenda for the Meeting will include:

1. Election of chariman and vice-chairman;
2. Proposed rulemaking amending the existing grazing regulations;
3. Supplemental and maintenance feeding policy in Arizona;
4. Business from the floor.

The meeting will be open to the public. Interested persons may make oral statements to the Board between 9:30 a.m. and 10:30 a.m. A written copy of the oral statement must be provided at the conclusion of the presentation. Written statements may also be filed for the Board's consideration. Anyone wishing to make an oral statement must notify the District Manager, Bureau of Land Management, 425 E. 4th Street, Safford, Arizona 85546–2029, by 4:15 p.m., January 28, 1982.

At the conclusion of that session, the board members will depart via BLM-provided vehicles for the Bryce allotment #4608 for an inspection of resource conditions. Members of the public may accompany the tour but must provide their own transportation. It is expected the board members will return to the Safford District Office at approximately 4:00 p.m.

Summary minutes of the board meeting will be maintained in the District Office and be available for public inspection and reproduction (during regular business hours) within thirty (30) days following the meeting.

Dated: December 18, 1981.

Lester K. Rosenkrance,

District Manager.

BILLING CODE 4310–84–M

[UT–910–43100–84]

Utah; Uinta-Southwestern Utah Regional Coal Team Meeting

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: Pursuant to Federal Coal Management regulations (43 CFR Part 3400) the Regional Coal Team (RTC) for the Uinta-Southwestern Utah Region will meet at 9:00 a.m. on January 26, 1982. This is the initial meeting of the RCT concerning the second round of leasing in the Uinta-Southwestern Utah Coal Region. The team will meet to consider organization for the second round, review expressions of leasing interest, preliminary feasible leasing target and procedures for delineating coal tracts. Written comments on the above subjects or other items of interest are invited. Comments should be submitted to the Regional Coal Team Chairman at the address listed below. Comments must be received by January 22, 1982.

DATE: The Regional Coal Team meeting will meet January 26, 1982 at 9:00 a.m.

ADDRESS: The meeting will be held in the Salt Palace, Room 220, 100 South West Temple, Salt Lake City, Utah.

FOR FURTHER INFORMATION CONTACT: Edward F. Spang, Regional Coal Team Chairman, Federal Building, P.O. Box 12000, 300 Booth Street, Reno, Nevada 89520.

Dated: December 18, 1981.

Roland G. Robinson, Jr.,

State Director.

BILLING CODE 4310-84-M

Arizona; Conveyance of Public Land

Notice is hereby given that pursuant to section 203 of the Act of October 21, 1976 (90 Stat. 2743; 43 U.S.C. 1713), the State of Arizona, Division of Emergency Services, has purchased by noncompetitive sale public land in Mariocopa County, Arizona, described as:

Gila and Salt River Meridian, Arizona,

T. 1 S., R. 2 W.,
Sec. 30, N½NE¼NE¼, NE¼NW¼NE¼,
Containing 30 acres.

The purpose of this notice is to inform the public and interested State and local government officials of the issuance of the patent to the above-named entity.

December 17, 1981.

Mario L. Lopez,

Chief, Branch of Lands and Minerals Operations.

BILLING CODE 4310-84-M

Off-Road Vehicle Designation Decision

Decision: Notice is hereby given relating to the use of off-road vehicles on public land in accordance with the authority and requirements of Executive Orders 11644 and 11989, and regulations contained in 43 CFR Part 8340. The following described lands under the administration of the Bureau of Land Management are designated as open, limited, or closed to off-road motorized vehicle use pursuant to the provisions of 43 CFR 8342.1.

This decision affects approximately 3,351,740 acres of public lands in the Lakeview District, Bureau of Land Management in Klamath, Lake and Harney Counties, Oregon. These designations are a result of land use decisions made in the 1980 Lakeview District Management Framework Plans for the Lost River, Warner Lakes and High Desert Resource Areas, and the off road vehicle implementation plans and environmental assessments dated December 1981 for the three respective Resource Areas. Comments received from a public meeting, meetings with ORV user groups, and written responses influenced the designation decisions. This designation order supercedes off-road vehicle designations made prior to the issuance of the 1981 Warner Lakes, Lost River and High Desert ORV Implementation Plans and Environmental Assessments. These designations are published as final effective today. Under 43 CFR 4.21 an appeal may be filed within 30 days with the Interior Board of Land Appeals.

A. Open Designation—Areas which are designated as open comprise approximately 3,254,520 acres.

B. Limited Designation—Areas which are designated as limited comprise approximately 86,445 acres. This designation affords protection for resource values where access on existing routes is non-impairing or when resource damage potential exists only at certain times or under certain conditions.

The following identifies the type of restriction on motorized vehicle travel, the specific area/areas where the restriction occurs, the affected acreage, and a brief rationale for each affected area.

1. Travel limited to existing roads and trails.

a. Lost Forest Research Natural Area (8,960 acres)—to protect natural values.

b. Picture Rock Pass (approximately 300 acres)—to protect archeological values.

c. Lake Abert Archeologic Zone (12,000 acres)—to protect archeological values.

d. Alkali Lake Sand Dunes (6,500 acres)—to protect natural values.

2. Temporary Closure.

a. Buck Creek (approximately 200 yards of spur road)—to protect resource values until road can be re-engineered and constructed.

3. Seasonal Closures.

a. Ft. Rock/Silver Lake Deer Winter Range (34,000 acres)—closed from Dec. 1 through March 31 to protect wintering deer.

b. Klamath Deer Winter Range (7,985 acres)—closed from Nov. 1 through April 15, to protect wintering deer.

c. Cox Creek Wildlife Closure (3,000 acres)—closed during hunting season to prevent harassment of deer by vehicles.

C. Closed Designation—Areas closed to vehicles total 10,775 acres. This designation prohibits vehicle use except for emergency or certain administrative purposes and affords full protection to the resource from vehicle related damage.

Closed areas are:

a. Black Hills (1,740 acres)—to protect resource values, threatened plant species.

b. Fossil Lake (6,560 acres)—to protect resource values (fossils).

c. Crane Mountain (1,080 acres)—to protect resource values, rare plants.

d. Lower Klamath Hills (1,385 acres)—to protect resource values, wildlife.

The Off-Road Vehicle Implementation Plans and Environmental Assessments describing more fully the need for the designations and their impact as well as detailed maps describing their locations are available from the office listed below.

Address: For further information about these designations, contact the following Bureau of Land Management Office: District Manager, Lakeview District Office, P.O. Box 151, Lakeview, Oregon 97630, (503) 947-2177.

Richard A. Gerity,

District Manager.

December 17, 1981.

BILLING CODE 4310-84-M

Prineville District Grazing Advisory Board; Meeting

Notice is hereby given in accordance with Pub. L. 92-463 that a meeting of the Prineville District Grazing Advisory Board will be held January 28, 1982.

The meeting will begin at 1:30 PM in the conference room of the Bureau of Land Management office at 185 East 4th Street, P.O. Box 550, Prineville, Oregon 97754.

The agenda will include: (1) Expanded role of District Grazing Advisory Board, (2) Discussion of proposed rangeland management policies, including assignment of project maintenance responsibilities and criteria for characterizing allotments.

The meeting is open to the public. Anyone wishing to make oral or written statements to the board is requested to do so through the office of the District Manager, at the above named address, at least two days prior to the meeting date.

Summary minutes of the board meeting will be maintained in the District Office and be made available for public inspection and reproduction (during regular business hours) within 30 days following the meeting.

December 17, 1981.

James L. Hancock,

Assistant District Manager.

[FR Doc. 81-36902 Filed 12-24-81; 8:45 am]

BILLING CODE 4310-84-M

Wyoming and Montana; Availability of Final Environmental Impact Statement

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, notice is hereby given that

the Bureau of Land Management (B&M), Department of the Interior, has prepared a final environmental impact statement (EIS) on 19 coal tracts located in Montana and Wyoming.

In addition, in accordance with 43 CFR 3420.6–2, BLM is issuing a call for submission to the BLM of written surface owner consents given by qualified surface owners that would permit mining of Federal coal on the identified tracts where the Federal coal is overlain by privately owned surface. Qualified surface owners also have the opportunity to submit written refusals to consent. The legal descriptions of all the tracts considered for regional lease sale in the final EIS are provided in Appendix A of this notice.

DATES: The dates for filing valid surface owner consent agreements, or evidence thereof, are contained in the Supplementary Information section of this notice.

FOR FURTHER INFORMATION CONTACT: Chuck Wilkie, Team Leader, Powder River Regional Cosl EIS, Casper, Wyoming at the address given below.

ADDRESSES: Single copies of the final EIS may be obtained from and are available for inspection at the following addresses:

Wyoming State Office, Bureau of Land Management, 2515 Warren Avenue, Cheyenne, Wyoming 82001
Casper District Office, Bureau of Land Management, 951 Rancho Road, Casper, Wyoming 82601
Montana State Office, Bureau of Land Management, 222 N. 32nd Street, Billings, Montana 59107
Miles City District Office, Bureau of Land Management, West of Miles City, P.O. Box 940, Miles City, Montana 59301
Office of Public Affairs, Bureau of Land Management, 18th and C Streets NW., Washington, D.C. 20240

SUPPLEMENTARY INFORMATION: The final EIS analyzes the cumulative regional environmental impacts of four leasing level alternatives including the no action alternative, leasing fourteen tracts at the 1.5 billion ton level with the Spring Draw tract included, leasing at the 1.5 billion ton level with the Kintz Creek and Keeline tracts included, and leasing at the maximum level of 2.6 billion tons with the development of all 19 tracts.

In accordance with 43 CFR 3420.6–2 and 3427 of the coal management regulations, the BLM is also requesting that written surface consent agreements, or evidence thereof, given by qualified surface owners for lands within the region be submitted to the appropriate BLM State Office at the addresses given above. Valid written consents for lands in which the ownership of the surface is held by qualified surface owners and the ownership of the underlying coal is reserved to the Federal Government will be accepted until 30 working days prior to the publication of each lease sale notice for the specific lands involved in accordance with the announced schedule of regional lease sales established by Secretarial decision. It is the responsibility of parties intending to file consents to be aware of pending lease sale notice dates, as set forth in an announced regional lease sale schedule.

Section 714(c) of the Surface Mining Control and Reclamation Act (SMCRA) states that, "The Secretary shall not enter into any lease of Federal coal deposits until the surface owner has given written consent to enter and commence surface mining operations and the Secretary has obtained evidence of such consent."

As defined in the regulations (43 CFR 3400.0–5(pp)), qualified surface owner "means the natural person or persons (or corporation, the majority stock of which is held by a person or persons) who:

(1) Hold legal or equitable title to the surface of split estate lands;

(2) Have their principal place of residence on the land, or personally conduct farming or ranching operations upon a farm or ranch unit to be affected by surface mining operations; or receive directly a significant portion of their income, if any, from such farming and ranching operations; and

(3) Have met the conditions of paragraphs (1) and (2) of this subsection for a period of at least 3 years, except for persons who gave written consent less than 3 years after they met the requirements of both paragraphs (1) and (2) of this section. In computing the three year period the authorized officer shall include periods during which title was owned by a relative of such person by blood or marriage if, during such periods, the relative would have met the requirements of this amendment."

Valid written consent is defined in the regulations (43 CFR 3400.0–5(zz)) as "the document or documents that a qualified surface owner has signed that: (1) Permit a coal operator to enter and commence surface mining of coal; (2) described any financial or other consideration given or promised in return for the permission, including in-kind considerations; (3) describe any consideration given in terms of type or method of operation or reclamation for the area; (4) contain any supplemental or related contracts between the surface owner and any other person who is a party to the permission; and (5) contain a full and accurate description of the area covered by the permission."

As required by 43 CFR 3427.2(e), it is the Bureau's responsibility to review all consents received. The Bureau will verify that the named surface owner is a qualified surface owner as defined in the regulations and that the title for split estate lands described in the filing is held by the named qualified surface owner(s). In addition, to be considered valid, consents entered into after the August 4, 1977, enactment of the Surface Mining Control and Reclamation Act must be transferable to whomever makes the successful bid in a lease sale for the tract that includes the lands to which the consent applies. A written consent shall be considered transferable only if, at a minimum, it allows that after the lease sale for the tract to which the consent applies (i) payment for the consent may be made by the successful bidder or (ii) the successful bidder may reimburse, at the purchase price of the consent, the party that first obtained the consent. If a filing is from anyone other than the named qualified surface owner, the Bureau shall contact the named qualified surface owner, and request confirmation, in writing, that the filed, transferable, written consent, or evidence thereof, to enter and commence surface mining has been granted and that the filing fully discloses all of the items of the written consent.

To facilitate the filing and review of written consents from qualified surface owners, the person submitting the consent is asked to include a statement that the evidence submitted represents a true, accurate, and complete statement of information regarding the consent for the area described. Such a validation statement is required by 43 CFR 3427.3. The statement is to be signed and dated by the person submitting the consent and can be either incorporated directly into the consent document or enclosed as a separate item submitted with the consent document. The statement can be worded as follows: "I (We) hereby declare that the evidence submitted, to the best of my (our) knowlege, represents a true, accurate, and complete statement of information regarding the surface owner consent for the area described." This validation statement does not have to be witnessed or notarized.

A qualified surface owner(s) that has not been contacted by, or requested to enter into any agreement with, a private party and who may wish to give consent to allow permission to enter and commence surface coal mining may prepare, sign, and submit a consent document to the BLM Wyoming or Montana State Offices, as appropriate. The consent document should include the inforamtion and requirements specified earlier in this notice in order to

constitute a valid written consent as defined in the coal regulations (43 CFR 3400.0–5(zz)) and must indicate any specific terms the surface owner may request to allow permission to enter and commence surface coal mining. This unilateral consent document must be signed by a private party at least 30 working days prior to the publication of the lease sale notice for the area affected, or the area affected will not be offered for lease sale.

In accordance with 43 CFR 3427.2(a)(2), written statements from qualified surface owners who refuse to consent to coal leasing may be filed with the Wyoming and Montana State Offices, as appropriate, at the addresses given above. Early submission of a refusal to consent, thereby disqualifying the specified lands from further leasing consideration, will deter pressure from persons or parties seeking to enter into a consent agreement and will prevent continued inquiries by the BLM of the status of surface owner consent for the specified lands.

A Secretarial decision for leasing in the Powder River Region is expected in February 1982, after filing of the final EIS. As part of that decision, the Secretary may choose to hold a series of lease sales beginning in April 1982.

Dated: December 11, 1981.

Robert L. Burford,

Director, Bureau of Land Management.

Approved:

Garey E. Cassuthers,

Assistant Secretary of the Interior.

Appendix A—Legal Description of Federal Coal Tracts

Tracts Included in Preferred Alternative:

Maintenance Tracts

Legal Description of Federal Coal in Colstrip A & B Tracts:
T. 1 N., R. 41 E., P.M. Montana,
Sec. 6, lots 1, 2, 3, 4, S½NE¼, N½SE¼NW¼;
Sec. 8, SE¼;
Sec. 10, S½SW¼, SW¼SE¼;
Sec. 18, lots 2, 3, SE¼NW¼, NE¼SW¼, SE¼.
T. 2 N., R. 41 E., P.M. Montana,
Sec. 30, NE¼SE¼, S½SE¼;
Sec. 32, all.

Legal Description of Federal Coal in Colstrip C Tract:
T. 1 N., R. 40 E., P.M. Montana,
Sec. 4, lots 1, 2, S½N½, S½;
Sec. 10, NW¼, NW¼SW¼;
Sec. 12, lot 3, NW¼SE¼;
Sec. 14, N½SW¼.

Legal Description of Federal Coal in Colstrip D Tract:
T. 2 N., R. 41 E., P.M. Montana,
Sec. 14, S½S½, NE¼SE¼;
Sec. 22, E½;
Sec. 24, all;
Sec. 26, N½, SE¼, NE¼SE¼, S½SE¼.
T. 2 N., R. 42 E., P.M. Montana,
Sec. 30, lots 1, 2, 3, NE¼, E½NW¼, NE¼SW¼, N½SE¼.

Legal Description of Federal Coal in Fortin Draw Tract:
T. 50 N., R. 71 W., 6th P.M., Wyoming,
Sec. 34, SW¼, S½N½.

Legal Description of Federal Coal in Little Rawhide Creek Tract:
T. 51 N., R. 72 W., 6th P.M., Wyoming,
Sec. 20, All of that part of the SE¼SE¼ lying east of a line 600 feet east of and parallel to the eastern right-of-way boundary of U.S. Highways 14 and 16.
Sec. 28, All of that part of the SW¼ lying east of a line 600 feet east of and parallel to the eastern right-of-way boundary of U.S. Highways 14 and 16.
All of the part of the NW¼ lying east of a line 600 feet east of and parallel to the eastern right-of-way boundary of U.S. Highways 14 and 16 SE¼.
Sec. 29, All of the part of the E½NE¼ lying east of a line 600 feet east of and parallel to the eastern right-of-way boundary of U.S. Highways 14 and 16.

Legal Description of Federal Coal in North Decker Tract:
T. 8 S., R. 40 E., P.M. Montana,
Sec. 28, NW¼SW¼, S½S½;
Sec. 29, S½NW¼, N½SW¼, SE¼SW¼, SE¼;
Sec. 32, NE¼SW¼;
Sec. 34, W½W½NE¼, W½.
T. 9 S., R. 40 E., P.M. Montana,

Oregon; Termination of Classification for Multiple Use Management

Correction

In FR Doc. 81-35194, appearing on page 60276, in the issue of Wednesday, December 9, 1981, make the following change:

In paragraph "3." in the second column, change the second word now reading "minimal" to read "mineral".

BILLING CODE 1505-01-M

[INT FEIS-81-54]

La Sal Pipeline Co.; Shale Oil Pipeline; Availability of Final Environmental Impact Statement

AGENCY: Bureau of Land Management (BLM), Interior.

ACTION: Notice of Availability of the Final Environmental Impact Statement (FEIS).

SUMMARY: Pursuant to section 102(2)(c) of the National Environmental Policy Act of 1969, the BLM has prepared a FEIS on a proposed shale oil pipeline to be constructed and operated as a common carrier by La Sal Pipe Line Company.

SUPPLEMENTARY INFORMATION: The BLM has prepared a FEIS on a proposed common-carrier pipeline from the vicinity of Parachute, Colorado to Casper, Wyoming. The main trunkline would be sixteen inches in diameter. There would be a lateral pipeline from the trunkline to Rangely, Colorado. The purpose of the project would be to transport upgraded shale oil from the Piceance Basin to existing crude oil transportation facilities at Casper and Rangely. The FEIS addresses the comments on the draft EIS. Alternatives analyzed include alternate routes for the main trunkline at river crossings, alternate routes for the Rangely lateral line, and denial of the right-of-way.

FOR FURTHER INFORMATION CONTACT: James Dean, Colorado State Office, Bureau of Land Management, 1037 20th Street, Denver, Colorado 80202, (303) 837-6016.

Dated: December 18, 1981.

George C. Francis,

Bureau of Land Management, Colorado State Director.

BILLING CODE 4310-84-M

Oregon; Riley Grazing Management Plan; Intent To Prepare Environmental Impact Statement and Conduct Scoping Meeting

The Department of the Interior, Bureau of Land Management, Oregon State Office, will be preparing an Environmental Impact Statement (EIS) on the grazing management program on approximately 1,080,000 acres of public land in the Riley EIS Area of the Burns District in south-central Oregon. Decisionmaking will take place over a several-month period following completion of the final statement.

A public scoping meeting will be held at 7:30 p.m., January 19, 1981, at the Harney County Museum Clubroom, in Burns, Oregon, to identify the significant issues to be discussed in detail in the EIS. At this meeting public comments will also be sought to help develop the preferred land use alternative for the area and various alternatives that could realistically be addressed in the EIS. Possible methods of obtaining public comment on the draft EIS after it is published will be discussed.

The proposed grazing management program will be based on coordinated land use allocations for all resources developed through the Bureau's land use planning system. The objectives of the program are to enhance the vegetative resource, provide quality habitat for wildlife and wild horses, provide a continuous supply of livestock forage, reduce soil erosion and sedimentation damage, improve water quality, improve the recreation and visual resources, and protect archelogical and historical sites.

The EIS will discuss alternatives to the proposed grazing management program. A no action alternative will be included in the EIS. Other alternatives being considered for discussion include no livestock grazing and at least one higher and one lower level of livestock grazing than that in the proposal.

The EIS will identify the impacts that can be expected from implementation of either the proposed grazing management program or any of the alternatives discussed. The statement will be an analytical tool used in making final decisions for managing livestock grazing in the Lakeview EIS area.

Information on the time and place of the public meetings may be obtained from:

Josh Warburton, District Manager, Bureau of Land Management, 74 S. Alvord St., Burns, Oregon 97720, Telephone (503) 573-2071
Gerry Fullerton, Statement Leader, Bureau of Land Management (922), P.O. Box 2965, Portland, Oregon 97208, Telephone (503) 231-6955

Dated: December 18, 1981.

Philip C. Hamilton,

Chief, Division of Planning and Environmental Coordination, Oregon State Office.

BILLING CODE 4310-84-M

[Bureau Order No. 601, Amdt. 14]

Oregon; Declaration of Annual Productive Capacity of Jackson and Klamath Master Units

SUMMARY: The annual productive capacity for the Jackson and Klamath Master Units Composed of Revested Oregon and California Railroad Grant Lands and the intermingled and adjacent public domain areas in Oregon, declared in Bureau Order No. 601, Amendment No 12, dated May 8, 1980 is amended as follows:

Jackson Master Unit—14,540,000 cubic feet (85,000,000 board feet, Scribner equivalent).

Klamath Master Unit—5,690,000 cubic feet (33,000,000 board feet, Scribner equivalent).

This change is a result of technical revisions in the allowable cut planning process as reported in Amendment No. 1 to the Jackson-Klamath Timber Management Plan Record of Decision, dated December 11, 1981.

The annual productive capacity represents the annual level of harvest which can be sustained in perpetuity without any planned decrease in the future. In addition to the annual

productive capacities, the timber management plan for the combined Jackson-Klamath Master Units specifies the annual harvest of approximately 860,000 cubic feet (5,000,000 board feet, Scribner equivalent) for the next 10 years as part of the cooperative Forestry Intensified Research (FIR) project to determine the number of years needed to re-establish commercial tree species on selected areas not included in the annual productive capacity land base.

The revised timber management plan is described in the Final Jackson-Klamath Timber Management Environmental Statement issued November 28, 1979. This Environmental Statement, together with the record of decision including Amendment No. 1, is available for inspection at the Medford District Office of the Bureau, located at 3040 Biddle Road, in Medford, Oregon, and at the Oregon State Office of the Bureau located at 729 NE Oregon St., Portland, Oregon.

This declaration became effective October 1, 1981.

FOR FURTHER INFORMATION CONTACT: Ronald Sadler, BLM, Oregon State Office, 729 NE Oregon St., Portland, Oregon 97232, 503–231–6851.

Dated: December 15, 1981.

BILLING CODE 4310–84–M

[Bureau Order No. 601, Amdt. 13]

Oregon; Declaration of Annual Productive Capacity of Josephine Master Unit

SUMMARY: The annual productive capacity of the Josephine Master Unit, composed of Revested Oregon and California Railroad Grant Lands and the intermingled and adjacent public domain areas in Oregon, declared in Bureau Order No. 601, Amendment No. 11, dated September 17, 1979, is amended as follows: the annual productive capacity is 18,500,000 cubic feet (95,000,000 board feet, Scribner equivalent).

This change is a result of technical revisions in the allowable cut planning process as reported in Amendment No. 1 to the Josephine Timber Management Plan Record of Decision dated December 11, 1981.

The annual productive capacity of 18,500,000 cubic feet represents the annual level of harvest which can be sustained in perpetuity without any planned decrease in the future. In addition to the annual productive capacity, the timber management plan specifies the annual harvest of approximately 1,800,000 cubic feet (9,000,000 board feet, Scribner equivalent) for the next 10 years as part of the cooperative Forestry Intensified Research (FIR) project to determine the number of years needed to re-establish commercial tree species on selected areas not included in the annual productive capacity land base.

The revised timber management plan is described in the Final Josephine Timber Management Plan Environmental Statement issued October 26, 1978. This Environmental Statement, together with the record of decision including Amendment No. 1, is available for inspection at the Medford District Office of the Bureau, located at 3040 Biddle Road, in Medford, Oregon, and at the Oregon State Office of the Bureau located at 729 NE Oregon St., Portland, Oregon.

This declaration became effective October 1, 1981.

BILLING CODE 4310–84–M

Geological Survey

Outer Continental Shelf Oil and Gas Operations; Personnel Safety and Protection in Hydrogen Sulfide-Prone Areas

AGENCY: Geological Survey, Interior.

ACTION: Notice to propose an amendment to section 5.2, *Personnel Safety and Protection,* of the Hydrogen Sulfide (H_2S) standard.

SUMMARY: The U.S. Geological Survey (USGS) proposes to amend certain requirements of section 5.2, *Personnel Safety and Protection,* of the USGS Outer Continental Shelf (OCS) Standard GSS–OCS–1, "Safety Requirements for Drilling Operations in a Hydrogen Sulfide Environment," First Edition, February 1976, concerning personnel safety and protection in H_2S-prone areas on the OCS.

Significant questions have been raised as to the necessity of the requirements that personnel undergo an eardrum examination before assignment to H_2S-prone areas and that personnel with perforated eardrums be prohibited from working in a H_2S environment. In addition, the USGS also has received data indicating that only pressure-demand-type respirators should be used in atmospheres immediately dangerous to life or health.

The proposed amendment will remove requirements that are unnecessary, expensive, and burdensome to implement and will require the use of pressure-demand-type respirators that will increase personnel safety. The amendment will result in considerable savings for the lessees.

DATES: Written comments and recommendations on the proposal to amend this standard must be received on or before February 26, 1982.

ADDRESSES: Comments to: David A. Schuenke, Chief, Branch of Offshore Rules and Procedures, U.S. Geological Survey, 640 National Center, Reston, Virginia 22092.

Conservation Manager, Gulf of Mexico OCS Region, U.S. Geological Survey, 3301 North Causeway Boulevard, Metairie, Louisiana 70002

Conservation Manager, Pacific OCS Region, U.S. Geological Survey, 1340 West Sixth Street, Los Angeles, California 900017

Deputy Chief, Conservation Division—Offshore Minerals Regulation, U.S. Geological Survey, 640 National Center, 12201 Sunrise Valley Drive, Room 6A113B, Reston, Virginia 22092

FOR FURTHER INFORMATION CONTACT: Lloyd M. Tracey, Branch of Offshore Rules and Procedures, Conservation Division, U.S. Geological Survey, 640 National Center, Reston, Virginia 22092, (703) 860–7395; FTS 928–7395.

SUPPLEMENTARY INFORMATION: Under Title 30 of the Code of Federal Regulations, §§ 250.10 and 250.11, and in accordance with the USGS Director's Delegation of Authority (45 FR 16570, March 14, 1980), the Deputy Chief, Conservation Division, Offshore Minerals Regulation, proposes to amend section 5.2 of USGS Standard GSS–OCS–1. This standard is incorporated by reference as a requirement in paragraph 8, *Hydrogen Sulfide,* of OCS Order No. 2, applicable to all areas of the OCS. This Order implements 30 CFR 250.41, Control of wells.

Background

Section 5.2 of USGS Standard GSS–OCS–1 provides:

Personnel Safety and Protection. All personnel shall undergo an eardrum examination before assignment to H_2S prone areas. Personnel with perforated eardrums shall be prohibited from working in an H_2S environment.

USGS has received medical data to support the contention that the requirements are medically and scientifically unwarranted, they do not improve the health or safety protection of personnel, they are expensive and burdensome to implement, and they are not necessary. These data are available for public inspection at the locations listed under "ADDRESSES."

When the standard was orignally developed, there was a divergence of opinion on the need for these requirements. After considering the available evidence, the USGS adopted these requirements. This decision was based on the opinions of recognized authorities who believed that a person, while using a breathing apparatus in a H_2S environment, could inhale the toxic gas through a perforated eardrum and the eustachian tube.

Subsection 5.2.5, paragraph (a), does not specify a type of protective breathing apparatus. Now, the USGS has received data which indicate that only pressure-demand-type respirators are adequate protection for personnel working in H_2S or sulfur dioxide (SO_2) environments.

This conclusion is based mainly on requirements of the 1980 Edition of the American National Standards Institute (ANSI), Standard Z88.2, and on recommendations of the National Institute for Occupational Safety and Health (NIOSH).

The ANSI Standard Z88.2 indicates that only pressure-demand-type respirators are permitted in "atmospheres immediately dangerous to life or health." NIOSH advises: "For emergency use, or in unknown concentrations or concentrations in excess of 70 mg/in^3 (50 ppm) only a full facepiece positive pressure self contained breathing apparatus is adequate."

As a result of our review of the data recently presented and information contained in our files, the USGS has reconsidered these requirements and proposes to amend section 5.2.

Request for Comments

In order to obtain full discussion of the issues, interested parties are requested to submit comments on the proposed amendment. Comments will be accepted through February 26, 1982. Comments should be submitted to David A. Schuenke, Chief, Branch of Offshore Rules and Procedures, at the address indicated in the preamble of this document under "ADDRESSES."

Drafting Information

The primary author of the proposed amendment is Mario Rivero, OCS Orders and Standards Section, Branch of Offshore Rules and Procedures, Conservation Division, U.S. Geological Survey, 640 National Center, Reston, Virginia 22092, (703) 860–7395; FTS 928–7395.

Statement of Significance

The Department of the Interior has determined that the proposed amendment to the standard does not constitute a major Federal action significantly affecting the quality of the human environment and, therefore, preparation of an environmental impact statement is not required. The Department has also determined that the issuance of the proposed amendment is not a major rule and does not require a regulatory impact analysis under Executive Order 12291.

The Department of the Interior has determined that this document does not have a significant economic effect on a substantial number of small entities and does not require a small entity flexibility analysis under the Regulatory Flexibility Act.

Dated: October 13, 1981.

Robert L. Rioux,

Deputy Chief, Conservation Division—Offshore Minerals Regulation.

For the reasons set out in the preamble, section 5.2 of the USGS Standard GSS–OCS–1 is proposed to be amended as follows:

1. In section 5.2, the introductory paragraph is removed.

2. In subsection 5.2.5, paragraph (a) is revised to read as follows:

5.2.5 *Personnel Protective Equipment.*

(a) All personnel on a drilling facility or aboard marine vessels serving the facility in H_2S and SO_2 environments shall be equipped with a pressure-demand-type respirator.

Accessory equipment, such as voice-transmission devices and spectacle kits, shall be made available, as needed.

The design, selection, use, and maintenance of the pressure-demand-type respirator used in a H_2S or SO_2 environment shall conform to—

(1) Title 29 of the Code of Federal Regulations, Subpart I—Personnel Protective Equipment, § 1910.132, *General requirements,* and § 1910.134, *Respiratory protection;* and

(2) Title 30 of the Code of Federal Regulations, Subpart A—General Provisions, § 11.2–1, *Selection, fit, use, and maintenance of approved respirators,* and Subpart H—Self-Contained Breathing Apparatus, §§ 11.70 through 11.83–19; and

(3) American National Standards Institute (ANSI), Inc., Standard ANSI Z88.2–1980, "Practice for Respiratory Protection."

BILLING CODE 4310–31–M

INTERSTATE COMMERCE COMMISSION

Commission Press Release Summary

AGENCY: Interstate Commerce Commission.

ACTION: Notice of proposed procedural change.

SUMMARY: In an effort to cut agency costs, the Commission is proposing to restrict press box service and advise-of-all-proceedings participation. A daily Press Release Summary will be available, by subscription, to anyone desiring the service.

DATES: Proposed Effective Date: March 1, 1982. Comments: Due January 18, 1982. Comments must be in writing.

ADDRESS: Press Release Summary, Room 2215, Office of the Secretary, Interstate Commerce Commission, Washington, D.C. 20423.

FOR FURTHER INFORMATION CONTACT: Kathleen King, 202–275–0956; Edward Fernandez, 202–275–7591.

SUPPLEMENTARY INFORMATION: For many years the ICC has maintained some 240 free private boxes for the Press and ICC constituency based in Washington. A single copy of all ICC decisions and other releases is placed in these boxes each day for pick up on or after the official 12:30 p.m. release time together with an index of the items released. Maintenance of the press boxes costs the Commission in excess of $590,000 annually.

In an effort to reduce costs and still provide service to local people, as well as people outside of the Washington area, the Commission is proposing to discontinue press box service to all *except* the working press, and replace it with a summary publication (Press Release Summary) of *all* items released each day. The Press Release Summary will categorize releases by decisional body, by type, e.g. certificates, permits

and licenses, restriction removals, name changes, revocation actions, etc. Within this categorization, the docket number, case title, decided date and Commission action taken will be delineated. (See sample page at the end of this notice.) The Press Release Summary will run from 6 to 10 pages each day and will be released at 12:30 p.m., the same time all daily decisions and notices are released from the Secretary's Office.

The Press Release Summary service will be available through the mail on an annual subscription basis for approximately $160.00. The actual amount charged will be dependent upon the number of subscribers. Consequently, we are asking those who intend to subscribe to send a letter to: Press Release Summary, Room 2215, Office of the Secretary, Interstate Commerce Commission, Washington, D.C. 20423.

A sample copy of the summary will be sent on request by calling 800-424-5403 and stating the publication, your name and address.

Subscribers to the summary interested in receiving the full text of a particular item appearing in the summary will be permitted to call a toll free number and a copy will be mailed to them, or they can obtain a copy from the Distribution Staff in Room 2227 of the Commission's Washington office. A copy of the Press Release Summary, together with copies of all decisions, will continue to be made available for review in the Press Room at ICC's Washington headquarters on the day of release.

Discontinuance of the press box service will not affect parties of record who will continue to be served all notices and decisions in a particular case. We are, however, proposing to stop advise-of-all-proceedings mailings except in Abandonment (AB), Ex Parte (EP), Ex Parte Motor (EPM), and Formal Docket (NOR and NOM) proceedings. To be placed on advise-of-all-proceedings status for such cases a letter delineating the party's interest must be sent to the Office of the Secretary.

Decided: December 18, 1981.

By the Commission, Chairman Taylor, Vice Chairman Clapp, Commissioners Gresham and Gilliam.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035-01-M

[Finance Docket No. 28691 (Sub-No. 4) and Finance Docket No. 29799]

Morristown and Erie Railroad Co.; Reorganization Plans and Purchase Application

AGENCY: Interstate Commerce Commission.

ACTION: Notice of reorganization plans and acceptance of purchase application.

SUMMARY: The Morristown and Erie Railroad Company (M&E) is now in reorganization in a proceeding pending before the District Court for the District of New Jersey. The Court has forwarded to the Commission two plans of Reorganization, and requested that the Commission comment on the merits of each plan. Because one of the two plans is based on the sale and continued rail service of all assets of the M&E, the Commission is also considering a purchase proposal from the proponents of that plan under Section 17(b) of the Milwaukee Railroad Restructuring Act. Therefore the Commission is instituting a consolidated proceeding in which interested parties can submit comments opposing or favoring either reorganization plan and the purchase plan. The Commission has requested the Court to allow it to submit its report on the reorganization and purchase plans on or before March 10, 1982.

DATES: (1) Verified statements supporting or opposing the reorganization plans or the purchase application are due on January 15, 1982.

(2) Verified statements from the United States Secretary of Transportation and the Attorney General of the United States are due on February 1, 1982.

(3) Verified replies are due on February 8, 1982.

ADDRESSES: An original and 10 copies of all statements should refer to Finance Docket No. 28691 (Sub-No. 4) and Finance Docket No. 29799 and be sent to: Section of Finance, Room 5414, Interstate Commerce Commission, Washington, D.C. 20423.

Copies of any statement should also be sent to:

(1) Representative for Mandelbaum and Mandelbaum: Ravin & Kesselhaut, 80 Main Street, West Orange, NJ 07052.

(2) Representative for the Friedland Group: Pitney, Hardin, Kipp, Szuch, 163 Madison Avenue, Morristown, NJ 07960.

(3) Representative for the trustee: Crummy, Del Deo, Dolan & Purcell, Attorneys for the Trustee, Gateway I, Newark, NJ 07102.

(4) Clerk, United States District Court for the District of New Jersey [1], Newark, NJ 07102.

FOR FURTHER INFORMATION CONTACT: Ernest B. Abbott: (202) 275–3002.

SUPPLEMENTARY INFORMATION: (1) *Reorganization Plans.* The Morristown and Erie Railroad Company (M&E) conducts operations over a line which extends approximately 16 miles from Morristown, NJ to Great Notch, NJ. The M&E has been in reorganization under Section 77 of the Bankruptcy Act since January 9, 1978. The District Court for the District of New Jersey has forwarded to the Commission for evaluation under Section 77 of the former Bankruptcy Act two plans of reorganization for the M&E.

The first plan, submitted by the firm of Mandelbaum and Mandelbaum, provides for the reorganization of the M&E as a rail carrier, cancellation of its existing shares, and transfer of all shares in the reorganized railroad to Mendelbaum interests in consideration of $175,000 cash. Under the plan certain classes of creditors will receive cash; remaining classes of creditors will receive a new series of non-interest-bearing notes totaling $1,308,000 payable over ten years.

Under the second plan, submitted by the Trustee and the Friedland Group [2] for a newly formed corporation, the Morristown and Erie Railway, Inc. (MER), MER would purchase the principal assets of the M&E for the sum of $500,000.00 cash. M&E would then be liquidated.

(2) *Purchase Application.* On December 10, 1981, the Friedland group also submitted an application under Section 17(b) of the Milwaukee Railroad Restructuring Act for acquisition of assets of the M&E by MER.[3] The application is complete under the Commission's regulations at 49 CFR 1111.20–.25 governing the contents of an application in a minor transaction and the Commission is hereby accepting the application.

(3) *Procedures.* Regulations governing this proceeding are located at 49 CFR 1111.25 and 49 CFR Part 1100. Persons wishing to file verified statements concerning the reorganization plans or the proposed purchase can obtain copies of the plans and purchase application from the respective representatives listed above. All plans are also available for public inspection at the Commission.

It is ordered:

1. The application is accepted for consideration;

2. Parties shall comply with the procedural requirements stated above;

3. This decision shall be effective on December 22, 1981.

By the Commission, Heber P. Hardy, Director, Office of Proceedings.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035–01–M

[1] Statements filed with the Court should refer to docket number B 77–3078.

[2] Benjamin J. Friedland, Edward J. Wikzynski, and Wesley R. Webb.

[3] Under the Mandelbaum plan, no separate Commission approval is required for the purchase of all stock in the reorganized M&E, *provided* the purchasers, prior to the transaction, are not carriers and do not control carriers within the meaning of the Revised Interstate Commerce Act. *See* 49 U.S.C. 11343.

[No. 38692]

Shippers Committee OT–5; Review of OT–5 Agreements

AGENCY: Interstate Commerce Commission.

ACTION: Notice of denial of petition for rulemaking.

SUMMARY: The Commission has denied a request for a rulemaking (1) to review the practices of rail carriers with respect to privately owned or leased covered hopper cars, and (2) either (a) to eliminate rail regulation of privately owned covered hopper cars, except with respect to mechanical and safety qualifications, or (b) to require a "sharing formula" covering the placement of carrier and private cars during a period of car surplus. This notice will not be printed in its entirety, but copies of the full decision may be obtained from the address listed below.

Copies: The complete notice is available upon request by called 800–424–5403 or by writing to: The Office of the Secretary, Interstate Commerce Commission, 12th & Constitution Avenue, N.W., Washington, DC 20423.

Dated: December 17, 1981.

By the Commission, Chairman Taylor, Vice Chairman Clapp, Commissioners Gresham and Gilliam.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035–01–M

Motor Carrier Permanent Authority Republications of Grants of Operating Rights Authority Prior to Certification.

The following grants of operating rights authorities are republished by order of the Commission to indicate a broadened grant of authority over that previously noticed in the **Federal Register.**

An original and one copy of an appropriate petition for leave to intervene, setting forth the precise manner in which petitioner has been prejudiced, must be filed with the Commission within 30 days after the date of this **Federal Register** notice. Such pleadings shall comply with 49 CFR 1100.247 addressing specifically the issue(s) indicated as the purpose for republication. Special Rule 247 was published in the **Federal Register** of July 3, 1980, at 45 FR 45539.

By the Commission, Review Board Number 3, Members Krock, Joyce, and Dowell.

Agatha L. Mergenovich,

Secretary.

MC 156793 (Republication) filed June 25, 1981, published in the **Federal Register** of July 16, 1981, and republished this issue: Applicant: EAST COAST CARTAGE, INC., 10 Otis Street, Westboro, MA 01581. Representative: Harold R. Rudnick (same address as applicant). A decision of the Commission, *Review Board 3*, decided November 18, 1981, and served December 7, 1981, finds that the present and future public convenience and necessity require operations by applicant in interstate or foreign commerce, over irregular routes, as a *common carrier*, by motor vehicle, transporting *such commodities* as are dealt in by grocery and food business houses, between points in Maine, New Hampshire, Connecticut, Vermont, Rhode Island, Massachusetts, New York, Pennsylvania, New Jersey, Delaware, Maryland, Ohio, Virginia, West Virginia, South Carolina, North Carolina, Georgia, and Florida; that applicant is fit, willing, and able properly to perform the granted service and to conform to the requirements of Title 49, Subtitle IV, U. S. Code, and the Commission's regulations. The purpose of this republication is to broaden the scope of authority.

BILLING CODE 7035-01-M

Motor Carrier Temporary Authority Application; Important Notice

The following are notices of filing of applications for temporary authority under Section 10928 of the Interstate Commerce Act and in accordance with the provisions of 49 CFR 1131.3. These rules provide that an original and two (2) copies of protests to an application may be filed with the Regional Office named in the **Federal Register** publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the **Federal Register**. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the ICC Regional Office to which protests are to be transmitted.

Note.—All applications seek authority to operate as a common carrier over irregular routes except as otherwise noted.

Motor Carriers of Property

Notice No. F-176

The following applications were filed in region I: Send protests to: Interstate Commerce Commission, Regional Authority Center; 150 Causeway Street, Room 501, Boston, MA 02114.

MC 133858 (Sub-11-TA), filed December 10, 1981. Applicant: THE COTTER GARAGE CORPORATION, 86 Granby Street, Bloomfield, CT 06002. Representative: James T. Graham, One Constitution Plaza, 18th Floor, Hartford, CT 06103. *Contract carrier:* irregular routes: *Passengers with their baggage and newspapers in eight-passenger vehicles* from Hartford, East Hartford and Farmington, CT to New York City, NY and return, under continuing contract(s) with United Technologies Corp., Hartford, CT and Aetna Life and Casualty Co., Hartford, CT.
